TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s,

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

London: John Churchill; and may be had of all booksellers

EXTRAORDINARY DISCOVERY—NEW THEORY.
(Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

EDUCATION, International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

DR CURTIS'S MEDICAL WORK. "MANHOOD
An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three, and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

NEW THEATRE ROYAL ADELPHI.

Sole Proprietor and Manager, Mr B. Webster.
110th, and last five nights of the great Sensation Drama of THE DEAD HEART.

MR AND MRS GERMAN REED,

with Mr JOHN PARRY, will give their entirely New and Original Entertainment, Our Card Basket and the Two Rival Companies, every evening (except Saturday) at eight o'clock; Thursday and Saturday at three o'clock, at the Royal Gallery of Illustration, 14 Regent street. Mr German Reed will give his musical recital entitled "A Day with the Hounds." Mrs German Reed will sing her new and original song, "I never does nothing at all." Mr John Parry will sing his new and original song, "Paterfamilias; or, A Treat for the Juveniles," with Pictorial Illustrations. Unreserved Seats, 1s, 2s; Stalls, 3s; Stall Chairs, 5s; can be secured at the Gallery in advance, and at Messrs Cramer, Beale, and Co., 201 Regent street.

Last Four Morning Representations:—August 22nd, 24th, 29th, and 31st at 3 o'clock.

MERCANTILE SHIPPING

AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and Co., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, London, E.C.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER

FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers thro h-out the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

CURE OF CONSTANT HEADACHE,

HEAVINESS, and DIMNESS of SIGHT, by Dr HUGO'S MEDICAL ATOMS.—Sir,—For more than ten years I was subject to constant pains in my head, so that at times I could hardly hold it up, my sight was dim, and my spirits always depressed, so that I felt life a misery; and having taken much medical advice and medicine, I had began quite to despair, when a friend gave me a packet of your glorious medicine. After three doses, I felt quiet like another man, and after a fortnight, I entirely discontinued the medicine, and now I have not taken any for three months, and feel as well as ever I did in my life, &c. (Signed) JAMES HEWET, Thames street, Kingston, April 4, 1861.—Dr Hugo's Medical Atoms purify the blood and relieve the head, heart, and stomach. Their action is immediate, and they are small, and agreeable to the taste, so that they may be swallowed whole, or eaten as confectionery. Price 1s 1½d, 2s 9d, and 4s 6d. Sold by all druggists.

HOLLOWAY'S OINTMENT AND

PILLS.—Disease prevented or cured.—Scorbutic humours so often appear during childhood that it behoves every mother and nurse to know how to eradicate them without danger or delay. In whatever way these constitutional taints display themselves, they may be surely met, and successfully treated, by using Holloway's noble remedies according to the instructions folded round each packet. Their employment is attended by no risk; by their means this formidable disease may be arrested and extirpated in its early progress before it has reached the vital organs. When once the scorbutic poison is overcome, the soundest health may be attained and preserved by occasionally using the same antidotes and paying proper attention to diet and ventilation.

PNEUMATIC DESPATCH

COMPANY (Limited).
TRIAL EXPERIMENTS AT BATTERSEA.

The Tube will be in operation on TUESDAY next, 20th inst., between 2 and 5 o'clock, being the last day until further notice. Cards of admission may be obtained at this office by written application.—By order,
T. G. MARGARY, Secretary.
6 Victoria street, Westminster Abbey, Aug. 15, 1861.

LOANS ON DEBENTURES.—

The London, Chatham, and Dover Railway Company are prepared to receive Tenders for Loans of £100 and upwards, on Mortgage of the Metropolitan Extension Lines, authorised by Act of Parliament, to last for three or five years, at 6 per cent. per annum.—By order,
G. F. HOLROYD, Secretary.
Offices, 3 Victoria street.

EAST INDIAN RAILWAY

COMPANY.—The Directors of the East Indian Railway Company are prepared to receive Applications for Debentures at par, bearing interest at the rate of 5 per cent. per annum, guaranteed by the Secretary of State for India in Council.

Forms of application and full particulars may be obtained at the offices of the Company.—By order of the Board,
D. I NOAD, Secretary.
East Indian Railway House, Alderman's walk,
New Broad street, London, E.C., July 27, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,
JAMES WALKER, Managing Director.
Company's offices, No. 33 New Broad street,
London, E.C., April 30, 1861.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE

ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, *d saving 25 per cent.* of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

TRADE B/P MARK.

BROWN AND POLSON'S

PATENT CORN FLOUR,

In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon sale of articles similar in appearance, to encourage the being recommended in place of Patent Corn Flour, a support which practice unscrupulous announcements *are* made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion *indisputably confirmed* by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

KEATING'S PERSIAN INSECT

DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension, as it has no qualities deleterious to animal life.

Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14 or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE,

or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

BLAIR'S GOUT AND RHEUMATIC

PILLS.—Price 1s 1½d and 2s 9d per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

TRELOAR'S CORK FLOOR CLOTH,
OR KAMPTULICON.
Cocoa-Nut Fibre, *Manilla*, and China
MATTINGS AND MATS.
T. TRELOAR, MANUFACTURER, 42 LUDGATE HILL, LONDON.

KAMPTULICON, OR
INDIA-RUBBER & CORK FLOOR CLOTH;
As laid at the Houses of Parliament, British Museum, Bank of England, and numerous Public and Private Offices.

Impervious to wet, indestructible by damp, soft to the tread, and warm to the feet. Far superior to every other material ever invented for the Covering of Floors, &c. Invaluable on Stone Floors.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

THE NEW SPIRIT ACT.—

By the 24 and 25 Vict., cap. 21, wine merchants are now allowed to sell a Single Bottle of Spirits. To carry out this boon to the public, J. J. R. is prepared to forward one dozen or half-dozen cases of assorted spirits, according to order. Brandy, 4s 6d; Whisky, 3s 6d; Rum, 3s; Gin, 2s 6d; Geneva, 2s 10d per bottle. Terms cash.

J. J. ROURKE, Importer, 31 Eastcheap, City, London.

ALLSOPP'S PALE OR BITTER ALE.—

Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

MESSRS SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; *postage, 6d.*

WHITE, MANUFACTURER, 228 Piccadilly, London.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MANCHESTER MEETING, 4th to 11th September, 1861.

Reception Room, the Portico, Manchester.

PRESIDENT.

WILLIAM FAIRBAIRN, Esq., LL.D., F.R.S., &c.

The objects of the Association are:—"To give a stronger impulse and more systematic direction to scientific inquiry; to promote the intercourse of those who cultivate science in different parts of the British empire with one another and with foreign philosophers; to obtain a more general attention to the objects of science and a removal of disadvantages of a public kind which impede its progress."

GENERAL ARRANGEMENTS.

Wednesday, 4th September.—Opening Meeting, and President's Address, at eight p.m., in the Free-trade Hall.

Sectional Meetings daily, as usual, from the 5th to the 10th inclusive.

Wednesday, 11th September.—Concluding General Meeting, in the Free-trade Hall.

Thursday, 5th September.—Soiree [Microscopes], in the Free-trade Hall.

Friday, 6th September.—Evening Discourse.

Saturday, 7th September.—Soiree [Telegraphs], in the Free-trade Hall.

Monday, 9th September.—Evening Discourse.

Tuesday, 10th September.—Soiree [Field Naturalists' Society], in the Free-trade Hall.

On Thursday, the 12th of September—Important Excursions.

Gentlemen desirous of attending the meeting may make their choice of being proposed as life members, paying £10 as a composition; or annual subscribers, paying an admission fee of £1, and (additional) £1 annually; or associates for the meeting, paying £1.

Ladies may become members on the same terms as gentlemen; or ladies' tickets (transferable to ladies only) may be obtained in the Reception Room, by members, on payment of £1.

Life members receive gratuitously the reports of the Association which may be published after the date of payment.

Annual subscribers receive gratuitously the report of the Association for the year of their subscription, and for every following year of subscription without intermission. Associates for the meeting are entitled to the report of the meeting, at two-thirds of the publication price.

In order to facilitate arrangements for the meeting, it is desirable that application for tickets should be made as early as possible.

Forms of proposal will be supplied in the Reception Room during the meeting; or the names of candidates for admission may be transmitted to the Local Secretaries.

As the funds which the Association has to expend for its scientific objects consist only of the payments made by its members and associates, it is particularly desirable that every opportunity should be taken of increasing their number.

Compositions and subscriptions of new members or associates will be received by the Local Secretaries until the commencement of the meeting; afterwards, as well as the subscriptions and arrears of former members, by the Local Treasurer.

For information respecting the local arrangements, application may be made by letter, addressed to any of the Local Secretaries for the meeting, at the "Portico, Manchester."

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,
} Local Secretaries for the Meeting.

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MEETING in MANCHESTER, 4th to 11th September, 1861.

RAILWAY PASSES.

Reception Room, Portico, Manchester, August, 1861.

The Executive Committee have arranged with the undermentioned Railway and Steam-packet Companies to issue to gentlemen and ladies attending the meeting in September, as members or associates, Passes entitling the bearer to a ticket to Manchester and back, for one fare, between the 2nd and 14th of September:—

Lancashire and Yorkshire Railway Company.
London and North-Western Railway Company.
Manchester, Sheffield, and Lincolnshire Railway Company.
Great Northern Railway Company.
North-Eastern Railway Company.
Midland Railway Company.
Caledonian Railway Company.
Great Western Railway Company.
City of Dublin Steam-packet Company (via Holyhead).
North Lancashire Steam Navigation Company (to Fleetwood).
Belfast Steamship Company (to Liverpool).
Glasgow and Liverpool Royal Mail Steam-packet Company.

Application for these passes must be made (the sooner the better) to Local Secretaries, B. A., Portico, Manchester, stating the names of those who will use them; and if any are not yet members or associates, their full names and addresses, and the particular class of membership desired.

The pass cards will have to be exchanged at the railway or packet office for the Company's special ticket.

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,
} Local Secretaries for the Meeting.

See other advertisements.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

WESTERN LIFE ASSURANCE and ANNUITY SOCIETY,
3 Parliament street, London, S.W.
Established A.D. 1842.

DIRECTORS.

Henry Edgeworth Bicknell, Esq., Upper Bedford place, Russell square.
Thomas Somers Cocks, Esq., J.P., Charing cross; Hereford street, Park lane; and Thames Bank, Marlow, Bucks.
George Henry Drew, Esq., Hibernia chambers, London bridge, and Caterham, Surrey.
William Freeman, Esq., Millbank street, Westminster
Joseph Henry Goodhart, Esq., J.P., 3, 4 and 5 Ratcliffe highway, and Manor House, Upper Tooting, Surrey.
Edmund Lucas, Esq., Millbank street, Westminster, and Wandsworth, Surrey,
Frederick Boyd Marson, Esq., Brunswick place, Regent's park.
James Lys Seager, Esq., Millbank row, Westminster, and Carroun House Surrey.
John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

	£ s d		£ s d
20	1 14 2	40	2 14 5
25	1 18 6	45	3 2 5
30	2 2 9	50	3 17 0
35	2 8 0	55	4 10 4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

THE SCOTTISH WIDOWS' FUND and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,
Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3,033,649
3. Sums assured and bonuses existing	10,886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Bread street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

New Books.

MR DU CHAILLU'S TRAVELS.
Tenth Thousand, with Illustrations, 8vo, 21s,

ADVENTURES IN EQUATORIAL AFRICA, with Accounts of the Cannibals and other Savage Tribes, and of the Chase of the Gorilla, the Nest-Building Ape, &c.

By PAUL B. DU CHAILLU.

"This extraordinary production. We must go back to the voyages of La Perouse and Captain Cook, and almost to the days of wonder which followed the track of Columbus, for novelties of equal significance to the age of their discovery. M. du Chaillu has struck into the very spine of Africa, and has lifted the veil of the torrid zone from its Western rivers, swamps, and forests."—The TIMES.

"M. du Chaillu's narrative will not disappoint the expectations which it has excited. Its literary merits are considerable, for it is clear, lively, and judiciously pruned of unimportant details. His explorations were in no degree exempt from the hardships and dangers which are the condition of African travel."—SATURDAY REVIEW.

John Murray, Albemarle street.

Mr MOTLEY'S NEW HISTORICAL WORK.
Fourth thousand, with Portraits, 2 Vols., 8vo, 30s,

HISTORY OF THE UNITED NETHERLANDS: from the Death of William the Silent to the Synod of Dort: with a full view of the English-Dutch struggle against Spain: and of the origin and destruction of the Spanish Armada.

By J. LOTHROP MOTLEY,
Author of the "Rise of the Dutch Republic."

"We must especially commend the hearty English spirit in which the book is written, and fertile as the present age has been in historical works of the highest merit, none of them can be ranked above these volumes in the grand qualities of interest, accuracy, and truth."—EDINBURGH REVIEW.

"Mr Motley's work must be read to appreciate the vast and conscientious industry which he has bestowed upon it. His delineations are true and lifelike. Diligent and painstaking as the humblest chronicler, he has availed himself of many sources of information which have not been made use of by any previous historical writer."—QUARTERLY REVIEW.

John Murray, Albemarle street.

The next Term will commence on Thursday, the 19th of September.

EAGLE INSURANCE COMPANY.

The ANNUAL GENERAL MEETING of this Company was held at Radley's Hotel, on Friday, 9th August, 1861, THOMAS BODDINGTON, Esq., in the Chair,

And the following Report, for the year ending 30th June, 1861, was read and unanimously adopted:—

The Directors have again to submit their Annual Report to the proprietors, and they commence it with the following abstract from the Company's books of the surplus fund account:—

SURPLUS FUND ACCOUNT.

Income of the Year ending 30th June, 1861.	£	s.	d.	£	s.	d.
Balance of account June 30, 1860				744,118	19	8
Premiums on new assurances	£19,799	5	7			
Ditto on renewed ditto	280,374	12	1			
	300,173	17	8			
Interest from investments	80,113	1	6			
				380,286	19	2
				1,124,405	18	10

Charge of the Year.	£	s.	d.	£	s.	d.
Dividend to proprietors				10,343	11	6
Claims on decease of lives assured	£232,781	10	3			
Additions to those under participating policies	22,654	13	6			
Policies surrendered	13,100	5	10			
Reassurances, new	3,763	1	9			
Ditto, old	29,244	6	4			
	301,543	17	8			
Commission	10,674	10	11			
Medical fees	920	7	4			
Income tax	3,116	3	2			
Expenses of management	11,261	8	0			
				327,516	1	1
Balance of account, June 30, 1861				786,546	6	3
				1,124,405	18	10

Examined and approved, THOMAS ALLEN, WILLIAM HENRY SMITH, Jun., } Auditors.

The total income is here shown to be £380,286 19s 2d, and the total outgoing to be £337,859 12s 7d. The difference—viz., £42,427 6s 7d—goes in augmentation of the surplus fund, which now amounts to £786,546 6s 3d.

The premiums on new assurances are £19,799 5s 7d—about £200 in excess of those of the previous year; but the renewals are somewhat less than it was to be expected they would be, a greater number of assurances having run off during the year than usual. The payments on account of reassurances newly effected amount to £3,763 1s 9d.

The realised assets in June, 1860, productive and unproductive, were £1,816,900, after providing for all immediate demands; and this sum has produced in the year £80,113 1s 6d, the rate of interest thus realised being rather more than £4 8s per cent. per annum.

The amount claimed on decease of lives assured is less than that last reported, by about £4,300.

The assets and liabilities on the 30th June, stood as follows:—

BALANCE SHEET.

Liabilities.	£	s.	d.	£	s.	d.
Interest due to proprietors				6,621	15	9
Claims on decease of lives assured and additions thereto unpaid				66,608	4	9
Cash bonus due to policyholders				22,446	5	6
Sundry accounts				5,609	19	8
Value (1857) of sums assured, &c.				4,877,392	16	10
Proprietors' fund	£201,246	9	3			
Surplus fund, as above	786,546	6	3			
				987,792	6	6
				5,456,471	9	0

Assets.	£	s.	d.	£	s.	d.
Amount invested in fixed mortgages				1,138,772	17	6
Ditto decreasing mortgages				154,620	10	3
Ditto reversions				77,577	15	3
Ditto funded securities				329,443	5	10
Ditto temporary securities				35,435	7	7
Current interest on the above investments				29,164	16	0
Cash and bills				31,111	17	0
Advanced on security of the Company's policies, &c.				99,555	16	9
Agents' balances				27,878	19	2
Sundry accounts				14,536	8	7
Value (1857) of assurance premiums				3,518,373	15	1
				5,455,476	9	0

Examined and approved, THOMAS ALLEN, WILLIAM HENRY SMITH, Jun., } Auditors.

This account differs but little from that presented last year. The net assets are, of course, upwards of £42,000 more than they were; and it will be observed that further investments have been made during the year in Government Funds.

As a very full report, both financial and statistical, will have to be made at the next Annual Meeting, the Directors abstain from further observations now. Meanwhile, they are glad to be able to say, there is every indication that the laborious investigation about to be entered upon, will lead to results of a very satisfactory character.

Explanations were given, and complimentary addresses made, by Mr Boddington, Dr. Guy, Mr Seymour Teulon, Mr Nathaniel Gould, Mr Cuthbert, Sir James B. East, Bart., M.P., Mr Joshua Lockwood, and others, and the proceedings terminated.

The Trustees and Directors of the Company are now as follows:—

TRUSTEES.

Lord Bateman.
Robert Cheere, Esq.
Joseph Esdaile, Esq.
Charles Thomas Holcombe, Esq.
Richard Harman Lloyd, Esq.
William James Maxwell, Esq.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

ROYAL HORTICULTURAL SOCIETY.

The Dahlia Show at South Kensington, Wednesday, September 11. Doors open at One o'clock. Tickets, 2s 6d each; on the day, 3s 6d; to be had at the Gardens and at the principal librarians and music sellers.

FIRST-CLASS BUSINESS PURSUITS.—Middle and Upper Schools, Peckham, London, S.E.—There is superior accommodation for a few BOARDERS, in the family of the principal, JOHN YEATS, LL.D.

WANTED, BY A MIDDLE-AGED man of the highest character and a good accountant, a situation in a place of trust (Messenger, Storekeeper, Warehouseman, &c.).—Address W., 100, Blackfriars road, S.

PARTNERSHIP.—THE Advertiser, who has been several years in the East, is desirous of meeting with an influential party with capital, to join him in a Commission Business in Bombay. —For particulars, apply to Messrs Bannatynes and Kirkwood's Writers, 151 West George street, Glasgow.

PARTNERSHIP.—A Gentleman who can command Capital to an extent of from £5,000 to £10,000, may hear of an opportunity of joining a respectable and well-established Mercantile Business in the City of London. It will be quite practicable to arrange that the incoming partner shall take an active share of the management, or otherwise, as may be preferred. References of the most unexceptionable kind will be given and expected. All applications to be by letter (postpaid), directed to A. B., Messrs Desborough, Young, and Desborough, 6 Sise lane, E.C

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. WHOLESALE HOUSES, Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

FRENCH WINE BOTTLES, Soda Water Bottles, Confectioners Bottles, Drug, Dispensing, and Castor Oil Bottles, Wine, Ale, and Porter Bottles, from Stock in London or direct from the Works.—AIRE and CALDER GLASS BOTTLE COMPANY, Castleford; Free Trade Wharf, Ratcliff; and 61 King William street, E.C. The Patent Stoppered Bottles of all kinds

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be eclared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

ROYAL INSURANCE COMPANY

HEAD OFFICES:—29 LOMBARD STREET, LONDON, AND ROYAL INSURANCE BUILDINGS, LIVERPOOL.

Branch Offices:—Manchester, Birmingham, Bristol, Leeds, Dublin, Glasgow, and Edinburgh.

Extracts from the Report for the Year 1860.

"The success of the Company, even in its earliest years, received the marked attention, and elicited the surprised comments of writers best acquainted with the history of Insurance Companies.

"Fire Premiums for 1860 equal the Total Fire Premiums for the Seven Years 1845 to 1851.

"Life Premiums for 1860 exceed the Entire Life Premiums for the Eight Years ending 1852.

"Purchase of Annuities in 1860 largely exceeds the similar receipts for the first Ten Years 1845 to 1854.

"This progress, it is believed, is unsurpassed, considering that it applies to each of the three branches of the business."

FIRE BRANCH.

"The Fire Branch has certainly shown no exhaustion during the year 1860 of that impetus which had previously brought it to a position of the first magnitude among the Insurance Companies of the United Kingdom. The Fire Premiums in 1859 had advanced to thesum of £228,314 7s 3d. In 1860, the amount of Fire Premiums has arrived at a sum of £262,977 19s 11d, showing an increase of £34,663 12s 8d, exceeding the large advance of the preceding year, so that in two years the Fire Revenue of the Company has been enhanced by the enormous sum of £66,829 17s 5d.

"The Parliamentary Report of Returns of Duty paid to Government for the year 1860 exhibits the augmentation of the business in a more prominent way, as it affords the means of comparison with other Companies. The Proprietors will be gratified to learn that the increase of Duty paid by the Royal in the last year is more than double that of any other Company, either London or Provincial, whilst only one of those Companies even approaches to 50 per cent. of the advance of this Company. Our increase actually equals 30 per cent. of the entire increase of the whole of the Metropolitan Offices combined, whilst of the Provincial Offices it forms upwards of 30 per cent. of the total advance of the other 28 offices established out of London."

LIFE BRANCH.

"The Reports of the Company for several years have had invariably to announce a constant periodical expansion of Life Business, the new Policies of each succeeding year showing an advance over the one that had immediately preceded it. A similar result is shown in the year 1860, the Premiums of New Policies, after deducting Guarantees, being £15,079 17s 10d, which is an increase in that item of £1,993 17s 5d above the amount received for the year 1859.

"But even this advance is small when compared with the sudden and remarkable momentum which has been given to this branch of the business in the present year (1861).

"It was not until the commencement of the year that the public seemed to have become fully acquainted with the fact that the Royal Insurance Company had published late in the last year an account of the investigation into the assets and liabilities of its Life Department, under a novel form, and in as plain and intelligible a manner as the abstruseness of the subject admitted, together with the entire statements and valuations necessary for that purpose.

"It is conjectured from the extensive notices of this pamphlet and its accompanying diagrams, which have appeared in the periodicals of the day, that it has largely attracted the attention of vast numbers of persons in all parts of the United Kingdom as well as in other parts of the world. Indeed, a most satisfactory and conclusive evidence that such is the case is afforded by the fact that the sum assured on new policies in the six months to the 3rd June of the present year is actually fifty per cent. in excess of the sum assured in the corresponding months of the year 1860, although the latter amount in itself exceeded the sum assured in any like previous period of time.

"If this success be continued, the Royal Insurance Company would, with respect to the amount of its new business, be at once placed (at least with one or two exceptions) at the head of all the Insurance Companies doing business in this country, and the anticipations of the last report, to the effect that the details of the life business then to be published would form an epoch of the establishment, will have a speedy and a very happy realisation."

SPECIAL ADVANTAGES OF THE LIFE BRANCH.

PROFITS.—Large profits returned every five years to policies then in existence two entire years.

Expenses chiefly borne by the Fire Branch, in order to increase the bonus to be returned.

LIFE BONUSES DECLARED,

Two per cent. per annum on the sum assured; the greatest bonus ever continuously declared by any Company.

SECURITY FOR BOTH FIRE AND LIFE BRANCHES.

Capital, Two Millions sterling.

Accumulated funds in hand exceeds £800,000.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary.

MERCANTILE INSURANCES.

NORWICH UNION FIRE

INSURANCE SOCIETY.

All policies effected with this office are entitled to participate in the Bonus periodically declared.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £31,332 2s 9d, and the amount insured on farming stock £9,988,368, thus placing the office Third in order of magnitude among the Insurance Companies of the United Kingdom.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich; and 6 Crescent, New Bridge street, Blackfriars, E.C.

DENT, CHRONOMETER,

Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

THE COMMERCIAL UNION FIRE

INSURANCE COMPANY.

The Directors have the pleasure to inform the Subscribers for shares in this Company, that a definite offer has been made to them by one of the most influential old-established Insurance Offices for an amalgamation, upon terms which would give the Shareholders in this Company an immediate and highly remunerative dividend. The proposal emanates from a Company who agree with the Directors of the Commercial Union in the inexpediency of the late serious changes of rates, and the impossibility of maintaining them. The Directors will not complete any arrangements without the sanction of a meeting of the Subscribers to this Company.

HENRY TROWER, Deputy-Chairman.

HENRY W. PEEK, Chairman.

LONDON LIFE ASSOCIATION,

81 King William street, E.C. Instituted 1806.

PRESIDENT—Charles Franks, Esq.

VICE-PRESIDENT—John Benjamin Heath, Esq.

TRUSTEES.

Francis H. Mitchell, Esq. | Robert Hanbury, Esq.
Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year and appropriated solely to a reduction of the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 73½ per cent., whereby each £10 of annual premium will be reduced to £2 13s.

This Society has paid in claims more than £4,150,000.

And has policies now in force amounting to £6,450,000.

For the payment of which it possesses a capital exceeding £2,750,000.

And a gross income from premiums and interest of more than £340,000.

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents, and allows no commission; nevertheless the new assurances effected in the last financial year amounted to £287,240, and the new annual premiums to £10,567.

EDWARD DOCKER, Sec.

WESTERN LIFE ASSURANCE

and ANNUITY SOCIETY,

3 Parliament street, London, S.W.

Established A.D. 1842.

DIRECTORS.

Henry Edgeworth Bicknell, Esq., Upper Bedford place, Russell square.
Thomas Somers Cocks, Esq., J.P., Charing cross; Hereford street, Park lane; and Thames Bank, Marlow, Bucks.
George Henry Drew, Esq., Hibernia chambers, London bridge, and Caterham, Surrey.
William Freeman, Esq., Millbank street, Westminster
Joseph Henry Goodhart, Esq., J.P., 3, 4 and 5 Ratcliffe highway, and Manor House, Upper Tooting, Surrey.
Edmund Lucas, Esq., Millbank street, Westminster, and Wandsworth, Surrey.
Frederick Boyd Marson, Esq., Brunswick place, Regent's park.
James Lys Seager, Esq., Millbank row, Westminster, and Carroun House Surrey.
John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

	£ s. d.		£ s. d.
20	1 14 2	40	2 14 5
25	1 18 6	45	3 2 5
30	2 2 9	50	3 17 0
35	2 8 0	55	4 10 4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

THE SCOTTISH WIDOWS' FUND

and LIFE ASSURANCE SOCIETY

is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE,

Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3 033,049
3. Sums assured and bonuses existing	10,886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

The Political Economist.

AT WHAT POINT WILL THE REDUCTION IN THE VALUE OF MONEY CEASE?

THE state of the money market during the last few weeks justifies an observation which we made at the commencement of them. *In certain states of the market*—in such a state as we now see—the rate of interest in the outer market rules the Bank rate, instead of (as is commonly believed) the Bank rate almost uncontrollably ruling the outer rate. The bill-brokers *will* have a certain number of bills because they *must*. They pay highly for the sums in their care, and they must employ them,—if not at 5 per cent, then at 4½, if not at 4½ then at 4¼, and so on. It is impossible for the Bank of England, which is under the pressure of no similar necessity, to contend with competitors who are obliged to employ their funds by the plain certainty of a serious loss if they do not contrive to do so. By a sure consequence of the fundamental rules of trade, those who want bills most will have most bills; and the power of the Bank of England is, in the present state of the money market, strictly limited by the competition of opponents who are more eager in the employment of money than itself.

But in such states of the market, what is the duty of the Bank of England? Is it to go down with the market step by step? Is it to pause at some rate, or if so, at what rate? Hardly any one will contend that the Bank should keep its rate at such a high point as would practically prevent its sharing in the business of the discount market. The two rules that have been most prominently inculcated on the Bank by the best authorities are:—1st, that they should follow in their charges the natural rate of interest as determined by the daily relations of supply and demand; 2ndly, that they should look to the interest of their own proprietors, which they can perceive, instead of following uncertain theories of national advantage, which depend on questions too large and too mixed to be usefully debated at a board of merchants and traders. But if the Bank kept out of the discount market by an artificially high rate, it would violate both maxims. It would impair the profits of the proprietors by neglecting remunerative business: it would be maintaining, as far as its own funds are concerned, a high value of money when the natural relations of the market dictated a low value.

Yet at what point is the reduction to stop? We say at the natural point. At some time sooner or later the market rate will certainly show a tendency to stop, and then the Bank should stop. Until then—until by actual trial this precise point has been ascertained—the Bank should continue to diminish their rate; and when the moment of cessation in the outer market comes, they too should cease, and should, if necessary, begin to rise again.

One of two causes must within a reasonable time intervene to arrest the gradual decline in the value of money. First, the trade of the country will before long revive. To some persons it seems absurd in the face of the large figures of our export and import trade to speak of trade as stagnant. Those figures, they say, show but little sign of it—rather, on the contrary, tend to disprove it. We have often before analysed the precise extent to which this is true, and we need not now recur to the results,—our immediate purpose is different. We say that even if our foreign trade, both of export and import, were undiminished, there are two other mercantile causes which would tend to diminish the value of money just now as compared with former times.

First. The absolute amount of trade carried on by this country is only one element in determining the supply and demand of loanable capital. Trade regulates the demand for capital, but it does not regulate the supply. That supply is determined by quite different causes. Every year England saves something; in good years it saves much; in comparatively bad years it saves little; but in all it saves something. Last year, undoubtedly, our savings were less than usual,—much less probably; for the disastrous effects of a deficient harvest permeate through the nation far more generally than those of any other unfavourable cause. Yet still, if we take the country as a whole, the accumulations were doubtless greater than the losses: in spite of every unfavourable circumstance the deposits of the London Joint Stock Banks materially increased in the course of the year. *These savings of capital are, therefore, pressing on the market.* Even though our foreign trade were precisely the same, yet still the capital seeking employment in that trade would be more. Though the debit side, so to speak, of the account was the same, the credit side would be different, and naturally, therefore, there would be an unoccupied surplus of capital even if the external commerce as shown by the Board of Trade tables presented no diminution.

Secondly. The home trade of the country is not so good as it was. The dividends of our great railway companies show this; they have almost all had to reduce the income of their proprietors. And though much of this was certainly caused by the unfavourable weather of last winter and the augmented outlay which it occasioned, yet still there is ample evidence in the reports that, under a brisk and prosperous state of the home trade, the traffic receipts would have been greater than they were.

Some time or other,—how soon we do not venture to predict, and we are not at this moment concerned in predicting,—the trade of the country, both foreign and domestic, will revive so far as to provide for the augmented capital of the country. Experience shows that the inherent energy and mercantile capacity of the industrial classes will soon absorb any probable accumulation of resources. For a moment they may be at fault: they may be harassed by the untoward confusion in America—an anomalous and perplexing result, to which there is no guiding precedent and scarcely an approximate analogy in the previous history of the world. But, in the long run, trading sagacity and trading

industry will triumph. Whatever money they can obtain, that money they will employ.

When this event shall happen, when the natural augmentation of trade has outstripped the natural accumulation of uninvested capital, then the fall in the rate of interest will cease at once. The producing cause will be no longer in action, and the Bank will not only be justified, but be bound to pause likewise, in its course of reduction.

And it may be compelled to pause by a second cause. In another way the fall in the market rate may be arrested. The effect of the recent high rate of interest was to attract much capital here from countries in which that rate was much lower. Now that the rate of interest is approaching to the rate of other countries, it is very possible that we shall part with much of this money, and it is very improbable that we shall retain the whole of it. For the most part it is invested in bills which will sooner or later become due, and when they do so, the foreign owners of the funds employed will have to begin a new transaction in which they will be determined by the respective rates of interest of this country and of foreign countries, and by the other circumstances of the particular moment.

If, therefore, a foreign demand should spring up for the repayment of the capital which we formerly obtained from the Continent by offering very high rates of interest, the rate of interest might again move upwards. The money market is very sensitive and delicate; a little too much will send it rapidly down; a very slight deficiency will cause it to rise just as rapidly. At present the foreign exchanges are extremely favourable to this country, and it is very probable that we shall see more than one reduction in the Bank rate of discount. But it is probable also that the low rate of interest will produce the reverse effect of the recent high rate,—that we shall not retain the whole of the money which we obtained by bidding high for it,—and that, if the improvement in trade, and especially in the domestic trade, should be contemporaneous with a foreign demand, we may see the rate of interest rise again as rapidly as it has lately fallen, and as it at present seems likely to fall still further.

MR ROEBUCK AT SHEFFIELD.

Mr Roebuck is a politician of positive character. Not only are his convictions confident, but even his private information partakes of the violent certainty of his convictions. He has no historic doubts about that most uncertain portion of all history—contemporary history. He does not think, but he "knows." "I am now," he says to his constituents at Sheffield, "about to break a secret to you all. I know "that there has been a contract entered into with the King "of Italy that the Emperor of the French shall have the "island of Sardinia so soon as he withdraws from Rome. I "am not relating what I think, but what I know." On this statement he builds a long political argument, which we will presently examine. But first as to his premised "fact." Mr Roebuck should remember that strong asseveration from ardent believers is supposed to imply a deficiency of evidence. They are very anxious to convince, but their main instrument for convincing is their own deep conviction. No wise man will trust information which is backed by such vehement expressions. The Emperor of the French and Count Cavour are not likely to have given Mr Roebuck proof of his assertion, and perhaps they were nearly the only persons who could demonstrate either its truth or falsehood. Mr Roebuck's suppressed evidence is probably Austrian or French official gossip, and both France and Austria have a definite interest in persuading the world that such a compact exists. For our parts we certainly could not deny that it is so, but we see great reason to disbelieve it. The Garibaldian and semi-republican party have already proved themselves very formidable to the Piedmontese Government. No external danger could be so great as a divided nation, and both Cavour and Ricasoli have shown themselves fully awake to this danger. It is likely enough that France presses for the island of Sardinia in compensation for leaving Rome. It is most unlikely that Italy would buy the benefit at such a tremendous price as alienating half the friends of the Government, and embittering to the deadliest point all its foes. These are reasons which have *far more weight with rational people than* Mr Roebuck's mystic affirmations, and we, therefore, cannot accept the fact on which he builds so much.

And now what does he build on this fact? He reasons as follows:—France is threatening England through her designs on Sardinia. Piedmont has yielded to these designs. England cannot and must not afford to allow France thus to grasp the preponderance in the Mediterranean,—and if Sardinia consents, must veto the transaction at the price of a great war. But in that impending war we must look out for natural allies. Our natural ally will be Austria,—free, "constitutional," Anglicised Austria, whose first instinct it is to resist French aggrandisement. Let us then, prepare, says Mr Roebuck, for close alliance with this noble Continental Power, and an internecine contest with France. Now Mr Roebuck had the grace to admit that he was speaking not quite as he would have spoken in the House of Commons,—with less reticence,—in fact, after a more random and wholesale fashion. We think a little examination of his argument will tend to show with what very random talk he has been indulging the people of Sheffield.

What is the war which Mr Roebuck so kindly proposes? It is a war in alliance with Austria to prevent France from acquiring Sardinia *with the consent of Piedmont*. Now it is true that England ought to go to war to deter France from an unprovoked aggressive movement on a weaker State,—if that was what Mr Roebuck feared;—but it is not. He not only thinks, "*but he knows;*" that the Italian Government is prepared to cede Sardinia for adequate consideration. Well, the Italian Government cannot do this without the consent of the Italian Parliament, and therefore, if the event ever happens, Italy, will apparently be on the side of France. Our war, therefore, would be a war for the naval command of the Mediterranean and for nothing else. Now, even if this were the sole consideration,—which it could not be by any means,—would this justify us in a war with France? Can it be said that the power of distributing the French navy between the Gulf of Lyons and Sardinia, instead of concentrating its power in Toulon, would be a matter of such paramount importance to exclusive English interests as to justify war? No statesman in his senses would say so. That it is of the first importance to prevent gross infractions of European rights we readily admit. But Mr Roebuck puts that question entirely aside. He lifts us forward a step by his positive "knowledge" that the thing, if done at all, would be done voluntarily by Italy. He argues the matter as a selfish English interest, and as that alone. Now of what great importance is it to England to prevent the harbours of Sardinia from being placed at the disposal of France? Is it of one half or one quarter the same importance to us as the consolidation of a strong and free Italian Power? We have already stations at Malta, Gibraltar, and Corfu,—and how could any but the most jealous and suspicious national vanity persuade itself that it was a positive requisition of national duty and equity to incur the passion, the blood, and the cost of a war with France, rather than permit France to get one naval station more there? It may be our duty to protest;—if we had any proof that Italy had been forced into such a bargain, we should feel it our duty to do a great deal more than protest,—but then it would not be for so empty an end as to keep down the naval opportunities of France. We say with the distinctest conviction that a war entered into simply and for no other reason than the limitation of French naval power in the Mediterranean, would be a foolish, a selfish, an unworthy war. The naval power of France must not be permitted to surpass our own,—but we have no special interest in checking her in the Mediterranean,—none at least half as powerful as our interest in erecting Italy into an independent and powerful State. The more the French navy is spread abroad, the weaker it will probably be. At all events, while we are among the guardians of European right, we are not invested with the duty of snubbing French ambition on every possible occasion.

But the Sardinian question could not be considered apart from others which, as the Sheffield orator very well sees, cluster round it. If we went to war with France—whether Italy were joined with her or were neutral—to prevent her descent on Sardinia, we could not, as Mr Roebuck sees, do without an European ally. And the only feasible ally for such a purpose would be, he says, Austria. What, then, would be the price we must pay for our alli-

ance? Mr Roebuck does not shrink from intimating one portion of it,—namely, a decisive exertion of English influence against Hungary. But he shrinks from stating the other half of the necessary sacrifice,—viz., a decisive confirmation of Austrian rule in Venetia,—and, in case Italy should take part with France, as she would in any contest in which Austria was the antagonist, active help to Austria in recovering her power in Italy. For this would be, in fact, the meaning of an Austrian alliance. To mortify and humble France it would be needful to attack her at the weakest point,—to attack her through Italy rather than North of the Alps. And thus by following Mr Roebuck's policy we should find ourselves drifting into an attempt to undo, or at all events to sanction the undoing of, all that the last two years have done for Italy;—and this for the contemptible motive that we could not permit France to acquire fresh naval stations in the Mediterranean.

On the whole, we must characterise Mr Roebuck's speech as a political dream founded on an unlikely, not to say imaginary fact,—at once uncertain in its base, and incoherent in its structure. Even granting the intention, England never would, never ought to, go to war in conjunction with the most obstinate and despotic Power in Europe, to the great hazard of Italian liberty, to prevent the realisation of that intention. Nor will she do so,—nor would Sheffield ever wish her to do so, in spite of Mr Roebuck's Austrian eloquence, and ostentatious anti-Gallican fervour.

WILL THE FEDERAL GOVERNMENT BE FINANCIALLY SUCCESSFUL?

Will the Northern States of America get their money? That is the question upon which, more than upon any other, the duration and the issue of the internecine conflict beyond the Atlantic now turns. We know that the South is poor; we know that its credit is worth nothing; we know that it is trying to make financial use of its sole reliance—cotton; we know that it is issuing loans receivable *in produce*—almost the extreme act, according to European theory, of financial degradation. If, on the other hand, the North can command unlimited pecuniary resources, if it can succeed in the money market of Europe, if it have within its own boundaries a money market sufficient for itself, the ultimate end is certain. Ten such disasters as that at Manassas Junction would not perceptibly counterweigh the infinite advantage of perfect credit over no credit.

But will the Northern Americans have this advantage? It is far easier to ask this question than to answer it, at least to answer it fully. American finance is in as revolutionary a condition as America itself; and the number of questions which it raises are almost infinite in number. The details of the proposed mode of raising money are still only known in this country very imperfectly, and the general considerations which are involved in the future prospects of American finance have hardly been thought out.

As we showed some time since, the ordinary revenue of the Federal Government bears no proportion to the sums which it has now to think of raising. It is principally derived from duties on imports, and was in the year ending 30th June, 1860:—

	£
Customs	11,967,000
Land Sales	400,000
Miscellaneous	227,000
	12,594,000

Congress talks, though Mr Chase did not, of an expenditure of more than 100,000,000*l*, and it is evident that when a State or an individual proposes to raise and to spend *eight times* its last year's income, there will be a strain on its resources.

What will be the credit given in Europe under the present circumstances to the American loan? We fear it will not be great. A State during a rebellion, or during a revolution, can in most circumstances not have much credit abroad. And the peculiarities of America are not such as to make it less liable to this general objection, but such as to make it more liable. A Federation is weak at its points of junction. A considerable number of separate States, with local centres, local interests, local passions, is of necessity deficient in cohesion. It contains within it dissevering forces from which more homogeneous States are free. When the cry of disunion is once on foot,—when that cry has been defended in a successful battle against the partisans of Union,—who can say how far its influence will extend, or what strange advocates may identify themselves with it? The United States of America cover a vast area; it would be little less than a geographical miracle if there were an absolute identity of interest in all parts of it. There is no such identity. The grain-growing states of the West are interested to remove the protectionist tariff which manufacturing Eastern States are interested to maintain. When we consider that the dislike to protection has had very much to do with the present movement at the South, we may begin to estimate what the danger will be to the remains of the Union if the Southern States should be successful in their present attempt, and the States which are taxed for the benefit of others and *those others* are left side by side in a diminished, a vanquished, a less glorious Union.

It may be even yet that the North will conquer, but even then is there no danger if it conquer at the cost of a heavy debt, of which the heavy interest will ensure grievous taxation? On the 30th January, 1860, the interest on the Federal public debt amounted to 3,930,000*l*. The interest of 100,000,000*l* at the rate of 7 per cent. (Mr Chase's rate) is 7,000,000*l*. The two together make just eleven millions, and the Federal revenue is now twelve and a half. With these facts before them, European capitalists will be cautious.

What, then, are the resources of America itself? We fear not much. The deposits of all the Banks of the Union, including *those of the Seceding States*, were on the 31st January, 1860, only 57,105,494*l*, but a feeble sum to begin loans on the scale the Federal Government require. It is true the *New York* Banks stand well. As Banks they stand admirably; the ratio of their cash to their liabilities is excellent. Perhaps no Banks in a time of revolution ever stood so well. They have 10,552,000*l* of *specie*. But what is that when a single year of war is, in the estimate of Congress, to cost 100,000,000*l*?

It is utterly out of the question, in our judgment, that the Americans can obtain, either at home or in Europe, anything like the extravagant sums they are asking for. Europe wont lend them; America cannot. But,—and this, we suspect, is the question the sounder heads are now revolving,—although the Americans cannot get all they ask, may they not get something less?—may they not get enough?

It is in this light that we should look at the plans which are now embodied in the recent legislation of Congress; and it is most unfortunate that Congress has here made a great mistake, and caused a great needless difficulty. These plans are thus stated by a leading American authority:—"The means of raising money, voted by Congress, are as follows:—First,—A national circulation of Treasury notes of 5 dols, 10 dols, and 20 dols, payable in specie on demand at the various commercial centres. These will doubtless enter largely into the currency of the country, supplying a want which is felt particularly at the West, growing out of the enormous depreciation of a circulation based on stock of the seceded States, and secured as they are by the faith of the General Government, in the same way as the circulation of our Eastern specie-paying banks is largely based on deposits of Government stocks; they will also have the effect of equalising exchanges through the country, thus facilitating commerce, and enabling the West, as far as is in its power, to meet indebtedness of the East. Second,—One year Treasury notes, bearing 3.65 per cent. interest. Temporary loans of 6 per cent. from 60 days to two years, and three years Treasury notes at 7.30 per cent. These all being convertible, at the option of the lender, into a 20 years 6 per cent. stock. Third,—A 7 per cent. 20 years funded stock of federal or sterling denominations at par, or 6 per cent. 20 years stock limited to not less than 91.07½, equal to a par 7 per cent. 20 years stock."

But it may well be doubted if the rate of seven per cent. offered will be adequate. According to the same authority,

the following were the state of American stocks in Wall street:—

UNITED STATES LOANS.

			Interest payable.		Offered.	Asked.

Considering the great depreciation necessarily caused by a large loan, these figures do not indicate seven per cent. Until Mr Chase obtains liberty to offer an additional rate, he will not be able to use to much advantage the second and third of his powers.

It is otherwise with the first. We believe, as is above suggested, that the Federal Government will be able to float a large number of Treasury notes. It can issue them as it wants them in payment of its debts; and the credit of the Government, still good if it were not asking for such vast sums, and attempting at once such great financial achievements, will be sufficient to float them to a very considerable extent, at least for a time. But, on the other hand, all bankers will dislike them; they will compete with the notes of bankers to a formidable extent; it will be for the public to say which shall be the general circulation of the country, and it will be for the bankers to say how, by aiding the Government to prolong the war, they will aid it to become their most formidable competitor.

Of the taxation proposed, we will speak more at length at an early opportunity. We give the tariff *in extenso* elsewhere in an elaborate and minute form. It is remarkable as increasing in some particulars the protection given by the Morrill tariff and as imposing war-duties on tea and sugar, which will not yield very much we fear under the enormous diminution of consumption which these lamentable events must cause.

Direct taxation, likewise, has been introduced, though until more information has reached this country, it is not easy to say how it will work, or how far it will be endured.

But taxation can only pay the interest on the loans: it is with the loans that war must be carried on. If taxes enough to pay that interest can be devised it will be well, and according to the figures which have been given it will be a great financial achievement. But it is borrowed money only that a sudden catastrophe like the present, with its immense demands, can at once be effectually met. Ready money is wanted, and can only be obtained on credit; and, on the whole, we think it unquestionable that Mr Chase will obtain no money in Europe or next to none; that he will obtain scarcely any at 7 per cent. in America; that he cannot obtain what he asks for, because it is out of proportion to the resources of the country; that he will find, as others in similar difficulties have found, a paper currency his best resource, but it will be at the expense of the formidable enmity of the banking interest, and at the risk of utter collapse, if, in a sudden panic, the Treasury notes should be presented at "various commercial centres for immediate payment."

M. MICHEL CHEVALIER'S NEW PROPOSALS.

M. CHEVALIER is at least entitled to this praise—he does not pause upon past results. Whatever he has achieved in his favourite task becomes to him immediately the basis of something else. To a person well acquainted with the state of public opinion on commercial subjects in France and with the long labours of M. Chevalier in the service of free trade, the recent French treaty might well seem no inadequate compensation for the labours of such a life. The particular details of the treaty, very important as they in themselves are, are altogether unimportant in comparison with the distinct recognition which the true principle has now obtained. Commercial Freedom has been recognised as the rule, the end, and the ideal of commercial legislation by the greatest authority, not in France only, but in Europe. The adhesion of France to free trade is the adherence of the nation which sets the fashion in thought to half the Continent. People blame the French, and sneer at the French, and occasionally hate the French; but they imitate the French. The strength of French arms and the clearness of French ideas have given her a sort of *intellectual initiative* of which it is difficult to over-estimate the daily influence. We could pardon M. Chevalier if he thought it enough to have been an essential co-operator in converting France—the French Government at any rate and a portion of the French people—to the principles of free trade. We should have been ready to pardon him if he had nothing else to propose. It appears, however, that he has a good deal else.

In the first place, he suggests that economists and philanthropists and statesmen should make it a part of their essential task to establish an identity in the commercial legislation of different countries. He wishes to see not only free trade, but uniform trade. He does not observe, but he might have observed, that this latter is an older object of attention by many centuries than free trade. The "law-merchant" has always been a sort of common property, supposed by a legal fiction to be identical in all commercial communities, and in great part really so identical. The least intelligent communities have not been blind to the obvious advantage of having identical principles of decision on the subjects upon which their respective members come especially in contact. The law of nations, as it was at first used, meant only an aggregate of legislative rules for regulating the various transactions between the individuals of different nations, and among these transactions commercial ones had a principal place. In more modern times, the rules of such modern instruments as bills of exchange have been shaped into a very great similarity, and in the most important points into a complete identity, by the universal perception of plain utility. In the middle ages and in ancient Italy, nations connected by the ties of trade have been alive to the importance of having identical laws of trade. Is modern Europe, M. Chevalier emphatically asks, not to be so alive?

It is certainly the fact that the commercial law of different nations has not been for a considerable period tending to an identity, but rather tending to a diversity, and the reason is a remarkable one. In the time to which we have alluded, when the original notion of an identical law-merchant was received and acted on, the law was "judge-made law." The tribunals, under the form of deciding a particular case, laid down "out of its own breast" a rule applicable to all like cases. Much of our mercantile law, and all the best of it,—as the law of marine insurance and the law of bills of exchange,—was introduced in this manner. The Legislature, properly so called, did nothing and thought of doing nothing: no Act of Parliament was passed on the subject, and no bill upon it was ever proposed. But able judges, as Lord Holt and Lord Mansfield, ascertained the rules which were floating more or less vaguely in the opinions and notions of the mercantile community,—shaped them into logical precision,—limited them with a due regard to other principles and by a long series of authoritative decisions,—in fact, enacted them for ever. Such an indirect mode of legislation is very favourable to legal uniformity in trading matters. Trade is much the same always and everywhere. Its appearance is different, but when we really get at it, its essence is very much the same. Such judges in such cases as we have mentioned did get at it; the actual facts of the particular case brought the necessary matters in the most practical way immediately before them. Accordingly they legislated uniformly. In most countries of the Continent this state of jurisprudence has entirely passed away, and in this country it has passed away almost entirely. Codes are now the regulating texts of law over the greater part of the Continent, and Acts of Parliament are the principal means of introducing new maxims of law here. Formal legislation by a supreme Government has taken the place of informal legislation by a judicial authority, and in some respects the change is for the better. But as far as respects the tendency to uniformity in commercial matters between different nations, the change is for the worse. The code is shaped once for all by a few men on a particular occasion upon a few facts; it is in vain to expect that it will be the same as another small number of men upon a different occasion will shape upon the

consideration of a different collection of facts. Our modern mode of legislation causes international diversity, and an international diversity is in commercial matters a great evil. M. Chevalier wisely argues that we should try to alter it. What Englishman, indeed, would willingly be a plaintiff in a Prussian court, or a Dutch court, or a French court, even in a plain trading matter? Yet until he is so willingly, practical jurisprudence is undeniably very defective.

M. Chevalier's language is apt and distinct in describing the evils he would have remedied, though not equally so with respect to their legislative cause:—"If you enter "into the thought which I indicate to you, you will im- "mediately perceive how many modifications there have "been made in the laws, regulations, and usages exist- "ing in different States; what additions to them ought "to be introduced either by legislation or by judicial prac- "tice; what negotiations States, both great and small, have "occasion immediately to enter upon with one another; "what new career may shortly be opened to diplomatists "who, as malicious tongues pretend, have too much leisure "in proportion to the high salaries which they receive. "It is, for example, not doubtful but that the *droit d'aubaine*, "in virtue of which the property of a man who died in a "foreign country, after having acquired possessions there, "was torn from his children, is now everywhere renounced. "But in the same manner we must cease to refuse to the "subjects of a foreign State the right of possessing land: "we have in respect of real property to make a complete "assimilation between foreigners and members of the nation, "always with the reservation of political rights. In the "same manner we shall simplify the law of naturalisation, "which in many instances still bristles with difficulties, and "fixes an excessive duration for the preliminary residence "and for the apprenticeship to the new nationality. In the "same series of ideas we shall come to adopt uniform regu- "lations for those affairs in which variety has no utility, "and where no explanation can be given for its continuance, "but by attributing it either to the ignorance in which "people were formerly steeped on the subject of what other "nations had done, or to the prevalence of a puerile spirit "of contradiction."

M. Chevalier wisely also draws attention to another point of international diversity which has been caused in recent times by mere national vanity. Scientific men have wished in matters of mere science to flatter their own nation. "On this occasion," says M. Chevalier, "one "may raise a question which appears to be only one of "detail, but which has a considerable practical bearing. I "allude to the convenience of reckoning from the same "meridian in geographical maps and nautical books. In "this manner the maps and nautical tables of one nation "would be easily used throughout the world. For naviga- "tion this would be a veritable benefit. Formerly there "had, up to a certain point, been an agreement upon one "meridian. They took that of the Isle of Ferro; after- "wards by national pride each State wished to have its own. "There is then the meridian of Greenwich, that of the ob- "servatory of Paris, that of Washington, and many others. "I do not see what each State has gained thereby. I only "see distinctly what it has lost—the power of using the "maps and tables of its neighbours."

Such absurdities might easily be modified, for they concern only the occasional practice of the educated and intellectual few; but we fear M. Chevalier will hardly in our time effect the establishment of even an approach to identity in the common weights, measures, modes of accounts, and coinage of different countries. These cling, if we may use the phrase, to the minds of the vulgar, and how they are to be separated, and how even slight modifications are to be introduced, passes our comprehension. If you can induce a West-country farmer to count in francs and kilogrammes, you may perhaps have effected *a good*, but have at all events achieved *a wonder*. Seriously, until an extended education shows the mass of mankind the advisability of altering their modes of counting, we think it lost labour to advocate an alteration in those modes. Let us all labour to improve, according to our means, the general culture of those upon whom we have any measure of influence, and leave such distant improvements to the continued action of progress and of thought.

THE SUPPLY OF COTTON.

THE following circular has been forwarded by Messrs Neill Brothers, of Manchester, to their correspondents:—

11 Cross street, Manchester, August 21.

Dear Sir,—Since the date of our circular of 22nd ult., the stock of cotton at Liverpool has shown a steady decline. The quantity of American then held in warehouse and afloat was 860,000 bales. It is now 639,000 bales. For one week the spinners increased their stock by about 30,000 bales. This was about used up in the succeeding three weeks. They are again therefore buying more freely. During the past four weeks and four days the takings from Liverpool for consumption have been 180,000 bales, or about 39,000 per week. Adding 2,000 per week for Glasgow, &c., would make the total consumption of American cotton for the kingdom 41,000 per week, which was precisely our estimate. Taking consumption and export together, the figures have been 210,000 bales, against 216,000 last year—a very slight discrepancy. In the remaining months of last year (24th August till 28th December) consumption absorbed 775,000 bales, and export 68,000 bales, in all 843,000 bales. It is impossible that the same rate of absorption should be maintained this year; for the whole available supply is only 639,000 bales, without any prospect of its being replenished before the close of the year. Yet the supply of American cotton will, no doubt, be sufficiently economised to enable it to last till that date, or longer, by the gradual advance in price throwing a larger proportion of the consumption on Surat, of which the supply is happily unusually large; and by a limitation of the hours of labour, there being, we understand, a pretty general resolve on the part of the trade not to "light up" at all this winter—or, at least, so long as the deficiency in the supply of cotton continues.

With regard to the probable continuance of the war, we have merely to confirm what we said in our last. Many thought then that the North was not in earnest in the war, and others that their immense preparations would ensure them an easy victory. The opinion which we ventured to give, that "the Government and people of the North vastly underrate the difficulties before them, and equally overrate their own strength and endurance," has had a very emphatic confirmation in the result of the first great battle. The believers in an early conclusion of the war, however, still cling to the same idea, but upon the very opposite grounds. The general idea now is that the North will be forced to yield by the demoralisation of her army, the impossibility of raising money, and the evident futility of the attempt to conquer the South. We beg to caution our friends against being led away by this kind of argument into any hope of an early peace. Money never was so abundant in the States as it is at present. The deposits held by the New York bankers at last accounts amounted to 93,687,000 dols, against an average of 77,721,000 at the corresponding dates for the past five years; and the specie or bullion to 46,900,000 dols, against an average of 21,249,000. The difficulty is to employ the money in safe securities, and, as this difficulty is increasing, it is probable that the high terms which the Government will be ready to pay will tempt capitalists to take the earlier loans. We have no doubt that the reasons now urged for an immediate peace will ultimately bring it about. The North will have to learn the limited extent of her powers as compared with the gigantic task she has undertaken. One and perhaps two defeats will be insufficient to reverse the false education of a lifetime. Many lessons will probably be necessary, and, meantime, any success the Northern troops may obtain will again inflame the national vanity, and the lessons of adversity will need to be learned over again. More effect will probably be produced by sufferings at home—by the ruin of the higher classes, and pauperisation of the lower, and the general absorption of the floating capital of the country. But this will take time to show itself, and to work its effect in the creation of a peace party strong enough to have weight with the Government. In the meantime the war must go on, as there is not the smallest chance of the South submitting.

That the latter is preparing for a protracted war is evidenced by the following documents:—

"A CARD TO COTTON PLANTERS.

"The undersigned cotton factors in the city of New Orleans, in view of the interests of all parties, recommend to their various customers and correspondents not to ship any portion of their crops of cotton to this city, or to remove it from their plantations, until the blockade is fully and entirely abandoned, of which due notice will be given."

This is signed by 141 firms, said to be all the cotton factors in New Orleans, and who control considerably more than one-half of the entire cotton crop.

"Office Board of Underwriters,

"New Orleans, July 23, 1861.

"At a meeting of this board held to-day, the following resolution was adopted, and ordered to be published:—

"Resolved,—That no river insurance on cotton bound to this port, nor fire insurance on cotton in the city of New Orleans, be taken until the blockade of the port is raised, and its free navigation resumed. Cotton on plantations may be insured against fire to the extent of three-fourths of its value, provided it is

stored in lots of not exceeding one hundred and fifty bales, and the lots at least three hundred feet apart.

"JAMES H. WHEELER, Secretary."

In the face of these decisions, it need hardly be expected that much cotton will come through New Orleans during the continuance of the blockade, whether efficient or not, and it is quite probable that the same course will be taken at the other ports. To prevent cotton being sent to the North, overland, the following order has been published, in addition to the stringent law already published against any transport of cotton into the Free States:—

"Head Quarters Department, No. 1.
"New Orleans, La., June 26, 1861.
"GENERAL ORDERS, No. 13.

"Communications of any kind, and on any pretence, with the black republicans is positively and peremptorily forbidden. Any citizen detected in communicating with them will be arrested and prosecuted.

"By command of Major-General Twiggs,
"D. BELTZHOOVER, Major La. Artillery,
A.A.A.G.C.S.A."

Strange and almost incredible as it may appear, it is nevertheless the fact that it is the deliberate intention of the American Governments—both North and South—the seal up the new cotton crop, so that not a bale of it (which they can prevent) shall leave the plantations during the continuance of the war. The North believes that the need of money will bring the South to terms: the South is just as firm in the faith that the need of cotton will bring the North to terms, or lead the European Governments to interfere. How long these efforts will be successful it is impossible to say. No doubt some cotton will reach the ports, creeks, and bays along the coast—notwithstanding all the recommendations of patriotic factors—and escape the blockade, in spite of the vigilance of the whole United States fleet. But it is clear that any supply that can thus reach us will be of very trifling importance. A week hence the time will have arrived (1st September) when, under ordinary circumstances, the new shipping season should commence. What we wish our friends to understand and fully realise is that there is absolutely no prospect of its commencing then, or for months to come.

Ordinarily we view high prices of cotton as injurious to our customers and to the trade, and we condemn speculation which is so frequently unfounded, and not required to attract a supply which would be certain to come in the natural course of trade. But we now beg our friends to understand that the only means of even slightly mitigating the fearful evils incident to a cotton famine are a great and timely advance in price, which will prove to merchants and growers in India and other distant countries that the scarcity is a real one, and induce them to gather up and ship cotton hither rather than leave it to be manufactured by the natives of those countries. Thus our distress may be mitigated—the wheels of trade may be kept in motion, even though at low speed—and partial employment may give food to thousands who would otherwise be destitute. A national benefit would also be conferred by all spinners who, by running their mills at half time, should reduce by so much their consumption of cotton. If this were universally adopted, the present stock, instead of being exhausted in December, would last till May, and before then it is possible that peace may be restored.—Very respectfully yours,

NEILL BROTHERS.

THE UNITED STATES TARIFF.

(AMENDED BY ACT OF CONGRESS, AUGUST 1, 1861.)

THE new duties on tea, coffee, sugar, wines, brandies, cocoa, chocolate, liqueurs, &c, as amended by the Act of August 1, 1861:—

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, that from and after the date of the passage of this Act, in lieu of the duties heretofore imposed by law on the articles hereinafter mentioned, and on such as may now be exempt from duty, there shall be levied, collected, and paid, on the goods, wares, and merchandise herein enumerated and provided for, imported from foreign countries, the following duties and rates of duty, that is to say:—Absynthe, first proof, 50c per gal; absynthe, all imitations to pay same as genuine; absynthe, oil of, or wormwood, 20 per cent *ad valorem;* acacia, or gum Arabic, free; accordions, 20 per cent; acetous acid, free; acid, chromic, 15 per cent; acetate of lead, or white lead, 3c per lb; acetate of potass, 10 per cent; acetic acid, free; acetate of quicksilver, 10 per cent; acid, benzoic, free; acid, boracic, free; acid, citric, white or yellow, 20 per cent. acid, gallic, 10 per cent; acid, muriatic, free; acid, nitric, 10 per cent; acid, oxalic, 10 per cent; acid, pyrolignous, free; acid, tartaric, in crystals or powder, 20 per cent; acid, sulphuric, or oil of vitriol, free; acorns, 10 per cent; acids, used for chemical or manufacturing purposes, not otherwise provided for, free; acid, medicinal, and used in the fine arts, not otherwise provided for, 10 per cent; adhesive felt, for covering ships' bottoms, free; adhesive plaster, 30 per cent; adianthum (reg. subs.) 10 per cent; adzes, 30 per cent; agaric (fungus), 10 per cent; agates, 5 per cent; agates, bookbinders, 20 per cent; agate mortars, 30 per cent; albata, in sheets or otherwise, 30 per cent; alabaster and spar ornaments, 30 per cent; alba, cancella, 20 per cent; albumen, 20 per cent; alconroque, free; ale in bottles, 25c per gal; ale, in casks, 15c per gal; ale, otherwise than in bottles, 15c per gal; alkanet root, 20 per cent; alkermes, 20 per cent; aluminum, 20 per cent; allspice, oil of, 20 per cent; almonds, 4c per lb; almonds, shelled, 6c per lb; almonds, oil of, sweet or bitter, 20 per cent; almonds, paste, 30 per cent; aloes, 10 per cent; alum, ¼c per lb; alum, substitute, ½c per lb; alumina sulphate of, ½c per lb; aluminous cake, ½c per lb; alzarine, free; amber, 10 per cent; amber beads, 30 per cent; amber, oil of, 20 per cent; ambergris, free; amethyst, 5 per cent; ammonia, 10 per cent; ammonia, sal., 10 per cent; ammonia, salts, 10 per cent; ammonia, carb., 10 per cent; ammonia, muriate of, 10 per cent; ammonia, crude, 10 per cent; ammonia, refined, 20 per cent; ammonia, bole, 20 per cent; ammunition, canister shot, 25 per cent; ammunition, cannon balls, 25 per cent; ammunition, chain shot, 30 per cent; ammunition, grape shot, 25 per cent; ammunition, gunpowder, 30 per cent; ammunition, langrel shot, 30 per cent; ammunition, musket balls, 30 per cent; anatomical preparations, 30 per cent; anchors, 1½c per lb; anchovies, in oil, 30 per cent; anchovies, in salt, not in barrels, ½c per lb; angelica, root, 20 per cent; angora, goat's wool or hair (see wool); angora, gloves and mitts, 30 per cent; animals, alive, free; animal's oil, not otherwise enumerated, 20 per cent; animal, carbon, free; annatto, free; annatto, extract, free; annealed iron wire, same as iron wire; aniseseed, 10 per cent; oil of aniseseed, 20 per cent; oil of anthos, 20 per cent; antimony, crude, free; antimony, bartrate, 20 per cent; antique oil, 20 per cent; antiquities, free; anvils, 1¼c per lb; apothecaries' glass measures (see glass); apothecaries' vials, 6 oz and under, 30 per cent; apothecaries' vials, exceeding 6 oz and not exceeding 16 oz each, 30 per cent; apparatus, philosophical, &c., for colleges, &c., free; apparel, wearing, in use, free; aqua ammonia, 30 per cent; aquafortis, 10 per cent; arabic, gum, free; arrack, 50c per gallon; arrack, imitations, same as genuine; argent, or quicksilver, 10 per cent; argol, 3c per lb; arms, fire, 30 per cent; arms, side, 30 per cent; arrowroot, 20 per cent; arsenic, free; arsenic, sulphate of, free; articles embroidered with gold, silver, or metal, 30 per cent; articles of gold and silver not otherwise provided for, 30 per cent; articles, crude, for dyeing, free; articles, not crude, for dyeing, 20 per cent; articles, raw, not specified, 10 per cent; articles of copper, 30 per cent; artificial feathers, 30 per cent; artificial flowers, 30 per cent; asphaltum, free; assafœtida, 10 per cent; Aubusson carpets (see carpet); augers, 30 per cent; bacon, 2c per lb; baggage in use, free; bags, bead, 30 per cent; bags, grass, 30 per cent; bags, gunny, 20 per cent; bags, woollen, 12c per lb and 25 per cent; bags, worsted, 30 per cent; bags, flax, 30 per cent; bags, hemp, 20 per cent; bags, carpet, 30 per cent; bags, silk, 30 per cent; bags, carpet, worsted, 30 per cent; bags, leather, 30 per cent; baizes, 30 per cent; balsams, all, 30 per cent; bamboos, unmfg., free; bananas, 20 per cent; bark, of cork trees, unmfg., free; bark, Peruvian, 15 per cent; barley, 15c per bushel; barytes, sulphate of, 20 per cent; baskets, wood, 30 per cent; baskets, palm leaf, 30 per cent; baskets, straw, 30 per cent; Bay rum, 25c per gal; bayonets, 30 per cent; beans, tonkay, 10 per cent; beans, vanilla, 10 per cent; beaver fur, undressed, 10 per cent; bed feathers, 30 per cent; bed screws, 1½c per lb; beer, in bottles, 25c per gal; beer, in casks, 15c per gal; beer, otherwise than in bottles, 15c per gal; Beeswax, 10 per cent; belts, sword leather, 30 per cent; benzoin, free; bergamot, essence of, 30 per cent; bichromate of potash, 3c per lb; binding, worsted carpet, 30 per cent; binding, cotton, 30 per cent; binding worsted, 30 per cent; binding, silk, 40 per cent; binding, leather, 30 per cent; binding, linen, 30 per cent; binding, quality, 30 per cent; bismuth, free; bitumen, 20 per cent; black, ivory, 20 per cent; black, lamp, 20 per cent; black lead, 10 per cent; black glass bottles, 25 per cent; blank books, 20 per cent; blankets, wool, value not over 28c per lb, 6c per lb and 10 per cent; blankets, wool, value over 28c and not over 40c per lb, 6c per lb and 25 per cent; blankets, wool, value over 40c per lb, 12c per lb and 20 per cent; blankets, for printing, 25 per cent; blankets of mohair, 25 per cent; bleaching powders, 15c per 100 lbs; blue, Prussian, 10 per cent; blue, vitriol, 20 per cent; bobinet lace, 20 per cent; bobbin, 30 per cent; bobbin wire covered with cotton, 30 per cent; bobbinet, 20c per square yard; boiler plates, 20 dols per ton; Bologna sausages, 30 per cent; bolting cloths, free; bolt rope (tarred), 2½c per lb; bolt rope (untarred) 3c per lb; bone black, free; bone dust, free; bonnets Leghorn, 30 per cent; bonnets, grass, 30 per cent; bonnets, silk, 30 per cent; bone, manufacture of, 30 per cent; books, in course of printing and republication in the U. S, 15 per cent; books for Congress library, free; borate of lime, 10 per cent; borax, free; bottles containing wine, 30 per cent; boxes, 30 per cent; boxes, musical, 20 per cent; bracelets, gold, 25 per cent; bracelets, hair, 30 per cent; braces, 30 per cent; brads, cut, not exceeding 16 oz to the 1,000, 2c per 1,000; brads, cut, exceeding 16 oz to the 1,000, 2c per lb; braids, cotton, 20 per cent; braids, in ornaments, 30 per cent; braids, hair, 30 per cent; braids, straw, 30 per cent; brimstone, crude, 3 dols per ton; brimstone, rolled, 6 dols

per ton; brandy, first proof, 1 dol 25c per gal; brandy, second proof, 1 dol 35c per gal; brandy, third proof, 1 dol 47c per gal; brandy, fourth proof, 1 dol 63c per gal; brandy, fifth proof, 1 dol 75c per gal; brandy, under first proof; brass, in plates or sheets, 30 per cent; brass, in bars, 10 per cent; brass, in pigs, 10 per cent; brass wire, 30 per cent; brass, rolled, 30 per cent; brass battery, 30 per cent; brass screws, 30 per cent; Brazil wood, free; Brazil pebbles, for spectacles, 30 per cent; Britannia ware, 30 per cent; bristles, 4c per lb; bronze casts, 30 per cent.; bronze, all manufactures of, 30 per cent; bronze metal in leaf, 10 per cent; bronze powder, 20 per cent; brushes, 30 per cent; buckles, of gold, silver, or metal, 30 per cent; bullion, free; bunting, 30 per cent; buttons, metal, 30 per cent; buttons, all other, 30 per cent; cables, tarred, 2½c per lb; cables, untarred, 8c per lb; cables, grass, 3c per lb; cables, iron, 1¼c per lb; calfskins, raw, 5 per cent; calfskins, salted, 5 per cent; calfskins, tanned, 25 per cent; cameos, real, 5 per cent; cameos, imitation, 10 per cent; cameos, real, set, 25 per cent; cameos, imitation, set, 30 per cent; camphor, refined, 6c per lb; camphor, crude, free; canary seed, 10 per cent; candlesticks, 30 per cent; candles, tallow, 2c per lb; candles, wax, 8c per lb; candles, spermaceti, 8c per lb; candles, stearine, 4c per lb; candy, 6c per lb; cannon, brass, 30 per cent; cannon, iron, 30 per cent; capers, 30 per cent; caps, 30 per cent; carbines, 30 per cent; carbonate of magnesia, 30 per cent; carbonate of soda, 20 per cent; carbonate of ammonia, 10 per cent; cards, 30 per cent; carpet binding, 30 per cent; carpeting, value 1 dol 25c per square yard, or less, 40c per square yard; carpeting, value over 1 dol 25c per square yard, 30c per square yard; carpeting—none shall pay less than 25 per cent ad val; carpeting, Brussels and tapestry, printed on the warp or otherwise, 30c per square yard; carpeting, treble, in grain and worsted, 25c per square yard; carpeting, chain Venetian, 25c per square yard; carpeting, hemp or jute, 4c per square yard; carpeting, druggets, bocking, and felt, 20c per square yard; carpets, all other kinds, of wool, flax, or cotton, not otherwise specified, 30 per cent; carpet mats, rugs, screens, &c., shall pay same as carpet of similar character; carpet, yarn for, valued under 50c per lb, and not exceeding in fineness No. 14, 25 per cent; carpets, yarn for, exceeding in fineness No. 14, 30 per cent; carriages, and parts of, 30 per cent; cassia, 10c per lb; cassia, buds, 15c per lb; castings of iron (see iron); castor beans, 10 per cent; castor oil, 20 per cent; castonem, 20 per cent; catcheu, free; catgut and strings for musical instruments, 20 per cent; caustic soda, 1c per lb; cayenne pepper, 6c per lb; cayenne pepper, ground, 8c per lb; cedarwood, manufactures of, 30 per cent; cedarwood, manufacturing, free; cement, Roman, 20 per cent; chains, cables, &c., (see iron); chalk, free; chalk, French, free; chalk pencils, red, 30 per cent; chalk, red, free; champagne wine, 50 per cent; charts and maps, free; cheese, 4c per lb; chicory root, 1c per lb; chicory, ground, 2c per lb; chinaware, 30 per cent; Chinese matting, 20 per cent; chloride of lime, 30c per 100 barrels; chocolate, 6c per lb; chromate of lead, 20 per cent; chromate of potash, 3c per lb; chromic acid, 15 per cent; chronometers, 10 per cent; cinnamon, 20c per lb; citric acid, 20 per cent; claret wine, 50 per cent; clayed sugars, 2½c per lb; clocks and parts, of, 50 per cent; cloth, grass and hair, 25 per cent; cloth, manufactures of, for shoe, not with Indiarubber, free; clothing, of wool, 12c per lb and 25 per cent; clothing, not otherwise specified, 30 per cent; cloves, 8c per lb; coal, bituminous, per ton of twenty-eight bushels, eighty pounds to the bushel, 1 dol per ton; cobalt, free; cochineal, free; cocoa, 3c per lb; cocoa leaves and shells, 2c per lb; cocoa, prepared or manufactured, 8c per lb; cocoanut oil, 10 per cent; coculus indicus, 10 per cent; codilla, or tow of hemp, 10 dols per ton; coffee, 4c per lb; coins, cabinets of, free; coir, manufacturing, 10 dols per ton; coir yarn, 1c per lb; coke, 25 per cent; colours, water, 30 per cent; combs, 30 per cent; comfits, 30 per cent; composition tops, for tables, &c., 30 per cent; confectionary, not otherwise specified, 30 per cent; copper, waziers, 25 per cent; copper manufactures, not other provided for, 30 per cent; copper, for United States mint, free; copper, in pigs, bars, or ingots, 2c per lb; copper, old for remanufacture, 1½c per lb; copper, in sheets, plates, &c., not otherwise provided for, 25 per cent; copper ore, 5 per cent; copper rods, bolts, nails, spikes, &c., 25 per cent; copper sheathing, in sheets 48 inches long, 14 wide, and weighing from 14 to 34 oz per square foot, 2c per lb; copper, sulphate of, 20 per cent; copperas, ¼c per lb; 1c per lb; nails, wrought, 2c per lb; nails, horseshoe, 3½c per lb; nuts, wrought, 25 dols per ton; old scrap, 8 dols per ton; pig, 6 dols per ton; rivets, wrought, 2c per lb; railroad chairs, wrought, 25 dols per ton; slabs, less finished than bars, and more advanced than pigs, except castings, 15 dols per ton; sad, 1c per lb; stoves, 1c per lb; stove plates, 1c per lb; steam pipes, cast, ½c per lb; slit rods, not otherwise specified, 20 dols per ton; spikes, cut, 1c per lb; spikes, wrought, 2c per lb; sledges, 2c per lb; steam tubes, wrought, 2c per lb; sprigs, cut, not over 16 oz per 1,000, 2c per 1,000; sprigs, cut, over 16 oz per 1,000, 2c per 1,000; sheets, smooth or polished, 2c per lb; sheets, common or black, not thinner than No. 20 wire gauge, 20 dols per ton; sheets, common or black, less than 20, not less than No. 25 wire gauge, 25 dols per ton; sheets, common or black, less than No. 25, 30 dols per ton; screws, wood, two inches or over in length, 5c per lb; screws, wood, less than two inches, 8c per lb; screws, washed, 30 per cent; screws plated, 30 per cent; tailors' irons, 1c per lb; tacks, not over 16 ounces per 1,000, 2c per 1,000; tacks, cut, over 16 ounces per 1,000 2c per lb; vessels, cast, not otherwise specified, 1c per lb; wire, drawn and finished, not more than ¼ inch in diameter nor less than No. 16 wire guage, ¾c per lb, and 15 per cent; wire, over 16 and not over 25 wire gauge, 1½c per lb and 15 per cent; wire, over 25 wire gauge, 2c per lb and 15 per cent; water pipe, cast, ½c per lb; water tubes, wrought, 2c per lb; washers, wrought, punched, 25 dols per ton; wrought, for ships, weight of each 25 lbs or more, 1½c per lb; wrought, for locomotive tire, parts of each, 25 lbs or more, 1¼c per lb; wrought for steam engine and parts of, each 25 lbs or more, 1½c per lb; in other forms, less finished than bars, more advanced than pig (except castings), 15 dols per ton; all rolled or hammered, not otherwise provided for, 20 dols per ton; casters, 30 per cent; curry combs, 30 per cent; cutting knives, 30 per cent; piano ferrules, 30 per cent; filings, 30 per cent; hoops, for use, 30 per cent; liquor, 10 per cent; malls, 30 per cent; manufactures of, part finished, pay same as if finished, 30 per cent; scythes, 30 per cent; shot, 25 per cent; shovels, 30 per cent; sickles, 30 per cent; spades, 30 per cent; squares, 30 per cent; square wire, for umbrellas, in pieces not exceeding lengths used therefor, 30 per cent; taggers, 10 per cent; sulphate of, ¼c per lb; wire, annealed, same as wire manufactures of, not specified, 30 per cent; indiom, free; isinglass, 20 per cent; ivory, manufactured, 10 per cent; ivory nuts, or vegetable ivory, 10c per cent; ivory, vegetable, manufactnres of, jalap, 10 per cent; japanned wares, 20 per cent; jellies, 30 per cent; jet, 30 per cent; jewellery, real or false, 25 per cent; juniper berries, 30 per cent; junk, old, free; jute, manufactured, 15 dols per ton; jute butts, 5 dols per ton; jute, cotton bagging, valued at less than 10 per square yard, 1c per lb; jute, cotton bagging, over 10c per square yard, 5c per lb; jute yarns, 1c per cent; jute, all other manufactures, 20 per cent; kaleidoscopes, 30 per cent; kaerossene and all coal oil, 10c per gal; koupos, 10 per cent; kirschenwasser, 50c per gal; knives, 30 per cent; lac dye and spirits, free; lace, gold or metal, 30 per cent; lace, cotton, coloured, 30 per cent; laces, thread, and insertings, 20 per cent; lampblack, 20 per cent; lard, 2c per lb; lastings, in stripes or patterns for shoes, &c., and buttons, exclusively, not combined with india rubber, free; laths, 20 per cent; lead, acetate of, 3c per lb; lead, chromate of, 3c per lb; lead, in pigs, bars, 1 dol 50c per 100 lbs; lead, manufactures of, not otherwise provided for, 30 per cent; lead, nitrate of, 3c per lb; lead, old scrat, 1c per lb; lead pencils, 30 per cent; lead, in sheets, 2 dols 25c per 100 lbs; lead, sugar of, 3c per lb; lead, white, dry or ground in oil, 2 dols 25c per 100 lbs; lead, red, 2 dols 25c per 100 lbs; leaf, gold and silver, 20 per cent; leather, sole and band, 30 per cent; leather, manufactures of, not otherwise provided for, 30 per cent; leather, tanned calf skin, 25 per cent; leeches, free; lemon juice, 10 per cent; lemons, 20 per cent; lignumvitæ, free; lime, 10 per cent; lime, borate of, 10 per cent; lime, sulphate of, free; lime juice, 10 per cent; limes, 20 per cent; linen, embroidered, 30 per cent; linens, composed of flax, jute, or hemp, valued at 30c and under per square yard, 25 per cent; linen, above 30c per square yard, 30 per cent; linseed, per bushel of 52 lbs, 16 cents; linseed oil, 20c per gal; liquorice, paste or juice, 5c per lb; liquorice root, 1c per lb; liqueurs, 50c per gal; listings, woollen, 20 per cent; litharge, 1½c per lb; loaf sugar, 4c per lb; logwood, extract of, free; maccaroni, 30 per cent; mace, 25c per lb; machinery, exclusively designed and imported to manufacture flax and linen goods, free; mackerel, 2 dols per bbl; madder, extract of, free; madder, ground or prepared, free; madder, Indian, free; Madeira wines, 50 per cent; magazines, printed books, &c, 15 per cent; magnesia, 20 per cent; magnesia, carbonate of, 30 per cent; mahogany, manufactures of, 30 per cent; mahogany, unmanufactured, free; malt, 20 per cent; manganese, 10 per cent; manna, free; manures, substances for, free; manuscripts, free; maraschino, 50 per cent; marble, in rough slabs or blocks, 30 per cent; marble, manufactures of, 30 per cent; marble busts, free; mats, cocoa-nut, 20 per cent; mats, rugs, screen, covers, bedside, and other portions of carpets pay the same as carpets; matting, Chinese and other, 20 per cent; mattresses, 20 per cent; meats, prepared, 30 per cent; medals, free; medicinal preparations, not specified, 30 per cent; medicinal roots, leaves, gums, &c., crude, 20 per cent; melado, concentrated, 2c lb; mercurial preparations, 20 per cent; metal, Dutch and bronze, 10 per cent; metallic pens, 30 per cent; metals, unmanufactured, not specified, 20 per cent; metal, yellow, free; mineral, blue, free; mineral and bituminous substances, crude, not specified, 20 per cent; mineral waters, 20 per cent; mitts, made on frames, not specified, 20 per cent; mixed materials, manufactures of cotton, silk, worsted, &c., not specified, 30 per cent; mohair, manufactures of, 30 per cent; mohair cloth, silk twist, for making shoes, &c., in slips and patterns, not with india rubber, free; mohair, unmanufactured, see hair; molasses, concentrated, 2c per lb; molasses, 5c per gallon; mosaics, set in metal, 25 per cent; mosaics, not set, 5 per cent; moss for beds, 20 per cent; moss, Iceland, 10 per cent; muffs,

fur, 30 per cent; muriate of ammonia, 10 per cent; muriatic acid, free; muscovado sugar, 2c per lb; musical instruments, 20 per cent; music, 10 por cent; munjeet, free; muskets, 30 per cent; mustard, ground, 20 per cent; myrrh, free; nankeens, imported direct from China, same as cottons; nankeens, not imported direct from China, subject to regulations on cottons; nankeen shoes, 30 per cent; natron, free; needles, 20 per cent; needles, crochet, 30 per cent; nets, fishing, 6c per lb; nickel, free; nitrate soda (refined), 10 per cent; nitrate soda (crude), free; nutria skins, undressed, 10 per cent; nut galls, free; nutmegs, 25c per lb; nuts, not otherwise specified, 2c per lb; nuts, for dyeing, crude, free; oakum, free; oats, 10c per bushel; oatmeal, 10 per cent; ochres, not otherwise specified, 35c per 100 lbs; ochres, ground in oil, 1 dol 35c per 100 lbs; oilcloths for floors, stamped, painted, or printed, valued at 50c or less per square yard, 20 per cent; oilcloths for floors, at over 50c per square yard, 30 per cent; oilcloth, not otherwise provided for, 30 per cent; oil, kerosene, 10c per gallon; oil, spermaceti, whale or fish, of American fisheries, free; oil, spermaceti, whale or fish, of foreign fisheries, 20 per cent; oil, hempseed, linseed, flaxseed, and rapeseed, 10c per gallon; oil, neatsfoot and animal, 20 per cent; oil of vitriol, free; oil, olive or salad, 30 per cent; oil, palm, seal, and cocoa nut, 10 per cent; oils, volatile, essential or expressed, not specified, 20 per cent; oil, cloves, 70c per lb; oil, olive, in casks, not salad, 10 per cent; olives, 30 per cent; opium, 1 dol per lb; oranges, 20 per cent; orpiment, free; orris root, free; manufactures of, not specified, 30 per cent; oxalic acid, 10 per cent; pack thread, linen, not otherwise specified, 30 per cent; paddy, ½c per lb; paintings and statuary, not otherwise provided for, 10 per cent; paintings and statuary, production of American artists abroad, not for sale, free; paintings on glass, 30 per cent; paints, dry or ground in oil, not otherwise specified, 20 per cent; palm leaf, manufactures of, not otherwise provided for, 30 per cent; palm leaf, unmanufactured, free; palm oil, 10 per cent; paper boxes, 30 per cent; paper hangings, 30 per cent; paper, not provided for, 30 per cent; paper sheathing, 10 per cent; papier mache, 30 per cent; parasols, 30 per cent; parchment, 30 per cent; Paris white, any, 35c per 100 lbs; Paris white, ground in oil, 1 dol 30c per 100 lbs; paving stones, 10 per cent; paving tile, brick, not otherwise provided for, 20 per cent; mother of pearl, free; pearls, not set, 5 per cent; pearls, set in metal, 25 per cent; pencils, lead, 30 per cent; pencils, red chalk, 30 per cent; pencils, slate, 30 per cent; pepper, 6c per lb; perfumes, 30 per cent; Peruvian bark, 15 per cent; pewter, manufactures of, 30 per cent; pewter, old, 1c per lb; pickles, not otherwise provided for, 30 per cent; pig iron (see iron); pimento, 6c per lb; pineapples, free; pipeclay, dry, 35c per 100 lbs; pipeclay, ground in oil, 1 dol 35c per 100 lbs; pipes, leaden, 1½c per lb; pipes, iron (see iron); pitch, 20 per cent; plaits for bonnets, 30 per cent; planks, 20 per cent; plantains, 20 per cent; plants, dye, free; plaster of Paris, ground, 10 per cent; plaster of Paris, unground, free; plaster of Paris, calcined, 20 per cent; plated ware, 30 per cent; platina, manufactures of, 30 per cent; platina, manufactured, free; platina vases or retorts, free; playing cards, 30 per cent; plumbago, 10 per cent; plums, 5c per lb; plush for hatters, 20 per cent; pocketbooks, 30 per cent; polishing stones, free; porcelain ware, 30 per cent; porter in casks; porter in bottles; port wine, 50 per cent; potash, chromate and bichromate of, 3c per lb; potash, prussiate and hydriodate, 15 per cent; potash, crude, nitrate of, free; potash, nitrate of, refined, 10 per cent; potash, refined and pearls, 10 per cent; potash, crude, free; potassium, 15 per cent; potatoes, 10c per bushel; poultry, prepared, 30 per cent; precious stones, not set, 5 per cent; precious stones, real or false, set in metal, 25 per cent; prunes, 5c per lb; Prussian blue, 10 per cent; prussiate of potash, 15 per cent; pulverised sugar, 4c per lb; pumice and pumice stone, free; pumpkins, 10 per cent; putty, 1c per lb; pyrolequious acid, free; quassia wood, free; quicksilver, 10 per cent; quilla bark, free; quills, 20 per cent; quinine, 30 per cent; rags, of whatever material, 10 per cent; raisins, 5c per lb; rapeseed, per bushel, 52 lbs, 10c; rapeseed oil, 20c per gal; rattans and reeds, manufactured, 20 per cent; rattans and reeds, unmanufactured, free; raw hides, 10 per cent; raw sugar, 2c per lb; red chalk, free; red chalk pencils, 30 per cent; red precipitate, 20 per cent; red lead, dry, 1½c per lb; rosins, crude, used like opal, 10c per lb; rhubarb, 10 per cent; rice, clean, 1c per lb; rice, unclean, ½c per lb; rifles, 50 per cent; Rochelle salts, 10c per lb; Roman cement, 20 per cent; Roman vitriol, 20 per cent; roofing slates, 30 per cent; roofing tiles, 20 per cent.; rosewood, manufactures of, 30 per cent; rosewood, unmanufactured, free; rotten stone, free; rubies, not set, 5 per cent; rubies, set in metal, 25 per cent; rye, 15c per bush; rye flour, 10 per cent; rum, first proof, 40c per gal; rum, second proof, 43¼c per gal; rum, third proof, 47c per gal; rum, fourth proof, 48¾ per gal; rum, fifth proof, 56c per gal; rum, under first proof, 40c per gal; rum, bay, 25c per gal; rum, cherry, 50c per gal; saddlery, common, trimmed, or japanned, 30 per cent; safflower; saffron, 10 per cent; sail duck, 25 per cent; salad oil, 30 per cent; sal ammonia, 10 per cent; salmon, pickled, 3 dols per barrel; salmon, preserved, 30 per cent; sal soda, ½c per lb; salt, in bulk, per bushel, 58 lbs, 12c per 100 lbs; salt, in bags, 18c per 100 lbs; saltpetre, crude, 1c per lb; saltpetre, refined, 2c per lb.

[TO BE CONTINUED.]

Agriculture.

EXPERIMENTAL AGRICULTURE.

All farmers are to a great extent experimental agriculturists. And it requires some period of occupation before a farmer is sufficiently acquainted with the peculiarities of situation and climate, and the special capacity or defects of the soil, to be able to farm in the most advantageous manner. And there can be no doubt that intelligent and observing farmers are eble to communicate various facts and circumstances which may serve as data for more strictly scientific deductions. It is probable, however, that the range of subjects on which any one farmer can afford such data is very limited, and that for general or scientific purposes, the experiences and observations of many farmers must be resorted to. But what is generally known as experimental agriculture is a very different matter. Precisely measured results are to be derived from well prepared and long continued operations conducted under conditions carefully ascertained and accurately recorded. That is not the work of a farmer. It will occupy too much time and it won't pay.

Societies, wealthy proprietors, or persons who can turn the knowledge attained by such experiments to profitable account as manure manufacturers or otherwise, are practically the only sources from which we can expect strictly experimental agriculture. Still farmers might, by recording their experience as to certain specialties, for which their farms are peculiarly suited, or to which they may have turned particular attention, aid and supplement the efforts of the strict experimentalist, and so contribute greatly to scientific knowledge in connection with husbandry.

In this view, a lecture recently delivered by Professor Anderson, of Glasgow University, on "Experimental Agriculture," merits attention as practical and discriminating. Reliable experiments in agriculture are of modern date. Those of past times went to work empirically, and attained such knowledge as they evolved with a vast expenditure of labour, or they were led away by preconceived notions, under the influence of which facts were disregarded. In modern experiments, definite laws, formed on a careful and minute study of known facts and on inquiries into the causes on which they depend, are sought for as essential guides to the experimenter. The more scientific form which agricultural knowledge has of late taken is fully recognised by our best farmers. Farmers have shown a keen desire to accommodate themselves to changes indicated by scientific inquirers. We agree with the Professor that "the farmer has shown a remarkable alacrity in suiting himself to the altered position of his art, and has given a practical refutation of the popular opinion, which pictures him as a man obstinately wedded to old ideas, slow to move, of retrospective rather than of prospective tendencies, and more ready to till his fields as his father did before him, than to adopt any novelty.....They readily, sometimes perhaps too readily, adopt every new suggestion, are always prepared to unite in the prosecution of experiments, anxiously and carefully canvass the mode in which they should be conducted, criticise the result, and endeavour to have the causes of the discrepancies which he may encounter explained, so as to make them the starting point for new experiments." This description is perhaps more generally applicable to the Scotch than the English farmers, though there are very many amongst the latter to whom it very justly applies. And the difference is more attributable to the landowners than to the English farmers, the mismanagement of English estates being such as very generally to prevent the farmers having such secure possession and liberty of action as will justify them in adopting the highest efforts of agricultural skill. Mr Anderson had found the comparison of experiments made by different persons not altogether satisfactory, for it showed that "the number of experiments in which all the necessary data had been determined was fewer than might be supposed, and that in many cases the experimenters had not been fully alive to all the minutiæ which go to the performance of a really good experiment." The farmer seeks to ascertain how he can most economically and profitably cultivate his own farm, and the more general questions of agriculture will assume in his eyes only a secondary importance. But if an observant man, he will find many points which occur in his practice worthy of consideration; and by a comparison of his own products from the use of any manure, or from the adoption of any special practice, with those of his neighbours by similar means, very valuable knowledge of a general character may be obtained. The establishment of general principles is the most important aim of agricultural experiments; but from the very nature of such experiments a mass of facts must be accumulated before any safe conclusions can be drawn. Many of these facts farmers can supply. It is of the first importance that whoever undertakes to experiment should have a definite object in view; he should study prior experiments of a like nature recorded in agricultural publications; and he should not undertake too much. "He should bear in mind that the most important part of his experiments, and that which more perhaps than any other requires his personal superintendence, namely, the weighing of the crop, must take place at harvest time, when he himself and his men are all

most busily occupied, and when it is difficult to find hands to do what is absolutely required. What can be done at spring-time is not so easily accomplished in autumn; and the risk is that the weighings are slurred over, and the experiments become valueless, or, what is worse, misleading. The most common error is to undertake too much. The experimenter sees that there is scarcely a branch of agriculture in which there is not room for work, and feeling interest in several points he seeks to arrange his experiments so as to include as many as possible, and he either breaks down or renders his results indefinite and unsatisfactory. He may rest assured that one good experiment is worth a hundred indifferent ones, and that it is best in every way for him to concentrate his energies on a limited field."

This is especially applicable to farmer experimenters. Some idea of the trouble and cost of very precise agricultural experiments may be gathered from the following. Mr Anderson says:—"The size of the plots may be very moderate, provided the experimenter is careful, and the soil has been proved to be of uniform quality, and thus preliminary experiments extending over a year or two, made with the express intention of establishing this point, may in the long run be the source of material economy. When the plots are small, the chief direction in which risk of error is to be encountered lies in the necessity for more careful measurement, and in the chance of the manures being mixed at the edges of the adjoining spaces, or the roots of the crop passing over and taking advantage of the manure not intended for them. These sources of error must exist in all experiments, but where the breadth of land on which they are made is considerable, they become so small as to be quite insignificant, although when the plots are small they become of serious magnitude. They may however be altogether avoided, provided care be taken not to place the spaces in immediate contact with one other, but to have a narrow strip of unmanured land between each. If this precaution be observed, there is no reason why very moderate plots might not be employed, and it is perfectly possible that the results obtained with proper care from a sixteenth of an acre might greatly exceed in accuracy and value those from a whole acre in which these minute points have not been attended to. Whatever quantity of land may be given to each plot, it is of the utmost importance that the entire produce obtained from it should be weighed. It is not an uncommon practice for experimenters, after taking considerable plots, to weigh the crop obtained from a part of them only. Thus, for example, if it be turnips, to measure off a certain length of drill in each case, and weigh the produce of it only, but it never should be forgotten that when this is done, whatever may be the breadth of land manured, the *experiment* is made only on that portion of which the crop was weighed. It is very difficult to fix definitely the size of the plots which should generally be adopted. From a quarter of an acre to half an acre may, however, be mentioned as convenient quantities, although there is no reason to doubt that an eighth or even a sixteenth of an acre may be employed, provided the precautions already mentioned be attended to."

The soil should be analysed, though the Professor admits that "our knowledge of the chemistry of the soil is still very imperfect, so much so, indeed, that it is often impossible to derive any definite conclusions from it;" and that in the present state of scientific agriculture "it would be infinitely preferable to endeavour to obtain more information regarding the meteorology of the season in which the experiments are made, and more especially to determine the amount and distribution of the rain fall." This last is a good suggestion, for the season, after all, has more to do with the crop than all else.

Literature.

COMMERCIAL LITERATURE.

VOYAGE AUX PROVINCES BRESILIENNES DE L'AMAZONIE EN 1860. By M. Belmar. London: W. W. Trezise, Beech street, Barbican.

THIS work gives a sketch of the provinces of Brazil bordering upon the Amazon, and gives a more favourable account of their present condition than is generally believed to be the case. M. Belmar does not write with a view to amuse, but is anxious to promote emigration from Europe, especially of Swiss and Germans, for whose enterprise he considers an ample field is open in these countries.

GAS LEGISLATION, being a Copious Index to the Metropolis Gas Act, 1860, with a Commentary on the Act, and Observations on Recent Gas Legislation. By SAMUEL HUGHES, F.G.S., Civil Engineer. London: Waterlow and Sons.

THE above is a compendious work on the legislation respecting gas, and especially examines the Act of 1860. The book will be found useful by way of reference. The strictures of Mr Hughes upon the inaction shown in carrying out some of the most useful provisions of the Sale of Gas and Metropolis Local Management Acts are unfortunately fully warranted by the facts.

LONDON SEWAGE AND THE THAMES-EMBANKMENT. By TELFORD MACNEILL, C. E. London: John Weale, High Holborn.

THIS pamphlet contains "a plan for carrying off the London Sewage without pumping and without low-level sewers through the City and Southwark, and for a Thames Embankment unencumbered with a sewer passing through it." The principles upon which it is based are alleged to differ from any which have yet been made public, but to describe them fully would occupy more space than we can afford. The *primâ facie* appearance of the plan, however, seems practical enough.

GENERAL LITERATURE.

PORT-ROYAL: a Contribution to the History of Religion and Literature in France. By CHARLES BEARD, B.A. Longman, Green, Longman, and Roberts.

SOME apology might perhaps be needed for our backwardness in noticing this work, if it were one of those that, relying upon novelty or the fickle breezes of fashion and public feeling, seek for immediate popularity. A standard work, however, such as Mr Beard's "Port-Royal," that deals in a way worthy of its subject with an historical epoch of much interest, rich in characters of rare worth and genius, many of which have left a permanent mark upon the history and literature of their country, can suffer no loss from the delay of a few weeks, while our first estimate of its value is only increased by a more leisurely consideration of its merits and defects. Mr Beard has undertaken to illustrate a little-known but very interesting period in French ecclesiastical history, and he has done it well and thoroughly.

At first sight, the story of a brief controversy, involving, outwardly, the fate of merely one religious community, and turning upon such obscure points and verbal quibbles as those which, on the surface, determined the heresy or orthodoxy of Port-Royal, would seem an ungrateful indeed, but scarcely a difficult or extensive task. It is not until we see how deeply the roots of this controversy had spread, how widely the teaching of Port-Royal had penetrated all classes in France, and how powerful its results were over the social life and literature of the period, that we can rightly appreciate the difficulty of weaving into one connected and luminous narrative the tangled mass of doctrinal controversy, of political cabal, of ecclesiastical jealousies and intrigues, and of curious and varied personal histories centering round Port-Royal, that make up the ample but undigested materials upon which our author had to write. To clothe the dry bones of the Jansenist controversy and make them live again in the forms of the pious and sober-minded men and women who fought out a protestant fight in the heart of the Catholic Church,—to hold up piety and the beauty of holiness to our admiration, though found in the midst of what we must esteem as false ideas of duty and untrue representations of religion,—to show the unity of Christian faith among widely divergent forms;—these are some of the aims Mr Beard has set before himself in writing this "Contribution to the History of Religion and Literature in France."

It was a saying of M. Royer-Collard that "he who knew not Port-Royal knew not humanity." This is bold praise; yet its very exaggeration exemplifies one of the most remarkable features in that remarkable community—the unbounded, enthusiastic love and admiration which it kindled in the minds of men of undoubted talent and power of mind, and of the most divergent characters; and it is true to this extent,—that he who has not made acquaintance with Port Royal and its band of high-minded, simple-hearted nuns and devoted recluses, has not seen human nature under one of its most attractive, as well as one of its loftiest aspects. Mr Beard deserves the thanks of every thoughtful mind for having brought within reach of every one a history which before the appearance of his book could only be collected from the study of foreign memoirs, or from fragmentary and scattered writings in our own tongue. The earliest and most complete of these latter was Mrs Schimmelpenninck's "Memoirs of Port-Royal,"—an excellent work of its kind, but slight in structure, not embracing above half of the wide ramifications of the theme, and devoted almost exclusively to the devotional aspect of the subject. The most brilliant is the Essay upon Port-Royal contained in Sir James Stephen's Biographical Essays; but its very title shows the narrow limits within which its life-like delineations are prescribed. These sketches rather excite than feed our appetite for knowledge about the striking events and celebrated characters of which they treat. Mr Beard has given us ample satisfaction in his elaborate, conscientious, yet amusing volumes. If in the wide range of his topics and in the almost infinite variety of characters that throng his pages he has now and then repeated himself, and from time to time seems to hold the connecting thread with a slacker grasp, it is only what was reasonably to be expected, and may readily be overlooked in the general clearness, fullness, and homogeneousness of his work.

Satisfactory on the whole as we consider his historical narrative to be, we consider Mr Beard's *forte* is in the biographical side of his subject. The sketches that are interspersed of the life and characters of the actors in the religious tragedy of Port-Royal are excellent. No one, we feel sure, could read the chapters devoted to Pascal, Racine, St Cyran, or the four Jansenist Bishops of Alet, Beauvais, Angers, and Pamiers, without deep interest, and a sincere admiration for men of such supereminent goodness, piety, and in-

tellect, and for the writer who can so faithfully reproduce their images. In depth of spiritual life and in the extent of his influence over others, St Cyran reminds us forcibly of Fenelon; but his nature was cast in a stronger mould, the storms of persecution left him unbent, and to the last he continued the steady opposition to the Jesuits that brought upon him many years of harsh imprisonment, and upon his spiritual children—the nuns of Port-Royal—destruction of their existence as a community, and great and long-protracted individual persecutions.

We cannot refrain from extracting a part of Mr Beard's sketch of St Cyran, since he in truth furnishes "an admirable example of what the Roman Catholic Church can do in building up the saintly character"; though the number and enticingness of the passages we have marked for extract make it difficult to choose those most suited to our limited space.

He was a man of few words; incapable of "wearing his heart upon his sleeve," hiding himself and his truth from all but a chosen circle of disciples. He thought that if he had his life to live again he should spend it all in solitude and prayer. We have seen how careless he was of literary fame: if God could be served by a book, what matter who was the human instrument of grace? Even in writing, he thought that purity of heart was more important than elegance or force of style; though force could never be wanting to one who wrote with such solemn earnestness of purpose. "The least cloud," he said, "which is in our heart, will spread itself over our paper, like an evil breath, tarnishing the brightness of a mirror; the slightest ailment (*indisposition*) of our spirit is like a worm which will pass into our book, and gnaw the hearts of those who read it to the end of the world." There was something of Spanish reserve in him; and the pride against which he fought in himself, broke out in his high conceptions of the dignity of the priesthood. And so it is almost wonderful that men loved not less than they revered him; that his power of subjugating hearts was as great as his ability to command admiration. Yet if cold and haughty to the world, and especially to the great, to his friends he was all tenderness and moderation.

Mr Beard opens his history with the foundation of Port-Royal in 1204. Various derivations have been found for the name; the most probable is that which traces it to the word Porra or Borra, a corrupt Latinism "meaning a hole covered with brambles and partly filled with stagnant water." Like many another conventual houses, it owed its origin to the Crusades. A lord of the house of Montmorenci went to the Holy Land, and the convent rose as an offering to Heaven in his behalf. Its history presents a gradual decline from the early simplicity of its rule till, by an ecclesiastical "job," the abbatial sceptre passed into the hands of a girl of eleven. This event, which seemed calculated only to hasten its degeneracy, was to prove the beginning of that rule which raised Port-Royal into a model for all conventual houses in the fervour of its piety, the strictness of its discipline, and the extent of its charity and good works. Yet the young Abbess had no calling for the conventual life. She had in her early youth been tempted by the promise that "she should not be a simple nun, but abbess and mistress of all the rest," to give her consent to her parents' arrangements for her future. Her love of rule and energetic spirit made her desire command even if it were within convent walls; and the future Mère Angelique spoke out in the little Jaqueline Arnauld when she exclaimed, "I *will* be Abbess, grandpapa, and will take care that my nuns do their duty."

The discipline of Port-Royal was at the time of her instalment as Abbess lax enough, yet she found the first few years almost insupportable, and even meditated a flight to her Huguenot relations at Rochelle as the only escape from the completion of her vows, until deterred by the consideration of the misery and disgrace she would bring upon her parents by such a step. She, therefore, acquiesced in her fate; employed her time in the amusements of dress, novel reading, masquerades, &c., in which this, comparatively, well-ordered convent did not hesitate to share, and cultivated at more serious times a naturally solid understanding and great powers of mind by graver works, among which her favourite was Plutarch's Lives. The chance preaching of a Capuchin monk gave an awakening stimulant to her religious feeling, and the depth and earnestness of her nature made it impossible for her to relapse into indifference, or rest content with mere impressions. A thorough reform of her convent,—a rigid adherence to the primitive seclusion, self-denial, and poverty of their order,—was the gradual result. In nothing was the true womanly gentleness and more than womanly strength of her character more fully shown than in the way in which she won over her reluctant nuns to an entire and hearty adoption of her own higher views of the monastic life; unless, indeed, it be in that touching scene between herself and her family, when, in completion of her vow of seclusion, she refused to receive them any longer within the convent walls, or to hold intercourse with her father and brothers excepting through the convent grate. In the whole course of history we shall find no nobler or more admirable woman than La Mère Angelique. Many of the nuns and abbesses of Port-Royal are remarkable for piety, earnestness, strength in keeping hold on their conceptions of truth through every trial, and gentleness in maintaining them; but none, not even her sister Agnès or her mère Jacqueline, or the fervent sister of Racine, come up to the height of this first and most deeply-loved and revered Abbess. Her influence over the minds of the ladies of the profligate Court of Louis the Fourteenth was almost as great as that of St Cyran over his wider range of followers; and curious it is to see how this poor and pious community became the haven most desired and sought for by those who were richest in all that the world holds as the blessings of life. The saying of Sister Agnès of St Theckla, that she had "often felt confusion in reading that scripture, 'Behold, we have left all and followed thee,' thinking that that she had left nothing, except wealth, and a title, and the luxuries of life, *which are nothing*, whilst, on the other hand, she had gained in that monastery everything," was no overstrained expression of a momentary exaltation of feeling, but the settled and peaceful conviction of numbers who found within its walls the realisation of their highest ideal, and protection from the temptations of a dissolute age. In its own time and place Port-Royal worked a good work. We may dissent from its views of the highest duties of life and from its form of religious expression; we may congratulate ourselves upon having a purer faith, and a wider and truer conception of the sacredness of human relations and of the common life of every man; yet we cannot but feel, as we close these volumes, that in the fervent faith, the boundless charity and self-denial, the humble piety of their simple views, there lay a regenerating life, and a deep spiritual influence of which we too feel the power, and from which we may learn in what genuine Christianity consists, by our own widened charity with all diversity of forms of belief, and our increased sensibility to the bond of union that underlies them all.

If from the nuns of Port-Royal we turn to the band of recluses who loved to shelter themselves under its walls, even while they were its chief bulwarks of defence against the attacks of the Jesuits and the Papal Court, we are led into a wide field of stirring political life, polemic conflict, and literary achievements. The names of Pascal and Racine alone are enough to make Port-Royal immortal; although it must in justice be said that Port-Royal did its best to stifle the genius of the latter, and by the narrowness of its bigotry on this point probably deprived the world of a few more such tragedies as the Iphigénie and the Phèdre. Arnauld himself confessed the sound morality of Racine's plays, but the stage was an offence and a stumbling block to the recluses as well as to the nuns, and the reconciliation of Racine with his earliest instructors was sealed by its complete renunciation. Mr Beard gives a pleasant picture of the tender friendship that united Racine and Boileau, and draws a striking comparison between their characters, the direct opposites of each other in their strength and in their weakness. His explanation of the circumstances of Racine's death is more satisfactory, and more honourable to his memory than the usual version that he died of a King's frown would lead one to expect, considering that the charge was substantially true. Boileau himself carried the news of his death to the King, who well knew the merits and deep attachment of the servant he had lost. "Louis was very gracious, and begged the poet to remember that he had always an hour a week to give him if he felt disposed to come to Versailles. But the heartless way in which the King received his tidings was too much for him; he never went to Court again; 'What shall I do there,' he would say; I can praise no longer."

It would be vain even to attempt to do more than ennumerate the learned and famous men that honoured Port-Royal with their friendship, and received from her, as they gratefully owned, more than they conferred. The enumeration even is futile, since they are too well known to need it. The grammars and logic of Port-Royal, the Moral Essays, the Ecclesiastical History, the Provincial Letters have given a wide renown to the name of Arnauld, Nicole, Lancelot, Tillemont, and Pascal. Yet, as Mr Beard remarks, "In truth, Port-Royal is not philosophical. Arnauld has a name among metaphysicians, Nicole among moralists, Pascal among religious philosophers; but the speculations of the three could not be united into one accordant whole; and no one of them was Port-Royalist on his philosophical side. St Cyran, Singlin, De Saçi, are, after all, our most characteristic figures; and the Bible and St Augustine, not Aristotle and the schoolmen, are the fountains of their wisdom." Still, while we own that the narrrow theology of Port-Royal acted in some degree as fetters upon their philosophical and intellectual powers, yet we fully agree with Mr Beard that "it was a happy chance—if such a word is not inapplicable—which grouped all the French Jansenists round the Cistercian Monastery of Port-Royal"; and presented us with the singular spectacle of a few weak women, professed nuns and attached children of the Church, standing up against Papal decrees and Court persecutions, and supported in their independent attitude by a company of recluses, bound by no monastic rule, though observing more than monastic strictness of life, and developing in the heart of the Catholic Church the distinctive doctrines of Calvinistic theology. We cannot wonder that she should rise up to destroy a movement which, in its essence, and divested of outward points of dispute, was a protest against her doctrine of celibacy, her scheme of theology, and the infallibility of her decrees.

We will conclude this notice, brief and imperfect as it must necessarily be, with an extract which will show both the method of Port-Royal in dealing with its penitents, and Mr Beard's easy and agreeable style in the relation of its history:—

It is noticeable how the Bishop of Alet, in common with the school of Jansenist theologians, to which he at this time unconsciously belonged, upheld, in dealing with such a penitent as the Prince de Conti, the claims

of common every-day morality. He would not suffer him to fly to a cloister and attempt to atone for profligacy by austerity. He withstood his desire to resign the government of Languedoc, and taught his penitent that a wise and righteous administration of public affairs, not a faithless abstinence from them, was the best sacrifice which a Prince could bring to God. He exacted from him hard and humiliating proofs of sincerity: to one gentleman of Bordeaux the Prince restored a great sum of money; of another he humbly asked pardon for having seduced his wife. When the Princess received her share of Mazarin's vast inheritance, she and her husband wished to employ the ill-gotten wealth in one splendid act of ecclesiastical munificence. There was a plan for building and endowing a costly church on the domains of Conti, another for founding a convent of Carmelite nuns, where the Princess might retire from time to time for religious meditation. But Pavillon also had his scheme. He held the Prince directly responsible for the wretchedness caused by the civil war, and asked of him an account of all the Church revenues which he had received and squandered. Now there was an opportunity of restitution. But he did not think promiscuous almsgiving enough, however lavish it might be; he proposed to the Prince to inquire through the Province of Berri for the families which had suffered most in the war, and to cause restitution to be made from house to house. The Princess at first rebelled against a plan which was not only unattractive to the imagination, but involved something of humiliation with its munificence. Presently she gave way; as one who yields rather to sincere conviction than to the will of a director. Fontaine tells an anecdote of her widowhood which illustrates her renunciation vow. De Saçi had inculcated upon her the necessity of almsgiving with reference to some occasion of great public misery, and she, "having a pearl necklace of admirable beauty and very great value, as soon as she was informed of the wretchedness of the poor, deeming this string of pearls a superfluity, sacrificed it to help them. It is true that as she gave it, and looked at it for the last time, she heaved a little sigh, but her faith soon smothered it and remained victorious over nature." Her weak and pliable husband, on the contrary, was incapable of choice when under the control of a stronger will than his own. He would go any lengths in virtue as in vice, and for the same reason. An amusing story has been preserved to the effect that his boys in reading the Old Testament with him, always passed over the story of the sacrifice of Isaac. "Our father is so good," they said, on being asked the reason, "that if God demanded it of him he would do with us as Abraham did with Isaac. So we keep that from him."

BLACK'S PICTURESQUE TOURIST OF SCOTLAND. Fifteenth Edition. Adam and Charles Black, Edinburgh.

WHERE SHALL WE GO? A Guide to the Watering Places of England, Scotland, and Ireland. A. and C. Black, Edinburgh.

THESE are two capital guide books. The fulness of its information, the judicious selection of traditions and historical facts associated with the places described, and the extremely pretty engravings by which it is profusely illustrated, make the first almost as attractive to the stay-at-home, as it is valuable to the *bona fide* traveller. The second is slighter in its nature, but equally complete in all essential points. It will be found particularly useful to those who wish to arrange their autumn residence with especial reference to health. It includes Wales within its circuit of watering places, and, like the "Picturesque Tourist," is amply supplied with maps.

OUR DOMESTIC ANIMALS IN HEALTH AND DISEASE. By JOHN GAMGEE, Principal of the New Veterinary College, Edinburgh. Parts 2nd and 3rd. Hamilton, Adams, and Co.

This seems a very able and reliable work on the diseases of domestic animals, and their proper mode of treatment. Mr Gamgee evidently knows his subject thoroughly and practically. His book will, when completed, be a valuable acquisition to the farmer, stock-keeper, and to all owners of domestic animals. The symptoms of disorder are carefully described, and the remedies prescribed, without too much technical phraseology.

THE COSMOPOLITAN REVIEW. A Political, Social, Philosophical, Scientific, and Literary Magazine. F. Pitman, 20 Paternoster row.

THIS review is certainly *sui generis*. Among the shoals of periodicals that crowd our tables, none are likely to contest its ground. Its aim is nothing less than the regeneration of the world. It calls upon its supporters to cast away such narrow virtues as patriotism, and respect for human, man-made laws; to regulate their lives by universal law; and to join in setting right a disjointed world by the well-known panaceas of universal suffrage, the ballot, and international exhibitions. America will perhaps serve to show us the value of the first two remedies; while the European war that followed close upon 1851 may seem to prove that the most successful exhibition of the industry of nations will not prevent their going to war with one another. One writer indeed presents us with a singular view of the triumph of cosmopolitanism. "When cosmopolitanism shall have planted its unwavering banner, when the flag of peace shall float calmly on the English staff, amid the wars and struggles of contending nations, then will its people rejoice in the fulness of joy, and prosper in the placid glories of repose; not so if feelings of separate nationality step in at every march of progress, and raise a bar of advancement." It would seem, then, that to be cosmopolitan it is only necessary "to rejoice with the fulness of joy" over the misfortunes of our neighbours. Wilder views and weaker writing we have seldom met with in any review; and if it has reached its seventh number, we scarcely think it will bear out the congratulations of its editor by ripening into a more mature age.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The announcement made by M. Michel Chevalier, in his very excellent speech in the Social Science Association, that a treaty of commerce is about to be concluded between France and the new kingdom of Italy, has caused considerable satisfaction here,—and all the more from the fact that only a few days back the official *Moniteur* affirmed, in somewhat tortuous terms, that no negotiations for a commercial convention had been entered into with Italy, and that none were to be commenced until the country should become more settled. When Italy shall have a treaty with France, she will of course enter into one with England; that is, if the latter should think one desirable.

It was stated in a recent letter that the shipowners were making a great clamour against a decree of the 24th June relative to the import of sugar, and especially against a stipulation in it for allowing foreign vessels the drawback on the export of refined sugars, which had previously been reserved exclusively to exports by French vessels; but the opinion was expressed that the Government would not materially modify the decree. The following paragraph, translated from a Bordeaux paper, corroborates that opinion:—"The delegates of the Chamber of Commerce who were sent to Paris to present the objections of the shipowners of Bordeaux to certain stipulations of the decree of the 24th of June have returned, after having had an interview with the Minister of Commerce. They state that if any modifications should be made in the measure which has excited alarm among the shipping interest, they will be far from what is desired."

The changes which have just been made in the tariff of the United States are, of course, of grave importance to this country. Next to England, it is to the States that France sends the greatest part of her productions; nay, there is even good reason for believing that it is to them that in reality she despatches more than to England, inasmuch as a very considerable portion of what is set down in Customs returns as for the latter, really goes there only to be forwarded to the States. The "actual value" of articles of French production which Customs returns represent to have been exported to England in the year 1859—the latest date of which detailed accounts have been published—was 591,277,018f; whilst the exports to the United States by the Atlantic Ocean were in the same year 298,790,705f, and by the Pacific 9,470,848f. The following account of the principal exports to the Atlantic ports may be of interest in presence of the recent tariff changes:—

	Quantities.	Value in Francs.
Silk fabrics, fringes, and ribbons.....kilogs	929,088	136,871,111
Woollen fabrics	991,720	28,243,183
Cotton fabrics.....	401,402	4,431,001
Clothing, and articles in linen.....	158,284	4,232,284
Wines .....litres	19,981,068	28,873,157
Pottery .....kilogs	7,907,465	5,233,108
Prepared skins.....	1,253,703	20,335,983
Spirits .....litres	7,186,882	20,394,375
Madder .....kilogs	3,849,699	6,977,373
Salted fish.....	1,087,772	2,393,099
Soap	1,369,276	1,401,957
Table fruits	2,732,873	3,375,000
Wool	715,984	2,222,336
Haberdashery and buttons	559,390	7,515,907
Hemp and flax fabrics	49,048	1,564,008
Paper and engravings	523,120	1,539,233
Millinery	...	2,093,555
Perfumery	225,145	1,120,725
Tools in metal.....	472,891	2,372,835
Clocks and watches and jewellery.....	...	539,821
Potash	688,868	1,963,961
Turnery.....	138,469	1,151,886
Raw silk	12,135	746,736
Articles de Paris.....	50,392	487,535

The other articles exported were mats of straw and other materials, medicines, cork, musical instruments, colours, straw hats, cheeses, feathers for ornament, hats, needles, millstones, furniture, percussion caps, &c., &c.

The principal exports of French productions to the ports of the Pacific were:—

	Quantities	Value. f
Wine .....litres	2,368,484	3,134,841
Spirits	740,198	2,077,617
Silk fabrics, fringes, and ribbons.....kilogs	9,673	1,375,496
Woollen fabrics, fringes, and ribbons	23,174	646,895
Cotton fabrics, fringes, and ribbons	7,374	81,568
Pottery, glass, and crystal	593,173	276,996
Salted fish	115,737	254,621
Clothing	12,505	348,233
Haberdashery and buttons	16,662	143,220
Millinery	...	105,220

The other articles exported were perfumery, skins, fruit, paper, tools, oil, umbrellas, articles de Paris, medicines, musical instruments, cheese, cork, turnery, &c. &c.

A banker of Neubourg, a small town of the department of the Eure, has just failed for 500,000f.

The monthly Customs returns have been published to-day. For the first time since the great commercial reforms were carried into effect, the import duties show an increase compared with a corresponding period of last year:—thus, in July last, they were 10,362,000f, whilst in July of 1860 they were only 10,205,000f:—they are, however, still considerably below those of July, 1859, which were 17,555,000f. As regards the first seven months of the present year, the import duties were 65,832,000f; same period

last year, 79,387,000f; and of 1859, 112,762,000f. With respect to the *quantities* of goods imported for consumption, it will be seen from the table below that all the principal articles, cotton, coffee, sugar, hemp, wool, cast iron, coal, &c., present a very considerable increase—the best proof that could be given of the excellency of the commercial reforms. As regards the export of French productions, the returns are not favourable.

The following is an account of the principal imports for consumption in France:—

	Seven months of 1861.	Seven months of 1860.	Seven months of 1859.

The following is an account of the markets:—

FLOUR.—The quotations at *Paris*, yesterday, were 76f to 82f the sack of 159 kilogs, and for American, 70f to 73f. Four marks were 78f 50c to 78f 75c for the current month, and for the four last months of the year, 79f 50c to 79f 75c.

WHEAT.—At *Paris*, yesterday, the offers of foreign were so large that prices declined, American being 39f to 42f the sack of 120 kilogs, Baltic 42f to 44f, Dantzic 43f. Of French, the quotation was 45f to 47f and 47f 50c. In these latter, the business done was not important, holders not being anxious to sell. Of the provincial markets, 47 present a rise of 20c to 2f 50c the hectolitre, 25 a fall of from 25c to 1f 50c; 13 are reported firm, 32 without variation, 13 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 1,387 bales, and the arrivals 280. Closing prices remained unchanged, very low New Orleans being 100f, low ditto 113f, and very ordinary ditto 118f the 50 kilogrammes. On the first two days of the week, sales were active, and prices excessively firm. *Yesterday, about 2,500 bales* were sold, and very low New Orleans was 101f; low ditto, 113f to 114f.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 216 sacks Hayti Port-au-Prince, disposable, 77f 40c the 50 kilogs in bond; 800 ditto for delivery, same price; 850 sacks *Gonaives, disposable*, 81f 50c to 82f; 128 ditto for delivery, 82f; 200 Cape, for delivery, 81f; 1,340 Rio, not washed, disposable, 67f to 71f 50c; 1,300 ditto for delivery, 68f to 75f; 3,000 Rio, washed, disposable, 82f; 7,000 Padang, for delivery, 109f; 640 Java, 114f. Some lots of damaged Java were also sold. The arrivals were some casks and about 2,600 sacks. This week, rather large sales have been made: Hayti, 77f to 78f 50c; Cape, 81f 50c; St Mark, 83f; Rio, 63f to 74f; ditto, washed, 85f; Macassar, 105f; Ceylon plantation, 112f; Java, 109f; Mysore, 108f 50c; Ceara, 80f. At *Nantes*, last week, 700 sacks Porto Cabello *grage* went at 85f; 329 ditto not grage, 83f to 83f 50c. This week, some damaged Porto Rico has been sold; also some Porto Cabello at 80f; and some Baly, 102f 50c. At *Bordeaux*, last week, 195 sacks Guayra grage went at 89f and 90f; a lot of Santiago, 91f 50c; one of Caracoly, 109f 50c; 111 sacks Java, 111f 50c; about 8,000 sacks Mysore, at from 107f to 112f 50c; Macassar, 97f 50c. This week, Rio, washed, has been at 91f to 95f; Mangolor, 109f 50c; Rio, not washed, 73f 25c to 78f 50c; Mysore, 109f 40c. At *Marseilles*, last week, 1,800 sacks Rio went at 63f to 72f; some lots of damaged ditto were also disposed of. This week, Rio has been at 62f to 65f; ordinary ditto, 55f.

SUGAR.—Business at *Havre*, in the week ending Friday, was rather more animated, owing to slight concessions made by holders. 80 casks French West India went at 46f the 50 kilogs duty paid; a small lot of ditto, 49f 50c; a lot of Cuba, 45f 25c; one of Cardenas, for delivery, 44f 65c; 292 casks Havana, 33f 50c to 34f in bond; 1,490 ditto, for delivery, 33f 25c. The arrivals exceeded 6,000 casks and 9,000 bales. This week, French West India has been at 49f. At *Nantes, last week*, upwards of 5,000 bales Reunion went at 50f; 2,700 casks French West India, at 46f 50c; 104 bales Mayotte, 40f. This week, some Havana has been sold. At *Bordeaux*, last week, the sales were 2,200 bales Reunion, at 49f 50c; a small lot of Guadeloupe, at 52f. This week, French West India ordinary, 45f 75c. At *Marseilles*, last week, Havana was at 35f and 36f; and there were various sales of French West India. This week, some damaged Havana has been disposed of.

INDIGO.—At *Havre*, in the week ending Friday, about 45 chests Bengal were disposed of at established prices. The arrivals were only one chest from England. This week, some Bengal has been sold; prices kept secret. At *Bordeaux*, last week, 52 chests Madras and 22 Bengal were sold;

prices not stated. This week there have been sales of Kurpah, Madras and Bengal—the latter rather large; quotations not given.

HIDES.—At *Havre*, in the week ending Friday, the sales were 2,750 Monte Video, salted, 70f to 71f the 50 kilogs; 1,505 ditto Mata deros 51f to 51f 50c; 6,430 New York, salted, 41f to 42f; 3,000 buffalo, dry 50f; 2,900 horse, salted Buenos Ayres, 83f 50c to 84f the 100 kilogs. Some damaged Mexico were also sold. The arrivals were nearly 11,000. This week, Buenos Ayres, dry, have been at 105f to 112f 50c; New York, damaged, 40f.

WOOL.—At *Havre*, in the week ending Friday, 10 bales Buenos Ayres, unwashed, went at 2f 55c the kilog; 2 bales sheepskin La Plata, unwashed, 1f 35c; 4 ditto, common sorts, 95c. The arrivals exceeded 1,500 bales. This week, Monte Video, washed, has been at 1f 95c to 2f 40c; Rio Grande, unwashed, 1f 7½c.

TALLOW.—Business was somewhat more active in the week ending Friday, at *Havre*, about 200 casks New York, disposable and for delivery, having been sold at 60f to 60f 50c. There were no arrivals. This week, New York has been at 59f and 60f. At *Paris*, yesterday, the 100 kilogs were 112f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 90f to 91f; Montpellier, disposable, 86 deg., 115f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 110f; beetroot, first quality, 92f.

ROTTERDAM, Aug. 21.

The autumn sale of coffee, fixed for the 18th of next month, will only consist of 389,750 sacks.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following is from Calcutta to the 16th ult.:—Produce market.—We have no change to report since our last. Import market.—Advices from England have caused a desire to sell; but, as there are no more buyers, the tendency of prices for the present is downward, and some sales have been made at lower rates. Freights.—For England the same unaccountable dulness prevails for all articles. Indigo.—The accounts from the up-country districts received since the last mail left show that serious damage has been caused by the heavy floods in some districts. In Purneah and Tirhoot considerable loss has arisen. The only districts where an average return may be looked for are Shahabad, Benares, and the Doab.

Advices from Bombay are to the 27th ult. The annexed report is to that date:—Imports are still sparingly dealt in, and the tone of the market is, if anything, assuming a weaker aspect, though in only exceptional cases have easier rates been submitted to. Exports.—Our chief staple has fully maintained previous rates, and which the advices just to hand will probably further help in sustaining. Cotton since our last has been only very moderately purchased for shipment to the English markets. We quote Surat and Broach 160r to 161r; Dhollera and Bhownugger, 161r to 162r; Oomrawuttee Akote, 148r to 155r; and Dharwar sawginned, 178r to 180r per candy of 784 lbs. Freights have advanced to 2*l* and 2*l* 2s 6d for cotton and seeds to Liverpool, and 1*l* 15s and 1*l* 17s 6d to London.

We have received advices from Port Louis, Mauritius, to July 5. The following is the state of the import and export trade to that date:—We have to report large arrivals of European goods, in consequence of which prices have shown a downward tendency. Mules have also arrived in great numbers from France. The late importations could not all find purchasers unless at a heavy sacrifice. Our Indian trade has been slow. But the news of a rise in this market had caused increased shipments of rice from Bengal, which we may ere long expect to receive. Present prices are firm. The money market is higher this month. We fear it will be so until the sugar season opens. We may expect the first sugars by the middle of next month; not in sufficient quantity, however, to establish prices. Exchange—The banks have altered the rate of 90 days' bills on England from 2½ per cent. pm. to par. There has been a proportionate reduction in the value of other bills. Treasury bills at 30 days are offered at 1 per cent. pm. Local bills do not meet with very ready takers. Bank rates of discount remain at 9 and 10 per cent. for three and four months' paper. Sovereigns continue at a premium. Freight—Nothing doing in the present state of the produce market. Sugar—Only trifling lots for sale, and it is not possible to quote prices with certainty. The following may be taken as very nearly the rates current:—Sugar for the English market, none; very fine yellow, 7 dols; good yellow, 6.50 dols; low yellow, 5.75 dols to 6 dols; very fine yellow sirup, 5.25 dols to 5.50 dols; good yellow sirup, 5 dols; low yellow sirup, 4.25 dols to 4.50 dols.

The annexed commercial report is dated Pernambuco, July 31:—Sugar—The weather having improved during the past week, produce has come forward more freely. The entries during the last fortnight have amounted to 1,139 tons, and the total entries since the 1st October last are 49,247 tons. Prices of white descriptions have remained without alteration. Cotton—Entries are 1,070 bags, purchased at 8,800 reis per arroba for fine; and 8,600 reis per ditto for regular quality. Paraiba cotton has been purchased at 9,400 reis per arroba, free on board. Hides—Dry salted are 190 to 195 reis per lb; the shipments have been 2,085 to Lisbon, 3,704 to Havre; also 4,000 green salted and 684 dry hides to latter place. Freights for sugar to Liverpool, ballast, 20s per ton; and *cotton, 9-16d per lb.*

The astounding development of the British cotton manufacture of late years probably surpasses the conceptions generally formed on the subject. Thus, the value of the cotton goods exported in 1843 was 16,254,000*l*, and of the cotton yarn 7,193,971*l*. Three years later, in 1846, the totals had risen to 17,717,778*l* and 7,882,048*l* respectively; in 1849, to 20,071,046*l* and 6,704,089*l*; in 1852, to 23,223,432*l* and 6,654,655*l*; in 1855, to 27,578,746*l* and 7,200,395*l*; in 1858, to 33,421,843*l* and 9,579,479*l*; and last year to 42,141,505*l* and 9,870,875*l*. In the first half of the eighteen years the value of the exports of cotton goods was in round numbers 230,000,000*l* and in the second half 340,000,000*l*, showing an increase of nearly 48 per cent. in the latter period over the former.

A report from Bahia, dated July 28, says:—Very little doing in produce. Sugar, 2,000 rs to 2,100 rs for brown, 2,600 rs to 2,700 rs for white. Coffee, 5,000 rs to 6,000 rs according to quality. Cocoa, 4,900 rs to 5,000 rs. Supplies of new sugar are expected soon. Freights are flat; Channel, 40s. Exchange, 25d.

Statement of deposits and coinage at the United States Mint in Philadelphia, for the month of July, 1861:—

Deposits.	dols	c
Gold bullion deposited	9,585,583	89

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 21st day of August, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,640,365	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	11,990,365
		Silver Bullion	..
	26,640,365		26,640,365

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,135,800
Rest	3,535,021	Other Securities	17,742,006
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 703,502	Notes	6,627,280
		Gold and Silver Coin	842,916
Other Deposits	11,840,743		
Seven Day and other Bills	715,736		
	35,348,002		35,348,002

Dated the 22nd August, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£.	Assets.	£
Circulation (including Bank post bills)	20,728,821	Securities	27,974,806
Public Deposits	4,703,502	Coin and Bullion	12,833,281
Private Deposits	11,840,743		
	37,273,066		40,808,087

The balance of Assets above Liabilities being 3,535,021*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£100,475
An INCREASE of Public Deposits of	776,547
A DECREASE of Other Deposits of	252,058
An INCREASE of Government Securities of	135,000
An INCREASE of Other Securities of	109,535
An INCREASE of Bullion of	185,622
An INCREASE of Rest of	6,144
An INCREASE of Reserve of	276,058

The above return shows a steady addition to the resources of the Bank. The bullion has increased satisfactorily, while a considerable augmentation has taken place in the reserve. Notwithstanding the moderate demand for money, the other securities have increased. The Bank appears to be taking up Government stock, upon which loans had been obtained during the late pressure in the money market.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,067,157	£ 21,146,342	£ 22 538,157	£ 22,084,598	£ 20,728,821
Public deposits	7,161,085	5,452,791	6,152 539	5,598 755	4,703,502
Other deposits	8,507,179	13 556,348	14.183,853	13.846,364	11,840,743
Government securities	13,464,216	10,884 244	11,214,068	9,543,398	10,135,800
Other securities	12,884 842	15,064 072	18,304,418	19 816.415	17,742 006
Reserve of notes & coin	8,482,674	11,766,851	9,678,320	8,795.260	7,470,196

Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	4½ p. c.
Price of Consols	96¼	97	95½	92⅞	91⅞
Average price of wheat	39s 10d	45s 1d	44s 1d	59s 6d	50s 3d
Exchange on Paris (shrt)	25 5 10	25 15 22½	25 7½ 12½	25 15 22½	25 45 50
" Amsterdam ditto	11 17 17⅝	11 17 17⅝	11 14 14½	11 13½ 14	11 18½ 19
" Hamburg (3months)	13 8½ 9	13 9	13 5¼ 5½	13 6 6½	13 10½ 11

In the corresponding week of 1851, the reactionary proceedings of the German and Italian Sovereigns were exciting considerable attention. The arbitrary conduct of the Roman police was causing great misery and discontent, and the city of Rome presented a melancholy and deserted appearance. Revolutionary movements were taking place in Cuba, with the aid and abetment of the population of the neighbouring United States. At home, the Commissioners for the Great Exhibition had decided on closing the building to the public on the ensuing 11th of October. The Roman Catholics had held a great meeting at Dublin to form a Defence Association on account of the change in their position through the passing of the Ecclesiastical Titles Act.

In 1858, the Continental exchanges had recovered from the fall which followed the reduction in the value of money from the previous panic point, and gold was still flowing into the Bank in large quantities. The first instalment was upon the point of being paid upon the Brazilian 4½ per cent. loan of 1,526,000*l*. The loan by the Bank of England to the East India Company of one million on India bonds had just been renewed for another twelvemonth at 3½ per cent.

In 1859, the negotiation of the Indian and Russian loans had been concluded. The total number of tenders sent in for the latter was about 800, forming an aggregate of 7,550,000*l*, or 50 per cent. more than was wanted. The minimum price fixed was 97, but the loan was, for the most part, subscribed for between 97*l* 0s 3d and 97*l* 10s. The quotation on the Stock Exchange immediately went to a premium.

In 1860, increasing uneasiness was beginning to be felt at the continued bad weather, which was seriously jeopardising the harvest. A report had arrived of the landing of Garibaldi in Calabria. The London money market was easy, and business was generally at a standstill.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 4,377,662*l*; in 1858, a deficiency of 1,513,724*l*; in 1859, a deficiency of 4,120,565*l*; and in 1860, a deficiency of 5,970,051*l*. In 1861, the deficiency is 5,901,263*l*.

DISCOUNT AND MONEY MARKET.—There has been a very moderate demand for money this week, especially on the first few days, from the possibility of a reduction in the Bank rate. No alteration, however, was announced yesterday, but there appears a general impression that the movement has only been deferred for a week, gold continuing to flow into the Bank, and the foreign exchanges being again firmer. This afternoon there was a slight increase in the demand for money, but the rate in the open market remains at 4½ per cent. Yesterday occasional transactions took place at a fraction less.

On the Stock Exchange, loans on Government securities can be readily obtained at 2½ to 3 per cent. Bankers and other capitalists who have borrowed money on stock during the late pressure appear to be now taking up their loans.

An instalment of 20 per cent. of the last Indian loan of 4,000,000*l* fell due on Tuesday, but from the previous payments in full only about 300,000*l* had to be provided. A further amount of about 176,000*l* stock was completely paid up on the present occasion, so that the total sum now received by the Government on account of this loan is rather more than 3,200,000*l*.

The following are the rates of discount in the chief cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

ENGLISH FUNDS.—Consols have been steadily improving during the week, in part on the generally favourable weather for the harvest, but chiefly from the ease in the money market inducing purchases of stock on banking account. The public also appear to have been latterly making numerous investments; and owing to the high price to which the Indian loan has risen, to have again turned their attention to Consols. The general course of business, however, has been rather limited. Compared with last week, a rise has taken place of more than 1 per cent., the last price being 91⅝ for money, and 91¼ to ⅞ for the account.

The ease in the money market has especially influenced Exchequer bills and India bonds, and in both these securities an improvement has been established. Exchequer bills were last quoted this afternoon 9s to 5s discount for the March issue, and 2s discount to 2s premium for those of June. India bonds are scarce in the market, and yesterday there were occasional buyers at par. The present price, however, is 3s discount to par.

The Indian Five per Cent. stock continues in favour, and a further rise has occurred of 2 per cent., the old loan leaving off at 102⅝ to ¾, and the scrip 103⅛ to ¼. The greater part, if not whole, of the last issue is now believed to have passed into the hands of permanent investors.

FOREIGN STOCKS.—The transactions in the foreign market this week have been on a limited scale, and few variations

of any importance have occurred. Equador New Consolidated has improved on the expectation of a dividend, the announcement that the 10s due the 1st May, 1860, will be paid next month appearing this morning. Mexican has fallen to-day. Turkish Six per Cents. have improved, but the full rise has not been maintained. Sardinian stock is steady. The closing price of French Three per Cents. at Paris this evening failed to arrive. The quotation yesterday was 68f 45c, showing no alteration.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

Railways and Other Shares.—The railway market has shown a better tendency this week, some stocks in particular experiencing a considerable advance. Eastern Counties at one time touched 53, but afterwards relapsed. The dividend for the past half-year was announced this evening at the rate of 1⅝ per cent. per annum, against 2⅛ last year. Caledonian has improved on the completion of a working arrangement with the Edinburgh and Glasgow. London and North-Western and Lancashire and Yorkshire are flat, owing to the anticipated falling off in the cotton supply. Midland continues in favour, the local traffic of this line being considered especially valuable.

In the colonial market, Indian guaranteed stocks continue in demand, with a limited supply. Grand Trunk and Great Western of Canada are also higher.

The principal change in foreign shares has been a rise in Great Luxembourg. Brazilian descriptions continue firm. New York and Erie preference shares have improved, while the ordinary stock shows a decline.

In the miscellaneous market there has been some inquiry for the stocks of the several Dock Companies and of Crystal Palace. Mercantile Fire and Commerical Union shares are firm at ⅜ to ⅝ premium.

The following notification was issued this evening by the Directors of the new Commercial Union Fire Insurance Company:—

The Directors have the pleasure to inform the subscribers for shares in this Company that a definite offer has been made to them by one of the most influential of the old-established Insurance Offices for an amalgamation, upon terms which would give the shareholders in this Company an immediate and highly remunerative dividend. The proposal emanates from a Company who agree with the Directors of the Commercial Union in the inexpediency of the recent serious changes of rates, and of the impossibility of maintaining them. The Directors will not complete any arrangements without the sanction of a meeting of the subscribers to this Company.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Foreign Exchanges.—The rates were generally higher on Tuesday, but to-day there is a slight reaction, especially as regards Amsterdam and Paris.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the movements in bullion during the week and the transactions in Indian rupee paper:—

Gold.—We have to report the following arrivals of gold during the past week:—The Suffolk from Melbourne with 16,000*l*, the Sussex from Melbourne with 127,000*l*, the Marco Polo from Melbourne with 26,000*l*, the Euxine from Alexandria with 2,040*l*, and about 120,000*l* received from the Continent. There being but little demand for export, the greater part of the above has been sent into the Bank of England, which establishment has already purchased about 170,000*l*, and the remainder is likely to follow. The Hibernian has taken 25,150*l* to Quebec, the Asia 4,743*l* to New York, and the Pera 3,390*l* to Alexandria.

Silver.—The silver ex Atrato has been sold at 60¼d per oz standard; there is not much demand for bars, and we consider the market rather quiet at that price. The Pera took 61,423*l* to Calcutta and China on the 20th instant.

Mexican dollars have been in slightly increased demand for the mail of the 20th instant, and owing to there having been but few on the market, the price was firm at 59d per oz for all that could be obtained for shipment by that opportunity. The market is now quiet, and there will not be much doing in dollars until the arrival of the next packet from Mexico, &c.

Exchange on India for banks 60 days' sight drafts on Bombay, Calcutta, and Madras, is 1s 11⅛d to 1s 11⅜d; bills with documents 1s 11d to 1s 11¼d, Bombay and Calcutta, and rather under that for Madras.

India Government Loan Notes have improved considerably since the date of our last circular. We quote them this day 102 to 102½ for 5½ per Cents., and 95 to 95½ for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0⅛d per oz std; bar silver, containing 5 grs gold, 5s 0⅜d per oz std; Mexican dollars, 4s 11d per oz, nominal; Spanish dollars (Carolus) in demand, scarce.

The North American, for Quebec, has taken 35,000*l*.

About 64,000*l* in bar gold was bought by the Bank yesterday, and 100,000*l* to-day. Besides the arrivals from Australia, French gold continues to come over to pay for purchases of wheat.

Failures and Mercantile Embarrassments.—The suspension has been announced of the New York firm of Claflin Melleh and Co., with liabilities to the amount of about 600,000*l*. The assets are estimated at about 400,000*l*. They were reported to be the largest jobbing house in New York, and their failure has caused a great sensation in that city.

A meeting of creditors of Messrs Bello Brothers, Greek merchants, of London, Constantinople, and Salonica, was held on Tuesday. The firm failed last February, and at a meeting held shortly afterwards the estate was stated to show a surplus of 12,000*l*. A proposition of 20s in the pound, in instalments, was agreed to. Since then, however, there have been further suspensions, and on a personal examination Mr Bello found that the affairs of the Constantinople establishment were in great confusion, owing to the negligence of his bookkeeper. The creditors there appointed an accountant to go through the books, and the result of the further inquiry shows that the total liabilities are 131,445*l*, while the assets amount to 53,102*l*, only about 7s in the pound. Of the latter, about 5,000*l* is in cash and bills on this side, and 15,000*l* consists of goods now in course of realisation. After some discussion, it was resolved to wind

up under a deed of inspectorship, the ceeditors at Constantinople having already come to a like determination.

A meeting of creditors of Messrs Beater, Dennant, and Russ, trading under the title of James Coster, Beater, Dennant, and Russ, took place yesterday, when a balance-sheet was read, showing liabilities expected to come upon the estate 216,863*l*, and assets valued at 168,482*l*. Among the debts is one of nearly 130,000*l* to the executors of the late Mr Coster, whose name was retained in the firm, although his death occurred four years ago. At that period he had a capital of about 150,000*l* in the business, and it was arranged that 100,000*l* of this sum should be repaid at the rate of 10,000*l* a year, with interest, and the remainder in six subsequent instalments. About 46,000*l* has thus been paid, while about 14,000*l* is overdue, and next month another sum of 20,000*l* would have had to be met. The firm took stock in July last, and then found the result of the year's trading to be very unfavourable, the returns having diminished by 90,000*l*, the gross profit being only about 16,000*l*, while the expenses were at the rate of 30,000*l* a year. It subsequently transpired that two of the clerks of the house had been carrying on an extensive system of robbery, and this circumstance, together with the knowledge that a large sum would have to be provided to meet the instalments due to the late Mr Coster's estate and to purchase their autumn stock, induced the partners to suspend at once. By this step a sum of 5,000*l*, which had been deposited for the specific purpose of meeting Mr Coster's claim, merged into the general estate. The capital of the present partners in 1857 was 6,620*l*, and the trading since then has shown a continuous, though not heavy, loss. The drawings in the four years have been 8,223*l*. The assets consist chiefly of the stock in trade, valued at cost at 78,000*l*; and after some discussion a committee was appointed to realise it at the earliest possible period, so as to avoid depreciation. The ultimate dividend to the creditors is expected to be about 12*s* 6d in the pound.

At a meeting of creditors of Messrs J. and H. Miller, Australian merchant, an approximate statement of affairs was presented, showing liabilities expected to rank on the estate 14,887*l*, and assets about 8,000*l*. The failure has arisen from losses on consignments to Australia. It was resolved to wind up under inspection.

The suspension was announced this evening of Messrs Frederick Harrison and Co., fancy woollen warehousemen, with liabilities of about 50,000*l*.

PUBLIC COMPANIES.—The half-yearly meeting of the Bank of Australasia took place on Monday, when a report was presented announcing a dividend at the rate of 10 per cent. per annum, free of income tax. The prospects of the bank were stated to be generally satisfactory, and indications are seen of a revival of trade in the Australian colonies. The injurious system of allowing interest on current accounts, against which the Directors have always contended, has not been formally relinquished by the banks, but has for some time been practically discontinued. The profits of the current year will thereby be proportionably benfieted. A careful reduction is taking place in the expenditure, due regard being paid to the efficiency of the staff. Commercial affairs are assuming a sounder and more legitimate character in the colony, and the bad debts of the bank have latterly been singularly small. In answer to questions, it was mentioned that no new branches have been opened, but that several have been discontinued. Some minor agencies, however, have been established. With regard to the publication of the accounts half-yearly, the Directors have considered the question, but several difficulties exist in carrying it out.

The Netherlands Land Enclosure Company have received a telegram announcing that the proposed arrangement between the Company and the Dutch Government has passed through the First Chamber, and now only requires the Royal assent.

The subscription list for the 1,000,000*l* of debentures authorised to be issued by the East Indian Railway Company at their meeting last March, has now been filled up. They offer increased advantages to the investor over former issues, being for 5 or 10 years, at the option of the holder, and convertible into stock at any period.

A meeting of the Southampton Dock Company took place on Wednesday, when the report was adopted, and a dividend declared at the rate of 3 per cent. per annum. There has been an increase of 300*l* in the earnings, while the working expenses have been diminished, and further reductions will be made as opportunity offers. With regard to the law proceedings recently taken to compel the Commissioners of the Port and Harbour of Southampton to claim a large sum as alleged arrears under the guarantee of 1,000*l* per annum granted by the latter in 1843, the Directors are advised that in the event of such claim being made, the Dock Company are neither legally nor equitably liable.

The Directors of the Ottoman Bank have just issued their report, preparatory to the meeting of shareholders on the 4th of September. It states the available balance to be 25,690*l*, and proposes a dividend at the rate of 8 per cent. per annum, free of income tax, and the appropriation of 3,000*l* to the reserve, which will then stand at 71,196*l*, leaving 1,894*l* to be carried forward. Business during the past half-year has been generally restricted, except in the Danubian Principalities, where a considerable extension has taken place.

At a meeting of the English and Australian Copper Company, it was stated that the copper made in the period from the 30th June, 1860, to the 25th of June, 1861, was 3,007 tons, against 1,975 tons in the previous year; and that the shipments of ore to this country and India have been 6,994 tons. The average number of furnaces at work was 8, against 7 1-7 last year. Some new furnaces are now in course of erection. A dividend of 2s 6d per share was declared out of the cash balance of 12,000*l*.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17*s* 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 8-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107¼ to 107¾ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 204,932 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There were no fresh arrivals of *new* English wheat at Mark lane this morning; yet the few samples on offer changed hands slowly, at Monday's decline in the quotations of 2s to 3s per quarter. The finest samples of old were disposed of at about previous rates; but inferior qualities were quite unsaleable. There was a moderate, though by no means extensive, inquiry on French account. In foreign wheat, the supply of which was moderately extensive, very little business was transacted, and inferior sorts were rather cheaper. Barley, beans, and peas ruled dull, and prices had a drooping tendency. Oats, however, were firm, at full quotations. Flour was a heavy sale, at the late reduction; the top price of town-made being 51s per 280 lbs. This week's imports amount to 15,940 quarters of wheat, 990 of barley, 28,810 of oats, 560 sacks and 16,310 barrels of flour.

At Liverpool, this morning, a fair business was passing in both wheat and flour, but at prices the turn in favour of buyers. The spring corn trade ruled very inactive, on rather easier terms.

The wheat trade at Alexandria, for the week ending Aug. 12, was very active—notwithstanding that large quantities of produce were near at hand—and an advance took place in prices. The transactions were as follows:—Saide wheat, private trade produce, 7,930 quarters at 31s 6d to 32s 3d; Beheireh ditto, 6,000 quarters, 29s 6d to 30s 9d; ditto white, 360 quarters, 30s 6d; to 31s 6d; ditto, Pasha's produce, 1,875 quarters, 32s to 33s 6d; Saide beans, private trade produce, 14,455 quarters, 26s 8d to 27s 4d; Beheireh ditto, 2,110 quarters, 25s to 26s; ditto, Pasha's produce, 1,560 quarters, 26s; barley, 4,930 quarters, 17s 6d to 18s; lentils, 410 quarters, 23s 8d to 24s; and linseed, 512 quarters, 41s to 45s 6d per quarter, free on board. Freight to United Kingdom, 4s 9d to 5s 3d for beans; to a direct port, 4s 6d to 5s per quarter.

The Liverpool cotton market has this week been very excited, and the sales reach 90,000 bales, of which spinners have taken 52,000 bales, speculators 21,000, and 17,000 for export. Prices are ⅛d higher, but the market closes with an improved tendency. Without as yet any appearance of an understanding for peace and raising the blockade in America, the position of cotton is certainly most precarious, and it is to be hoped that our spinners will not only very soon curtail their consumption, but also use more India cotton, of which the stock and the quantity afloat is so unprecedentedly large, say together upwards of 500,000 bales, against 250,000 bales last year same time; whilst the present weekly consumption of American cotton would bring the stock of that production to a total exhaustment before December.

The public sales of tea, held this week, have, on the whole, gone off steadily. Good and fine qualities have changed hands at full prices; otherwise, the quotations show a slight, though unimportant decline, compared with last week. By private contract, a limited business has been transacted on former terms.

In the demand for raw sugar, there has been rather more animation, at, in some few instances, a slight advance in the value of superior samples. Refined goods, however, have sold slowly, yet prices have been supported.

The following table exhibits the shipments of sugar from the Mauritius from Aug. 1, 1860, to June 30, 1861, compared with the three previous years, and also the shipments from Aug. 1 to June 30 of each of the last three crops:—

	lbs.
Total shipped from Aug. 1, 1860, to June 30, 1861	268,950,351
Against same period 1860	223,042,753
Ditto 1859	235,013,438
Ditto 1858	217,967,622

COMPARATIVE STATEMENT of the SHIPMENTS of SUGAR from the 1st August to the 30th June of each Crop.

For most kinds of coffee, the inquiry has continued active, and the quotations have been fully maintained to 1s per cwt advance. The supply on offer has been tolerably extensive.

The transactions in rice have been to a fair average extent, at full currencies for all good and useful sorts. In cocoa, rather more business has been done.

The fruit trade—owing to the continuance of favourable accounts from the Morea and Islands—has ruled heavy, yet very little change has taken place in prices. To effect sales, however, lower rates must be submitted to.

For rum there has been a limited demand; nevertheless, prices have been supported. Brandy has sold freely, at fully the late advance in its value.

The public sales of colonial wool have been progressing somewhat slowly. For good and fine wools, and chiefly the latter, the biddings have been moderately active, and prices have improved ½d to 1d per lb; but inferior kinds remain at the decline already noticed, viz., from 1d to 3d per lb. Several lots of inferior wool have been withdrawn. Privately, the demand for English parcels has been more active.

Hemp rules firm, and for clean Russian 30*l* 10s per ton is demanded. Flax and saltpetre have changed hands to a limited ex-

tent, at late rates. Indigo has advanced 4d to 6d per lb, compared with July prices.

Scotch pig iron is steady, at 50s 9d, cash, for mixed numbers. Spelter has improved to 17*l* 10s, on the spot, and the value of copper has been advanced 5*l* per ton.

Linseed oil, in the early part of the week, was selling at 33s 3d per cwt on the spot; but the market is now less active, at 32s 6d per cwt. Rape is steady. In other oils, a limited business is doing. American spirits of turpentine are held at 55s per cwt.

In the tallow trade, there has been rather more activity, and prices have, to some extent, recovered from the late heavy fall—P. Y. C. being quoted at 46s to 46s 6d per cwt on the spot; and at 47s for spring delivery. Town tallow, 46s net cash.

STATEMENT of TALLOW SHIPPING at ST PETERSBURG.

We extract the following from the New York *Shipping List* of the 7th and 10th of the present month:—Apart from the increasing confidence which is manifesting itself, there is very little apparent improvement in trade circles. With capitalists money was scarcely ever so plentiful, while banking institutions were never before in so strong a condition; and the recent financial legislation at Washington, virtually abrogating the Sub-Treasury system, in permitting Government dues to be paid in its own paper, in Treasury and Bank notes instead of specie, will tend to render them still stronger. It will be seen that our flour and grain markets continue pretty animated, and, judging from the tenor of the more recent European advices, holders have a fair prospect before them of realising prices fully as high, if not higher, than those now current, all through the fall and winter seasons. In the money market, things remain in the same state of inactivity, and there is nothing of interest transpiring. Loans on call are readily obtained at low rates, viz.:—

	Per cent. per annum.
Loans on call, stock securities	4 to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	9 10
First-class single signatures	7 ...
Other good bills	... ...

The last Bank statement is rather different from what was generally anticipated, the specie line showing a decrease in the face of further arrivals from Europe. The recurrence of quarter-day, however, and the consequent considerable withdrawals from Bank, account, in part, for this result. The statement is as follows:—

	July 27. dols	Aug. 3. dols		dols
Loans	112,311,832	111,719,111	Dec.	592,721
Specie	46,900,721	46,226,181	Dec.	674,54
Circulation	8,324,368	8,585,594	Inc.	261,226
Deposits	93,687,933	92,229,380	Dec.	1,458,549

The import of foreign dry goods at New York for the month of July, and for six months, are as follows:—

	1860. dols.	1861. dols.

The cotton market has been active throughout the past week; all classes of buyers have operated freely, and a large business has been transacted. Prices of American have been maintained at fully the level of last week, but notwithstanding the extensive demand, we can only raise our quotations 1-16d to ⅛d per lb. Egyptians have not been in great request, but the better grades bring full prices. Brazils are without alteration. East India are selling freely, and on easy terms. The sales to-day are 20,000 bales. The market continues firm. The reported export amounts to 17,380 bales, consisting of 9,080 American, 120 Brazil, and 8,180 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Notwithstanding the continued upward movement in the value of cotton, the accounts at hand from the manufacturing districts are, on the whole, rather favourable. The business doing in goods, however, has not been to say extensive; yet prices generally are well supported. The transactions in iron and coals have been less extensive than of late, and, in some instances, the quotations have had a drooping tendency.

than manufacturers, though even among the former many would gladly sell at the rates which have been quoted for some weeks past. In 40-inch shirtings there have been a few low sales, sellers having given way on receipt of the unfavourable advices from India to 26th ult. In other goods there has been no movement, though the cost of production enhances week by week; but, on the contrary, stocks made of high-priced material accumulate upon sellers, many of whom accordingly are anxious to quit them, to enable them to continue working a short while longer. It is, therefore, expected that as short-time has been deferred to the last extremity, it will be all the more general when it does come, though that may not be till after heavy losses to the manufacturing interests.

BRADFORD.—The fine weather of the past week, and the easy state of the money market, have together made the price of wool very firm. Buyers, however, are not numerous, and the sales made are generally small. There is nothing of importance to notice in yarns. Things remain pretty much in the same condition as for some weeks past. The chief business doing in pieces is for the home trade, for which there is a good demand.

BELFAST.—The finish of goods continues to be actively carried out at the principal concerns in this neighbourhood. In some departments hands have been working overtime. Exports are steadily on the increase in the direction of the Continent, but towards the Atlantic ports the total quantity sent off is very trifling. Some improvement may be noted in the home trade. The market for wefts has been steadier. For warps of the superior class of spinnings, there is a better state of demand direct from manufacturers. In the export trade there has been some evidence of improvement. The markets have again been very lightly supplied with flax. Prices for handscutched, 5s 9d to 8s; and for milled, 7s to 11s the stone. The crop is favourably spoken of.

LEICESTER.—There continues to be a healthy demand in several branches of the hosiery trade, and business generally is in a satisfactory condition. The foreign demand is limited, in consequence of the civil war in America. At Loughborough and Hinckley trade is, on the whole, quiet. Wools are tolerably firm, recent prices being supported. There is a fair business doing in yarns, spinners being well employed and full rates supported.

NOTTINGHAM.—Although the lace trade generally is in an exceedingly depressed state, there has been a shade more doing this week in some departments. There is a little more inquiry for stiff nets. The home trade, however, remains very dull, and shipping orders are limited. In the hosiery trade there is still no improvement to report. Goods for the home market are not much in demand, and for export there is a very limited amount of business doing. Buyers purchase only sparingly, and manufacturers produce only what is actually ordered. Yarns continue firm, old prices being well realised.

LEEDS.—The market has worn a quiet aspect, and only a very moderate amount of business has been done. The Lancashire houses are not buying so freely as of late, nor are the sanguine expectations which some entertained about the demand for woollen goods under the French treaty being realised, though, all things considered, a fair amount of goods will probably go into France from this district as soon as the tariff comes into operation.

ROCHDALE.—There is a little better feeling in the flannel trade, but the demand is scarcely equal to what is usual at this season of the year. Yorkshire goods are in moderate request.

WOLVERHAMPTON.—Owing to the late reduction in the rates of discount, an inproved business has been passing in most kinds of iron, and prices have been well supported.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 10.—The market for State and Western flour has steadily increased in strength during the past three days, and, notwithstanding the continued unfavourable character of the European advices, the demand for shipment has been tolerably active, in view of which holders have been enabled to obtain prices

MANCHESTER, Aug. 22.—There has been another week of inaction in business, and prices are now irregular. Some holders are affected by the advancing tendencies of cotton, and some by the absence of demand for cloth. Spinners are comparatively firmer showing a further advance of 5c to 10c per bbl on nearly all kinds. Canada flour is steady, with a fair demand, and sales to the extent of 2,500 bbls, including 700 bbls yesterday, at 4.25 dols to 7.50 dols. The market for Southern flour remains steady, under a fair demand, and prices are in some cases a trifle higher.

EXPORT from Aug. 1 to Aug. 6.

		1861.	1860.
Flour	brls	74,238	54,232
Wheat	bush	593,430	379,645
Corn		154,810	10,786

The demand for wheat has been active, holders have succeeded in establishing a further advance in prices of about 2c to 4c per bushel. The bulk of transactions have been for shipment to Great Britain and France. White Western, 1.23 dol to 1.30 dol; amber Jersey, 1.17 dol; winter red Western, 1.19 dol to 1.20 dol; Milwaukee Club, 1 dol to 1.08 dol; white Kentucky, 1.30 dol to 1.35 dol; North-Western Club, 1.02 dol; 13,000 white Canada, 1.25 dol to 1.28½ dol. Corn has been active, and prices are rather higher; the sales comprise 465,000 bushels, including 98,000 yesterday, at 44c to 47c for Western mixed, and 40c to 43c for unsound. Southern has also advanced somewhat, closing firm.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the various markets have been but moderately supplied with home-grown wheat, the demand for all kinds has ruled heavy, at a reduction in the quotations of from 2s to 3s per quarter. The new wheats still continue to arrive in excellent condition, and in full average abundance, the time of year considered. Foreign wheat, the supplies of which have been very extensive, has ruled heavy, and the currencies have given way fully 2s per quarter. There has been very little doing either in English or foreign barley, and prices have had a drooping tendency. Malt has changed hands slowly, but no actual decline has taken place in its value. Good sound oats have moved off steadily, at late rates; but damp parcels have fallen 6d per quarter. Beans and peas have sold heavily, and the finest parcels of flour have given way 4s per 280 lbs.

The accounts at hand from most parts of England in reference to the progress of harvest work are very favourable. Large tracts of land have now been cleared, but the yield of the new wheat will not, we understand, exceed an average in quantity. Its general quality, however, should the weather continue favourable, will be very superior compared with last year.

Most of the Continental markets are heavy for wheat, and all kinds have sold at depressed currencies. Barley and other articles have commanded very little attention. Letters from New York state that somewhat heavy shipments of wheat and flour were being made to England, and that prices were fairly supported.

In Ireland and Scotland wheat has given way in price, and most other kinds of produce have met a heavy inquiry.

The crops in Canada are very favourably spoken of, and although they are not likely to be excessive, still they are considered quite equal to good seasons, certainly as regards quality, which is very fine.

At Mark lane, to-day, there was no fresh new English wheat on offer. The demand, however, for the few samples on sale was in a sluggish state, at Monday's decline in the quotations of 2s to 3s per quarter. Old wheats were much neglected, and only a few of the finest samples were diposed of, at late rates. In foreign wheat, very little was doing, on former terms, Barley, beans, and peas moved off heavily, and prices were with difficulty supported. The oat trade, however, ruled firm, at full currencies. New white mustard seed realised 12s per bushel. The business doing in flour was very limited, at the late reduction in prices. The finest town made was 51s per 280 lbs.

There have been 75 arrivals of grain-laden vessels, off coast, since the 14th inst., viz., 18 cargoes of wheat, 42 maize, and 15 miscellaneous. The demand for cargoes afloat, more especially for wheat, has been less active. Several, however, have changed hands for the Continent.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There is still an absence of activity in the demand, though yesterday rather more disposition was shown to purchase. A large cargo of Cuba was sold in the early part of the week for France, but altogether the business afloat has been smaller than for some time past. The deliveries at this port are still below last year's, last week's being only 4,386 tons, against 5,314 tons in 1860, and the landing being heavier, there is a further small increase to note in the stock, which is now 79,809 tons, against 71,486 tons last year. West India has been taken freely, the sales to yesterday being 3,377 casks. 280 hhds Barbadoes, by auction, partly sold at 32s to 42s for brown to fine yellow, and 260 casks Jamaica at 33s to 38s per cwt.

Mauritius.—2,500 bags were disposed of: low to fine, from 28s to 34s 6d; strong refining yellow, 39s; washed crystallised, 42s to 45s per cwt.

Bengal.—3,166 bags were partly sold: fine Gurpatta date, 41s to 41s 6d; mid to fair Benares, 42s 6d to 46s 6d; and grainy, 42s 6d to 46s per cwt.

Foreign.—Afloat, a cargo Cuba muscovado has sold for Havre at 22s 3d; two of Havana, No. 14½ to 12½, 25s to 26s 9d; and one of brown Maceio, at 20s, for the United Kingdom. By auction, 990 hhds 480 barrels Porto Rico sold at 33s to 42s for brown to fine yellow; 300 casks Cuba muscovado, at 33s to 36s for brown to good middling yellow. 1,530 boxes Havana were mostly bought in: yellow and grey, 38s to 44s 6d; florette (duty 16s), 46s to 47s; and white (in bond), at 30s to 32s per cwt.

Refined is rather cheaper. Common lumps to fair titlers have sold at 48s 6d to 50s per cwt. Some business has been done in English crushed at 33s per cwt.

RUM dull of sale; barely 200 casks have been disposed of: Demerara at 1s 9d to 1s 10d, Leeward at 1s 7d to 1s 7½d, and Jamaica at 3s 3d per gallon.

COCOA is steady. 260 bags Trinidad, in auction, realised 51s to 57s 6d for grey to good middling red. By private contract, some business is reported in Surinam at 68s, and Dominica at 51s to 51s 6d per cwt.

COFFEE.—There has been a brisk demand experienced, and prices may be quoted fully 1s per cwt dearer. The advance is owing chiefly to smallness of the forthcoming Dutch sale. 900 casks 561 barrels and bags plantation realised 69s 6d to 76s 6d for fine ordinary to good middling; 56 casks 640 bags native obtained 61s 6d to 64s for small to fine ordinary pale. 100 casks 700 bags Jamaica brought 64s to 70s; 563 casks Tellicherry realised 69s 6d to 76s 6d; 300 bags Malabar at 67s 6d to 68s; 100 bags good ordinary Padang at 58s; 750 bags Brazil sold at 53s to 56s for good to fine ordinary; and 800 bags Costa Rica at 56s per cwt. Afloat, a cargo of common first Rio has sold for a near port at 48s; one good first at 50s; and one superior at 53s per cwt f.p.a.

TEA.—The improved tone mentioned last week has continued. The business has been chiefly in parcels by auction. 2,300 packages were offered, and 13,000 sold, low-scented capers being rather cheaper. The Assam tea brought full prices. Some dusty Tayshaans sold at 9¼d to 9½d; fine Kaisow, 2s 2d; common Canton-scented orange pekoe, 1s 1d to 1s 1½d; inferior scented caper, 9d; fair Oolongs, 9¼d to 9½d; and fine Japan young hyson, 2s 4½ per lb.

RICE.—In soft grain, both on the spot and afloat, the transactions continue large, but there is less inquiry for other kinds, and cargo Bengal has sold 3d cheaper. 35,000 bags are estimated to have changed hands on the spot: Rangoon and Necrancie at 8s 10½d to 10s 3d; Madras at 10s 3d to 10s 6d; Ballam at 9s 6d to 9s 9d; and white Bengal at 10s 3d to 13s per cwt. Afloat, four cargoes soft grain are reported at 10s to 10s 4½d, open charter, and one at 10s 1½d for a near port; quality not guaranteed.

SAGO is in better demand. 2,500 boxes small grain have sold at 19s to 20s per cwt.

SPICES.—1,200 bags pimento have been taken at 2¾d. 700 bags Sumatra pepper realised 3¾d, and 400 bags Penang 3¾d to 3½d per lb. Nutmegs—66 cases Penang sold at 1s 3d to 3s 2d; and 94 boxes Java, 1s 2d to 1s 3d; 9 cases common to fine red mace, 10d to 1s; and 200 bags Zanzibar cloves at 3¾d to 3¾d per lb.

SALTPETRE.—470 bags Bombay realised 30s 6d to 31s for refraction 52¾ to 31 per cent., being steady prices. Bengal—Sales confined to 150 bags, refraction 5½, at 35s 6d per cwt.

SHELLAC is rather dearer. Good middling button has realised 9*l* to 9*l* 2s 6d; garnet, 8*l* 5s to 8*l* 7s 6d; and D.C. orange, 11*l* per cwt.

SAFFLOWER is cheaper. 130 bales low to good Bengal sold by auction at 2*l* to 5*l* 10s per cwt.

GAMBIER is firmer. Business done at 16s 6d to 17s per cwt.

CUTCH remains quoted at 22s to 22s 6d per cwt.

METALS.—There has been *more* activity in the market *generally*. Tin has risen 2s per cwt. Spelter continues in request, and is again 5s higher; 17*l* 10s paid on the spot, and 17*l* 15s for arrival. The price of copper has been raised 5*l* per ton; 98*l* is now the quotation for tough cake. Scotch pig iron has rallied to 50s 9d cash for mixed numbers.

HEMP.—More doing. Clean Petersburg, 29*l* 15s to 30*l*. Some Manilla sold by auction at 18*l* 15s to 22*l* 10s per ton.

JUTE realises full prices. Of 4,500 bales offered, the greater part sold at 13*l* 17s 6d to 20*l* 17s 6d per ton.

LINSEED has been taken freely, and prices close 1s 6d per quarter above last week. Calcutta is now worth 57s to 58s, and Bombay 59s 6d per quarter. For arrival, Calcutta has realised 56s c.f.i., while numerous cargoes of Black Sea have been taken for outports at 55s 9d delivered United Kingdom.

OILS.—Linseed was at one time sold at 33s to 33s 6d, but there are now sellers at 32s 6d. Rape is rather dearer: brown, 41s to 41s 6d; and refined, 43s to 44s. Olive is firm, at 49*l* to 50*l* for Mogadore, 54*l* for Tunis, and 57*l* 10s for Gallipoli. A cargo of Gioja has been purchased at 53*l* 6s c.f.i. to the Continent. Cocoa-nut quiet, at 43s 6d for Ceylon, and 44s 6d for Cochin. Palm offers at 42s 6d. Fish oils are without demand.

TURPENTINE.—In rough nothing is doing. Spirit has advanced considerably, with large sales. 54s last price paid for American.

TALLOW.—The market exhibits more firmness. Old P.Y.C. is quoted at 44s; new, 46s 6d; *ditto*, delivery last three months, 46s; and spring delivery, 46s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, August 19.

POSTSCRIPT.

FRIDAY EVENING.

SUGAR.—A large business has been concluded in West India at steady prices. The sales have amounted to 2,040 hhds, making 5,410 hhds for the week. 1,632 bags Mauritius, at auction, were disposed of at 29s to 30s. 6d for ordinary and good middling brown, 34s to 35s 6d for fine brown and low yellow, and 40s for middling grainy. 3,206 bags Bengal about half sold: Cossipore, 43s 6d to 44s; Bally, 44s 6d to 45s 6d; good yellow Gurpattah date, 40s 6d to 41s. Common brown date was withdrawn for want of demand. 1,849 bags Penang sold at 33s to 36s for brown, and 36s 6d to 42s for low to fine yellow. Two floating cargoes Havana, No. 10½, have changed hands at 25s and 25s 3d for the United Kingdom.

COFFEE.—4,758 bags Rio in public sale attracted a very strong competition, and realised high prices: full fine ordinary to middling washed, 67s 6d to 71s 6d; fine ordinary, 61s; ordinary to low good ordinary, 50s to 54s; and very ordinary, 47s to 48s. The inferior qualities showed in many cases an advance of 3s to 5s from the late lowest point. The small parcels of Neilgherry sold at 80s to 80s 6d for bright green, and some plantation Ceylon at full rates.

RICE.—Of 3,200 bags white Bengal and 2,485 bags Ballam at sale, only a few bags of the latter found buyers at 9s 6d. Privately, 4,000 bags low Russian sold at 9s 3d.

SALTPETRE.—500 bags have been sold, principally 4 to 4¼ per cent. at 36s.

SPICES.—674 bags Penang were bought in above market rates, but subsequently about half was placed at 3½d per lb. 270 cases Cochin ginger sold chiefly at 41s to 45s per cwt.

METALS.—Spelter is in steady request; further sales have been made at 17*l* 10s on the spot, and 17*l* 15s spring shipment.

OILS.—Linseed is more inquired for at 32s 6d; cocoa-nut on sale went steadily at 44s to 44s 6d for Cochin, 43s Ceylon, and 42s to 43s Sydney. Palm declined to 40s and 41s 6d for fine Lagos.

TALLOW has been steady to-day. Of 2,750 casks at public sale, 1,000 sold; Australian sheep, 46s; beef, 43s to 43s 6d: South American 1st sort pipes, 44s 6d to 44s 9d; Y. C., 1859, brack, 43s 6d to 43s 9d. New allow quoted 46s 6d, spot, and last three months, 47s to 47s 6d spring.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues moderately well supported; no material alteration to note as respects prices. For export about 350 tons of crushed have been sold at 33s for immediate and forward delivery, all in barrels. By the accounts from Holland, refined sugar continues scarce and firm for present delivery.

GREEN FRUIT.—A moderate business doing in all kinds. Nuts in request, in consequence of the scarcity of home-grown fruit. Lemons of good quality sustain their price; a parcel of Lisbon, per steamer, sold by Keeling and Hunt at public sale, went at prices equal to former quotations. The crop of Almeria grapes will not be as abundant as was anticipated.

DRY FRUIT.—The market has had a little vitality thrown into it this week, in consequence of news of rain. The improvement, however, was checked later in the week by telegraphic advice that no harm was done. Valencia raisins will be in London early next week.

ENGLISH WOOL.—There is rather more activity in the English wool market, without any change in prices.

COLONIAL AND FOREIGN WOOL.—The sales continue to be well attended. Prices are firm, especially for better sorts of Australian fleece. The East India and low wool will be sold on 28th and 29th inst. Quantity very small—only 4,000 bales in all—mostly low foreign.

FLAX unaltered.

HEMP.—A good demand during the week, and sellers are now demanding higher prices.

COTTON.—Sales of cotton, from Friday, 16th August, to Thursday, 22nd August, inclusive:—2,300 bales Surat, at 6⅜d for good fair new Broach, 6⅜d for good fair new Dhollera, 5⅞d to 6d for middling fair to fair old Dhollera, 6⅛d to 6¼d for good fair new Omrawatty, 5⅞d for middling fair Mangarole, 5⅝d for good fair Compta; 250 bales Tinnevelly, 6⅛d to 6⅜d for good fair to good; 100 bales Western Madras, 5⅛d for fully fair. An improved demand has been experienced, owing to the continued warlike character of the American advices, and a fair amount of business has been transacted at the extreme rates of last week, and in some instances Surats have commanded rather higher prices, and the market closes with great firmness, the tendency being upward. P.S.—Market very firm. Sales, 300 bales Surats at 6 5-16d to 6½d, being rather improved rates.

SILK.—Silk market remains without alteration, and business very limited.

TOBACCO.—The market continues extremely firm, with a moderate business doing.

LEATHER AND HIDES.—We have to report a cheerful trade in leather during the past week. There was an increased supply of leather at Leadenhall on Tuesday. Strong sole leather was the most prominent article in demand, and prime and heavy foreign butts may be quoted ½d per lb above our last week's prices; best kips were also wanted.

METALS.—Metals are little changed. Copper advanced in quotations of English on Monday last, and since has been steady. Quotations of English are now 98*l* for tough, and 101*l* for select. Burra Burra, 98*l*. Iron is still depressed from insufficiency of demand. Tin is firm at late quotations, and foreign is even dearer. Spelter is a shade better in quotations. Lead neglected. Tin plates much depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	48	6
Fat by ditto	2	5
Yellow Russian	48	0
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market stagnant at previous quotations; a reduction is anticipated. Friesland butters up 2s; quality fine.

METROPOLITAN CATTLE MARKET.

THURSDAY, Aug. 22.—To-day's market was only moderately supplied with beasts, in very middling condition. Prime breeds sold steadily, at full quotations; otherwise the beef trade was in a sluggish state, at Monday's currency. The top price was 4s 10d per 8lbs. Most breeds of sheep moved of slowly; nevertheless late rates were quite supported, prime Downs having realised 5s 4d, in some instances 5s 6d per 8lbs. Lambs—the supply of which was limited—sold readily at fully the late advance in their value. Calves met a slow sale on former terms, and the supply was moderately good. Pigs, milch cows, and suckling calves were in slow request, at former prices.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	2	5	6
Second quality ditto	3	4	3	8	Large coarse calves	3	4	3	10

Lambs, 5s to 6s.

Total supply—Beasts, 950; sheep and lambs, 10,980; calves, 420; pigs, 390.
Foreign supply—Beasts, 323; sheep 4,230; calves, 310.

NEWGATE AND LEADENHALL.

FRIDAY, Aug. 23.—The supplies of wheat on sale here are only moderate. Generally speaking, the demand rules steady, and prices are well supported.

Per 8 lbs by the carcase.

Inferior mutton	3	2	3	6					

HOP MARKET.

FRIDAY, Aug. 23.—All kinds of hops are a dull inquiry, and sales can only be effected by submitting to further reduced rates. Duty, 130,000*l*. Mid and East Kent pockets, 80s to 200s; Weald of Kent ditto, 70s to 170s; Sussex, 65s to 130s; and Yearlings, 110s to 200s per cwt.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 19.—Although the arrivals of home-grown potatoes to these markets have been very moderate, and scarcely any imports of foreign have taken place since our last, the demand for all qualities is in a sluggish state; yet prices are fairly supported. Shaws are selling at from 70s to 80s, and Regents 75s to 100s per ton.

FRIDAY, Aug. 23.—Although the arrivals of potatoes continue very moderate, the demand for them rules inactive, at 70s to 80s for Shaws, and at 75s to 100s for Regents.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 4s to 1*l* 12s per load. Both hay and straw changed hands steadily at late rates. Supply moderate.

CUMBERLAND.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 4s to 1*l* 12s per load. Trade steady.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 4s to 1*l* 10s per load. A fair demand.

COAL MARKET.

FRIDAY, Aug. 23.——Wall's-end: Lambton 18s 3d—Haswell 18s 6d—Thorpe 16s—Tunstall 16s 6d—Wylam 15s—Carr's Hartley 16s 6d—Hartlepool West Hartley 16s—Walker Primrose 12s 3d—Bebside Hartley 16s 9d—Hastings Hartley 16s 9d. Ships at market 117.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 23.—There is not much change to notice in our market. The demand continues on a moderate scale, and prices remain pretty steady.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 23.—Though the trade has been generally quiet during the week, there has been a moderate or steady business done in wheat and flour to-day, at a little under Tuesday's rates. Indian corn and Egyptian beans are likewise a little cheaper. In other articles no change.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Aug. 23.—The market for all kinds of manufactured iron continues dull, and prices have still a drooping tendency. In Scotch pig iron there has also been during the week an absence of all animation, and the limited business done has been at lower rates. The price of manufactured copper has this week been advanced ½d per lb, and unmanufactured 5*l* per ton; this has been mainly occasioned by a corresponding increase in the value of the raw material. Lead continues dull. Spelter in better demand and dearer.

The Gazette.

TUESDAY, Aug. 20.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 10th of August amounted to 609,207*l*, and for the corresponding week of last year to 595,986*l*, showing an increase of 13,221*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 290,936*l*, and for the corresponding week of 1860 to 283,718*l*, showing an increase of 7,218*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 19.—In the railway market there was a feeling of mo confidence, and in several stocks a decided rise took place. Midland wa 1¼ per cent. higher. Lancashire and Yorkshire was also in demand The other stocks that chiefly improved were North-Eastern, North British, and Eastern Counties. London and North-Western, on the other hand, and Great Northern were depressed, the former on the publication of the directors' report, and the latter on the half-yearly meeting. South-Eastern was likewise prejudiced by a further decrease in the traffic, attributed to the competition of the London, Chatham, and Dover. In the colonial market there has been a general rise in Indian guaranteed stocks. Grand Trunk and Atlantic and St Lawrence are also higher. Foreign shares were steady; Lombardo-Venetian improved to ⅞ to 1 pm., while Great Luxembourg relapsed to 7⅞ to 8. Canada and New Brunswick debentures were firmer. In American securities, Erie shares were lower. Mines were dull, and occasionally flat.

TUESDAY, Aug. 20.—In the railway market to-day the principal movement was a rise in Eastern Counties; which at one period marked as high as 53. A reaction then took place to 50½ to 51, or 1½ per cent. above yesterday's price. Midland also advanced fully 1 per cent., and London and North-Western, Lancashire and Yorkshire, North-Eastern descriptions, South-Eastern, and Caledonian, ½ to ¾. Indian guaranteed stocks continued in steady demand, and East Indian improved to 101½ to 102. Canadian were also fairly supported. In the foreign market, Lombardo-Ven tian shares were rather lower, at ⅝ to ⅞ pm., while Great Luxembourg and Pernambuco improved. American railway securities were without alteration. Mines were in little demand, but occasionally showed an advance. No change of importance occurred in joint stock banks. In miscellaneous descriptions there was a further rise in Madras Irrigation.

WEDNESDAY, Aug. 21.—The railway market was firmer to-day, most of the leading stocks showing an advance of ¼ to ½ per cent. Midland continued chiefly in demand, but Lancashire and Yorkshire and Caledonian were also in some request. Eastern Counties and Sheffield were exceptionally rather flat. The market closed with a very good appearance. Colonial stocks were steady, especially Indian guaranteed. Great Western of Canada shares were also firmer. In the foreign market, Great Luxembourg and Pernambuco improved. No change of importance occurred in American railway securities. Mines were inactive, and rather dull Joint stock banks closed about the same as yesterday. In miscellaneous descriptions, London Dock and Crystal Palace stocks were firmer.

THURSDAY, Aug. 22.—The railway market improved in the morning with Consols, relapsed in the middle of the day, but closed better than at one period. South-Eastern advanced 1 per cent. on the announcement of the proposed dividend at the rate of 4*l* 3s 4d per cent. per annum. Caledonian also experienced a temporary rise to 103, but afterwards went to 101¾ to 102¼. Midland continued chiefly in speculative demand. North British was slightly higher. On the other hand, London and North-Western, Lancashire and Yorkshire, North-Eastern stocks, and Sheffield showed a decline. In the colonial market, Grand Trunk of Canada receded to 19¼ to 20. Indian guaranteed stocks continued in demand, with a limited supply. In the foreign market, Lombardo-Venetian declined to ⅝ to ¾ pm., while Great Luxembourg advanced to 8⅛ to ¼. Dutch-Rhenish were also firmer. Canada, New Brunswick, and Nova Scotia debentures improved. The only important change in American railway securities was a fresh rise in Erie preference. Mines showed a stronger tendency.

FRIDAY, Aug. 23.—In the railway share market to-day the principal feature was a rise of 1¼ per cent. in Caledonian stock. South-Eastern advanced ½, whilst Lancashire and Yorkshire declined ⅛. Other stocks were quoted much the same as yesterday afternoon. London and North-Western marked 92½ to ¾; Great Western, 67⅞ to 68⅛; Midland, 127⅛ to ⅜; Lancashire and Yorkshire, 109 to ½, ex div.; Caledonian, 103 to ½; South-Eastern, 82¼ to ½; and Great Northern, 107 to 108. Lombardo-Venetian Railway shares ruled dull, at ⅝ to ¾ prem. Grand Trunk of Canada Railway stock was rather flat. Great Luxembourg shares continued to meet with inquiry. The Indian railway stocks were fairly supported. Mines, generally, ruled steady.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the eneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

London: John Churchill; and may be had of all booksellers

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

EXTRAORDINARY DISCOVERY—NEW THEORY. (Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

CURE OF INDIGESTION by DR HUGO'S MEDICAL ATOMS.—Dear Dr,—I don't know how sufficiently to express my gratitude to you for the cure of my long sufferings by your Medical Atoms. No one who has not suffered the pangs of indigestion and its attendant miseries can appreciate my feelings now. For more than twenty-one years I suffered with more or less intensity—nothing really benefited me but your atoms; and now, after what may be called a short use of them, I am quite another man. I may truly say I found relief after the first dose, &c., &c. —(Signed) EDWARD THORNEY, Lower road, Deptford, March 31, 1861. Dr Hugo's Medical Atoms purify the blood and relieve the head, heart, and stomach. Their action is immediate, and they are small, and agreeable to the taste, so that they may be swallowed whole, or eaten as confectionary. Price 1s 1½d, 2s 9d, and 4s 6d. Sold by all druggists.

HOLLOWAY'S PILLS AND OINTMENT.—Confidence.—To expect for merely asking the confidence of another would be unreasonable, but for the other to disbelieve his own senses would be madness. To discredit the celebrity obtained by Holloway's medicines in all parts of the world is to doubt the united testimony of thousands. Their virtues have been tested for twenty years, during which period no single charge has been made against them. No invalid, after a fair trial, has found them fail to relieve his pain or completely cure his disease. The combined action of the Ointment and Pills in all disorders is too irresistible to be withstood. All who try them once award them their entire confidence, and are never deceived.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.

EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Xurrachee, and by engineers and manufacturers thro hout the country.

Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

DEANE'S TWO-HOLE BLACKPENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

DR CURTIS'S MEDICAL WORK. "MANHOOD An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations. Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either, from the publisher, J. Allen, 20 Warwick lane: or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MANCHESTER MEETING, 4th to 11th September, 1861.

Reception Room, the Portico, Manchester.

PRESIDENT,

WILLIAM FAIRBAIRN, Esq., LL.D., F.R.S., &c.

The objects of the Association are:—"To give a stronger impulse and more systematic direction to scientific inquiry; to promote the intercourse of those who cultivate science in different parts of the British empire with one another and with foreign philosophers; to obtain a more general attention to the objects of science and a removal of disadvantages of a public kind which impede its progress."

GENERAL ARRANGEMENTS.

Wednesday, 4th September.—Opening Meeting, and President's Address, at eight p.m., in the Free-trade Hall.

Sectional Meetings daily, as usual, from the 5th to the 10th inclusive.

Wednesday, 11th September.—Concluding General Meeting, in the Free-trade Hall.

Thursday, 5th September.—Soiree [Microscopes], in the Free-trade Hall.

Friday, 6th September.—Evening Discourse.

Saturday, 7th September.—Soiree [Telegraphs], in the Free-trade Hall.

Monday, 9th September.—Evening Discourse.

Tuesday, 10th September.—Soiree [Field Naturalists' Society], in the Free-trade Hall.

On Thursday, the 12th of September—Important Excursions.

Gentlemen desirous of attending the meeting may make their choice of being proposed as life members, paying £10 as a composition; or annual subscribers, paying an admission fee of £1, and (additional) £1 annually; or associates for the meeting, paying £1.

Ladies may become members on the same terms as gentlemen; or ladies' tickets (transferable to ladies only) may be obtained in the Reception Room, by members, on payment of £1.

Life members receive gratuitously the reports of the Association which may be published after the date of payment.

Annual subscribers receive gratuitously the report of the Association for the year of their subscription, and for every following year of subscription without intermission. Associates for the meeting are entitled to the report of the meeting, at two-thirds of the publication price.

In order to facilitate arrangements for the meeting, it is desirable that application for tickets should be made as early as possible.

Forms of proposal will be supplied in the Reception Room during the meeting; or, the names of candidates for admission may be transmitted to the Local Secretaries.

As the funds which the Association has to expend for its scientific objects consist only of the payments made by its members and associates, it is particularly desirable that every opportunity should be taken of increasing their number.

Compositions and subscriptions of new members or associates will be received by the Local Secretaries until the commencement of the meeting; afterwards, as well as the subscriptions and arrears of former members, by the Local Treasurer.

For information respecting the local arrangements, application may be made by letter, addressed to any of the Local Secretaries for the meeting, at the "Portico, Manchester."

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MEETING in MANCHESTER, 4th to 11th September, 1861.

RAILWAY PASSES.

Reception Room, Portico, Manchester, August, 1861.

The Executive Committee have arranged with the undermentioned Railway and Steam-packet Companies to issue to gentlemen and ladies attending the meeting in September, as members or associates, Passes entitling the bearer to a ticket to Manchester and back, for one fare, between the 2nd and 14th of September:—

Lancashire and Yorkshire Railway Company.
London and North-Western Railway Company.
Manchester, Sheffield, and Lincolnshire Railway Company.
Great Northern Railway Company.
North-Eastern Railway Company.
Midland Railway Company.
Caledonian Railway Company.
Great Western Railway Company.
City of Dublin Steam-packet Company (via Holyhead).
North Lancashire Steam Navigation Company (to Fleetwood).
Belfast Steamship Company (to Liverpool).
Glasgow and Liverpool Royal Mail Steam-packet Company.

Application for these passes must be made (the sooner the better) to Local Secretaries, B. A., Portico, Manchester, stating the names of those who will use them; and if any are not yet members or associates, their full names and addresses, and the particular class of membership desired.

The pass cards will have to be exchanged at the railway or packet office for the Company's special ticket.

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,

W. J. HALL and Co., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, London, E.C.

TEETH.—

No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent,—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

DR MARSTON'S LECTURES.—

FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE; Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

N.B.—An immense and choice assortment of goods for all classes and all ages in the several above-mentioned branches of our business.

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR,

In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.

Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.

BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

KEATING'S PERSIAN INSECT DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension as it has no qualities deleterious to animal life.

Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE,

or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Roland, and Legros Clark, LANCET, Nov. 6, and Dec. 16, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

FRAMPTON'S PILL OF HEALTH,

Price 1s 1½d and 2s 9d per box

This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.

Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.

These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prost, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all Vendors of medicine.

KAMPTULICON FLOOR CLOTH.

E. GOUGH AND CO., ORIGINAL PATENTEES & MANUFACTURERS,

12 BUSH LANE, CANNON STR MANUFACTORY—GREENWICH ROAD.

TRELOAR'S CORK FLOOR CLOTH,

OR KAMPTULICON.

MATTINGS AND MATS.

T. TRELOAR, MANUFACTURER, 42 LUDGATE HILL, LONDON.

KAMPTULICON, OR

INDIA-RUBBER & CORK FLOOR CLOTH;

As laid at the Houses of Parliament, British Museum, Bank of England, and numerous Public and Private Offices.

Impervious to wet, indestructible by damp, soft to the tread, and warm to the feet. Far superior to every other material ever invented for the Covering of Floors, &c. Invaluable on Stone Floors.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP and SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

GLENFIELD PATENT STARCH,

USED in the ROYAL LAUNDRY.

The Ladies are respectfully informed that th s Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

TO MERCHANTS,

FOUR PER CENT.

THE reduction of the Bank rate to *half* what it was in March last will not surprise any reader of our first article of last week. In the existing state of the money market, the Board of Directors could hardly do otherwise. The market rate was clearly less than their rate, and, in the position of their Banking Department, they could hardly do otherwise than *follow* the market. The liabilities of the Banking Department are :—

	£
Public deposits	4,064,709
Private deposits	12,774,391
Seven-day and other bills	669,066
	17,508,166

The reserve is :—

	£
Notes	7,137,875
Gold and silver coin	862,367
	8,000,242

which, though not half the liabilities of the Banking Department, is 2,000,000*l* more than one-third.

If made up under the old form, the liabilities of the Bank are :—

	£
Circulation, including Bank post bills	20,423,146
Public deposits	4,064,709
Private deposits	12,774,391
	37,262,246

against a reserve of 13,104,322*l*.

It is to be observed that the satisfactory position of the Bank is consequent rather on the reduction of liabilities than an increase of reserve.

Last year the liabilities of the Banking Department were :—

	£
Public deposits	5,949,005
Private deposits	14,168,176
Seven-day and other bills	735,601
	20,852,782

And if the Bank stood in that position now, 8,000,000*l* would scarcely be such a reserve as to justify four per cent. Last year that reserve was more than 9,000,000*l*.

The diminution in the trade of the country is now shown very conspicuously in our Board of Trade tables. Our exports have been :—

	£
In July, 1861	10,004,260
In July, 1860	12,522,698

and in the first seven months of the year :—

	£
In 1861	70,237,685
In 1860	74,542,687

It may seem wonderful that such a reduction should not have sooner affected the money market. An increasing trade, we have often maintained, is necessary to a steady value of money. Augmenting means of investment are annually needful, because the savings of the country are annually accumulating. But the operating cause which has until now sustained the value of money is shown in another part of these same tables.

Our imports have been for the first *six* months of

	£
1861	93,079,371
1860	92,462,437

showing that we have really had a larger capital employed in trade until now than we had last year; and that this has prevented the natural effect of the accumulating savings of the country upon the value of money, especially as those savings were last year far less than usual.

That the diminution of trade is likely to continue no one can doubt. There are scarcely any American bills in the market, and so long as the supply of bills is below the demand, the value of money must remain low.

THE AMERICAN QUESTION.

THE American Revolution presents so many points of varied interest; it is such a confused event in itself; and its recent history has been of a sort to attract so much attention to its subordinate details, that there is some danger lest the attention of our mercantile classes should be distracted from the vital point in which alone their pecuniary interests are critically concerned, and lest their judgment should be confused in consequence. As Englishmen, as thinkers, as lovers of free government, as well-wishers to the progress of mankind, as haters of slavery; we watch the American Revolution with keen curiosity in all its changing phases; but *as men of business* we are vitally concerned with but a single inquiry :—Shall we this year receive a principal part of this year's cotton crop, and if not, what will prevent our receiving it?

In substance this question immediately resolves itself into another :—Will the Northern States of America be able effectually to blockade the ports of the South? If they can, evidently we shall not get our cotton; if they cannot or do not, then we shall get it.

Some persons, indeed, believe that this last assertion is rather dubious. They fear that the South will not be willing to send us their cotton, although the North may be willing to let it come. And, indeed, if we attended to what the South is wishing to tell us,—if we listened to many of their popular organs—if even we were impressed by various important acts of their present Government—if, in a word, we thought as *the South would have us think*, we should ourselves feel great doubts of the truth of what has been said. But we do not so think. We acknowledge that the South, under the impression that its cotton is essential to France and England, *thinks now* that it will not send any, in the hope that France and England will require the North to acknowledge their independence. But this is the temporary dream of persons who exaggerate the wants of others, and who do not perceive their own necessities. Money in some shape the Southern States must have; they are at war, and

actual cash is a military necessity. They have no credit which would or ought to get them a sixpence in any part of the world. They have nothing, we may broadly say, but cotton, either as individuals or as a State. Surely, then, they will sell their cotton if they can? Surely they will not be *able*, if they can part with it, to withhold it? Let us consider the circumstances. Suppose, what seems the most feasible of the Southern financial schemes, that the cotton-growers subscribe or lend some part of the next year's crop for the use of their Government. Of what military use will that cotton be to the Government until it is turned into money? It will not be of the least avail. It will not, of itself, buy a gun or subsist a soldier. If it is pledged (as perhaps it might be) to the moneyed classes, a powerful part of the community—a part specially powerful in time of war, when the Executive Government is daily requiring loans—becomes vitally interested in its early sale. The South will soon perceive that Europe will never interfere in a Transatlantic civil war, and then it will not withhold the cotton it has grown at its own cost, at the sacrifice of its own means of carrying on military operations, at the peril of its own immediate destruction.

The single question then remains:—Will the North be able to close the ports of the South?

We cannot venture to give a categorical answer—a positive yes or no—to this question. We cannot undertake to give determinate prophecies of future events, which a multitude of causes must affect, and which an infinity of accidents may control. But we can assign several reasons why the affirmative should not be, as there seems some risk of its being, rashly taken for granted.

First. The blockade of an immense extent of coast is a very difficult thing to effect. Under most circumstances it is impossible. If the Eastern coast of America were like many other coasts in the world,—if it were like our own coast,—we should not be discussing the subject. If the whole length of the Southern American seaboard for twelve degrees of latitude and more were studded with harbours as near to one another and as good as those of England, no fleet which the world has ever seen could blockade its whole extent. Doubtless the American coast is not so studded. It is poor in ports, and those which it has are very favourable to a blockading force: they are landlocked, or have a bar, or in some way small apertures. Yet still the best authorities say that there are as many as thirty harbours, great and small. Again there are probably others which might be used in case of pressing need to a more or less extent, and a very pressing anxiety we believe there will be to obtain the high prices for the crop that will be current in Liverpool.

Next. The blockade, if it is to be effected, will require a great deal of arrangement and management, and the circumstances of the United States are not, as far as we can see, very favourable to its good management. They are engaged in an exciting and dangerous war by land, close to their capital and seat of Government. Their army has been found to be far less efficient than they had hoped,—than almost every one even in Europe expected. They are reorganising that army, and it seems likely that this difficult operation will require many months. It is perfectly possible, and even fairly probable, that there will be during those months an enemy in the vicinity of Washington. What is the natural consequence, judging either by the historical analogy of ordinary wars, or by the particular temperament of the American people? It is surely to be presumed that the land war, of which the scene is so close and the danger so evident, will be closely watched and vigorously pressed, and that the distant naval war, in which there will be no danger, about which there will perhaps be no popular interest, will be comparatively neglected. So history tells us it has been in other cases, and so we might expect it to be. In all affairs—and in war more than any—that which is pressing and exciting is attempted; that which can be postponed is postponed. We question if there is an instance in history of so tedious, so complicated, and so remote an operation as the effectual blockade of the entire seaboard of the Southern States having been successfully maintained for many months by any Executive Government with a formidable enemy at its very gates. What, too, is the national virtue most necessary for such an effort? It is patience, and of all people the Americans are the most impatient. They are so apparently by physical temperament; and the endless adulation of their newspapers and their demagogues has taught them to believe that no enemy can long resist them, that they had only to "go ahead," and that every difficulty will vanish from their path. But it is impossible to "go ahead" in a tedious blockade.

Nor are the Northern Americans likely to have an Executive Government especially calculated to surmount unexampled difficulties. As yet it has failed in very trivial ones. It has not produced an effective army even of moderate size, although it has had several months of preparation: it would even appear that it has not produced an army equal to that of the Confederate States, bad as that army probably is, and contemptible as their pecuniary resources undeniably are. The constitution of the Union places at this moment at the head of affairs an unknown, inexperienced, *irremovable* man—a man specially chosen because he was *not* one of the ablest men in the country. He is surrounded by executive departments not used to a tenth part of their present work and largely corrupted by a constant subserviency to electioneering purposes. Is it likely that such a man with such tools will be able to carry on for a long time a distant blockade—perhaps when the multitude are pressing on him to fight by land and to regain the *prestige* which they fear they may have lost? It is very conceivable too that money may be scarce in the Treasury at Washington. Mr Chase is endeavouring to spend 75,000,000*l*, while the ordinary revenue of the whole Union is only 12,600,000*l*. Money in such circumstances can scarcely be plentiful. Will not all the cash be economised for the inevitable land war, and will not the maritime operations, which are comparatively optional, be postponed till a more convenient occasion?

Lastly. The maintenance of such a blockade requires a united people, and in this respect the Northern Americans will hardly be long united, even if they now are so. The Northern manufacturers want cotton as well as we, and they must buy that cotton in Liverpool. Mr Lincoln has just authoritatively proclaimed that they shall have none from the South, for he has interdicted all trade with the "rebel" States. The Northern manufacturers, therefore, are as much interested as we that Liverpool should be well supplied, and, therefore, that there shall be no real blockade. All New York—all the North, we might almost say—has a similar interest. They derive great advantages from being the exchange centre, the trading *entrepôt* and manufacturing counterpart of the South. They have derived great profits by aiding the prosperity of the South, and they will lose them if that prosperity should be impaired. It will not only be impaired, but be destroyed by a close blockade during a long war, which would raise the price of cotton in Europe far beyond its usual limits for a protracted period, and would effectually stimulate in other parts of the world equal, if not superior, competitors to the plantations of the South. Can the *brokers* of New York afford to ruin their *principals*, and will they consent to do so?

NOTE.—The following is the list of the harbours in the Southern States above referred to. It is by an officer of the United States Survey, given in "Hunt's Commercial Review:" 1, Albemarle and Pamplico Sound; 2, Beaufort, N. C.; 3, Wilmington, N. C.; 4, Georgetown, S. C.; 5, Bull's Bay; 6, Charleston, S. C.; 7, Beaufort, S. C.; 8, Savannah, Ga.; 9, Brunswick, Ga.; 10, Fernandina, Fla.; 11, St John's, Fla.; 12, St Augustine, Fla.; 13, Key West, Fla.; 14, Fort Jefferson, Fla.; 15, Tampa Bay; 16, Cedar Keys; 17, St Mark's, Fla.; 18, St George's Sound; 19, Pensacola, Fla.; 20, Mobile, Ala.; 21, Mouths of the Mississippi; 22, Galveston, Texas; 23, Brazos River; 24, Matagorda Bay; 25, Brazos Santiago; 26, Mouth of the Rio Grande; 27, Espiritu Santo Bay; 28, San Antonio Bay; 29, Mission Bay; 30, Hines Bay.

AUSTRIA AND HUNGARY IN 1849 AND 1861.

THE Emperor of Austria has dissolved the Hungarian Diet with a superfluous threat of using force in case of its refusal to separate. He has further intimated pretty strongly his intention to occupy the whole country with his army; and only reserved one loophole for a peaceable settlement in case he finds concession absolutely essential. He reserves to himself, he says, the right to summon a new Diet within six months if he sees any hope that it will be more disposed to comply with his demands. At Pesth this last breach with the constitutional party under M. Deak is regarded almost with triumph. The Hungarians look forward, it is true, to

a time of great suffering, but they look forward also to a certain ultimate triumph. What can the Emperor do? It is all very well to occupy the impoverished country with troops, and wring the last drop out of the exhausted land,—but what then? He cannot beat the fortitude out of a perfectly passive and absolutely unanimous people. He cannot get money where there is no money to be got. His foreign soldiers cannot even screw their own rations for any indefinite period out of a country governed by this military despotism. In the meantime, the Imperial Parliament at Vienna is in a very awkward state of rudimentary life. More than half the Empire is unrepresented in it. Of the portions that are represented, only the German,—the smallest of the fragments,—is really heart and soul with the Emperor in his centralising purpose. The Poles and the Bohemians view with little favour the Hungarian policy of the Cabinet: their orators are protesting against it: and it is generally believed that they will, at all events, not consent to proceed to the financial legislation for which the Emperor is so eager in the present half-constituted assembly. If an Imperial financial scheme, committing Hungary and the unrepresented sections of the Empire, is forced on, the Poles and Bohemians will, it is expected, retire from the House, and leave to the Germans the unpleasant alternative of affecting to represent an Empire of which they do not constitute much more than a tenth part,—or separating also, and leaving the Cabinet in the lurch. The Emperor has addressed the Houses in a speech defending his Hungarian policy, which we will only describe as conceived in the true spirit of the densest despotism, and as portending very little constitutional liberty for the Reichsrath itself whenever an occasion occurs for a difference of opinion between that assembly and the Throne.

Such is the present state of affairs as between Austria and Hungary. On the Hungarian side there is absolute unanimity, and the most temperate strength of purpose. Magnates, deputies, and people are all united under M. Deak. They call for the rights of Hungary as secured by the Pragmatic Sanction,—separate administrative organisation under Hungarian Ministers and Legislature, separate finance and military organisation, and a recognition of the last laws regularly enacted by the Diet and sanctioned by the Emperor Ferdinand in 1848. On the other hand, the Imperial party under M. von Schmerling contend that the revolution of 1849 put an end to all necessity for literal adherence to the Pragmatic Sanction; that if the Emperor restores any part of the old constitution of Hungary, it is solely an act of grace so to do; and that looking to the mischievous results of this quasi-recognition of Hungarian independence in 1848, His Majesty would be acting very ill in restoring any machinery which would allow Hungary to resist the beneficent influences of Imperial centralisation.

Thus stand matters now. It is instructive to compare this state of things with that which existed on occasion of the last constitutional struggle between the Emperor and the Hungarian people in 1848-49, for we think our readers will learn from the comparison that but one solution of this question is ultimately possible,—a solution towards which public opinion has been developing itself in Hungary through years of wretched oppression,—which has been forced upon the people with ever-increasing emphasis, even while they have been apt learners in political caution and self-restraint,—a solution which the very same events have demonstrated to be the sole end worthy of Hungarian patriots' effort and sacrifice, while they have also simultaneously taught them to prefer the calm sagacity of Deak to the impassioned and headlong impetuosity of Kossuth. It is surely a significant fact that, as their unanimity has become more complete, their policy has become calmer; as all parties have formed themselves into one national party, they have chosen for the leader of that national party a man in whom comprehensive sagacity predominates over passion, in whom reverence for historical traditions predominates over the sense of abstract right.

The progress of opinion in the Hungarian Kingdom since 1847 is in fact truly remarkable. In the years 1847-48 there were some, indeed, who strove vehemently for the absolute administrative independence of Hungary,—and the Diet was well aware that this was its pledged political right, which it might, if it chose, insist on having fulfilled to the letter. But in 1847 there were few, even of the Hungarian Liberals, who would not gladly have accepted much less than this together with anything like a guarantee for practical liberty and Imperial good faith. The Ministerial or moderate party was then completely Imperial in its bias, though eager for specific constitutional reforms. The extreme Left or Kossuthian party insisted, it is true, on the literal fulfilment of the Pragmatic Sanction, but even so, explicitly avowed its conviction that were it but possible for the Imperial Government to act honestly by its pledges, and concede a genuine representative Government to the Empire,—that which Hungary would never yield as a duty, she might easily be persuaded to concede to the spirit of generous and wise conciliation. This was their language:—"Professing our willingness to support any measure that may tend to an equitable adjustment of the conflicting interests of Hungary and the hereditary States, we at the same time declare that we cannot tolerate a system that would sacrifice all our interests and our constitution itself to the so-called general administrative unity: a kind of unity which by many is regarded as correlative with that of the monarchy.....We are convinced that if the old constitutional rights and liberties of the Austrian hereditary States still existed; if these States, in conformity with the demands of the age and the principles of equity and justice, could be ranked amongst the constitutional nations of Europe—and the Government of the entire monarchy, in its general system, as well as in every department of the administration, was grounded on constitutional principles, and animated by a constitutional spirit—we are convinced, we say, that our interests could then be easily combined with those which are at present in conflict with and even inimical to them; and that by a greater unity of interests and a greater degree of confidence being thus established, every part of the Empire would be invigorated and knit together by a common tie, and the united monarchy, by a guarantee being thus afforded for its material and intellectual development, be enabled to brave with impunity the storms and convulsions by which it might hereafter be assailed."

This language, which was then the language of the *extreme* Radicals, would not now be used by the most conservative of the Hungarian statesmen;—not that it is less true now than then;—not that if Austria could once persuade herself to trust Hungary for a quarter of a century with something like honesty and faithfulness, it would not again become easy to find a large party willing to consider the project of a closer Imperial bond among the various constituents of the Empire; but simply that tyranny has been carried so far, despotism has been so shameless, engagements have been so treacherously violated, oaths have been so lightly broken, that no Hungarian can now look beyond the first step in the process. Austria must show her good faith *first*,—must treat Hungary as she has pledged herself to treat her,—must govern her by the letter of the bond, first,—before any voluntary *rapprochement* between the Central Government and its independent constituent elements can ever be again thought of. For this Austria has herself to thank and no one else. The language which Kossuth was willing to use in 1847, M. Deak rejects as simply unpractical in 1861.

But the change in the attitude of the various parties in the Hungarian Legislature is certainly not at all more remarkable than the change in their tactics. The spirit of Europe was then widely different from what it now is. Princes relied far more on force, and peoples relied far more on force. The treacherous Imperial manœuvre, which, after conceding all the rather large demands of the Hungarian Liberals, suddenly put Jellachich and his Croatians in motion against them, was met by the most violent revolutionary measures in Hungary. The Hungarian Ministry was split into two factions;—one of them, represented by M. Deak, the Minister of Justice, which still relied on the German Reichstag for support, lost all power;—the other, represented by Kossuth, hoisting at once the revolutionary flag, carried the nation with it. Now, the distrusted moderate of those days is the trusted leader of *this*: and though he has cast his confidence in the German party at Vienna to the winds, his tactics are still the same,—strict adherence to traditional forms,—passive resistance to tyranny,—appeal to the public opinion of Europe,—in short open war with Imperialism, but war restricted within constitutional limits and carried on with

the most legitimate constitutional weapons. And this is the policy which under the present condition of Europe is most likely to win. It has won in Italy, when more violent means like those of 1849 would have enthroned France there permanently. It seems likely to pave the way for real reforms in Poland, though at present at least it cannot lead to any substantial independence. And Hungary has many advantages over both Italy and Poland for a chronic warfare of this kind. Her troops are numerous, though not in the country. Their permanent disaffection is certain if no concessions are made, and they are far too important a part of the Austrian army for their permanent disaffection to be at all an agreeable contingency. Her financial resources are great, and are absolutely wasted during such a conflict. Her people are united to a man, and can never be subdued except by extermination. Under these circumstances, the victory of Hungary, if she sticks to the Fabian warfare of M. Deak, is merely a question of time. It is much more certain, as it is much more painful, than violent revolution. What we now see is a partial recurrence of all the events of 1848-49, under a phase far more developed and of far more certain issue. Now, as then, an Imperial plan far sharing in a Central Parliament is half urged, half forced on the Hungarians in exchange for their constitution. Now, as then, they decline it, but with far more unanimity, far distincter firmness, and far *less* violence. Now, as then, the Germans are eager for centralisation, but the Croats are *not* now willing to act as the instrument of the German ambition. Now, as then, danger threatens Austria from Italy, but the Hungarians are no longer willing to aid in keeping Italy down while they are fighting for their own freedom. Now, as then, Europe is interested by the patriotic attitude of Hungary, but far more deeply interested, far fuller of admiration than before. And now, in all probability, no Russian intervention would be either conceded by the Czar, or, we hope, permitted by the Western Powers, should Austria again invite it. In short, in every respect the moral case of Hungary is infinitely stronger than it was in 1849;—fortitude alone is necessary to ensure her a final victory over the hereditary obstinacy of Austrian despotism.

WHAT MR CHASE HAS DONE AND WHAT HE HAS *NOT* DONE.

An impression has gone abroad that the Banks of the Northern States have lent Mr Chase 30,000,000*l* of money, and that he will require no more till Christmas. Till that time, therefore, it is inferred the Treasury at Washington will be full. The real facts are very different. The Banks have contracted to supply 11,125,000*l*, "to bear interest" from the 15th August, and are to have the "privilege," if they choose to exercise it, of lending—

11,125,000*l* on 15th October,
11,125,000*l* on 15th December,

and are to declare whether they will lend the money or not on the 1st October and 1st December. Two-thirds, therefore, of the proposed loan remain "to be placed." The Banks may either lend the money or not, as they please, when the specified time arrives.

And with respect even to the instalment now taken by the Banks, there is an unpleasant clause that "overdue "Treasury notes" and 60 days' Treasury notes may be taken in payment instead of cash. As the Government has already been borrowing as largely as it could in the money market, this option will be extensively exercised.

On the whole, Mr Chase will, as we explained last week, get some money, but it will be doled out to him very cautiously, and will bear no resemblance at all to the large figures with which the American imagination loves to gratify itself.

THE TRADE OF THE COUNTRY.

The usual Statistical Tables of the Board of Trade are published in our Supplement. The total declared value of the exports for the month ending the 31st of July, during the present and two last years, is as follows:—

	£
1859	11,285,451
1860	12,522,698
1861	10,094,266

Thus the decrease for the month ending the 31st July last is nearly 20 per cent. on the amount for the corresponding month of 1860, and 10 per cent. on that for the corresponding month of 1859.

If we take, however, the whole seven months ending 31st of July, we shall find a much less marked change. Thus the figures stand for the first seven months of the same three years:—

	£
1859	74,288,610
1860	74,542,687
1861	70,237,685

On the seven months, therefore, the difference between the years 1861 and 1860, instead of being twenty, is but little more than six per cent.. The decline in our export trade is therefore rapidly becoming far more marked. We lose two millions and a half on the last month, and only 4,300,000*l* on the last seven months.

The largest decrease on the month is in the following articles:—

	£
Apparel and slops	43,892
Beer and ale	30,892
Cottons	818,984
Earthenware	50,443
Haberdashery	136,749
Hardware	100,722
Linens	180,094
Metals	341,087
Copper and brass	101,335
Tin	74,662
Woollens	450,384
Woollen yarn	59,903
Unenumerated articles	123,854

Some articles, however, show a slight increase in the month, of which the principal are:—

	£
Coal and culm	53,200
Cotton yarn	77,374
Machinery	62,755
Wool	70,901

If we turn to the *imports* into the United Kingdom, both from foreign countries and from British possessions, for the month ending the 30th of June in the same three years, we shall find the following figures. These, however, concern the principal or enumerated articles of import only:—

	£
1859	15,846,674
1860	18,271,568
1861	15,806,230

According to these figures, it would seem as though even the import trade had already fallen below that of last year, and had sunk to the level of that of 1859. But the figures for the quarter and for the half-year suggest a different conclusion. Thus, for the *six months* ending the 30th of June we find the following figures for the same three years, these totals referring also, it must be remembered, to the principal or enumerated articles:—

	£
1859	60,815,537
1860	75,369,206
1861	82,266,349

At this rate, while the exports in the seven months declined, as we have seen, by six per cent., the imports in the six months increased by nine per cent. The unenumerated articles, however, present a great addition to these figures; and we find the following representing the grand total of imports, of all kinds and from all places, during the quarters and the half-years respectively. Thus, for the quarters ending June 30, the figures stand:—

	£
1859	45,983,000
1860	56,558,000
1861	58,259,000

According to this view, the increase in imports for the quarter ended the 31st of March over last year is inconsiderable. But if we turn to the *half-year* ending the 30th of June, we find the distinction again more strongly marked:—

	£
1859	75,541,000
1860	92,462,000
1861	99,079,000

Our imports from the United States are always vastly greater than our exports to them. During the present year, this difference has been largely increasing. We will first take our exports to the United States, and for the *quarter* ending the 30th of June. Thus:—

	£
1859	5,422,000
1860	3,544,000
1861	1,209,000

Here is a reduction of scarcely less than two-thirds on the

year 1860, and of more than three-fourths on the year 1859. The *half-year* presents results less striking. Thus:—

	£
1859	11,625,000
1860	9,366,000
1861	5,295,000

It is obvious, therefore, that our exports to the United States have been decreasing more rapidly during the quarter ended the 30th of June than during the quarter ended the 31st of March. This was of course to have been expected.

The imports from America have proceeded in an inverse ratio. We take the *quarter* ending the 30th of June, and find the following figures:—

	£
1859	10,400,000
1860	14,584,000
1861	17,741,000

The *half-year*, ending also the 30th of June, supplies us with the following figures:—

	£
1859	17,301,000
1860	25,618,000
1861	31,576,000

The imports, therefore, from the United States were greater during the quarter from the 1st of April to the 1st of July, than during the previous quarter from the 1st of January to the 1st of April.

The way in which our trade is divided between the Northern and Southern States is curiously shown in these returns in the half-year ending 30th June, 1861. We exported to the

	£
Northern Ports on the Atlantic	5,066,238
Southern Ports on the Atlantic	228,789

We imported from the

	£
Northern Ports on the Atlantic	10,494,608
Southern Ports on the Atlantic	21,082,161

The trifling importance of our direct trade *to* the South, or the stupendous importance of our direct trade *from* the South, could not be better shown.

The following is the comparison of the articles exported to the United States during the seven corresponding months:—

VALUE of EXPORTS to the UNITED STATES in the Seven Months ending July 31.

	1859. £	1860. £	1861. £
Beer and ale	61,582	57,839	21,127
Coals	104,923	108,602	153,110
Cottons	2,236,634	2,024,666	1,012,671
Earthenware	337,407	364,581	166,731
Haberdashery and millinery	1,020,544	865,640	487,334
Hardwares and cutlery	671,689	523,174	331,110
Linens	1,195,328	919,823	409,482
Iron—Pig	158 095	91.490	66,309
Bar, bolt, and rod	529,868	385,067	134,015
Railway, of all kinds	573,310	491,840	153,599
Cast	13,515	11,371	8,598
Wrought	283,006	260,775	109,648
Steel, unwrought	289,226	311,504	182,589
Copper—Sheets and nails	82,273	28,886	7,503
Lead	44,626	46,723	1,451
Tin plates	26,416	7,758	22,376
Oil seed	144,494	65 290	1,620
Salt	42,811	54 902	48,357
Silk stuffs, handkerchiefs, and ribbons	174,542	83,047	67,913

Soda	359,341	295,819	110,471
Spirits (British)	32,634	33,646	11,405
Woollens:—Cloths of all kinds, duffels, and kerseymeres	495,742	425,766	227,098
Mixed stuffs, flannels, blankets, and carpets	1,462,003	1,099 622	533,809
Worsted stuffs	898,102	642,639	308,140
Totals	11,311,742	9,265,904	4,595,949

Our exports to India are on the decline. The figures for the half-year are—

	£
1859	10,109,563
1860	8,225,507
1861	7,764,044

Contrary to what might have been expected from the effects of the French treaty, it has produced most effect in our exports to France.

These were for the first half of—

	£
1859	2,358,912
1860	2,324,665
1861	3,142,185

while our imports *from* France were during the same period—

	£
1859	9,615,065
1860	8,523,983
1861	8,765,235

showing that we are sending France more, but that she is not sending us no more. The contrary might have been anticipated, as our reductions of the tariff came into effect immediately, and theirs were for the most part postponed. Doubtless, however, the whole account has been disturbed by the effects of the bad harvest which France as well as we last year experienced.

The following are the quantities of the principal articles of food and drink received and retained for home consumption during the month of July:—

	Quantities Imported. 1860	1861	Quantities Retained for Home Consumption. 1860	1861
Cocoa lbs	437,992	345,080	192,259	291,523
Coffee	7,497,476	9,600,433	2,813,557	983,536
Wheat qrs	509,358	703,342	509,358	703,342
Barley, oats, beans, peas, and Indian corn	1,105,776	755,981	1,105,776	755,981

wines, 50 per cent; woods, unmanufactured, free; wood, cedar ebony, &c., manufactured, 30 per cent; woollen clothing, 12c per lb and 25 per cent; wool, embroidered, 30 per cent; wool, manufactures of, not otherwise provided for, 30 per cent; woollen shawls, 12c per lb and 25 per cent; woollen hats, 20 per cent; wool, sheep's, or hair of the alpaca, goat, &c., unmanufactured, valued at 18c or less per lb at place of export, 5 per cent; wool, ditto, exceeding 18c and not exceeding 24c per lb, 3c per lb; wool, exceeding 24c per lb, 9c per lb; wool, not in its ordinary condition, or if changed to evade duty, or reduced by admixture below 18c, 9c per lb; wool, mixed, appraised at 24c, 9c per lb; wool, sheep skins, raw, 15 per cent; worsted, all delaines, muslin delaines, barege, grey or uncoloured, 25 per cent; worsted, bunting and all other stained, coloured, or printed wools, not otherwise specified, 30 per cent; woollen yarn, valued at 50c and not over 1 dol per lb, 12c per lb and 15 per cent; woollen yarn, value over 1 dol, 12c per lb and 25 per cent; woollen yarn under 50c, not finer than No. 14, 25 per cent; woollen yarn, finer than No. 14, 30 per cent; worsted, manufactures of, not specified, 30 per cent; worsted yarn, valued at 50c and not over 1 dol per lb, 12c per lb and 15 per cent; worsted yarn, valued over 1 dol, 12c per lb and 25 per cent; yarns, 10 per cent; yarn hemp, 4c per lb; yarn, coir, 1c per lb; zinc, iron coated with, 2c per lb; zinc, oxide of, in oil, 1½c per lb; zinc, sulphate of, 20 per cent; zinc, unmanufactured, 1c per lb; zinc, manufactured, not specified, 30 per cent; zinc, in blocks or pigs, 1c per lb; zinc, in sheets, 1½c per lb.

And be it further enacted, that all articles, goods, wares, and merchandise, imported from beyond the Cape of Good Hope in foreign vessels, not entitled by reciprocal treaties to be exempt from discriminating duties, tonnage, and other charges, and all other articles, goods, wares, and merchandise not imported direct from the place of their growth or production, or in foreign vessels, entitled by reciprocal treaties to be exempt from discriminating duties, tonnage, and other charges, shall be subject to pay, in addition to the duties imposed by this Act, 10 per centum ad valorem: Provided that this rule shall not apply to goods, wares, and merchandise imported from beyond the Cape of Good Hope in American vessels.

And be it further enacted, that from and after the passage of this Act, there shall be allowed on all articles wholly manufactured of material imported, on which duties have been paid, when exported, a drawback equal in amount to the duty paid on such materials, and no more, to be ascertained under such regulations as may be prescribed by the Secretary of the Treasury: Provided that 10 per centum on the amount of all drawbacks so allowed shall be retained for the use of the United States, by the collectors paying such drawbacks respectively.

And be it further enacted, that all goods, wares and merchandise, actually on shipboard and bound to the United States, and all goods, wares, and merchandise on deposit in warehouses or public stores at the date of the passing of this Act, shall be subject to pay such duties as are provided by law before and at the time of the passage of this Act.

And provided further, that all goods deposited in public store or bonded warehouse after this Act takes effect and goes into operation, if designed for consumption in the United States, must be withdrawn therefrom, or the duties thereon paid in three months after the same are deposited, and goods designed for exportation and consumption in foreign countries may be withdrawn by the owner at any time before the expiration of three years after the same are deposited, such goods, if not withdrawn in three years, to be regarded as abandoned to the Government, and sold under such regulations as the Secretary of the Treasury may prescribe, and the proceeds paid into the Treasury: Provided, that merchandise upon which the owner may have neglected to pay duties within three months from the time of its deposit, may be withdrawn and entered for consumption at any time within two years of the time of its deposit, upon the payment of the legal duties, with an addition of 25 per cent. thereto: Provided also, that merchandise upon which duties have been paid, if exported to a foreign country within three years, shall be entitled to return duties, proper evidence of such merchandise having been landed abroad to be furnished to the collector by the importer, 1 per centum of said duties to be retained by the Government.

And be it further enacted, that all Acts and parts of Acts repugnant to the provisions of this Act be, and the same are hereby, repealed: Provided, that the existing laws shall extend to, and be in force for, the collection of the duties imposed by this Act, for the prosecution and punishment of all offences, and for the recovery, collection, distribution, and remission of all fines, penalties and forfeitures, as fully and effectually as if every regulation, penalty, forfeiture, provision, clause, matter, and thing to that effect in the existing laws contained, had been inserted in and re-enacted by this Act.

Agriculture.

THE HARVEST.

The wheat harvest in England is for the most part finished, and a finer has never been known. The grain is, generally, of the best quality and of unusual weight; from 66 lbs to 69 lbs per bushel being often spoken of as the weight of new wheat. This will in a degree compensate for a thin crop which unquestionably has been the most prevalent, although in some districts, as in Berkshire, around Windsor, we are told by competent judges that the wheat crop there, taken as a whole, will be an average one. We notice that the South Lincolnshire correspondent of the *Mark Lane Express* speaks of the wheat crops of that great wheat-growing district as "very varied," and as likely "to be defective in quality and yield." Some of the crops are stated to be affected with mildew, and the ears, though long, are said to be thinly set. We believe, however, that a more cheerful account is more generally applicable to the bulk of the wheat crop. That the land is foul, is not to be denied, but that will be remedied if we have a dry autumn. Barley is of first quality, but the quantity turns out to be less than was at one time expected. The crop which everywhere seems to have succeeded best is the oat crop, and with an abundant produce, the weight per bushel will universally prove much beyond an average. The grain markets continue steady, and as the breadth of wheat is certainly less than usual, no great reduction is looked for by the trade. It is in the farmers' favour that the intrinsic—flour-making—value of their wheat is high.

Meadows and pastures are beginning to tell of dry weather, and in some places water is getting short. As yet, however, stock of all kinds have thriven, though the last ten days must have been trying to feeding beasts. The feeding pastures are very uneven. At one time the grass grew so rapidly that the stock could not consume it, consequently the animals selected the best portions, leaving a good deal of rough grass, which they will now never touch. This is always an untoward state of things for the grazier. The potato disease has not made much progress of late, and in many cases where a great loss was expected, the percentage of diseased tubers, when dug, turns out to be small. This crop,

however, is very various. On the whole, the farmer will scarcely recover his losses of last year, but his produce of this year will be very good and saleable, while the dry and hot weather will go far to restore the land to a more healthy condition, and afford opportunities for clearing it. His prospect is at least hopeful as regards next year.

AUSTRALIAN FARMING.

It must interest great numbers of persons who have relatives in Australia, or who may contemplate, more or less of immediately, an emigration to that part of the world, to catch such a glimpse of Australian husbandry and the wants and wishes of Australian husbandmen as the local agricultural journals afford. We have now before us several numbers of the *Victorian Farmers' Journal*, and the *Victorian Agricultural and Horticultural Gazette*, which give a few such glimpses. The editor of the *Farmer's Journal* writes an account of a visit to the farm of Mr Barton, "situated on the basaltic plains at the southern base of the Anzaghe Yowang Hills (commonly called the Anakies), about half way between Geelong and Bacchus Marsh, and distant about 12 miles from the Duck Ponds station on the Geelong and Melbourne Railway." After some description of the district, the writer states that Mr Barton had been farming very successfully for some years in that neighbourhood, having previously had considerable experience as a farmer in the sister colony of South Australia, but he had no knowledge of farming till he arrived in Australia. It seems that much of late has been said in the province of Victoria "about farming not being a remunerative business," and the writer puts "the actual experience of a really practical man" against the truth of such an opinion. That Mr Barton's neighbours have the advantages of a good soil and situation is evident, for we learn that "the soil on the ranges, and on the slopes in the immediate vicinity, is of the richest description, and consists of a thick black mould, such as we generally find near the site of volcanic eruptions. The natural grasses are very luxuriant, and support at the rate of about three sheep to the acre. One gentleman has 3,000 acres fenced in and rendered sheep proof, which supports at the present moment 3,000 sheep. The crops, too, have turned out excellent, and as much as 40 bushels of wheat and upwards per acre have been attained on the slopes of the ranges." Mr Barton's farm however is at some distance from the ranges, and the soil is "of a brownish stiff clay, hard on the surface, and here and there a plentiful outcrop of boulders. The natural grasses too are of the poorest kind." His farm "forms part of a stony plain, and as bleak, barren, and unpromising a plain as one could well imagine." Such land is usually considered in the colony as valueless except for sheep grazing. On such land, then, profitable results have been achieved. The following are the operations of 1859:—The land having been previously broken up, it was ploughed and sown, the corn reaped, and thrashed, produced from 150 acres of wheat land 20 bushels to the acre, equal, at 6s per bushel, to 900*l*. The reaping and thrashing being done by machinery, gave Mr Barton an advantage over those of his brethren who adhere to hand reaping and thrashing, and this really made up all his profit. A pair of horses will plough five acres a week, which cost "for wages 20s, rations 6s, horsefeed 10s, and blacksmith work 4s per week. Total for five acres, 40s, or at the rate of 8s per acre. In sowing, two teams of working bullocks (four bullocks to the team) and one man, for sowing, managed five acres per day; allowing wages and rations as before, and a little for tear and wear, the expense will be 12s 2d for five acres. Then there is the seed at the rate of 1¼ bushel to the acre, 12s 6d—for the 5 acres, 62s 6d; allow also for contingencies an additional sum, say 5s 4d. This will make the whole five acres 6*l*, being at the rate of 1*l* 4s per acre. In harvesting, Mr Barton employs one of Mellor's Adelaide stripping machines, along with one of Hornsby's spike roller winnowing machines, and so the reaping, winnowing, and bagging operations are carried on in the field at one and the same time. By using these machines he was able to reap, clean, and bag his wheat at the rate of seven to eight acres per day, and at a cost of only 9s per acre. Mr Barton estimates that the whole of the plant and machinery requisite for farming, say 150 acres of wheat, on land similar to his own, may be purchased for 200*l*; and he believes that 50*l* per annum, or 25 per cent., for tear and wear, depreciation of stock, &c., would be amply sufficient. On 150 acres, then, this would amount to 6s 8d per acre. The wheat crop on this farm yielded from 20 bushels and upwards per acre; and the price obtained, on the farm, was 7s 3d per bushel on the average."

Such land may be rented at 20s per acre, and the following is the result:—

	£	s	d
Ploughing, per acre	0	8	0
Sowing	0	2	6
Seed, at 1¼ bushel	0	12	6
Reaping, &c	0	9	0
Tear and wear, and depreciation of stock	0	6	8
Rent	1	0	0
Cost per acre	2	18	8
150 acres, 20 bushels, at 6s	900	0	0
Cost of do., at 2*l* 18s 8d per acre	435	0	0
	465	0	0

A British farmer would say "But the farm can't be all wheat," and that some allowance must be made for keeping up the fertility of the soil to a given wheat-growing power. But perhaps our Victorian farmers have not yet exhausted the original fertility of the land, and at all events we present the account as one which the editor deemed entitled to the heading of "The farm that paid the rent and something more." It strikes us that such land as is described must in Victoria be considered very highly rented at 20s per acre. We should have supposed such land would scarcely bear any rent. In contrast with the cost of 9s per acre for reaping and thrashing according to Mr Barton's practice, the cost of the ordinary system of hand reaping is thus stated:—

	£	s	d
Reaping, per acre	1	0	0
Rations and grog	0	2	2
Carting	0	5	0
Thrashing	0	11	8
Winnowing and bagging	0	5	0
Cost per acre	2	3	10

The *Gazette* also deals with the same subject, and admits that "farming, as a rule, has not paid in Victoria," and attributes it to the excessive cost of labour, and the bad quality of much of that labour. The remedy suggested to the farmers is this:—"Let them establish labour depots in the towns and centres of population supported by themselves. Let them pledge themselves only to engage servants at these appointed places, or at their own homesteads, at the rate fixed by a majority. Let them insist on such terms of service as shall include harvest time during the summer six months hiring, and ploughing and sowing during the winter period. Men must be prevented from allowing their engagements to terminate immediately before harvest time and seed time commence." Whether such suggestion indicates a very full acquaintance with economical laws may be a question. It points, however, to this, that farming, to be profitable in Australia, must be largely aided by machinery, and that farmers ought to secure the best men they can meet with on permanent engagements, and to do so they must give good wages. Other work is plentiful and highly paid, and the farmer must act accordingly. Slovenly farming, however, seems to be the rule, for in another number of the *Gezette* we find these remarks:—"No country in the world possesses greater capabilities for judicious farming than Victoria, because there is no country where the green and root crops can be cultivated to more advantage. It is the home of the mangold, beet, parsnip, carrot, sorgham, and millet, and it is incomprehensible to many how, with all those facilities at our fingers' ends, and with a virgin soil to open up, we should continue to persevere in the old slovenly system that is neither comfortable nor profitable. More especially are we astonished at those farmers who are their own landlords.....Their ground is their own, and if they choose to work it out in a few years by practising a most unproductive system of husbandry, they leave no resource left to fall back upon."

We find in the *Gazette* also some judicious advice to the colonial farmers to rear hedges to take the places of their constantly decaying wood fences. Hawthorn and holly grow too slowly, and furze hedges would be liable to take fire in a country where the natural grasses are periodically burnt. Acacia *is* the plant recommended for fencing as quick growing, and, if properly cut, making a strong fence. It is best raised by seed sown where the hedge-row is wanted.

The vine is evidently a topic of much interest to the Australian farming public, for we find its treatment the object of constant comment. The *Farmers' Journal* states the produce of five small vineyards, the largest being four acres, and neither of the others exceeding an acre and a half, in the neighbourhood of the Murray River, in 1861, at 5,988 gallons, being an average of 630 gallons per acre. Storekeepers are offering 7s 6d per gallon for the new wine, without troubling themselves much about the quality. This makes the gross return from an acre of vines for the present year 236*l* 5s. The colonial wine, however, when one year old sells for from 15s to 21s per gallon in the district. This season has been a good one, and 500 gallons to the acre, at 5s per gallon, is said to be more like an average yield, representing 125*l* per acre. The district around Albany, in the valley in the Murray, is said to offer great advantages for the growth of the vine. In South Australia the vine is grown on a far larger scale.

COMMERCIAL LITERATURE.

The Theory of the Foreign Exchanges. London: Effingham Wilson.

The simple title of this treatise gives an idea of its subject, but scarcely conveys a correct notion of its value. The subject of the Foreign Exchanges may be treated both theoretically and practically. Many political economists have written explanatory dissertations, expounding at more or less length, and with more or less accuracy, the abstract principles which regulate exchange transactions. Many experienced cambists have written careful treatises which show in what manner the needful calculations of the

exchange market may be worked most concisely and most correctly. But no writer had, before the appearance of the present work, attempted to pass from the theoretical to the practical part of the subject. Between such a dissertation as appears in Mr Mill's "Political Econony" and such a dissertation as appears in Mr Tate's "Cambist," there is a vast intellectual interval. We wish to know *how* those book principles affect those mercantile sums: we know that they do, it is proved that they do, but our imagination is not able to perceive in what manner.

The short treatise of which we have given the concise title above endeavours, in some degree, to supply the missing link in mercantile science. It is written by some one who is thoroughly conversant with actual exchange transactions; by some one who has daily watched them for the purpose of ensuring a profit or of avoiding a loss; by some one who has learned to read in "miscellaneous parcels" of foreign bills the precise history and true significance of each; and by one who also has thoroughly weighed the speculations of philosophical writers upon this complicated subject, and who has learned from the necessity of tracing out *all* the agencies which operate on the exchange market, before assigning with confidence any remarkable phenomenon to the causative influence of any one of them. The subject of the book is exactly that middle region which we have described as hitherto comparatively unnoticed. It deals with facts by the aid of principles; it confirms principles by the help of facts.

The time is very favourable for such an attempt. Almost all the contributions of practical men to abstract science have been stimulated by pressing controversies. They have endeavoured to give such help just where they had found that they needed help themselves. They have wished to impart the distinct ideas given by first hand experience, and to remove the shadowy conceptions which disguise the real facts from those who half see them. Such a subject is that of our foreign exchanges at the present moment. The events of last year brought them constantly to the surface. We saw, first, the curious strategems of the Bank of France; next, the American Revolution, with its long train of very singular and very important effects; lastly, but most memorable of all, the certain efficiency of a rise in the rate of interest in preserving our Bank reserve from exhaustion, and our commerce from panic and confusion. Such events are just those which most arouse the attention of an experienced man who has to deal with them as matters of business,—are just those on which he is most likely to give us valuable information. There are three questions respecting the foreign exchanges on which there is much curiosity just now. 1st. How far can one country draw gold from another? 2ndly. In what manner did the Americans succeed in obtaining from Europe such vast supplies? 3rdly. In what manner does the rise in the value of money correct the exchanges? We all of us see that it does, but most of us would be puzzled to explain precisely *how*. We cannot of course discuss such large topics within the narrow limits of a review, but we will, in a future notice, attempt to give a very slight sketch of the mode in which our author appears to answer them.

LIGHTHOUSES AND BEACONS OF THE BRITISH COLONIES. Two Letters addressed to the Right Hon. T. Milner Gibson, M.P., President of the Board of Trade, by ALEXANDER GORDON, Member Inst. C. Engineers. London: Strangeways and Walden, Castle street, Leicester square.

THE above pamphlet contains two letters which have been addressed to the President of the Board of Trade on the Lighthouse System of the British Colonies. Mr Gordon appears to have considerable experience in the subject, and as early as 1847 suggested to the Government of the day the expediency of a department to superintend the erection and maintenance of colonial lights. Like too many others, Mr Gordon complains that he is likely to be passed by, notwithstanding the labour and thought that for many years he has bestowed upon colonial lighthouse engineering, and that the fruits of his industry are likely to be bestowed upon official favourites.

GENERAL LITERATURE.

THE ORDEAL OF FREE LABOUR IN THE BRITISH WEST INDIES. By W. G. SEWELL. London: S. Low, Son, and Co., 47 LudgateHill. New York: Harper and Brothers. 1861.

[FIRST NOTICE.]

THIS valuable and interesting work is a revised reprint of letters written to the *New York Times* during a tour in the British West Indies in the years 1859-60. The author says (p. 177) that he "came to the West Indies imbued with the American idea that African freedom had been a curse to every branch of agricultural and commercial industry," and the ground from which he starts is professedly that the question of emancipation "is a commercial question, and must be determined by a commercial standard."—(P. 49). Passing by the curious anomaly which this involves (*i.e.*, the testing by a *commercial* standard that system which commences by *stealing* the labourer who is to manufacture your merchandise), there is an evident advantage in examining slavery from every point of view. It would be a moral contradiction if that social state which begins by de-humanising one race could really and permanently benefit another. Mr Sewell's very careful and elaborate inquiry into the subject proves abundantly that such has not been the case; that slavery did not answer even to the West India planters themselves, and that in proportion as they have cordially accepted emancipation and really worked out its consequences, has it been beneficial to them as well as to the blacks.

Mr Sewell found that the islands differed from each other in so many important particulars, that he wisely insists on judging the commercial problem of each island separately, before proceeding to any general deductions. Commencing with the Windward Islands, he landed at Barbadoes in the beginning of 1859. Here, he says, emancipation has been a decided success. Of the 106,000 acres in Barbadoes, 100,000 are under cultivation. The profits of sugar-growing with free labour are amply remunerative, and "agricultural land in Barbadoes will bring at this moment double what it brought under slavery, and infinitely more than land brings in Cuba."—(P. 52.) Taking an average of sugar exportations, he states (p. 62) that the crop "from 1720 to 1800 was 23,000 hhds per annum, and from 1800 to 1830 was 20,000 hhds, showing a decline under slavery of 3,000 hhds."

Let us now look at the Barbadoes sugar exportations of the present day, premising with the observation that from 1826 to 1830 the average weight of a hogshead of sugar was 12 cwts; from 1830 to 1850, 14 cwts, and is now from 15 to 16 and even 17 cwts. With this difference of weight *against* her, Barbadoes exported, in 1852, 48,610 hhds; in 1853, 38,316 hhds; in 1854, 44,492 hhds; in 1855, 39,,692 hhds; in 1856, 43,552 hhds; in 1857, 38,858 hhds; and in 1858, 50 778 hhds, or nearly double what she exported during the most favourable year of slavery! .....It must be remembered that this immense sugar-crop comes from about one-fourth of the land under cultivation. I have no statistics in regard to other productions, but the average exportation of miscellaneous articles of native growth may be valued at 20,000*l* sterling per annum, and the inference is that a considerable portion of the island, and especially the lots owned by the labouring population, are grown in articles of food for home consumption.

As to the imports, "in the year 1832 the largest number of vessels entered Barbadoes under the slavery *régime*, and amounted in all to 689 vessels, of 79,000 tons. In 1856—I select the year at random—966 vessels, of 114,800 tons, were entered, and this may be taken as an average of the last eight years." "While under slavery American importations did not exceed in value 60,000*l* per annum, they now average five and six times that amount. As an illustration I select again the imports of the year 1856, having the figures before me. The values of breadstuffs and food imported that year from the United States amounted to more than 200,000*l*; of manufactured articles, to 70,000*l*; of lumber and wood goods, to 20,000*l*; and of horses and mules, to 6,000*l*, besides minor articles. The fact, then, that all the American importations have greatly increased, that they are required by the masses, as their nature indicates, and that they are obtained at much cheaper rates than if brought from Europe, as they formerly were, are so many arguments in favour of the prosperity of Barbadoes, and of the improved condition of her labouring population."—(Pp. 63-5.)

Mr Sewell shows that the flourishing condition of the sugar estates in Barbadoes is greatly owing to the cheapness of labour which is peculiar to that island. The population there "is extremely dense, averaging 800 persons to the square mile, and partly from an aversion of the negro to leave his house, partly from his fear, still easily excited, of being sold into slavery, no material emigration from the island has ever taken place. In Barbadoes, therefore, labour has always been abundant.....But no credit is due to the Barbadian plantocracy for retaining that adequate labouring population in their employ. To the latter it was the option of work at low wages, and on most illiberal terms, or starvation."—(Pp. 33-4.) In spite, however, of this and other obstacles, the coloured Barbadians have decidedly risen in the social scale since emancipation. "The small proprietors of Barbadoes holding less than five acres have increased from 1,100 to 3,537. A great majority of these proprietors were formerly slaves, subsequently free labourers, and finally landholders."—(P. 39.) Mr Sewell is of opinion that the coloured mechanics and artisans of Barbadoes "are equal in general intelligence to the artisans and mechanics of any race in any part of the world equally remote from the great centres of civilisation," and adds that "*it is impossible to produce a single man of colour in Barbadoes, if he can boast of any education at all, who will answer to the popular idea of the negro character.*"—(Pp. 45-6.)

Of the morality of the Barbadians Mr Sewell does not speak so well as of their industry. He bears witness to a serious amount of vice among them, but he thinks that it might be greatly diminished by educational means. The planters, he says, although convinced that free labour is much more economical than slave labour, have not heartily accepted emancipation as a whole. They still set their faces against the elevation of the labourers, and refuse political rights even to the most advanced section of the coloured classes,—the wealthy and cultivated mulattoes. In spite of the immense changes of recent times, "the Barbadian franchise remains as it stood a century ago"; it "utterly excludes the middle class from the polls, and places legislation under the complete control of the planting interest."—(Pp. 37-8.) Still worse, the difference of colour separates members of the *same* social class, to a deplorable extent. "White planters refuse to associate with coloured planters, white merchants with coloured merchants, white mechanics with coloured mechanics, simply because they *are* coloured."

(P 71.) "I know of parties in Barbadoes who refused to visit Government House because they met there coloured persons of the very highest respectability and cultivation."—(P. 72.) Mr Sewell regards these prejudices as the chief hindrance to the full solution of "the emancipation problem," and looks to the educated mulattoes as the probable instruments by whom that problem will eventually be worked out.

Mr Sewell's chapters on St Vincent, Grenada, Tobago, and St Lucia present a condensation of interesting details, for which we must refer our readers to his book. In all these islands the sugar crops have diminished since emancipation, but the cultivation of other products has greatly increased. In St Vincent, "within the last 12 years, from 10,000 to 12,000 acres have been brought under cultivation by small proprietors, owning from one to five acres, and growing arrow-root, provisions, and minor articles for export." —(P.80.) Grenada is now producing, in minor articles, such as cocoa, double what it produced 25 years ago; and the products of St Lucia also have doubled within the same period. This does not look like "ruin."

Mr Sewell devotes three chapters to the island of Trinidad, which is, he says, "the very opposite of Barbadoes in climate, soil, population, and in all that can affect a country or its inhabitants. Trinidad is a new island very recently settled—Barbadoes had a population of 60,000 two centuries ago. Trinidad has an area of 1,287,600 acres, of which about 60,000 only are under cultivation. Barbadoes, covering some 106,000 acres, is cultivated from end to end like a garden. Trinidad, even under slavery, never had anything like an adequate labouring population. Barbadoes is so thickly inhabited that work or starvation is the labourer's only choice. In Trinidad land is exceedingly rich, plentiful, and cheap, while labour is scarce and extravagantly high: in Barbadoes land is dear and labour comparatively cheap.....The only similarity between the two islands is that sugar forms the staple production of both, and that both have been successful, though from very different causes, under a free-labour system."—(Pp. 106-7).

In accordance with Mr Sewell's plan, in visiting each island, to make himself "acquainted with the true condition of its emancipated classes," he traces the progress of the coloured labourers in Trinidad from the time of their emancipation to the prosperous and independent condition which they now occupy. Of the 11,000 who were liberated, he estimates that 4,000 only remained on the estates; but although they supply labour to nearly all the cacao estates, "comparatively few are to be met with on the sugar plantations."—(P. 111.) Various means were tried by the planters to remedy the deficiency. "They were a new race compared with the ancient proprietary of Barbadoes and Jamaica, and with more life, intelligence, and energy, they made every exertion that men could make to extricate themselves from their difficulties."—(P. 117.) After several plans had been tried with little or no success,

The importation of foreign labour, after the successful example of the Mauritius, was finally attempted. The first ship with Chinese immigrants arrived in the harbour of Port-of-Spain in 1845. But the importation of Indian coolies was soon substituted for that of Chinese. The experiment remained for some time very doubtful. The labourers arrived for several years in small detachments, and at long intervals; and they were brought from the opposite extremity of the world at an enormous cost. They had to be instructed, and from the day on which the first convoy was landed, down to the year 1853, no one could say whether the plan was a success or a failure. But, now that it has been fairly and fully tested, the advantages to the colony of this importation of Indian labour are so thoroughly established that no one who visits Trinidad in 1859, after having seen her and known her in 1846, can hesitate to believe that not only has the island been saved from impending ruin, but a prospect of future prosperity has been opened to her such as no British island in those seas ever before enjoyed under any system, slave or free. —(Pp. 119-20.)

Mr Sewell inquired closely into this subject, and gives it as his decided opinion that the coolie immigration is conducted with justice and humanity, and is a real benefit to the immigrants as well as to the planters. From the profusion of details which he gives, we must extract a few of the most important:—

The chief feature in Trinidad immigration is its entire management on the responsibility, not merely of the colony, but of the Government and people of Great Britain.....No planter, were he so disposed, can wrong them with impunity. A superintendent, or agent-general, of immigrants is appointed, and is invested with special powers. He acts on behalf of the Government as the immigrants' protector. He indentures them to their employers; keeps a register, with the names and other particulars of both parties to the contract; provides food for those immigrants who are not employed immediately on their arrival; sees that husbands are not separated from wives, or children from parents; visits and inspects the condition of the immigrants on the estates; and is required to obtain from the planters quarterly returns, in which the increase by birth and the decrease by death of the labourers on each estate, with other specified particulars, must be fully stated. The reports are transmitted to the Government by the agent-general. This officer has also power to cancel any immigrant's indenture if it shall appear to him that the man has been ill-used by his employer, or that the accommodation or medical attendance to which he is entitled is bad or insufficient.....The law provides for their free return after they have completed the term of industrial residence for which they were indentured.....The physical appearance of a crowd of coolie immigrants returning to India attests the beneficent results to themselves of an industrial residence in Trinidad. Instead of being a set of naked, half-starved, gibbering savages, ready to eat any dead, putrid animal, fish, flesh, or fowl that lay in their path, they are clothed, sleek, and well fed, strong and able-bodied, speaking English with tolerable accuracy, and looking the intelligent people that they really are. I have seen them arrive and I have seen them depart, and speak from actual observation.....That they receive adequate compensation for their services is apparent from the fact that all who return home, after completing their term of industrial residence, carry away large quantities of money. I heard of a coolie the other day who returned after a residence in the island of 10 or 12 years, with 9,000 dols yet this man was entitled to, and actually received, a free passage home. A ship-load of coolies, going back, will take with them from 40,000 dols to 50,000 dols.....That the coolie labourers themselves are fully satisfied with their condition in Trinidad is very evident from the fact that large numbers remain in spite of the bonus, for it is nothing else, offered them to return. After they have fulfilled their terms of service, many voluntarily renew their contracts.....After the immigrants have fulfilled the obligations to which they bound themselves, they receive a certificate of what is called "industrial residence," which empowers them to act as independently as they choose for the future.—(Pp. 121-6.) Out of 1,799 coolies distributed in 1853, there remained in 1858, under indenture, 1,184, of whom 623 had never quitted the estates to which they had been originally assigned, while 90 had purchased their remaining periods of industrial residence.—(P. 136.)

Under the coolie system the sugar crops have gradually increased, so that while the highest average exportation under slavery was "not equal to 20,000 hhds of the present day,"—"this year [1860], with coolie labour, the export will reach nearly 40,000 hhds." —(P. 139.)

We must defer Mr Sewell's account of the remaining islands to another article.

SYLVAN HOLT'S DAUGHTER. By HOLME LEE. Second Edition. Smith, Elder, and Co., 65 Cornhill.

MESSRS SMITH AND ELDER have done well on the whole in adding to their cheap and good series of novels one which, if not first-rate, is yet much superior to the common run of novels. The first part indeed of the story is so promising, and is written with so much freshness and ease, that we are the more disappointed in the marked falling off towards its close.

ROUTLEDGE'S ILLUSTRATED NATURAL HISTORY. By the Rev. J. G. WOOD, M.A., F.L.S., &c. Part 29. Routledge, Warne, and Routledge, Farringdon street.

THIS is a very handsome work, both in point of illustration and general getting up. The names of Wolf and Dalziel are securities for the excellence of the former; the paper is good, and the print clear and large. The descriptions of the pigeon tribes in this number, accompanied as they are by life-like pictures of the birds themselves, are as complete as can be desired. Mr Wood writes like a true lover of nature.

POEMS. By the Rev. GEORGE EDMOND MAUNSELL. Smith, Elder, and Co., 65 Cornhill.

THESE verses,—we cannot call them poems,—were, we are told, printed originally for private circulation. We are left to infer that the solicitations of friends has led to their after publication. We all know, more or less, the unreliability of such encouragement —the natural partiality that blinds, or the fear of giving pain and offence that softens, the judgment of friendly critics. Clergymen especially need to be on their guard against the cruel kindness of friends. It is a pitiful sight to see a man wasting out his brains, and fancying that the wretched stuff he produces is poetry. It is not even clear water, much less genuine wine. From beginning to end of his volume,—and we have, what we venture to predict few beyond the bounds of Mr Maunsell's parish will do, read it through, —we find nothing but the same hopeless dead level of "words, words, words."

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The judgment of the Tribunal of Correctional Police, condemning Mirés to five years' imprisonment and 120*l* fine for swindling and embezzlement, has been confirmed to-day by the Imperial Court, after very lengthened pleadings.

The Councils-General of Departments have commenced their annual session. The duty of these bodies is to occupy themselves with local affairs, and to make known local wants; and on that account their deliberations possess value in an economic point of view. But thus far they have done little more than listen to the opening speeches of their presidents; and those discourses have

been more of a political than an economic character. Two of them may be mentioned: one by Count de Morny contains a declaration that "no apprehension of any war in which France can be engaged" need be entertained; and as he is a personage high in Imperial councils, what he says is important: his speech also exhorts French manufacturers not to be discouraged by the commercial treaty with England, as, though at first they may have difficulties to encounter, they, being stimulated by competition, and favoured by various commercial measures which the Government has adopted, will be able to obtain success, not only in their own, but in foreign markets. The second speech to be noted is that of M. Michel Chevalier in the Council of the Hérault: it consists of a vigorous and eloquent defence of the commercial treaty with England, and of a detail of what France has to do with regard to railways, the Credit foncier system, primary instruction, &c. I regret not having the text of this last harangue before me.

The Compagnie Generale Maritime, which, as is known, was got up under the protection of the Credit Mobilier, has been authorised by Imperial decree to change its name to "Compagnie Generale Transatlantique," because it is to establish regular steam communication, and is to carry the mails, between France and North America.

On the annexation of Savoy to France the question was raised what was to be done with the Bank of Savoy. The amalgamation of the establishment with the Bank of France was strongly recommended by several influential persons; but the Minister of Finance has just decided that the Bank shall be maintained, and that it shall be allowed to issue notes as heretofore.

The Discount Bank (Comptoir d'Escompte) is making an issue of 5,987 bonds at 500f, the amount raised to be employed as loans on mortgage to planters in the French colonies.

The Government has just decided that the stipulations of the treaty of 1850 between France and the Kingdom of Sardinia, relative to the admission of Sardinian productions into France, shall be applicable to articles brought from all the ports of Italy which are now subjected to the sceptre of King Victor Emmanuel. This treaty allows Sardinian ceruse, coral, fruits, silk gauzes, books, engravings, lithographs, music, certain sorts of cheeses, silk in cocoons, olive oil, pickled fish, rice, mules, and prepared skins, to be imported at lower duties than from other countries. The Board of Customs, on its part, has directed that American 3-6 alcohol, destined for re-exportation, may up to the end of the year, as a special favour, be reduced to 90 deg. by the addition of distilled water.

The Court of Cassation has just given a decision which is of considerable commercial importance at this epoch of frequent tariff changes; namely, that merchandise placed in bond must pay the import duties in force at the time of entrance in bond, and not those which may subsequently happen to be decreed. In virtue of this decision some merchants at Havre, have been compelled to pay the duties on a quantity of grain fixed by the defunct sliding scale, because the grain was put in bond when the scale was in operation, though it was not taken out until some time after the scale was suspended.

Emigration from France is singularly limited, as will be seen from the following figures extracted from an official report just published:—

	For Foreign Countries.	For Algeria.	Total.
1856	9,433	8,564	17,997
1857	10,817	7,992	18,809
1858	9,004	4,809	13,813
1859	6,786	2,378	9,164
1860	7,443	2,644	10,087

Although the Bank of France has not yet reduced its rate of discount, owing chiefly to an apprehension for large demands of money to pay for purchases of corn, it can hardly fail to do so, in presence of the new diminution which has taken place at London; but the reduction will probably not exceed ½ per cent.

Little animation continues to prevail on the Bourse, and the following are the week's quotations:—

	Thursday, Aug. 22. f c	Thursday, Aug. 29. f c

Annexed is an account of the markets:—

FLOUR.—The quotation at *Paris*, yesterday, was 76f to 81f and 82f the sack of 159 kilogs, but business was not active. For the four marks prices were firm, though operations were limited: current month, 79f 50c; September alone, 79f 75c. At a public auction which took place yesterday, the prices realised were 75f to 81f, but biddings were not spirited.

WHEAT.—At *Paris*, yesterday, business was not active, and the quotations varied from 45f to 48f and 48f 50c the sack of 120 kilogs. The offers of foreign were numerous, and some small sales were effected at 42f to 43f for American; Dantzic, 43f to 44f; English, 46f to 47f—all delivered at railway stations. In the provinces, 63 markets present a rise of from 10f to 2f 70c the hectolitre, 13 a fall of from 5c to 1f 30c, 19 are reported firm, 44 without variation, 15 calm.

COTTON.—The sales at *Havre*, in the week ending Friday, were 17,628 bales and the arrivals only 232. The closing prices were 1f to 2f higher for very low sorts, 1f for low and for all other sorts. Very low New Orleans was consequently 102f the 50 kilogs; low ditto, 114f; very ordinary ditto, 119f. On the first two days of the present week business was very active, and on Tuesday very low New Orleans was 104f; low ditto, 115f. Yesterday, the sales were 1,500 bales; prices unchanged.

COFFEE.—At *Havre*, in the week ending Friday, business was important, and prices advanced: 6,000 sacks Hayti, Port-au-Prince, Jacmel, and Jeremie, disposable, went at 77f to 80f the 50 kilogs in bond; 1,800 sacks Jacmel and Jeremie, for delivery, 77f 50c to 79f; 1,510 Port-au-Prince, for delivery, 78f to 78f 50c; 350 Cape, disposable, 81f 50c; 270 sacks St Marc ditto, 83f to 83f 50c; 11,670 Rio, not washed, disposable, 61f to 72f; 2,770 ditto, for delivery, 63f to 74f; 185 Rio, washed disposable, 85f; a lot of Ceara, 80f; 31 Java, 113f, duty paid; 7,092 ditto, 109f; 1,750 Macassar, 105f; 200 Mysore, 108f 50c to 109f; 80 Malabar, 106f; 128 Ceylon plantation, 112f. Various lots of damaged Hayti, Rio, and Ceylon were also sold. The arrivals exceeded 9,000 sacks. This week, Hayti has been at 80f; San Yago, 88f; Rio, 70f to 81f; Ceylon, 107f 50c. At *Nantes*, last week, 2,600 sacks Porto Cabello, *non-grages*, went at 80f; 100 Baly, 102f 50c; 1,497 Hayti, at prices not stated; also some damaged Porto Cabello were sold. This week, a small lot of Reunion, inferior quality, has been disposed of: some ditto, *fève pointue*, 130f. At *Bordeaux*, last week, 510 sacks La Guayra *grages* were sold at different prices; 1,754 ditto, *non-grages*, 86f 50c; 4,000 sacks Mysore, 109f to 109f 50c; 3,050 sacks Rio, not washed, 75f to 78f 50c; 600 ditto, washed, 91f to 95f; 1,228 Java, 113f to 114f; 1,685, at 112f 50c to 115f. This week, Mysore has been at 108f 50c to 112f; San Yago, 93f to 100f; Java, 116f; La Guayra, *grage*, 93f; ditto, *non-grage*, 86f. At *Marseilles*, last week, 3,200 sacks Rio were sold at 70f with discount; 900 ditto inferior, 53f to 70f; 1,200 ditto damaged were also disposed of. This week, a large lot of Maracaibo has been sold at 82f; and a still larger one of Malabar, at prices kept secret.

SUGAR.—Business at *Havre*, in the week ending Friday, was not animated. 40 casks French West India went at 49f the 50 kilogs duty paid; a lot of Trinidad and Cuba at 44f 50c; a small lot of Porto Rico, same price. The arrivals exceeded 9,000 casks. This week, some damaged Havana has been sold. At *Nantes*, last week, various small lots of French West India went at 46f to 48f; 226 casks Havana, 52f 25c to 53f 50c. This week, some Mayotte has been sold at 38f. At *Bordeaux*, last week, about 800 casks French West India went at 45f 75c; and a small lot of Guadeloupe "usine," 58f. Reunion was not demanded. This week, Martinique has been at 46f. At *Marseilles*, last week, business was insignificant.

INDIGO.—The sales at *Havre*, in the week ending Friday, consisted of 85 chests Bengal at established prices, and the arrivals were 145 chests. This week, some Bengal has been sold at prices kept secret. At *Bordeaux*, last week, the demand was active, 78 chests Madras, 322 Bengal, and 38 Kurpah having been disposed of, the Bengal good quality at a premium of 2f 50c, the quotations of the rest not given. This week, some sales of Kurpah and Bengal have been made.

HIDES.—At *Havre*, in the week ending Friday, sales were 2,361 Buenos Ayres, dry, between 100f and 112f 50c the 50 kilogs; 547 ditto, salted mataderos, 51f; 700 Rio Janeiro, salted, 50f; 250 Pernambuco, salted, 52f 50c; 300 Valparaiso ditto, oxen, 63f; 2,262 New York, salted, 41f 50c to 42f; 617 ditto, damaged, 40f; 3,050 horse, La Plata, 83f to 83f 75c the 100 kilogs. At a sale by auction, 6,765 out of 29,049 offered were disposed of: Monte Video, dry, fetching 97f to 97f 50c the 50 kilogs; Valparaiso, 29f to 95f 50c; Cote Ferme, 74f; Ireland, 30f 50c to 38f 60c. The arrivals exceeded 16,000. This week, New York has been at 41f 50c to 45f; Buenos Ayres, dry, 110f to 120f; ditto Saladeros, 71f; Tampico, dry, 77f 50c to 87f; Monte Video, salted, 68f to 72f 50c; New York, salted (cow), 45f.

WOOL.—The demand at *Havre*, in the week ending Friday, was not active: 39 bales La Plata, unwashed, 1f 15c to 2f 40c the kilog; 13 ditto, washed, 1f 95c; 6 Rio Grande, unwashed, 1f 7½c; 35 sheepskins, Buenos Ayres, 90c to 1f 30c. The arrivals exceeded 1,000 bales. This week, Rio Grande, washed, has been at 205f the 100 kilogs; Buenos Ayres, unwashed, 170f; Russian Donskoy, 202f 50c; also Buenos Ayres, unwashed, 1f 75c to 2f 80c per kilogramme.

TALLOW.—At *Havre*, in the week ending Friday, 25 casks New York disposable went at 60f the 50 kilogs; and 50 ditto for delivery, at 59f. The arrivals were nearly 200 casks. This week, Rio Grande has been at 59f. At *Paris*, yesterday, the 100 kilogs were 115f—a rise on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were 87f to 88f the hectolitre; Montpellier disposable, of 86 deg., 115f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc were 110f; and beetroot, first quality, 92f.

ST PETERSBURG, Aug. 29.

The Government has very wisely resolved that from January, 1863, the pernicious system of farming out the right of selling brandies and other spirits shall cease, and that a tax of about four shillings the gallon shall be imposed instead, also that retailers shall be required to purchase licences. The duty on tobacco is likewise to be increased from the same period. An Imperial ukase

allows engine-builders to import free of duty the iron and cast iron they may require in their constructions.

ANTWERP, Aug. 28.

A new attempt is to be made to establish a regular line of steam navigation between this port and New York. The line is to be undertaken by a private company, Messrs Marzion, of France, and the first steamer, the Congrès by name, has already sailed for America. It is believed that the trade between Belgium and the States is quite large enough to afford freights for a special line of steam vessels. Two previous attempts to establish direct communication, however, failed,—one after causing an expenditure to the Government of 120,000*l*, the other after a loss to a private company of a much larger amount.

An official return shows that in 1860 there was a decrease of 10 in the number of vessels which sailed from this port to places out of Europe, and an increase of 429 in those which sailed to European ports.

The manufacturers of Ghent who are interested in the maintenance of protection, have lately been making some very rabid denunciations of England, both by tongue and pen, because they think that a commercial treaty will soon be entered into with her. As an answer to these foolish men, the Association for Promoting Commercial Reform has resolved to have a grand free-trade demonstration at Brussels, on the 23rd September next.

TURIN, Aug. 27.

The treaty of commerce which, as M. Michel Chevalier has announced, is to be concluded between the new Kingdom of Italy and France will be, it is said, substantially the same as that between the latter country and England. It is M. Benedetti, the new French Minister in this city, who is charged to negotiate the treaty.

MADRID, Aug. 25.

The Government makes its newspaper organs announce that a bill for effecting Customs reforms is to be presented to the Cortes in their next session; but, unfortunately, the same promise was made about this time last year, and nothing came of it. Yet the Government must well know that a sweeping Customs reform in this country has long been imperatively needed.

It may be of interest to some of your readers to mention that the premium allowed on commercial ships built in Spain, is henceforth only to be paid after they shall have made a *direct* voyage to America or Asia. An order to that effect has recently been issued, in consequence of some vessels, for which the premium was claimed, having before proceeding to their destination put in at English or other foreign ports to complete their fittings.

COMMERCIAL AND MISCELLANEOUS NEWS.

Advices from Calcutta are to the 20th ult. Imports—At the date of our last report some improvement had taken place in the position and prospects of this market, but it was again suddenly checked to give place to the dulness and depression previously existing. Arrivals of late too have been very heavy, and have greatly augmented already existing large stocks; while it is to be feared the full supplies on the way will add to our present difficulties, and, unless some unlooked-for change occur, tend still further to reduce our present low currencies. Exports—Our market has been comparatively quiet during the past fortnight—the result of continued dull advices from Europe, and the high prices still demanded by holders for most descriptions of produce. Supplies are coming in very slowly. Sugar—There have been sales of white vacuum pans for Australia at former quotations, and a fair business has been done in Benares sorts at a decline of 2 annas to 6 annas per maund: supplies of the latter ought to increase daily. Saltpetre—A decline of about 6 annas per maund having taken place, considerable purchases are being made. It is difficult however to obtain good quality. Linseed has declined about 2 annas per maund, but there are not many purchasers. Hides are being shipped to a considerable extent at about former rates for cow, and a decline of 5r for buffalo hides. Rice is unchanged in price. Silk—Almost nothing doing; holders are more willing sellers. The rainy bund has commenced to arrive. Indigo—Advices from the indigo districts are worse, and we are likely to have not only a small crop, but inferior quality. In lac dye and shellac there have been transactions at about former rates. In other articles there is scarcely any change to note.

Annexed is Messrs Volkart Brothers' report of the import and export trade of Bombay, dated July 26:—The piece goods market has not been brisk, and closes with a quiet feeling, but dealers have not gained any advantage, holders being firm. Clearances for the interior remain still on a moderate scale, to which cause we may attribute the want of animation in the bazaar. Some few speculative purchases have been made latterly, but the largest buyers, the Marwarrees, keep back in consequence of disputes amongst the opium speculators. Produce is firm; but the decreasing stocks do not admit of large transactions. Exports.—Cotton—The market since last mail has not been brisk, but a fair steady demand prevailed at fully former prices, and more than those even for fine qualities. Speculation is going on to a moderate extent, to-day's price being 167 rs for Dhollera. Stocks are estimated at about 14,000 candies. Freights for Liverpool, 37s 6d to 40s for cotton, and 17s 6d for seeds. Cargo is far from abundant, and we rather expect a decline after the mail has gone.

Madras advices are to July 26. We have again to report a dull fortnight in exports. Sugar is still in very small supply, which as far as we can gather is owing, not as was once supposed to the season being late, but to an undoubtedly short crop. Cotton—Tinnevelly has remained steady 90 rs, and dealers refuse to enter into large contracts at less than 92 per candy, equal to 5 3.5d per lb; it is supposed that 39,000 candies have now been contracted for, and that but little of the crop remains to be disposed of. Shipments to 20th instant amount to 7,590 bales, all to the United Kingdom. Indigo—The new crop is just commencing to arrive, but will not be available to any extent until the end of September; a small lot of about 200 maunds fair quality Kurpah is now in the market, for which the dealer asks 52 rs per maund. Coffee has rather improved in demand. The supply is limited, and the quality objectionable. To-day's quotations is 106 rs per candy. Rice is without change; late prices on the coast are fully maintained.

The following is Messrs Remé and Co.'s Singapore market report, under date July 18:—Trade in imports has been very dull during the past month, and although there has been a slight movement recently in cotton goods for Cochin China and Siam, no advance on last low rates has been obtainable. In exports a slight reduction in price has been generally given, owing to a falling off in demand caused by bad accounts of the European markets. Exchange on London—The few private bills in the market have been sold at 4s 7d for 6 months' sight, and the banks are drawing at 4s 6½d same sight.

The annexed report is from Rangoon to July 16:—Imports—Transactions in British cottons have been of a very limited character, while large sales have taken place of silk and silk mixed corahs chiefly for transmission to the Prome and Ava markets. Exports.—Rice—In continuance of our advices upon the position of this staple we have to remark no feature of interest. Supplies have not increased beyond actual requirements, and a decline in value has therefore not taken place. Timber—The Government has now deemed it fit to throw the greater portion of the teak forests, to the east and west of the Sittang river, open to tender, until the 15th September. The permit-holder will have to pay the following fixed rates on each log:—Above 4 feet 6 inches middle girth, 10 rs; below 4 feet 6 inches, 5 rs; below 3 feet in girth or 12 feet in length, 8 annas. Besides these rates, the tenderer has to pay a fee, fixed at an upset figure, for each forest according to its estimated value. Decision will therefore be given upon the amount of fee offered by the tenderer. Cotton—Purchases have been made to a small extent only, as there has been but little offering.

The following is dated Cochin, July 20:—Our last quotation for cocoa-nut oil was 82 rs, and at that rate a few small purchases were effected. The rate to-day is given at 83, but we have not heard of transactions at that figure, and are inclined to look upon it as merely nominal. The weather has been very wet, and but little produce of any kind coming in. From Tinnevelly our advices are up to the 13th July No change had taken place in the cotton market. The transactions during the week had been confined to 600 candies at 90 rs, deliverable in three months. Deliveries continued on the most limited scale, and were likely to continue so for some time, arising from the ryots being engaged picking the second crop of cotton, which prevented their ginning what they already had on hand.

We have received the annexed from Quebec, dated Aug. 16:—The arrivals of white pine during the past fortnight have been moderate, and the total quantity measured to date does not equal that of 1859 and 1860. Very little of the St Lawrence wood, however, has come to hand yet. Prices are steady. A fair raft of 68 feet fetched 7½d, one of 70 feet 7¼d, 64 feet 6¾d, 66 feet 7d, all measured off. The supply of waney board wood is in excess of the demand, while square wood of prime quality is very scarce. Red Pine—The quantity to arrive will be less than was anticipated, owing to diversions to the New York market. Prices are unaltered. Elm—A large raft of 29 feet sold at 9½d measured off. Oak is very firm. It is reported that many rafts are being diverted to New York for Government purposes. Birch—No change in value. Staves sell slowly, but are likely to be light in stock, and to advance in value later on. Deals—A considerable quantity of inferior bright are finding their way here and are difficult of sale; fair specifications of well-known manufacturers are worth 14*l* 10s to 15*l*, floated about 13*l* 10s. Coals—No arrivals. Salt—The market is overstocked. Exchange has fallen about 1 per cent. 7½ per cent. is offered by the banks for 30 days.

The operations of the United States Branch Mint in San Francisco for the fortnight ending July 13th were as follows:—Deposits of bullion, weight after melting, 75,551.53 ozs; coinage, double eagles, 460,000 dols.

The production of cocoa-nut oil on islands in the Pacific is increasing. On June 11 the Hawaiian schooner Marilda arrived at Honolulu in 12 days from Fanning's Island, bringing 12,000 gallons of cocoa-nut oil. She reported everything at the island prospering. On her return she was to take the new oil press constructed by Mr Hughes, at the Honolulu foundry, which will enable the proprietors to double the present manufacture of oil, at a much reduced cost of labour. The cargo was expected to go forward by the American barque Comet, of San Francisco, then at Honolulu.

By the last West India mail we have received the annexed information:—At Demerara the weather was wet. A dry season was anxiously looked for by the planters. Two ships had arrived with immigrants from China. Produce was scarce; shipping abundant. The Guiana Bank had declared a dividend for the half-year at the rate of 8 per cent. per annum. The crop at Barbadoes was nearly finished. It was expected to reach 50,000 hhds of sugar. Exchange, 30 days, 490 dols. The news from Trinidad is unimportant. The question of cotton-growing was being practically tested, and its cultivation spiritedly taken up. Business was excessively dull. The demand for imports was limited. The quarterly return of revenue is 4,550*l* less than last quarter. The coffee crop was nearly closed, but the supply in the market was limited: inferior, 42s to 44s; mountain, 48s to 50s. Pimento, none at market; the coming crop is small. Sugar sales at 15s to 18s; inferior, 12s to 14s.

Freights scarce. American gold scarce. The banks demand 1¼ per cent. above the island standard value. Exchange on London, 90 days, ¼ per cent. premium; 60 days, 1; 30 days, 1½.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending July 27, 1861, compared with the previous month:—

	June 29, 1861.	July 27, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	19399794	20202800	803006	...
Private Banks	3008977	3030202	21225	...
Joint Stock Banks	2787446	2753068	15622	...
Total in England	25146217	25986070	839853	...
Scotland	4284732	4077331	...	207451
Ireland	5819566	5617044	...	202522
United Kingdom	35250565	35680445	420880	...

And, as compared with the month ending the 28th of July, 1860, the above returns show a decrease of 2,514,091*l* in the circulation of notes in England, and a decrease of 3,182,594*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,317,706*l*, the English joint stock banks are below their fixed issue 549,289*l*,—total below fixed issue in England 1,866,995*l*; the Scotch banks are above their fixed issue 1,328,060*l*, the Irish banks are below their fixed issue 737,450*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 24th of July was 11,761,076*l*, being a decrease of 487,218*l* as compared with the previous month, and a decrease of 4,402,028*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 27th July:—Gold and silver held by the Scotch banks, 2,446,191*l*; gold and silver held by the Irish banks, 2,098,187*l*; total, 4,544,378*l*; being a decrease of 186,584*l* as compared with the previous return, and a decrease of 311,640*l* when compared with the corresponding period last year.

An account of the importations and exportations of bullion and specie registered in the week ended 28th August, 1861:—

MARKETS IN THE MANUFACTURING DISTRICTS.

The continued upward movement in the value of cotton at Liverpool has compelled most of the manufacturers to demand higher quotations for cotton goods. The advices from India being very unfavourable—rather a heavy fall having taken place in prices there—dealers generally have operated with extreme caution, so that the rise in the currencies is by no means general. The iron trade may be considered steady, and there is a fair amount of business doing in coals, at full prices.

MANCHESTER, Aug. 29.—This market has rather gained in firmness since last week, but business continues on the most insignificant scale, utterly disproportioned to the production. The larger transactions of the week, as of some weeks past, appear to have been on speculation, and stocks both in first and second hands are now comparatively extensive. Still no impression has been made upon prices by the enhanced cost of material, and measures have accordingly been taken in various districts for short-time working. In Blackburn, Burnley, Bacup, Church, and Accrington, this movement has made a decided commencement, and it is expected Preston and Bolton will follow. Medium numbers of yarns may be quoted ½d per lb, and shirtings 1½d per piece, over the low prices of last week.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

	Price Aug. 29, 1861	Price Aug. 1860	Price Aug. 1859	Price Aug. 1858	Price Aug. 1857	Price Aug. 1856

BRADFORD.—The tone of the wool market is firm, the fine weather and the increased ease in the Bank rate tending to impart confidence to the trade. This is as much as can be said; the business done is not much improved. Yarn manifests a slight improvement, but the quantity producing is still very limited. The home manufacturers being busy, rather more yarn is required to supply their wants. The activity in the home trade for pieces continues. Fancies are in brisk demand, and the makers thereof are well employed. The German houses are also busy, and take a fair amount of plain goods. The Americans still buy very little. Not much is taken for France. Prices show no variation.

BELFAST.—The market for white goods has been very quiet in all its departments. Continental customers are doing more in the lighter lines of linens. South American markets have been little influenced by the international war in the States. Home markets were likely to become pretty active, but the weather, and its effects on the crops, seriously interfered with that portion of the trade. For some time past manufacturers have been buying yarns with great caution, and, consequently, stocks of yarns in such hands are very low. The demand is rather steady from home consumers. Flax—It is pretty evident that the quantity of material in the hands of growers has fallen into narrow bounds. Prices are firm for milled, say 7s to 10s 6d per stone. In handscutched there was little passing.

LEICESTER.—The hosiery trade is tolerably active for the time of the year, and employment is nearly as general as it is usually is in the autumn. In the country districts trade is quiet. Yarns keep up in price, spinners being tolerably well employed. There is no material change in the price of wools, the market holding firm.

NOTTINGHAM.—There is very little alteration to report in the state of the lace trade, although manufacturers express themselves more confidently with respect to the autumn demand. There has not been much doing. Plain goods are not in demand, and fancies, too, are not much inquired for; nevertheless, the tone of business is slightly improved. In some classes of silk goods there is a fair amount of business passing. There is a slight improvement in the linen trade. Yarns held high in price, with a tendency upwards.

LEEDS.—The cloth halls have not been very animated. Purchasers are chiefly confined to small parcels of medium and low-priced goods for the approaching season. Wools are steady in price, but not a great is deal doing by the local brokers. The flax trade continues rather quiet, and the whole of the machinery engaged in it is not running full time.

ROCHDALE.—There has been a better feeling in the flannel trade, but the business doing is not an average one for the season. Home buyers are now getting up their stocks for winter, and they have purchased with more freedom. Manufacturers keep moderately well employed. In common with the Lancashire flannel trade, there is a little more doing in Yorkshire low goods. Wools maintain last week's prices.

WOLVERHAMPTON.—The iron trade is tolerably firm, and previous quotations are well maintained.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 28th day of August, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,891,955	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,241,955
		Silver Bullion	..
	26,891,955		26,891,955

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,135,800
Rest	3,476,271	Other Securities	17,401,395
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 064,709	Notes	7,137,875
		Gold and Silver Coin	862,367
Other Deposits	12,774,391		
Seven Day and other Bills	669,066		
	35,537,437		35,537,437

Dated the 29th August, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,423,146	Securities	27,634,195
Public Deposits	4,064,709	Coin and Bullion	13,104,322
Private Deposits	12,774,391		
	37,262,246		40,738,517

The balance of Assets above Liabilities being 3,476,271*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£305,675
A DECREASE of Public Deposits of	688,793
An INCREASE of Other Deposits of	933,648
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	340,611
An INCREASE of Bullion of	271,041
A DECREASE of Rest of	58,750
An INCREASE of Reserve of	530,046

The position of the Bank appears to be strengthening, the above account showing a further considerable augmentation in the bullion and reserve. A large increase has taken place in the other deposits, owing to the ease in the money market, but this is partly counterbalanced by the reduction in the Government deposits. The falling off in the other securities also shows the less demand for money.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,965,434	£ 21,093,286	£ 22,428,020	£ 21,877,386	£ 20,422,146
Public deposits	7,607,965	5,627,855	7,816,480	5,949,005	4,064,709
Other deposits	8,525,022	13,674,788	12,740,833	14,168,176	12,774,391
Government securities	13,464,216	10,918,381	11,220,018	9,543,398	10,135,800
Other securities	13,391,746	15,453,324	18,991,882	19,966,726	17,401,395
Reserve of notes & coin	8,645,929	11,969,376	9,476,849	9,247,568	8,000,242
Coin and bullion	14,362,424	17,797,196	16,540,454	15,914,353	13,104,322
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	4 p. c.
Price of Consols	96⅞	96⅜	95⅝	93	92⅝
Average price of wheat	39s 1d	42s 6d	44s 5d	59s 6d	50s 3d
Exchange on Paris (shrt)	25 10 15	25 15 22½	25 7¾ 15	25 15 22	25 40 47½
— Amsterdam ditto	11 17½ 17⅝	11 17	11 14¼ 15½	11 13½ 14	11 18¼ 19
— Hamburg (3months)	13 9 9¼	13 8	13 5¼ 6	13 5¼ 5¼	13 10¼ 10½

In the corresponding week of 1851, some important failures had taken place in Liverpool, owing to heavy losses on consignments to India and a general system of overtrading. No effect, however, was exercised on the London money market, the rate of discount being only 3 per cent. The Italian revelations of Mr Gladstone had considerably annoyed the Neapolitan Government, and at one time it was proposed to publish a refutation; but, after a discussion, the Ministers concluded that no good would be gained by such a course. The National Guard of Austria had been dissolved throughout the Empire by Imperial ordinance. The advices from California announced that the Vigilance Committee was in full operation and accomplishing much good, the authority of the Courts and Legal Executive being for the present completely set aside.

In 1858, Messrs Dent, Palmer, and Co.'s Turkish loan of 3,000,000*l* in a 6 per cent. stock at 80 had just been taken, the application in excess of this sum amounting to more than a million. Subscribers were allowed the option of taking another two millions until the ensuing 8th of October. The final instalment had been paid on the Brazilian loan of 1½ millions. The influx of gold to the Bank continued to be very rapid. The funds were strengthened by a steady rise in French Rentes.

In 1859, large arrivals of bullion were announced. It was ascertained that the average rate at which the Indian loan had been taken was 97*l* 3s 2d, and the price had risen to 2½ premium. Messrs Thomson, Bonar, and Co. had communicated to the London Stock Exchange a notification from the Russian Government to the effect that the whole of the 12,000,000*l* Three per Cent. Russian loan had been taken.

In 1860, apprehensions still prevailed respecting the harvest, although the weather had for the time been rather less unfavourable, and there was a general belief that the crops would prove very deficient. The Great Eastern had arrived from New York. The invasion of Calabria by Garibaldi was successfully progressing, the Royal troops having been beaten in at least one important action. The Committees of the Vienna Reichsrath had considered their reports, and political reforms were expected to be shortly initiated by the Emperor or Austria.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 4,866,724*l*; in 1858, a deficiency of 1,778,536*l*; in 1859, a deficiency of 6,251,049*l*; and in 1860, a deficiency of 5,828,550*l*. In 1861, the deficiency is 4,627,004*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England, at their weekly Court yesterday, reduced their minimum rate of discount from 4½ per cent., at which it had been fixed a fortnight back, to 4 per cent.

This change had been generally expected, and hence no effect was exercised on the stock market. In Lombard street the rate for the best paper in the earlier part of the week was 3⅞ per cent., and since the reduction at the Bank good bills are readily taken at 3⅝ to ¾. The demand continues limited, chiefly from the contraction of trade, a general disposition being shown to act cautiously in the face of an apprehended cotton crisis. On the other hand, gold continues to be taken to the Bank, and the foreign exchanges are favourable, which so far are satisfactory features. There also appears no revival of the demand for specie for New York, the 88,000*l* sent this week by the City of Manchester being on French account to pay for corn.

On the Stock Exchange there is an abundant supply of money, and loans on Government securities are offered at 2½ to 3 per cent.

The discount establishments have reduced their interest on deposits from 3½ to 3 per cent. for money at call, and from 3¾ to 3¼ with seven days' notice. The joint stock banks have also lowered their allowance from 3½ per cent. to an uniform rate of 3; the London and Westminster however, in accordance with their usual practice, giving 1 per cent. less than their ordinary terms on sums below 500*l*.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4
Vienna	6	5½
Berlin	4	2½
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	3	3
Hamburg	...	2¾
St Petersburg	7	...

ENGLISH FUNDS.—The continued brilliancy of the weather and the ease in the money market have caused a further improvement in Consols, which, after a slight temporary decline, has been fully maintained. The closing prices this evening were 92⅝ to ¾ for money, and 93 for the new account on the 10th of October, showing another rise of more than 1 per cent.

LONDON:—Printed and Published by David Aird, of 13½ Exeter street, Strand, in the parish of St Paul, Covent Garden, at the Economist Office, 340 Strand, in the parish of St Mary-le-Strand, in the county of Middlesex.—Saturday, Aug. 31, 1861.

The upward tendency continues to be stimulated by the purchases on banking account, and there is also more inclination to operate speculatively for the rise.

Exchequer bills and India bonds continue to be favourably affected by the lower value of money, and show this week a further advance. The last quotations for Exchequer bills are 3s discount to par for the March issue, and 4s to 7s premium for those of June. India bonds also left off at 4s to 7s premium.

India Five per Cents. have again been in demand, and exhibit a fresh rise, the old stock leaving off at 103⅝ to ¾, and the scrip 104⅛ to ¼. More than three-fourths of the recent loan of four millions are now believed to be paid in full.

FOREIGN FUNDS.—The chief movement this week in the foreign market was a fall yesterday in Mexican to 20⅞ to 21⅛, on the very unfavourable advices from Mexico; but to-day there has been a partial rally. Peruvian bonds are in request, and scarce in the market, the old Four-and-a-Half per Cents. having been done to-day at above par. Sardinian is also firm. Turkish Six per Cents. of 1858 have experienced a further relapse. Equador New Consolidated has steadily supported the late improvement. No transactions have occurred in New Granada bonds, but the tendency is firmer, owing to the confirmation of the defeat of the Government party by the liberal General Mosquera. The closing price of French Three per Cents. on the Paris Bourse this evening was 68f 85c, showing a rise compared with last week of about three-eighths per cent. Transactions, however, have taken place in the interval at a further slight advance.

The annexed Communication is from the Committee of Mexican Bondholders. Other mercantile letters confirm the state of anarchy and misery into which the Republic of Mexico is now plunged:—

The Committee have received advices from Mr Whitehead dated June 29 and July 29, and from Messrs Viya, Brothers, dated Vera Cruz, the 1st inst. The repayment of the 660,000 dols appeared hopeless for the present. The repayment of the 400,000 dols robbed from the Laguna Seca Conducta was, as agreed on, in consideration of the recognition of the present Government, to have taken place on the 11th of June, but not the smallest attempt was made to provide for it, and there is plainly a disposition on the part of the present Government to repudiate their liability for the robbery committed on the bondholders by their adversaries. Meanwhile, Miramon lives in style in Paris on the proceeds of this felony, and is said to have been presented to the Emperor by General Almonte, and to be invited to the *soirees* of the Empress. On the publication of the law of the 29th of May, decreeing the confiscation of one year's produce of the assignments of the British bondholders, Sir Charles Wyke strongly remonstrated against the outrage, and intimated to the Mexican Government that serious consequences must follow unless they were attended to. Two days elapsed before he got any acknowledgment of his second letter from the Under Secretary, and then it was merely to own receipt of his communications, and to say that they must lie over until the appointment of a Minister. One of the editors of the *Siglo XIX.* has since been named Minister for Foreign Affairs, and Mr Munoz, for many years first clerk in the Treasury, a respectable man, for Finance. But on the 17th of July Congress adopted another law, the first paragraph of which suspends for two years all payments, including those of the assignments made in favour of the British debt and foreign conventions. As a measure of this sort, adopted without previous consent, was a complete act of defiance towards England and France, the British and French Ministers gave the Mexican Government the alternative of withdrawing this law within forty-eight hours or breaking off diplomatic relations, and as on the morning of the 26th of July they both received unsatisfactory replies, the boards have been removed from the Legations, and Sir C. Wyke awaits Her Majesty's pleasure.

The money in the hands of the agents in Mexico amounts altogether to about 120,000 dols, the greater part of which is in the capital. There had been some talk of sending a *conducta* to Vera Cruz on the 25th of June, but, owing to the reappearance of Marques in those parts, a *conducta* is now out of the question for some time to come. There is a certain amount in *menudo* in Vera Cruz, but the agents there write that it would be impossible to procure 10,000 hard dollars, even by 50 and 100, at present, nor under a premium of 2½ per cent.

There is a strong party continually urging Juarez to resign, and the Congress had elected General Gonzales Ortega President *ad interim* of the Supreme Court of Justice. This is significant, as he thus becomes virtually Vice-President of the country.

General Comonfort was in Monterey, and was reported to have been proclaimed President of the Republic by Vidaurri.

Marques, after having levied 100,000 dols on the Real del Monte Company, proceeded in the direction of Puebla, followed by General Ortega, who had, however, according to the last accounts, suspended the pursuit at Cuernavaca, and stopped there. Very little hope seemed to be entertained that an end would be put to the present anarchy and virtual dissolution of the Federation without the armed intervention of some powerful nation. All eyes were directed to what England was going to do.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market this week has shown a steady improvement, which has only been slightly checked this afternoon. A large speculator for the fall in Lancashire and Yorkshire, Midland, and South-Eastern, having failed at Manchester, some considerable repurchases have been made to close his transactions, and have hastened the rise in these stocks. Other operators for a decline have also bought in their accounts, and thus exercised a favourable effect. The traffic returns also continue good, especially as regards passengers, owing to the fineness of the weather; last year in this particular affording a marked contrast to the present. The public also show no disposition to dispose of their stock, from the anticipated accession of revenue that will be brought by the Great Exhibition next year. Among the heavier stocks, Caledonian and Midland have been chiefly in favour, the former from purchases on Scotch account. Great Northern is also firm, and in limited supply, but there has latterly been little or no businesss doing in this stock.

In the colonial market, Indian guaranteed descriptions continue to rise with other Indian securities. Grand Trunk of Canada is also firmer.

In foreign descriptions, there have been some fluctuations in Lombardo-Venetian; but the closing price this evening was rather dull. More confidence continues to be entertained with regard to the prospects of the Great Luxembourg Railway, and the shares of this Company are again higher. American railway securities have been affected in only a partial degree by the second defeat of the Federalists.

In miscellaneous securities, Crystal Palace stock is rather less firm. The shares of the Mercantile Fire Insurance Company have receded to ⅛ to ¼ premium, and of the Commercial Union to ⅛ to ¼. The negotiations between the latter Company and the Liverpool and London, of which a preliminary notice appeared last week, have been broken off.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Foreign Exchanges.—There has been no alteration of importance in the rates this week.

Bullion.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—There has been but little doing in our market during the past week, and as there has been scarcely any demand for export, the Bank has purchased about 280,000*l* since the date of our last circular (22nd instant). The Shannon has brought 130,000*l* from the West Indies; and the Euxine has taken 10,113*l* to Bombay, and 1,500*l* to Alexandria; and the City of Manchester 88,000*l* to New York.

Silver.—The Shannon has brought about 120,000*l* in silver from the West Indies; this will not be deliverable until about the 4th or 5th proximo. The price is now 60¼d per ounce standard, and a quiet market; the rate will doubtless be slightly lower when the above amount comes forward for sale.

Mexican Dollars.—The Shannon brings about 130,000*l* in dollars from the West Indies, These, however, will not be available for the outgoing mail to China of the 4th proximo, and for that opportunity the price has been 59d to 59½d per ounce. The large amount now to hand will cause a reduction in price when it is placed on the market for sale.

Exchange on India for banks' 60 days' sight drafts on Bombay, Calcutta, and Madras is 1s 11½d to 1s 11¾d; bills with documents, 1s 11d to 1s 11¼d.

Indian Government Loan Notes are again better, and we quote them fully 1½ per cent. better than this day week. The prices this evening are 103½ to 104 for 5½ per Cents.; and 96½ to 97 for 5 per Cents. The reduction in the Bank rate of discount this day to 4 per cent. may possibly cause a further improvement.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std, last price; Spanish doubloons, 76s 6d to 77s nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0½d per oz, std, last price; bar silver, containing 5 grs gold, 5s 0⅝d per oz std; Mexican dollars, 4s 11d per oz, nominal; Spanish dollars (Carolus) in demand, scarce.

The amount of gold purchased by the Bank since making up the last return is 36,000*l*, of which 20,000*l* was taken yesterday, and 16,000*l* to-day.

Public Companies.—At the half-yearly meeting of the General Steam Navigation Company on Tuesday, a dividend was declared at the usual rate of 10 per cent. per annum, carrying forward about 4,000*l*.

A half-yearly meeting of the Victoria Dock Company was held yesterday, the business being nearly confined to the reception of the report. It was stated that the result of the operations of the past half-year has been satisfactory, the number of ships entering the docks being 1,475, measuring 485,154 tons, or an increase over the same period of 1860 of 119 ships and 102,738 tons. Comparing the years ending in June 1860 and 1861, it appears that the total in the former year was 2,580 ships of 759,693 tons, and in the latter 2,801 ships of 953,075 tons. The Charing Cross Railway having obtained authority for the purchase of the Company's Steelyard Estate, the Board will take care to secure adequate compensation. After a short conversation the report was adopted unanimously.

A meeting of the Submarine Telegraph Company took place this afternoon. The report stated that there had been a decrease in the receipts of the past half-year, owing to the reduction of 50 per cent. in the charges by the new tariff, but that the augmentation at present shown in the messages is so favourable as to warrant the expectation that this falling off will be shortly compensated. Owing to the heavy expenses in repairing the Emden cable, which is now stated to be in excellent working order, no dividend was proposed. The Directors have purchased a cable with six wires from the Mediterranean Telegraph Company on favourable terms, and it has since been successfully laid down between Beachy Head and Dieppe. After some conversation the report was adopted, and the proposal for a committee of investigation announced at the last meeting was not proceeded with.

Failures and Mercantile Embarrassments.—The suspension has been announced of Messrs Scott and Wright, of Vigo street, a respectable house in the woollen trade, with liabilities of about 45,000*l*.

The stoppage has taken place of Mr A. T. Gordon, contractor for public works of Westminster, with considerable liabilities. The assets, however, are also large.

A meeting of creditors of Messrs Beater, Dennant, and Russ, warehousemen (trading as James Coster, Beater, Dennant, and Russ), who failed early in the month, was held this afternoon, to consider a legal question of great importance respecting the estate of the firm. It appears that since the last meeting some doubt has been cast upon the claim of the executors of Mr James Coster, who are creditors for nearly 130,000*l*, to prove upon this estate, and it has been urged that the sum left in the business by that gentleman forms part of the partnership assets, and is, therefore, in the first instance, liable to the general creditors of the house. If this could be substantiated, the trade creditors of about 84,000*l* would receive 20s in the pound. The point was discussed at great length to-day, and the result arrived at was the appointment of a committee of eleven creditors to take the necessary legal advice on the question. It is to be feared that in consequence of this difference of opinion the estate will ultimately go into the Court of Bankruptcy.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429½ per mark, and the short exchange on London is 13.8¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 7-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107 to 107½ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 257,097 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, the supply of new English wheat was much restricted, and the demand for both red and white samples ruled somewhat active, at the full prices of Monday, to, in some instances, a slight advance. In foreign wheat, a limited business was done on French account, and the trade generally ruled slow, at previous rates. There was very little barley on offer, and holders were firm, at quite former prices. Malt, oats, beans, and peas changed hands to a limited extent, but without leading to any quotable change in their value. All kinds of flour, especially useful and fine qualities, were firm in price; but the demand ruled far from active. This week's imports amount to 21,370 quarters of wheat; 400 of barley; 14,140 of oats; 1,430 sacks and 19,710 barrels of flour.

The Liverpool market, this morning, was more active for wheat, and, in some instances, enhanced prices were realised. Flour was also firmer; but most kinds of spring corn sold slowly on former terms.

The following is Mr Othon Trithen's monthly report of the corn trade at Odessa, under date August 16:—"In consequence of harvest-work, the descent of wheat from the interior, during the latter days of July, was almost suspended, but it will shortly recommence with the produce of the new crop. There are already collected, from our more immediate neighbourhood, a few small parcels of new Ghirkas, weighing at least poods 9.35 lbs, which would alone establish a good saleable quality. Judging, however, from the samples which have been received from remote districts, it would be better to wait in order to receive wheats of really superior quality. Unfortunately the descent, already retarded by a late harvest, is still more so on account of the frequent rains which prevent the wheat being thrashed. During the latter fortnight of the past month, almost unexampled activity has prevailed in our market. The total sales amount to about 250,000 chetwerts. The demand, however, has since slackened a little; nevertheless, the sales of this week still amount to 65,000 chetwerts. Maize very active. The produce of the new barley crop is in perfect condition, but of light weight.. Good oats are wanting, and we shall have nothing to offer for exportation on account of the total failure of the new crop. There is no stock of linseed. The new crop, which is reported to be of fine quality, will reach in November. Current prices:—Superior Polish Odessa wheat, 41s 6d; fair average ditto, 39s 6d; superior Sandomirka wheat, 44s 4d; fair average ditto, 41s per 480 lbs; Ghirka wheat, fair average, 40s; hard ditto, 37s 10d per 492 lbs: maize, 24s 6d per 492 lbs; barley, 16s 6d per 400 lbs; oats, 15s per 300 lbs; rye, 21s 9d per 480 lbs; linseed, sifted, fair average, 48s 6d; ditto, unsifted, 45s 4d; rapeseed, fair average, 24s 9d per quarter, all free on board."

The wheat trade at Alexandria, for the week ending Aug. 17, was very active, and prices had further improved. Beans also sold freely, on higher terms. The following are the sales since the 12th instant:—Saide wheat, private trade produce, 12,270 quarters, 31s 10d to 32s 2d; Beheireh ditto, private trade produce, 7,360 quarters, 30s 10d to 32s 2d; Beheireh ditto, Government produce, 330 quarters, 32s 8d to 33s 6d; Saide beans, private trade produce, 10,260 quarters, 27s 10d 28s 4d; ditto, Pasha's produce,

1,250 quarters, 29s 6d; Beheireh ditto, private trade produce, 1,310 quarters, 26s 2d to 26s 7d: barley, private trade produce, 1,702 quarters, 17s 7d to 18s 7d; ditto, Pasha's produce, 2,280 quarters, 18s 7d to 19s 7d: lentils, 680 quarters, 25s 4d; ceci, 53 quarters, 34s; linseed, 186 quarters, 40s 8d to 48s per quarter, free on board. Freights—Beans to the United Kingdom for orders, 5s to 5s 3s per quarter; wheat or other grain or seed in proportion; to a direct port, 4s 3d to 5s 6d. Grain to Liverpool by steamer, 2s 6d to 3s.

The Liverpool cotton market, this week, has again exhibited great excitement. The sales reach the large quantity of 120,000 bales, 51,000 of which are to spinners, 50,000 on speculation, and 19,000 for export. Quotations are raised 3-16d to ¼d per lb. The market closes with a tendency to a further advance, the advices from America showing from the proclamation of the President that war is to be continued vigorously. Several competent parties in the United States express the opinion that only by the interference of the European Powers a compromise could be effected. To-day's sales are 12,000 bales.

The following remarks are from Mr W. Mure's cotton circular, dated New Orleans, Aug. 8:—The picking of cotton having commenced in some of the earlier districts of Louisiana and Mississippi, it may be of interest to you to receive some information regarding the probable extent of the production. I have remarked that a general impression prevailed that the extent of land under cotton cultivation was not quite as great as in the previous year, many planters being induced, from the high price of provisions, and the scarcity of corn in many sections, to employ a larger amount of their force in raising the necessaries of life. Some parties estimated this decrease as high as 20 per cent., but, making allowance for the annual increase, I do not estimate it more than ten per cent. The weather since the seed was put in the ground has been propitious to the planters. At first the growth was slow, the temperature in April and May being moderate; this contributed to make the plant hardy and strong, and as June and July were very warm, and accompanied by seasonable showers, the plant is represented to be unusually luxuriant and full of bolls, both on the high and bottom lands. In the Southern parts of Texas, blooms were noticed as early as the latter part of May, and in the beginning of June they were general in Louisiana and Mississippi. Picking has commenced as far North as the mouth of the Arkansas river. During the last ten days, heavy rains have fallen almost every day, and, should they continue much longer, the cotton, which is opened, must be injured. Of course it is too early to give any estimate of the crop in figures, as, during the next three months, several contingences may occur which will affect its ultimate result. With average weather for the remainder of the season, it is generally calculated that the crop will exceed four millions of bales.

Messrs Briggs and Co. thus report the state of the cotton trade at Alexandria for the week ending August 17:—"Prices of cotton are still tending upward, and the quality, on the other hand, is deteriorating. Although we make no quotable alteration, the currencies are in fact higher. The week's operations have been 39 bales very low ordinary, at 6.70d to 7d; 113 bales ordinary to middling, 7.65d to 8.24d; 113 bales good middling to fair, 8.45d to 8.65d; 114 bales good fair to good, 8.74d to 8.88d; 10 bales good to fine, 9d per lb, free on board. Freights are very dull at ⅛d per lb by steamers.

The public sales of tea, held this week, have gone off with rather more animation, and prices have been quite supported. Privately, the market has ruled firm,

The following intelligence in reference to tea and silk is dated Hong Kong, July 12:—

Canton Silk—Settlements are only 80 piculs during the fortnight. The second crop is said to be about one-third short of the usual yield. Quotations are:—Loongkong, 420 dols; Kumchuck, 405 dols; Kowkong, 385 dols; re-reeled Kumchuck, 450 dols; Mahtow, 175 dols. Tea—The market for the new congous opened on the 6th inst. at 34 taels, and settlements amount to 16 chops, together with 5 chops contract tea. As regards quality, the liquor in some few instances is superior, but the leaf is roughly made, and, almost without exception, inferior to last year. Arrivals amount to 53 chops. Scented teas of good quality meet with purchasers, but the common kinds may be quoted rather lower. Sales are as follows:—New congou, 16 chops, and 5 chops contract; old congou, 1 chop; oopacks, at 31½ to 34½ taels; oonahurs, 28½ taels; Tayshan congou, 2,500 half-chests, at 18 to 20 taels; scented orange pekoe, 15,000 boxes, at 24 to 30 taels; scented caper, 2,000 boxes, at 24 to 29 taels. Canton Green Teas—Gunpowder, 6,000 boxes, at 18 to 23 taels; twankay, 800 half-chests, at 14½ taels. Country Green Teas—Sales, 200 packages; stock, 1,500 packages. Amoy advices are to the 5th inst. Tea—One settlement of 1,700 half-chests orange pekoe, ordinary to good quality, had been made at 13½ dols to 15 dols. Stocks were 6,749 half-chests orange pekoe, 8,670 half-chests congou, 5,612 half-chests oolong, and 5,494 half-chests Ankoi; total, 26,525 half-chests. Foochow advices are to the 2nd inst. Tea—A good business has been done, and generally at the high rates last quoted. Latterly, however, the teamen showed a greater desire to press sales, and foreigners having at the same time reduced their offers, there was every prospect of a fall in prices; already common to rather flavoury kinds were quoted lower, while medium Kaishow kinds to fine were more firmly supported. The second crop was close at hand, and was reported to be small and inferior. The general advices from the country led to the expectation of a full supply to this port. Souchongs had been taken to some extent for England. Oolongs come in slowly and the quality was inferior. Pekoes and scented teas were in fair supply. Sales from the 17th to the 30th of June as follows:—Congou, 22,562 chests, at 7.2 taels for ordinary siftings, and to 31 taels short for fine, chiefly for England. Souchong, 2,417 chests, at 23 to 35 taels short for good and fine; finest were held for 40 taels. Oolong, 350 half-chests, at 19 to 20 taels short for medium. Pekoe, 952 chests, at 22 to 50 taels short fair to finest. Scented teas, 5,750 boxes, at 23 to 31 taels for good to fine. Stocks—Congou, 42,000 to 45,000 chests; souchong, 12,000 chests; oolong, 20,000 half-chests; pekoe, 2,000 chests; scented kinds, 3,000 boxes. Shanghai advices are to the 2nd inst. Silk—The market for the new silk had not yet opened owing to the high rates asked—viz., 430 taels for No. 3 Tsatlee. The transit from the silk districts was by no means safe, some boats having been plundered by the rebels. The export for last season shows an increase on the previous one of about 18,000 bales. Stocks are estimated at 4,000 bales old, and 2,000 bales new silk. Total export of silk from China and Japan to Europe is 85,798, against 69,982 bales last year, showing an increase of 15,816 bales. Tea—Black—A very trifling business has been done, amounting to only 400 chests Ningchow, at 23 taels, and 300 chests flowery pekoe, at 23½ taels. Stocks were 1,500 chests congou, and 800 chests pekoe; 21 chops Oopeih congou had arrived on foreign account. In greens, settlement had been 500 half-chests, and of Japan growth, 700 half-chests. Total export of tea from China to Great Britain is 89,918,400 lbs, against 85,304,900 lbs last year, showing an increase of 4,613,500 lbs for 1860-1. To the United States the export is 27,049,900 lbs, against 30,842,000 lbs, or a decrease of 3,702,100 lbs for 1860-1.

Messrs Arles Dufour and Co., of Lyons, thus report on the silk trade of that city to Aug. 27:—"The hope of a political and commercial reaction in the United States, which had alone caused manufacturers to keep their looms employed, and which sustained prices with tolerable firmness during the early part of the year, has entirely been destroyed lately by a succession of disastrous reports. Consequently, the inactivity in our market has assumed a still more serious character during the present month. Holders show much anxiety to sell, and prices are falling rapidly. The fall since the highest period of the year may now be estimated from 10 to 20 per cent. according to quality, leaving still a margin of about 10 per cent. upon the lowest rates of 1857."

Very moderate supplies of coffee have been on sale, and all kinds have sold readily, at the extreme rates of last week.

The annexed is dated Colombo, July 30:—

The weather since our last has been generally fine, but the coffee crop being nearly all away, and our freight market barely supplied with tonnage, there is but one clearance for Great Britain to report. The shipments to date are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	409,699	against last year, cwts		389,340
Foreign Ports	23,814	—	—	30,391
Australia and India.....	14,086	—	—	9,150
	438,599			428,881

NATIVE COFFEE.

To Great Britain.....cwts	72,023	against last year, cwts		78,981
Foreign Ports.....	50,769	—	—	67,269
Australia and India.....	6,326	—	—	2,376
	129,118			148,626

Plantation coffee is nominal in price. Native kinds are quoted at 59s 3d per cwt, cost, free on board, including exchange and freight.

The distribution of our coffee crop in the various markets of the world is as follows:—

	Plantation. cwts.	Native. cwts.	Total. cwts.
London	399,510	71,729	471,239
Liverpool	1,189	295	1,484

Port Louis	334	844	1,178
Total	438,599	124,169	562,760
Total, 1860	428,881	148,626	577,507

On the whole, the demand for rice has been tolerably active, and the quotations have been well maintained. Cocoa has attracted rather more attention.

The first cargo of *new* Valencia raisins has arrived, and the opening price is 46s, against 35s last year, and 50s per cwt in 1859. Old produce is only purchased to meet actual wants, yet the quotations are supported.

In rum, a fair, though by no means extensive, business has been passing, but mostly at a reduction of ½d per gallon. Brandy is less firm, and cheaper.

The public sales of colonial wool were brought to a close on Tuesday. The following is Messrs Hazard, Sons, and Caldecott's report for the series:—

On the 18th ultimo, the third series of sales for the present year commenced, and closed on Tuesday. The catalogues contained the following quantity, viz.:—Port Philip, 24,062 bales; Sydney, 21,192; New Zealand, 12,997; Van Diemen's Land, 9,505; Adelaide, 6,378; Swan River, 1,095; Cape of Good Hope, 9,556—total colonial, 84,785; sundry foreign, Spanish, Odessa, Buenos Ayres, &c., 1,250—total, 86,035. At the opening, and during the greater portion of these sales, great depression prevailed; the stagnation of trade, consequent upon the American revolution, the doubtful prospects for the harvest, and a rather high condition of the money market, caused buyers to operate with extreme caution. The attendance from the home and foreign markets was unusually small; the purchases for the latter have been throughout much below the average. As compared with the previous sales, prices have ruled 2d to 4d per lb lower, inferior descriptions suffering most, and even at this reduction little sought after. Towards the close, the very favourable state of the weather, and successive reduction in the Bank rate for discount to 4½ per cent., imparted more confidence, the attendance became augmented, and for the better sorts prices in some cases exhibited more firmness, but throughout the series they have shown much irregularity. The Port Philip flocks were generally of fair average as to quality and condition. Of the Van Diemen's Land much was very irregular and in heavy moiety condition: this class, together with the inferior moiety Sydney, of which the proportion was very large, and the ill-sorted heavy New Zealand, suffered most in the decline. Cape wool generally showed a heavy fall, especially greasy and short stapled-lots. The South Australian was as usual chiefly in grease, and may be quoted 1d to 2d lower. Several parcels were offered more than once, so that the actual amount sold is less than that contained in the catalogues as given above. The quantity held over for the November sales is greater than usual, some importers preferring to wait the result of those sales to accepting current rates. The import of this year will show a large increase on the previous one by about 20,000 bales, while the contraction of trade has lessened the consumption; had it not been for the favourable circumstances above mentioned, even a greater fall might have ensued during the progress of these sales. The accounts from the colonies generally speak favourably of the prospects for the next clip as to condition, and should these anticipations be realised, it is to be hoped, for the sake of the growers, that the very heavy fall which must take place in the colonies (to equalise these markets with ours) for the ensuing clip may in some degree be compensated for; as not any improvement in the value of the raw material can be looked for while trade remains as it now is.

Clean Russian hemp is now worth 30*l* 10s to 30*l* 15s per ton, being a slight advance. Saltpetre rules inactive, but without change in value.

Scotch pig iron is in steady request, at 51s, cash, for mixed numbers. English tin has improved 3*l* per ton, and foreign is held for more money. In spelter, business has been done at 17*l* 15s per ton on the spot.

Linseed oil is in fair request at 33s per cwt on the spot. For other oils, the market may be considered steady at last week's currency. American spirits of turpentine have advanced to 60s per cwt.

The tallow trade has been moderately active. P. Y. C. is quoted at 47s 6d to 47s 9d per cwt on the spot; and at 47s 9d to 48s for spring delivery. Town tallow, 46s 3d net cash.

We extract the following from the New York *Shipping List* of the 14th inst.:—

"The great event of the times in financial circles has been the advent of the Secretary of the Treasury in Wall street, who came from Washington expressly for the purpose of holding a consultation with bankers and capitalists in regard to the new United States loan, authorised by Congress at its late extraordinary session. In commerce and trade business has been light, and the operations have been considerably interfered with by the inclemency of the weather. Some of the leading articles which are affected by the tariff, or the supply of which is limited by the blockade, continue in active demand at rapidly enhancing prices. In the money market there is nothing new, and nothing calling for especial remark which has not already been enumerated under this head. Our quotations below, for other than call loans, may be considered merely nominal, as there is nothing doing on which to base quotations. We reinsert our previous rates:—

	Per cent. per annum.
Loans on call, stock securities	4 to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	9 10
First-class single signatures	7 ...
Other good bills	... ...

The rates of discount on bank notes are without important change, though there are several alterations. The weekly Bank statement shows a large increase in the specie. The reserve is now upwards of 48,600,000 dols, and the usual California remittance of 941,081½ dols will increase it to nearly, if not quite to, the unprecedented amount of 50,000,000 dols. The movement still presents the same features—a rapid accumulation of specie, and a steady contraction of loans. The figures are as follows:—

	Aug. 3. dols		Aug. 10. dols		dols
Loans	111,719,111	...	109,983,942	... Dec.	1,735,169
Specie	46,226,181	...	48,630,116	... Inc.	2,403,935
Circulation	8,585,574	...	8,730,482	... Inc.	144,908
Deposits	92,229,384	...	92,016,057	... Dec.	213,327

The imports of general merchandise were unusually small last week, even for these dull times. The following are the figures:—

IMPORTS.

	1860. dols		1861. dols
For the week—			
Dry goods	2,627,559	.....	554,567
General merchandise	2,389,840	.....	615,250
Total for the week	5,017,399	.....	1,169,817
Previously reported	141,981,683	.....	85,376,476
Since January 1	146,999,082	.....	86,546,293 "

The same journal of the 17th inst. remarks:—"The alacrity with which the bankers of the three leading cities of the country, New York, Boston, and Philadelphia, have responded to the call of Mr Secretary Chase, in behalf of the National Government, for 150,000,000 dols, has fully met the general expectation of the mercantile public, and reflects the highest credit upon them, individually and collectively. The full amount asked for, 150,000,000 dols, will be furnished—50,000,000 dols to be subscribed at once, of which New York is to furnish 30,000,000 dols, Boston 15,000,000 dols, and Philadelphia 5,000,000 dols. The banks are privileged to take 100,000,000 dols more in two equal instalments, viz.:—50,000,000 dols on the 15th of October, and 50,000,000 dols on the 15th of December. It may be interesting to show the combined strength of the banks of the three cities which have responded to the requirements of the Government, and we therefore present their last statements:—

	Loans. dols		Deposits. dols
New York, Aug. 10	109,983,942	.....	92,046,057
Boston, Aug. 13	61,138,000	.....	18,044,700
Philadelphia, Aug. 13	24,064,070	.....	15,568,024
Total	195,186,012	.....	125,628,791
	Specie. dols		Circulation. dols
New York, Aug. 10	43,630,116	.....	8,730,482
Boston, Aug. 13	6,412,000	.....	6,450,000
Philadelphia, Aug. 13	6,796,140	.....	2,074,009
Total	61,338,256	.....	17,254,491

The banks are still stronger to-day, and it is generally expected that the next statement of the New York city banks will show fully 50,000,000 dols in the specie line. At the Stock Exchange there has taken place little of interest outside of the regular routine of business."

Total	25	19	53
Same time 1860	35	20	68

The market opened very buoyant, and with a continued speculative demand, prices have further advanced fully ½c per pound, to which we conform our quotations. The sales for the three days foot up 5,000 bales.

There have been no receipts since our last. Total import since 1st September, 431,065 bales. Export from 1st to 13th August, 800, against 2,720 bales same time last year.

NEW YORK, Aug. 17.—The market has been quiet during the past three days, and prices are unchanged; the sales foot up 2,500 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	15½	15½	15½	15¾
Good ordinary	16¾	16¾	16¾	17
Middling	18¼	18¼	18½	18¾
Good middling	18¾	19	19¼	19½
Middling fair	19½	19¾	19¾	20

The receipts have been from Philadelphia 213 bales. Total since 1st inst., 213 bales. Total import since 1st September, 431,278 bales. Export from 1st to 13th August, 800 bales, against 2,720 in 1860.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 14.—There has occurred little or no change in the market for State and Western flour during the past three days, though, with a fair demand both for the home trade and for shipment, prices have advanced about 10 cents. per bbl. Canada flour is in fair request at rather better prices. The sales are 1,800 bbls, including 700 yesterday. Southern flour is in fair demand and firm. The market for wheat has been firm, under a fair demand for export, and prices are somewhat higher. The sales for the three days comprise only about 278,000 bushels, of which 41,000 changed owners yesterday, including 23,000 Milwaukee Club at 95 cents. to 1.08 dol; 6,800 white Western, 1.26 dol to 1.27 dol; and 5,100 white Kentucky, 1.32 dol to 1.35 dol. Corn is steady at about previous rates; transactions have been moderate, however, owing to the limited receipts; the sales comprise only about 188,000 bushels, including 38,000 yesterday.

NEW YORK, Aug. 17.—The market for State and Western flour has been unusually buoyant during the past three days, and all kinds have been placed at a considerable advance upon our previous quotations. Canada flour is also firmer, with a tolerably active demand. There has prevailed a steady fair demand for Southern flour, and the market is rather firmer in consequence.

EXPORT from 1st to 13th Aug.

	1861. barrels	1860. barrels
Wheat Flour	128,149	77,426

The market for wheat has been characterised by increased firmness, and with an active export demand, prices have greatly advanced. There has also prevailed an active demand for corn, and prices have advanced fully two cents per bushel.

EXPORT from 1st to 13th Aug.

	1861. bushels	1860. bushels

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only limited supplies of English wheat, both old and new, have been on offer in the leading markets held this week, the demand for most kinds has been somewhat restricted; nevertheless, prices have ruled about stationary. Several rather large parcels of foreign wheat having been taken for shipment to France, holders have been somewhat firmer in the demands. In the quotations, however, no change has taken place. There has been only a limited inquiry for barley, and, in some instances, last year's qualities have been somewhat lower in price. The malt trade has continued heavy, but without leading to any change in value. Good sound oats ruled tolerably firm; but low and heated samples have had a drooping tendency. Beans and peas have sold slowly, and the inquiry for flour has been somewhat restricted.

The continuance of remarkably fine weather has enabled our farmers to make rapid progress in the cutting and carrying of wheat. In Norfolk and several other countries, nearly the whole of the crops have been secured in excellent condition. The present year's samples, therefore, are likely to prove the best on record as to quality. Barley and oats are turning out remarkably heavy crops, and of unusually fine quality.

The grain trade in Scotland has continued very inactive. In prices, however, scarcely any change has taken place. Very little wheat has as yet been secured.

The Irish markets have been scantily supplied with produce, which has moved off slowly at about stationary prices.

Very moderate supplies of new English wheat were on sale at Mark lane, to-day, and the demand for both red and white qualities ruled steady, at fully Monday's currency, to, in some instances, a slight advance. In foreign wheat, sales progressed slowly; nevertheless, prices were quite supported. Barley realised full quotations. For oats, beans, and peas, the trade ruled inactive, but without leading to any change in their value, compared with Monday. The flour trade was firm at late rates.

Annexed is Mr E. Rainford's report of the trade in floating cargoes:—Since the 21st inst. to last night 21 arrivals off coast are reported, consisting of 14 cargoes of wheat and 7 miscellaneous, viz.:—Wheat, 3 cargoes from Galatz, 5 New York, 1 Ibraila, 1 Odessa, 1 Trieste, 1 Taganrog, 1 Enos, 1 Montreal; maize, 3 Sulina, 1 Galatz, 1 New Orleans; barley, 2 Ibraila; beans, 1 Alexandria, 1 Larache. Some of these were sold previously. The demand for France continues animated, and keeps up the prices of wheat. The following sales are reported since this day week:—Wheat, arrived, per 492 lbs, for the United Kingdom, Berdianski, supposed 52s 6d; Taganrog, 47s 6d and 48s; for the Continent, Taganrog, 47s and 47s 9d; for the Continent, per 480 lbs, American white, delivered sound, 57s; red winter, slight warmth in one part, supposed a little over 54s; amber Milwaukee, 51s; Enos, not perfect, 40s; for the United Kingdom, red Milwaukee, bad condition, equal to 42s 5d; Milwaukee and Chicago, not perfect, 46s 6d; Galatz, imperfect, 35s; ditto, heated and discoloured, 29s; on passage for the Continent, Milwaukee, to be delivered sound, 53s; ditto, 49s 6d (or 48s 6d for the United Kingdom); amber Minesoti, equal to about 50s. Maize, arrived, per 492 lbs, for the United Kingdom, Galatz, 32s 6d; per 480 lbs, Ibraila, 31s 1½d, 31s 3d, and 4 cargoes at 31s 6d; ditto, imperfect, 31s; Banat, 31s; mixed American, not perfect, 29s 3d; Fatza, 30s 3d; Bulgarian, 31s 3d; on passage, mixed American, 29s 6d. Barley, arrived, per 400 lbs, for the United Kindom, Danubian, not perfect, 24s; ditto, imperfect, equal to about 22s 10d. Beans, arrived, per 480 lbs, Egyptian, for London, 32s 9d.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been quiet throughout this week, and prices showed scarcely any change to yesterday (Thursday). Some parcels of low Bengal, not previously saleable, have been taken off, and a fair proportion of the foreign muscovado offered found buyers. About 1,900 casks West India changed hands in the three days, including a portion of 590 casks Barbadoes at 32s to 40s. Several parcels of other West India went at 32s 6d to 37s 6d; grainy Demerara, 38s to 42s per cwt. The stock continues to be augmented by large landings. It is now 83,300 tons at this port, against 72,200 tons last season. There were 4,675 tons delivered, making the net decrease in London for home use 7,140 tons since the beginning of the year.

Mauritius.—Of 6,527 bags in the sales, about 5,500 bags sold: black to good brown, 28s 6d to 33s 6d; grainy yellow, 38s per cwt.

Bengal.—5,000 bags low and date brown Bengal have sold privately at 28s 6d to 29s 6d per cwt.

Penang.—143 bags low brown sold at 31s 6d to 32s per cwt.

Foreign.—Two floating cargoes of Havana have sold for the United Kingdom: Nos. 12 to 12½, 26s 3d; one of Cuba muscovado at 23s, and one of brown Paraiba at 19s, for a near port. 1,084 casks Cuba, by auction, chiefly met with purchasers: brown, 32s 6d to 34s; low greyish to fine pale yellow, 34s 6d to 41s. 971 boxes Havana were bought in at 33s 6d to 43s for low brown to pale soft yellow. 1,258 casks 481 barrels Porto Rico were partly sold: brown, 33s 6d to 34s 6d; low grey to fine yellow, 35s to 43s per cwt.

Refined.—There has been rather more business done during the last two days: common grocery goods may be quoted 49s per cwt.

MOLASSES.—A fair amount of business is reported in West India, at 14s to 14s 6d per cwt.

RUM.—Several contracts have been made, at rather lower rates, including Demerara at 1s 8d to 1s 9d; proof Leewards, 1s 6½d to 1s 7½d; Mauritius and Penang, at 1s 6d per gallon, proof. The stock has been materially increased, and in total reaches 29,810 puns 5,755 hhds, against 29,180 puns 5,200 hhds at the same date last year.

COCOA.—608 bags Grenada sold at rates proportionate with those paid last week, viz., 51s to 52s, for common quality. 85 bags St Lucia, 51s. 567 bags Trinidad partly sold at steady rates: low grey to very good red, 50s to 74s 6d; one lot fine 95s 6d per cwt.

COFFEE.—Rather higher rates have again been paid this week, and the market is very firm. 116 casks 274 barrels Jamaica, by auction, partly sold at 62s to 81s for ordinary to good. 153 casks 103 barrels and bags plantation Ceylon realised 71s to 75s 6d for low middling and small berry to middling colowy. Privately, 1,000 bags good ordinary native Ceylon have sold at 63s to 64s; and some few hundred bags Rio at last week's improvement. A floating cargo of common Rio has sold at 49s 6d, and one of good at 53s 6d per cwt, for near ports.

TEA.—There has been a good business done by private contract, and green teas are much in demand at higher rates on account of the reduced stocks. At the public sales on Wednesday, 18,015 packages were brought forward, and 7,483 packages sold, including 5,210 packages "without reserve," at full prices. Flowery pekoe, with very little flower, 1s 2¼d; medium kinds, 1s 4d to 1s 6¼d. Blackish congou, 1s 3½d. Oolongs from 11d to 1s 3d, went without alteration. Common Tayshaan brought 9½d to 10½d per lb.

RICE.—Seven floating cargoes of soft grain description have sold at full prices, viz., four of Necrancie Arracan at 10s 4½d to 10s 6d; two of Bassein and Rangoon at 10s 1½d; and one of Moulmein at 10s 3d. A large business has also been done on the spot: old Necrancie Arracan, 9s to 9s 6d; new Rangoon, 10s 3d to 10s 6d; Ballam, 9s 3d to 9s 6d; white Bengal, 11s 6d to 13s 9d. By auction, 4,243 bags Bengal partly sold: white to good middling, 12s 6d; Ballam, 9s 6d per cwt.

IMPORTS and DELIVERIES of RICE to August 24, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Exported	...	8400	13650	14880
Stock	41250	45100	70025	93700

SAGO maintains the late advance.

SPICES.—The principle feature to notice is the sustained demand for pimento, 867 bags common to good middling quality, by auction, selling at 2¾d to 2¼d; also some parcels, privately, being rather dearer. 332 bags fair Penang pepper realised 3¼d to 3⅝d per lb. 176 barrels Jamaica ginger: ordinary to middling, 40s to 48s. 86 cases small and slight wormy Calicut, 41s to 42s per cwt.

SALTPETRE.—Some small orders have been executed in Bengal at 6d reduction, 3½ per cent. refraction selling at 35s 6d per cwt.

NITRATE OF SODA.—A floating cargo has sold at 13s 4½d. 14s per cwt is the nearest quotation on the spot.

DYESTUFFS.—Gambier is firm at 16s 6d to 17s. 1,105 bags Cutch, by auction, went rather dearer, viz., from 22s 6d to 23s 6d per cwt. Safflower is quiet.

METALS.—An improved demand prevails for some kinds. Spelter has sold freely as high as 18*l* 5s per ton. The price of British tin is up 3s. Foreign has advanced in proportion: Straits, 114s to 116s per cwt. Lead remains quiet. Copper steady at the rise last quoted. The iron market has been more active, with transactions to a fair extent in British manufactured. Scotch pig steady at 51s 4½d per ton, the deliveries being good and the production materially diminished.

HEMP.—Holders of Manilla are asking higher rates. Clean Petersburg has risen fully 1*l*, the present quotation being 30*l* 10s per ton with a firm market.

IMPORTS and DELIVERIES of SALTPETRE to August 24, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	8000	8950	12900	6710
Delivered	7700	8415	11500	9610
Stock	3620	4370	4030	3255

JUTE.—6,150 bales, offered on Wednesday, went off without much spirit, and prices ranged from 12*l* 5s to 20*l* per ton.

HIDES.—The sales of East India, held yesterday, passed off with animation, at full prices.

LINSEED.—Stocks keep light, and the production of oil large. Bombay has advanced to 60s; Calcutta, 57s to 58s; Black Sea and Azoff, 56s to 56s 6d per quarter.

TURPENTINE.—The last sale of rough was at 16s. Spirits advanced to 60s per cwt for American drawn.

OILS.—Pale seal has advanced to 39*l* per tun. Sperm quiet. Other fish oils are unaltered. Olive has met with inquiries, particularly the lower qualities: Mogadore, 50*l*; Gallipoli quoted 57*l* 10s to 58*l* per tun. Cocoa-nut is rather quiet: Cochin, 44s to 44s 6d; Ceylon, 43s to 43s 6d. Palm inactive, at 41s to 42s. Linseed, owing to the small supply offering, has risen to 33s. Rape oil unaltered: foreign refined, 43s to 44s; brown, 41s per cwt.

TALLOW.—The demand has been active, at a further rise of 1s to 1s 6d, but the market is now less excited. New Petersburg Y.C., on the spot, 47s 6d; for delivery in the last three months, 47s to 47s 6d; January to March, 47s 6d to 48s per cwt. The shipments from St Petersburg have hitherto been very small compared with the former year's.

PARTICULARS OF TALLOW.—Monday, August 26.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The week's business in West India reaches 3,610 casks, including the various parcels by auction to-day. Quotations are stationary. 858 bags white Benares by auction realised 44s 6d to 46s 6d. 206 casks Surinam, 33s to 36s 6d. 100 bags Natal, 33s 6d to 36s. 316 casks melado and sugar partly sold from 23s 6d to 32s 6d per cwt.

COFFEE.—39 casks Jamaica found buyers upon former terms. 217 cases Neilgherry at 72s 6d to 76s 6d per cwt.

RICE.—1,142 bags Bengal partly sold at 9s 6d to 9s 9d for Ballam. Privately, sales were made on similar terms; also further parcels soft grain afloat.

SAGO.—376 boxes found buyers: good medium, 18s 6d to 19s; middling bold, 17s 6d per cwt.

SAGO FLOUR.—129 bags fine were bought in at 17s per cwt.

SALTPETRE.—854 bags Bombay, refracting 50½ to 47½, sold at 30s 6d to 31s per cwt.

SPICES.—429 cases 313 bags Calicut ginger realised 43s to 64s; one lot fine, 114s. 175 barrels Jamaica, 42s to 55s. 113 bags pimento, 2¾d to 2¼d. 400 bags Malabar pepper of old import part sold at 5d for good shot kind. 140 bags Tranq (Penang), 3¾d to 3⅝d. 120 bags Zanzibar were bought in at 3⅝d per lb.

SAFFLOWER advanced 2s 6d to 5s per cwt.

SHELLAC sold at rather higher rates: garnet, 8*l* 7s 6d to 8*l* 10s; button, 8*l* 12s 6d to 9*l* 7s 6d per cwt.

RED SANDERS WOOD sold at 6*l* to 6*l* 2s 6d per ton.

OIL.—375 casks palm partly sold from 37s to 42s. 509 casks cocoa-nut: Cochin, 44s to 44s 3d; Ceylon part sold at 43s; Sydney, 37s to 42s 3d per cwt.

TALLOW.—348 casks Australian sold at 41s to 46s 9d. 64 pipes 591 packages South American chiefly withdrawn. East India part sold at 44s 3d to 45s. Town advanced to 49s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues very steady; no material alteration to note as respects prices. For export, 150 tons crushed have been sold at 33s in barrels. Dutch crushed continues very firm in Holland.

GREEN FRUIT.—A moderate business doing. Barcelona nuts in steady demand, and may be quoted 1s per bag higher. Lemons scarce, and improved in price. A parcel of Lisbon, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. The crops of Almeria grapes will not be as good as was expected.

DRY FRUIT.—The accounts continue bad from Greece, and much of the next crop will be damaged by rain. Price here has advanced 5s per cwt during the week. New Valencias opened on Tuesday last at 46s, but sell very slowly, a parcel offering (to arrive in a day or two) at 39s.

ENGLISH WOOL.—Rather more demand; no alteration in prices.

COLONIAL WOOL.—The public sales of colonial wool have been brought to a close. By private contract nothing is doing. The low wool sold at prices firmer than at the late Liverpool sales.

FLAX unaltered.

HEMP.—Again a good demand throughout the week, and prices well supported.

COTTON.—Sales of cotton from Friday, 23d August, to Thursday, 29th August, inclusive:—1,300 bales Surat, 6¾d, fully good fair new Dhollera; 5⅞d to 6 3-16d, middling to fully fair old Dhollera; 6 5-16d, fully good fair new Oomrawatty; 5⅞d, fair Compta: 300 bales Tinnevelly, 6d to 6¾d, middling to good: 200 bales Western Madras, 5⅞d, good fair—total 1,800 bales. There has been a fair, but not animated demand, this week, the business being restricted by the small quantity offering. The accounts from America of a second defeat of the Federalists, and the reported purchase at Liverpool of 15,000 bales Surat for shipment to America, produced more inquiry, but holders asking extreme

prices, the business has been but moderate, at an advance in some cases of ⅛d per lb for Surat and Tinnevelly. 1,200 bales new Dhollera, guaranteed fair, have been sold for arrival at 6⅛d to 6⅝d. Yesterday, the Bank rate of discount was reduced from 4½ to 4 per cent. 28 bales St Vincent and 69 Carracon are advertised for public sale on Thursday, 5th proximo. P.S.—Market quiet, but firm; sales to-day, 200 bales, at previous rates.

SILK.—No alteration in prices. Very firm market, although very quiet. Some few bales of new crop (China) silk arrived, and sold for 22s 9d, No. 2; 21s 6d, No. 3; 19s 6d, No. 4.

TOBACCO.—But little business done during the past week. Holders still continue firm.

METALS.—The principal change in the market is an advance of 3*l* per ton in the value of English tin. Spelter, on the spot, is worth 18*l* 5s per ton.

LEATHER AND HIDES.—We have not any alteration to report in the prices of leather this week. There was a fair average supply of leather at Leadenhall on Tuesday, and a greater appearance of business, so that a fair trade was done at previous prices. The inquiry still continues to be for strong sole leather, and for good calf skins 40 lbs to 50 lbs average.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	49	3
Fat by ditto	2	5½
Yellow Russian	49	0
Melted stuff	34	6
Rough ditto	19	6
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 26.—The total imports of foreign stock into London, last week, amounted to 13,400 head. In the corresponding period in 1860, we received 10,025; in 1859, 10,609; in 1858, 8,931; in 1857, 10,431; in 1856, 11,383; and in 1855, 8,372 head.

We were well supplied with foreign stock to-day, and the trade generally, ruled heavy, at a decline of 2d per 8 lbs. The receipts of home-bred beasts to this morning's market were seasonably extensive, and the general quality of the supply exhibited a decided improvement, when compared with Monday last. For all breeds the trade was in a very sluggish state, and prices gave way 2d per 8 lbs, the top quotation for prime Scots, crosses, &c., being 4s 8d per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire, the arrivals amounted to about 2,100 Shorthorns, crosses, &c.; from other parts of England, 800 of various breeds; from Scotland, 120 Scots and crosses; and from Ireland, 500 oxen and heifers. There was an increased supply of sheep on offer, but most breeds came to hand deficient in weight. The mutton trade ruled heavy, and a fall of 2d per 8 lbs took place in prices, compared with this day se'nnight. The primest Downs realised 5s 4d per 8 lbs. Lambs, the supply of which was only moderate, moved off slowly at about previous rates. Really choice qualities made 6d per 8 lbs. For calves there was a steady demand, at a slight improvement on last Monday's currency, the top price being 4s 8d per 8 lbs.

SUPPLIES.

	Aug 27, 1860.	Aug 26, 1861.
Beasts	4470	5380
Sheep and lambs	27850	29250
Calves	220	245
Pigs	350	570

THURSDAY, Aug. 29.—The supply of beasts on sale here to-day was moderate. Prime breeds were scarce, and were disposed of at full prices, viz., 4s 6d and 4s 8d per 8 lbs; otherwise, the trade was in a sluggish state, at quite Monday's decline of 2d per 8 lbs. Prime Down sheep were in fair request, at full quotations; but middling and inferior breeds moved off heavily at, in some instances, 2d per 8 lbs less money than on Monday. Lambs were a dull sale, and the choicest qualities sold at 5s 8d, being a decline of 2d to 4d per 8 lbs. For calves—the supply of which was large—the trade ruled heavy, at a decline of 2d per 8 lbs. Pigs changed hands slowly, at barely late rates.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	4	3	6	Large coarse calves	3	4	4	0

Coarse and inferior sheep	3	0	3	4	Small porkers	4	6	4	8
Second quality ditto	3	6	3	10	Suckling calves.....each	21	0	29	0
Prime coarse-woolled do.	4	2	4	10	Quarter old store pigs	22	0	30	0

Lambs, 4s 8d to 5s 8d.

Total supply—Beasts, 1,090; sheep and lambs, 11,630; calves, 580; pigs, 490.
Foreign supply—Beasts, 410; sheep 4,260; calves, 370.

NEWGATE AND LEADENHALL.

FRIDAY, Aug. 30.—Moderately good supplies of meat are on sale here. Good and prime qualities move off steadily, at full prices; otherwise, the trade rules inactive, at our quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	10	3	4	Middling mutton	3	10	4	2

Large Pork	4	2	4	6	Lamb	4	4	5	4
Inferior mutton	3	2	3	6					

HOP MARKET.

BOROUGH, Monday, Aug. 26.—The late improvement in the growing crops has steadily continued during the past week, and the duty has consequently advanced to 145,000*l* to 150,000*l*. Our market is still very dull, and lower prices are submitted to where sales are effected. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 70s, 120s, 170s; Sussex, 70s, 80s, 130s; Yearlings, 120s, 160s, 210s.

FRIDAY, Aug. 30.—The plantation accounts report further improvements, and our market is very dull, at next to nominal currencies. Sales, indeed, can only be effected by submitting to lower prices. Duty, 150,000*l*.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Aug. 26.—Very moderate supplies of home-grown potatoes continue on sale here. For all descriptions the demand rules steady, and prices have an upward tendency. Shaws are selling at from 70s to 85s, and Regents 80s to 105s per ton.

FRIDAY, Aug. 30.—The supplies of potatoes have somewhat increased, yet the demand has continued steady, at from 75s to 85s for Shaws, and 85s to 105s for Regents.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 5s to 1*l* 10s per load. Trade steady.

CUMBERLAND.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 6s to 1*l* 12s per load. A fair demand.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 5s to 1*l* 12s per load. A steady trade.

COAL MARKET.

FRIDAY, Aug. 30.—Wall's-end: Hetton, 18s; Haswell, 18s; South Hetton, 18s; Trimdon Hartlepool, 17s 9d; Hartlepool, 17s 9d; Braddyls Hetton, 17s; South Hartlepool, 16s 6d; Kepier Grange, 16s 9d; Kelloe, 17s 3d; Wharncliffe, 16s; Walker Primrose, 12s 6d; Hastings Hartley, 16s 6d; Lambert's Hartley, 16s 3d. 64 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 30.—Our market does not show much animation; but there is rather more inquiry for all useful kinds of low and medium qualities of foreign, and holders of such descriptions are very firm in their demands.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 30.—A fair attendance at to-day's market. Wheat in good request, and 1d to 2d dearer on low qualities. Flour rather more inquiry. Indian corn scarce. Holders ask 31s for mixed beans, without change. Oats and oatmeal unaltered in value.

The Gazette.

TUESDAY, Aug. 27.

BANKRUPTCIES ANNULLED.

T. Geddes, Liverpool, draper.
S. Fleet, Audlem, Cheshire, mercer.

L. Stewart, auctioneer, Glasgow.
G. Stewart, cattle dealer, Fochabers, Elgin.
D. Tannahill, engineer, Glasgow.

THEATRE-ROYAL, ADELPHI.—The last night of the season, for the benefit of Mr J. W. Anson, treasurer, will take place on Wednesday, Sept. 4, on which occasion an extra treat is offered to the public. "Masks and Faces," "Wreck Ashore," and the "Midnight Spectre" will be performed.

The great services rendered to the cause of popular education by Mr Pepper, and his untiring zeal in catering for the public amusement, during his former management of the Polytechnic, received a gratifying recognition on Monday evening, in the vast throng assembled to welcome him back to that institution, and, by whom his appearance on the platform of the large hall was hailed with the most enthusiastic plaudits.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

LONDON, FRIDAY EVENING.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 17th of August amounted to 591,430*l*, and for the corresponding week of last year to 588,896*l*, showing an increase of 2,534*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 279,452*l*, and for the corresponding week of 1860 to 275,146*l*, showing an increase of 4,306*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Aug. 26.—The railway market was rather dull at the opening, but afterwards improved with Consols. In several stocks an advance of ¼ to ⅜ per cent. took place, especially in South-Eastern, Midland, Great Western, and Great Northern. London and North-Western was also firmer, Eastern Counties relapsed 1 per cent. on the publication of the accountant's report, and London and Brighton fell to 116 to 118 on the accident of yesterday. No change of importance occurred in the colonial market. In foreign descriptions, Lombardo-Venetian advanced after official hours to 1 to ⅛ premium. American securities were rather flat, Virginia Five per Cents. and Erie ordinary and preference shares especially showing a reduction. Mines were firm, and in some cases exhibited an advance.

TUESDAY, Aug. 27.—The railway market opened firmly, and soon experienced a general advance, which was fairly maintained, although at one period a tendency to reaction was shown. Midland, Lancashire and Yorkshire, and South-Eastern were favourably influenced by the failure at Manchester of a large speculator for the fall in those stocks. The final prices were at the best point of the day, and exhibited a rise of fully 1½ per cent. in Midland, about 1 per cent. in Lancashire and Yorkshire, Great Western, Great Northern, and Caledonian, and ¼ to ½ in other stocks. Eastern Counties at one period showed a further decline, but left off the same as yesterday. In the colonial market, Grand Trunk improved to 19⅜ to 20½, while Great Western of Canada receded to 9¾ to 10. Indian guaranteed descriptions showed renewed buoyancy. French shares and Dutch-Rhenish advanced. Canada and Cape of Good Hope debentures were quoted higher. In American securities, there was a rise in Erie preference shares; but a decline in the ordinary stock and in Illinois Central. Mines were in fair demand, and in one or two cases showed an improvement.

WEDNESDAY, Aug. 28.—The railway market improved to-day, partly from the favourable traffic returns, the receipts from passengers being materially increased through the present brightness of the weather as compared with the bad season last year, and partly from further repurchases to close speculative operations for the fall on the low dividends. The present state of the money market, and the prospect of a large augmentation in railway earnings through the Exhibition of 1862, also appeared to restrain sales on the part of the public. Midland continued chiefly in favour, and advanced 1⅜ per cent. Great Western and Caledonian were also 1¼ per cent. higher. In the colonial market, Grand Trunk of Canada improved to 20 to ½. Indian guaranteed stocks were also steady. In foreign descriptions, Great Luxembourg advanced to 8⅜ to ½, while Lombardo-Venetian receded after official hours to ⅞ to 1 pm. Dutch-Rhenish and Bahia were higher. American securities left off without alteration. There were few transactions in mines, and prices occasionally showed a decline.

THURSDAY, Aug. 29.—The railway market opened firmly, and, after a slight temporary reaction, closed with renewed buoyancy, at a general advance. The stocks chiefly in demand were Lancashire and Yorkshire and Caledonian, which left off fully 1½ per cent. higher. Midland was also in request, from a large speculative withdrawal, but the final quotation was scarcely so good as at one period. Great Western, North-Eastern, and Eastern Counties, also improved. In colonial stocks, Grand Trunk of Canada improved to 20 to ½; and East Indian to 101½ to 102. Foreign descriptions showed no change of importance. Lombardo-Venetian were dull at ⅞ to 1 pm. American securities closed the same as yesterday. British mines were quiet at an occasional advance. In foreign, United Mexican and Lusitanian improved, but in the former case a partial reaction took place.

FRIDAY, Aug. 30.—In the railway share market to-day attention was occupied with the settlement. In several instances, including Lancashire and Yorkshire stock, prices were quoted ¼ to ½ per cent. lower than they closed yesterday. The dividend was this morning taken off the prices of the leading stocks. London and North-Western stock was quoted 92¾ to 93 ex div.; Great Western, 70¼ to ¾ ex div. Lombardo-Venetian Railway shares remained quoted ⅞ to 1 prem. Grand Trunk of Canada and Great Indian Peninsula were inquired for. This being settling day, very few transactions were recorded in the mining market.

THE MUTUAL TONTINE ASSOCIATION,

(For Tontine, Investments, Annuities, and Endowments, and for the accumulation of capital), No. 39 King street, Cheapside, London, E.C.

This Association, which is managed by Directors who are also members of the Board of the Mutual Life Assurance Society, is now prepared to receive proposals from parties who may desire to become members of the various classes of Tontine in the course of formation, or to obtain any of the other objects of the Association. Amongst those objects, the Association will enable persons to provide for themselves Annuities, steadily augmenting in proportion to the period to which life may be protracted, and also ready means for the investment and accumulation of capital. Particulars of the Classes, Prospectuses, Forms of Proposal, Tables for Annuities, and Endowments, and every information, may be obtained on application to

JOHN LAKER, Secretary.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

EXTRAORDINARY DISCOVERY—NEW THEORY.

(Medicines Superseded.)

NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.

State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

THE CELEBRATED "INDISPENSABLE SUIT,"

Country Establishments:—

SHEFFIELD and BRADFORD, YORKSHIRE.

N.B.—An immense and choice assortment of goods for all classes and all ages in the several above-mentioned branches of our business.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

KEATING'S PERSIAN INSECT DESTROYING POWDER.

This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.

Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension as it has no qualities deleterious to animal life.

Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.

Take notice, each genuine packet bears the above name and address.

DR CURTIS'S MEDICAL WORK. "MANHOOD

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations. Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.

This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.

Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

HOLLOWAY'S OINTMENT AND PILLS.—Certainty without Risk.—These excellent curatives may be fearlessly used by the weakest or most delicate invalid. From their purifying and cooling virtues in all diseases, benefit must flow from their employment without inconvenience or danger. Holloway's remedies are suitable to every climate, and are admirably adapted for restoring health to both sexes at any age and under any circumstances. A long list of wonderful cures of the most intractable complaints can be produced to prove their utility and safety. They always do good, never mischief. These medicines are invaluable in the nursery, where slight accidents or trifling ailments can at once be corrected by the judicious use of Holloway's medicaments, which cannot be wrongly applied.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.

MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

TO MERCHANTS,

SHIPOWNERS, and FORWARDERS.—For Rates of Freight per Grand Trunk Railway, the most direct and only safe route, to all parts of Canada and the Western States, apply at the Grand Trunk Railway Offices, 21 Old Broad street, London, E.C.

TUESDAY, September 10
TUESDAY, October 29.

Fares: Cabin passage, £20 to £28, according to accommodation; steerage, 7 guineas and upwards. Freight on moderate terms.—For further particulars apply to C. E. Dixon, 9 Rumford place, Liverpool; Pritchard and Monneron, 4 Rue Rossini, Paris; Seymour, Peacock and Co., 116 Fenchurch street, E.C.; or to the Great Ship Company (Limited), 90 Cannon street, London, E.C.

BLACK BALL MONTHLY

AUSTRALIAN CLIPPERS.

LONDON to SYDNEY.

PLANET, A 1, at Lloyd's, 11 years, (special survey), 667 tons register, to sail 10th September. This well-known high-class Australian clipper is famous for the delivery of cargo in the most perfect order, is now loading in the London Docks. Has spacious full poop accommodation for passengers.

LONDON to ADELAIDE direct.

HARWICH, A1 9 years, 613 tons register, J. Franklin, commander. This favourite regular trader made the last passage to Adelaide in 83 days, and offers the best opportunity to shippers of season goods and passengers.

LONDON to MELBOURNE direct.

BLUE JACKET, 1,442 tons register, loading in the East India Docks, receiving goods until the 30th September, unless previously full. This far-famed ex-Royal Mail Ship landed the mails from England in the colony in 68 days, and is celebrated in the trade for the regularity of her passages and sound delivery of cargo; offers the best opportunity to shippers of fine goods, and passengers.

LONDON to QUEENSLAND.

Under arrangement with the Queensland Government. Free grants of land. Passage money, £18 and upwards. Packet for August.

SALDANHA, A1, 1,563 tons register, 3,000 tons burthen. This magnificent three-decked clipper has a flush deck forming a promenade of 200 feet; her saloon and between deck accommodation for all classes of passengers are unsurpassed, and, being the largest and finest ship ever sent to the colony, offers the best opportunity to passengers and shippers. Free land grants, under the Government regulations, to the amount of £30, given to all persons paying their own passage by this ship. All further information given by applying to H. JORDAN, Esq., representative of the Queensland Government; to JAMES BAINES and CO., Liverpool; all Agents for the Black Ball Line; and to T. M. MACKAY and CO., 1 Leadenhall street, E.C.

*** Boulogne departures daily.

Professor Pepper will receive pupils and perform analyses in the Laboratory, and deliver his FIRST POPULAR SCIENTIFIC LECTURE on "Ventilation" on Monday the 26th inst. at eight o'clock. All the other entertainments and the new Dissolving Views as usual.

HEALTH AND HAPPINESS FOR

the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MANCHESTER MEETING, 4th to 11th September, 1861.

Reception Room, the Portico, Manchester.

PRESIDENT.

WILLIAM FAIRBAIRN, Esq., LL.D., F.R.S., &c.

The objects of the Association are:—"To give a stronger impulse and more systematic direction to scientific inquiry; to promote the intercourse of those who cultivate science in different parts of the British empire with one another and with foreign philosophers; to obtain a more general attention to the objects of science and a removal of disadvantages of a public kind which impede its progress."

GENERAL ARRANGEMENTS.

Wednesday, 4th September.—Opening Meeting, and President's Address, at eight p.m., in the Free-trade Hall.

Sectional Meetings daily, as usual, from the 5th to the 10th inclusive.

Wednesday, 11th September.—Concluding General Meeting, in the Free-trade Hall.

Thursday, 5th September.—Soiree [Microscopes], in the Free-trade Hall.

Friday, 6th September.—Evening Discourse.

Saturday, 7th September.—Soiree [Telegraphs], in the Free-trade Hall.

Monday, 9th September.—Evening Discourse.

Tuesday, 10th September.—Soiree [Field Naturalists' Society], in the Free-trade Hall.

On Thursday, the 12th of September—Important Excursions.

Gentlemen desirous of attending the meeting may make their choice of being proposed as life members, paying £10 as a composition; or annual subscribers, paying an admission fee of £1, and (additional) £1 annually; or associates for the meeting, paying £1.

Ladies may become members on the same terms as gentlemen; or ladies' tickets (transferable to ladies only) may be obtained in the Reception Room, by members, on payment of £1.

Life members receive gratuitously the reports of the Association which may be published after the date of payment.

Annual subscribers receive gratuitously the report of the Association for the year of their subscription, and for every following year of subscription without intermission. Associates for the meeting are entitled to the report of the meeting, at two-thirds of the publication price.

In order to facilitate arrangements for the meeting, it is desirable that application for tickets should be made as early as possible.

Forms of proposal will be supplied in the Reception Room during the meeting; or the names of candidates for admission may be transmitted to the Local Secretaries.

As the funds which the Association has to expend for its scientific objects consist only of the payments made by its members and associates, it is particularly desirable that every opportunity should be taken of increasing their number.

Compositions and subscriptions of new members or associates will be received by the Local Secretaries until the commencement of the meeting; afterwards, as well as the subscriptions and arrears of former members, by the Local Treasurer.

For information respecting the local arrangements, application may be made by letter, addressed to any of the Local Secretaries for the meeting, at the "Portico, Manchester."

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

MEETING in MANCHESTER, 4th to 11th September, 1861.

RAILWAY PASSES.

Reception Room, Portico, Manchester, August, 1861.

The Executive Committee have arranged with the undermentioned Railway and Steam-packet Companies to issue to gentlemen and ladies attending the meeting in September, as members or associates, Passes entitling the bearer to a ticket to Manchester and back, for one fare, between the 2nd and 14th of September:—

Lancashire and Yorkshire Railway Company.
London and North-Western Railway Company.
Manchester, Sheffield, and Lincolnshire Railway Company.
Great Northern Railway Company.
North-Eastern Railway Company.
Midland Railway Company.
Caledonian Railway Company.
Great Western Railway Company.
City of Dublin Steam-packet Company (*via* Holyhead).
North Lancashire Steam Navigation Company (to Fleetwood).
Belfast Steamship Company (to Liverpool).
Glasgow and Liverpool Royal Mail Steam-packet Company.

Application for these passes must be made (the sooner the better) to Local Secretaries, B. A., Portico, Manchester, stating the names of those who will use them; and if any are not yet members or associates, their full names and addresses, and the particular class of membership desired.

The pass cards will have to be exchanged at the railway or packet office for the Company's special ticket.

R. D. DARBISHIRE,
ALFRED NEILD,
ARTHUR RANSOME,
H. E. ROSCOE,
} Local Secretaries for the Meeting.

LOANS ON DEBENTURES.—

The Directors of the Metropolitan Railway Company are prepared, in pursuance of the powers of the Company's Acts, to accept TENDERS of MONEY, in sums of not less than £100, for periods not exceeding three years, on the security of their debenture bonds, bearing interest at 6 per cent. per annum. Applications may be addressed to the Secretary, at the Offices of the Company; or to Messrs R. and J. Sutton, 22 Royal Exchange, London.—By order,

JOHN HENCHMAN, Secretary.

Offices, No. 17 Duke street, Westminster.

DEBENTURES. — SCINDE RAIL-

WAY COMPANY.—The Directors are prepared to receive applications for Debentures at par, bearing guaranteed interest at five per cent. per annum, for the purposes of the Indus Steam *Flotilla*.

The Debentures are for five years, and may be renewed for five years at the same rate of interest.

The Debentures may be converted into Indus Steam Flotilla Capital Stock, at the option of the holder.

Full particulars may be obtained at this office.

THOMAS BURNELL, Secretary.

Scinde Railway Company, Gresham House, Old Broad street, August 15, 1861.

EAST INDIAN RAILWAY

COMPANY.—IRON SUPERSTRUCTURE for CHANDMAREE ROAD BRIDGE.

The East Indian Railway Company is prepared to receive Tenders for WROUGHT-IRON WORK for a SKEW BRIDGE of 58 feet span.

Specification, drawings, and form of tender, upon which only tenders will be received, may be seen at the Company's offices.

Tenders, endorsed "Tender for Iron Bridge Superstructure," must be delivered to the Secretary on or before 12 o'clock at noon, on Thursday, the 5th September next.

The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. T. ROAD, Secretary.

East India Railway House Alderman's walk, New Broad street, London, Aug. 19, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. Debentures as above are being issued by the Company of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract entered into with the East India Company.

Forms of application may be obtained at this office.—By order of the Board,

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

Catalogues, particulars, and orders to inspect, of
MATTHEW CLARK and SONS, Sworn Brokers, 72 Great Tower street, London, E. C.

FIRST-CLASS BUSINESS PURSUITS.—Middle and Upper Schools, Peckham, London, S.E.—There is superior accommodation for a few BOARDERS, in the family of the principal, JOHN YEATS, LL.D.

INVESTMENTS.—J. H. WOOD, 10 Cornhill, E.C., has for SALE, 125 Shares in the LONDON and YORKSHIRE INSURANCE COMPANY, £1 paid; also Shares in a Limited Company, to pay 8 per cent, on the purchase money; and several Reversionary Interests. Particulars on application.

CLERK.—A YOUNG MAN IS desirous of obtaining a situation in a Merchant or Ship Broker's Office. He writes a good hand, is quick at figures, and knows something of bookkeeping. He has also a little knowledge of manufactures (piece goods), and how to buy them. Would have no objection to go abroad.—Letters addressed to A. B., care of Mr Roberts, 17 Brompton row, Brompton, will be punctually attended to.

A GENTLEMAN, well acquainted with Accounts and Bookkeeping, and who has had considerable experience in China and America, is desirous of obtaining employment at home or abroad. The advertiser understands the Chinese language, and can give unexceptionable references.—Apply to K. C., care of Messrs Sawyer, Brothers, Castle court, Birchin lane.

WANTED.—A GENTLEMAN of good education, to act as Assistant Correspondent, and take charge of the Shipping and Marine Insurance Department of a large firm in the City. He will require to have had considerable experience in chartering vessels and freight contracts, in doing insurance both at Lloyd's and the Companies, and to be well acquainted with the London and Liverpool shipping business.—Address, stating full particulars and salary required, to P. K., care of Wm. Dawson and Sons, 74 Cannon street, City, E.C. Highest references required.

NEW WEEKLY JOURNAL.—The Advertiser being about to start a Class Journal, will be glad to hear from Printers, Writers, or others having suggestions or services to offer. A bookkeeper required.—Apply to G. T., 24 Bow lane, E.C.

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed Instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

WHOLESALE HOUSES, Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

BRITISH AND FOREIGN INVESTMENT.
Mr THOMAS SPARGO, of 224 and 225 Gresham House, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 95 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured. £	Bonuses added. £ s	Amount payable up to Dec., 1854. £ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

ROYAL INSURANCE COMPANY

HEAD OFFICES:—29 LOMBARD STREET, LONDON, AND ROYAL INSURANCE BUILDINGS, LIVERPOOL.

Branch Offices:—Manchester, Birmingham, Bristol, Leeds, Dublin, Glasgow, and Edinburgh.

Extracts from the Report for the Year 1860.

"The success of the Company, even in its earliest years, received the marked attention, and elicited the surprised comments of writers best acquainted with the history of Insurance Companies.

"Fire Premiums for 1860 equal the Total Fire Premiums for the Seven Years 1843 to 1851.

"Life Premiums for 1860 exceed the Entire Life Premiums for the Eight Years ending 1852.

"Purchase of Annuities in 1860 largely exceeds the similar receipts for the first Ten Years 1845 to 1854.

"This progress, it is believed, is unsurpassed, considering that it applies to each of the three branches of the business."

FIRE BRANCH.

"The Fire Branch has certainly shown no exhaustion during the year 1860 of that impetus which had previously brought it to a position of the first magnitude among the Insurance Companies of the United Kingdom. The Fire Premiums in 1859 had advanced to the sum of £228,314 7s 3d. In 1860, the amount of Fire Premiums has arrived at a sum of £262,977 19s 1d, showing an increase of £34,663 12s 8d, exceeding the large advance of the preceding year, so that in two years the Fire Revenue of the Company has been enhanced by the enormous sum of £66,829 17s 5d.

"The Parliamentary Report of Returns of Duty paid to Government for the year 1860 exhibits the augmentation of the business in a more prominent way, as it affords the means of comparison with other Companies. The Proprietors will be gratified to learn that the increase of Duty paid by the Royal in the last year is more than double that of any other Company, either London or Provincial, whilst only one of those Companies even approaches to 50 per cent. of the advance of this Company. Our increase actually equals 30 per cent. of the entire increase of the whole of the Metropolitan Offices combined, whilst of the Provincial Offices it forms upwards of 30 per cent. of the total advance of the other 28 offices established out of London."

LIFE BRANCH.

"The Reports of the Company for several years have had invariably to announce a constant periodical expansion of Life Business, the new Policies of each succeeding year showing an advance over the one that had immediately preceded it. A similar result is shown in the year 1860, the Premiums of New Policies, after deducting Guarantees, being £15,079 17s 10d, which is an increase in that item of £1,993 17s 5d above the amount received for the year 1859.

"But even this advance is small when compared with the sudden and remarkable momentum which has been given to this branch of the business in the present year (1861).

"It was not until the commencement of the year that the public seemed to have become fully acquainted with the fact that the Royal Insurance Company had published late in the last year an account of the investigation into the assets and liabilities of its Life Department, under a novel form; and in as plain and intelligible a manner as the abstruseness of the subject admitted, together with the entire statements and valuations necessary for that purpose.

"It is conjectured from the extensive notices of this pamphlet and its accompanying diagrams, which have appeared in the periodicals of the day, that it has largely attracted the attention of vast numbers of persons in all parts of the United Kingdom as well as in other parts of the world. Indeed, a most satisfactory and conclusive evidence that such is the case is afforded by the fact that the sum assured on new policies in the six months to the 3rd June of the present year is actually fifty per cent. in excess of the sum assured in the corresponding months of the year 1860, although the latter amount in itself exceeded the sum assured in any like previous period of time.

"If this success be continued, the Royal Insurance Company would, with respect to the amount of its new business, be at once placed (at least with one or two exceptions) at the head of all the Insurance Companies doing business in this country, and the anticipations of the last report, to the effect that the details of the life business then to be published would form an epoch of the establishment, will have a speedy and a very happy realisation."

SPECIAL ADVANTAGES OF THE LIFE BRANCH.

PROFITS.—Large proportion returned every five years to policies then in existence the entire years.

Expenses chiefly borne by the Fire Branch, in order to increase the bonus to be returned.

LIFE BONUSES DECLARED,

Two per cent. per annum on the sum assured; the greatest bonus ever continuously declared by any Company.

SECURITY FOR BOTH FIRE AND LIFE BRANCHES.

Capital, Two Millions sterling.

Accumulated funds in hand exceeds £600,000.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary.

DENT, CHRONOMETER,

Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

ST MARGARET'S COLLEGE,

NORTH-END, FULHAM, London, S.W., for the Education of Young Ladies.

Principal—The Rev. A. LENDRUM, M.A.
Vice-Principal—The Rev. FREDERICK TAUNTON, M.A.

For prospectuses and all particulars apply to the Rev. the Vice-Principal.

N.B.—All the Pupils are resident in the College.

The next Term will commence on Thursday, the 19th of September.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

THE LIVERPOOL AND LONDON

FIRE and LIFE ASSURANCE COMPANY.

Established 1836.

Offices: 1 Dale street, Liverpool; 20 and 21 Poultry London.

FIRE DEPARTMENT.

The Annual Premiums exceed £310,000, and place it in the first class of Fire Offices. Its liberality and promptitude in settling claims have been established in the adjustment of enormous losses; and its influence in determining rates of Premium has uniformly been given to proposals for improving the character of risks, that high Premiums may be unnecessary.

LIFE DEPARTMENT.

The Annual Premiums exceed £130,000; the Accumulated Reserve in this department is £707,060.

RESOURCES.

The invested funds of the Company exceed £1,260,000.

The liability of Proprietors is unlimited.

SWINTON BOULT, Secretary to the Company.
JOHN ATKINS, Resident Secretary, London.

WESTERN LIFE ASSURANCE

and ANNUITY SOCIETY,

3 Parliament street, London, S.W.

Established A.D. 1842.

DIRECTORS.

Henry Edgeworth Bicknell, Esq., Upper Bedford place, Russell square.
Thomas Somers Cocks, Esq., J.P., Charing cross; Hereford street, Park lane; and Thames Bank, Marlow, Bucks.
George Henry Drew, Esq., Hibernia chambers, London bridge, and Caterham, Surrey.
William Freeman, Esq., Millbank street, Westminster
Joseph Henry Goodhart, Esq., J.P., 3, 4 and 5 Ratcliffe highway, and Manor House, Upper Tooting, Surrey.
Edmund Lucas, Esq., Millbank street, Westminster, and Wandsworth, Surrey,
Frederick Boyd Marson, Esq., Brunswick place, Regent's park.
James Lys Seager, Esq., Millbank row, Westminster, and Carroun House Surrey.
John Bazley White, Esq., Blackheath, Kent.

ACTUARY.

Arthur Scratchley, Esq., M.A.

Annual payments to insure £100 at the undermentioned ages:—

£ s d	£ s d
20 ..... 1 14 2	40 ..... 2 14 5
25 ..... 1 18 6	45 ..... 3 2 5
30 ..... 2 2 9	50 ..... 3 17 0
35 ..... 2 8 0	55 ..... 4 10 4

Partners in Firms are recommended to give attention to the moderate terms upon which joint life assurances may be effected.

The medical attendants of the lives proposed are always consulted, and paid for their reports.

BONUSES.—The rates of this society, when compared with those of other offices, will be found to give an immediate bonus to assurers, and, in addition, large bonuses are periodically declared out of the surplus profit. The next division will take place in 1865.

Agents wanted in the towns and villages of the United Kingdom where the society is not already represented.

THE SCOTTISH WIDOWS' FUND

and LIFE ASSURANCE SOCIETY is a purely mutual office, in which the whole funds belong to the members, and the profits are divided among them alone. Since it was founded in 1815, its history has been one of constant and increasing prosperity; and it is now, in point of funds, annual revenue, and number of members, one of the largest Life offices in the world. The security presented by the Society to its members and their representatives is of the most unquestionable character, while the returns made in the form of bonuses are, it is believed, not exceeded by those of any other similiar institution. The following is a

MEMORANDUM OF BUSINESS, BONUSES, FUNDS, AND REVENUE.

Extracted from the Society's detailed Prospectus.

	£
1. Total assurances issued	14,621,724
2. Total bonuses declared	3 033,049
3. Sums assured and bonuses existing	10,886,591
4. Total claims paid exceed	3,600,000
5. Invested funds	3,601,764
6. Annual revenue	425,738

Forms of proposal, detailed prospectuses and reports, and every information may be had at the Head Office, or any of the Society's agents.

SAMUEL RALEIGH, Manager.
J. J. P. ANDERSON, Secretary.

SPECIAL NOTICE.

Proposals dated and lodged at the Head Office, or with any of the Society's agents, during the current year, will secure One Bonus more than those of later date.

LONDON HONORARY BOARD.

George Young, Esq., Mark lane.
Charles Edward Pollock, Esq., Barrister, Temple.
David Hill, Esq., Sussex square.
John Murray, Esq., Publisher, Albemarle street.
Samuel Laing, Esq., Indian Finance.
Sir John Thomas Briggs, Admiralty.

The Political Economist.

THE REPORT OF THE INCOME TAX COMMITTEE.

THE Income Tax Committee, presided over by Mr Hubbard have considered not so much the tax itself as the Chairman's ideas upon the tax. Mr Hubbard laid before them an elaborate memorandum suggesting a plan for the adjustment of the existing inequalities in the collection of the tax; he tendered evidence in explanation of his scheme, and underwent a somewhat sharp cross-examination from some members of the Committee, especially from Mr Lowe, both as to its principles and as to its details. He likewise proposed a report recommending his plan for adoption. On the other hand, Mr Lowe prepared a document which is entitled a Draft Report, but is, in reality, a highly acute criticism on Mr Hubbard's memorandum. Both these papers were, as the phrase goes, "too much" for the Committee, and they accordingly adopted a very short Report which tells us that the tax is bad now; that Mr Hubbard's scheme will make it no better; and that the Committee have no further suggestions to offer on the subject. A more lame and impotent conclusion to an elaborate inquiry on an important subject we do not remember to have ever met with.

But if the report is rather meagre, the evidence is almost amusing. Mr Lowe's cross-examinations of those of the witnesses who are favourable to a readjustment of the rate may be recommended as logical exercises to any one who wishes to improve his powers of definition, and as economical exercises to any one who wishes to make progress in abstract science. It would be still higher praise if we could say that they advanced the inquiry in the pursuance of which they were made, but we acknowledge that we do not think so.

The ground upon which the industrial classes are dissatisfied with the present mode of assessing the income tax is very plain. They say that it is unfair that a man of business with 1,000*l* a year, dependent, as all business incomes necessarily are, upon life, health, and opportunity, should pay the same tax as a man with 1,000*l* a year derived from land or from the funds, which are quite certain not to cease so long as the English soil exists or the English Government is solvent. They say that this *inequality* is peculiar to the income tax, that all indirect taxation is self-assessed, that a man of business with 1,000*l* a year does not expend so much upon taxable articles as a landlord or a fundholder with the same income; they require the modification of a tax which, under some form or other, is sure to be permanent, and which works what all fair-minded persons consider to be an exceptional injustice.

Some persons appear to have a difficulty in comprehending this argument, yet surely poverty is an intelligible idea. It is quite certain that a man of precarious income cannot spend as the man of secure income spends; he cannot live as the man of secure income lives; he cannot enjoy himself equally. It would not be in human nature to do so. Life has a certain number of primary necessities, a certain number of less pressing needs, a great number of secondary desires that are rarely very strong. It would be absurd in a man of business to drink champagne every day, to eat green peas in December, to hire a mansion in Belgravia, even though he might not go beyond the margin of his income in so doing. It is not for him to spend up to the margin of his income, or if he does so he must take the consequences. A man of business is not so well off as a freeholder with the same nominal income, for four reasons:—First, his income depends on his health, which must be precarious; 2ndly, on his opportunities of making money by means of his mind, which are precarious too; 3rdly, because he must provide for the old age which is coming upon him; 4thly, because he must likewise lay up for those persons (if any) that are dependent upon him.

Mr Lowe says that these considerations only prove that a man of business ought to save more than an owner of an estate in fee simple; but that they do not prove that he *will* save, or that if he do save, that his savings should not be taxed. He cannot see, he tells us, "why the mere existence "of a duty, apart from any proof of its performance," should be a ground of fiscal exemption: he declines to admit that it is wise to stake a revenue on the hypothesis "that "men are what they ought to be." He will not admit either that money saved is a less fitting subject of taxation than money spent. "Avarice," he says, "is as odious as prodi-"gality;" and he will be no party to encouraging, by legislative enactment, the one at the expense of the other.

What is the value of these assertions? They puzzled various witnesses a little when they were stated with great acuteness and great command of words in rapid interrogatories; but is there anything in them which need puzzle us at our leisure? It is absurd, then, to say that because men of business ought to save for themselves, for their family, and for their children, therefore they do save. There is no abstract logic in the argument. Certainly men often do what they ought not, and often do not do that which they ought to do. They often even spend money which they should not spend, and neglect to save money which they should save. All this is very plain. But is this the real point of the argument? Let us see what we are reasoning about. We wish to discover what men are doing with their money. We have no means, it is admitted, of finding it out by direct investigation; we cannot search bankers' pass-books or their private ledgers; we must reason from apparent facts, and form the best judgment we can. Accordingly, we say the majority of men do perform with approximate accuracy most of those duties which the society in which they are placed most stringently requires of them, and on which their own happiness most depends. Out-of-the-way virtues are not to be calculated on; exceptional magnanimity is a very rare thing; extraordinary heroism is a marvel,—but decency is not a marvel; every-day virtue is an every-day matter; the average performance of social duties is a familiar as well as a gratifying fact.

We have much sympathy with Mr Lowe's indisposition to take virtue for granted. We know that most people often act ill and sometimes mean ill. Virtue requires evidence as well as vice before we can believe it. But we cannot refuse credit to the ordinary probabilities of common life, even though they may possibly indicate that some of our neighbours have some degree of virtue. Is it not plain, can any one question that, as a matter of fact, men of business do save enough to provide for themselves and their families? Still less can any one think it irrational to expect that on ordinary matters which require no unusual exertion, and which come within the sphere of their usual habits, the actions of men will fairly approximate to the moral code which society around them prescribes, and which they themselves profess to recognise.

The second proposition is, that if men of business save their savings ought to be taxed. Now we decline to argue the general question as to the advisability of taxing capital or not taxing it. Some of our taxes undoubtedly are taxes on capital,—the legacy duty is so almost avowedly. We look to the *man*. We say it is not fair on the man of business to tax his yearly savings of capital unless you tax other capital too. Why should that particular form of capital be subject to an isolated burden? A trader receives a certain income, but he cannot spend that income; it is not his for himself, for his own immediate enjoyment; it is only his as a *trust* for others and for futurity. What justice is there in taxing him upon certain funds passing through his hands, on certain moneys which he is investing, while you tax no other part of the capital of the country? If the State require a subsidy of half of everybody's goods, the State must have it; but no State and no person must take half of some people's goods and not take half of others'.

Again, Mr Lowe inquires how will you get elsewhere the revenue you will lose by the remission of the tax? You must get it somewhere. Will not the persons on whom you put the new tax be equally entitled to complain with those from whom you have removed the old one? He would have us do evil which we know, for fear of doing evil which we do not know. But suppose that all the English revenue was raised by the income tax, could it then be contended that we must continue to levy it in an unfair manner because we should need to augment its nominal rate if it were levied fairly? We must raise our taxes as justly as we can. If it is proved that the income tax presses unjustly on the industrial classes to the extent of 2,000,000*l*, we must divide that 2,000,000*l* among all classes of the community, the industrial class included. We must endeavour so to arrange it that each shall pay their share, and that none shall pay more than their share.

Lastly, Mr Lowe is wholly in error in saying or hinting that the frauds of certain of the commercial classes are reasons why others of them should be excessively taxed. It may be true that A does not pay on the whole of his income, but is that a reason for overtaxing B who does?

We shall on a subsequent occasion speak of Mr Hubbard's scheme. We have on the present occasion been desirous of removing the preliminary difficulties which have been ingeniously suggested, not only against that scheme, but against every other with a similar object.

THE RECENT RISE IN THE PRICE OF THE FUNDS.

The rise in the price of the funds is at least partially owing to the removal of a cause which has this year operated to a remarkable extent,—namely, the poverty of bankers, and especially of bankers in the country. The effect of a bad harvest is necessarily to take a good deal of money out of the country, and a considerable portion of this money, if it had remained, would have been in the hands of country bankers. The process is simply this:—The farmer's crop did not come up either so large as was expected or so good; the corn merchant consequently had to buy abroad the supplies necessary for the subsistence of the country. Through his instrumentality, the money which would have been paid to the English farmer was paid to the American or Continental farmer. The banker of the rural district is poor because the agriculturists who supply him with money are poor; the banker with whom the corn merchant keeps his account is probably poor likewise, though in a different sense, for he has probably had to supply such merchant with the means of importing an unusual quantity of corn.

The poverty of the country bankers presses upon the funds with perhaps a steadier action than that of many more conspicuous causes. It augments what is really the most important agent in reducing the price of stock—the supply in the market. The demand of the public for what may be called actual consumption is a steady calculable force,—liable, doubtless, to be increased by many circumstances, and also to be diminished, but still, on the whole, remaining tolerably steady from year to year. If any sudden addition should be made to the supply, the immediate consequence is a reduction of price. The poverty of country bankers causes such an addition to the supply. They hold a considerable portion of their reserve funds—of what they consider their tangible assets—in the public funds of this country, and when a drain, from whatever cause, comes upon them, they are often compelled to borrow on stock. In one way or in the other they throw stock upon the market, and the result is the reduction of price.

The good harvest which is now being reaped in most parts of England,—though not, as it seems, in parts of Scotland and Ireland,—necessarily tends to relieve the pressure upon country bankers, and it is understood that they are withdrawing the stock which has recently been pressing on the market. They are repaying the loans which had been made to them gradually, and only at present to a slight extent, for most of the corn has yet to be sold or turned into money, and the wealth of the bankers is not therefore very much augmented. Still it is augmented to some extent; they no longer fear that there may be a drain upon them, as would have been the case if this year's harvest in the country had resembled the harvest of last year. They are not so rich as they will be; but they are no longer as poor as they were, and of this the effects are beginning to be felt.

THE PROBABLE CONTINUANCE OF THE AMERICAN CONFLICT.

The one engrossing topic of speculation in manufacturing and mercantile circles is still the probable duration of the civil war between the North and the South, and the probable degree in which the blockade of the Southern Ports can be made effectual. No confident reply can be given to either question; and those most immediately concerned and most conversant with Americans and American politics do not even affect to have any positive opinions on the matter. Every one feels so uncertain what turn affairs may take that caution is the predominant feature of the business world just now both in Liverpool and in Manchester. Manufacturers continue to purchase cotton freely because they do not choose to be left without a moderate supply, and because they prefer to pay 9d a lb now to the possibility of having to pay 1s 6d a lb a few months hence;—and importers meet the demand freely because they can realise large profits at present prices, and they feel uncomfortable misgivings that any steamer *may* by possibility bring tidings which would drive down the market quotations twenty-five per cent. in a single morning. Indeed, there never to our knowledge was a crisis half as serious or exciting as the present when the mercantile community showed the coolness they evince at present. There is no wild speculation; there is no irrational panic; prices creep up steadily but slowly;—faster no doubt than they should were there any sanguine prospect of an early accommodation, but by no means so fast as they ought and would were there any absolute certainty or settled conviction of the prolongation of the contest for eight or twelve months more.

A circular which we published last week, written in a somewhat alarmist spirit, mentions a movement on the part of cotton factors and insurance brokers at New Orleans, discouraging planters from forwarding their cotton to the shipping ports. But far too much weight has been attached to this and other verbal demonstrations of a similar character. It should be borne in mind that up to the present time nothing of the sort can have produced any effect whatever;—nor indeed can it for many weeks to come. The whole of the last crop has long since been forwarded to Europe. The picking of the new crop has barely commenced. Not a bale of cotton could have reached us more than has reached us, even if the war and the blockade had never been heard of. The shipping season does not commence till far on in November,

and it is usually the end of December before any large exportations take place. Till then, of course, it is of little consequence whether the cotton is retained on the plantations or is forwarded to the ports as fast as it is bagged. If the blockade ceases any time before the end of the year, the probability is that by March or April we shall have received just as full a supply of cotton as if the blockade had never been declared. Moreover, there has been another reason, very different from the fancied indisposition to sell which has been gratuitously attributed to the producers, why it should have been determined for the present to retain cotton on the plantations, in place of transmitting it at once to New Orleans and Mobile:—there was for some time a considerable apprehension lest the cotton ports should be successfully assailed by sea,—in which case of course all the goods stored there would have been destroyed or have fallen into the hands of the captors. That fear has now to a great extent died out; and we have no doubt that, as soon as sufficient shipping has arrived in the Southern harbours to demand freight, and as soon as any fair chance of escaping the blockading squadron shall become apparent, cotton will find its way down the rivers quite as fast as necessary. We do not for a moment give credit to the notion that any cotton will be voluntarily *withheld* from the market by patriotic or fanatical planters—nor can we find the faintest apprehension on this score in the recesses of the mercantile mind.

As to the prospect of an early termination of the conflict either by compromise or conquest, we can throw little light. The means for forming any very confident conjecture simply do not exist. The South are resolute, cheerful, and quietly convinced of ultimate success. They are preparing for a long contest;—looking a considerable way ahead;—organising remote plans;—and they are by no means destitute of pecuniary resources safely lodged in this country, and available for naval and military stores. On *their* side, we are satisfied, no recession from the position they have taken is to be looked for. The practical question, therefore, narrows itself to this important inquiry:—What chance is there that the North—or a sufficiently numerous and influential section to speak its mind and make its weight felt—will grow sick of the contest, and insist, first upon an armistice, and then upon a negotiation? On the one side lie the considerations, *first*, that the merchants of Boston and New York are suffering perhaps heavier losses than they have ever known, and that the men against whom they are fighting are both their *customers* and their *debtors*, whom they cannot impoverish or ruin without correspondingly injuring themselves. *Secondly*, that a very considerable proportion of the population in the Northern States are not native Americans, and do not, and cannot be expected to, share the patriotic passions of the genuine Yankee or Pennsylvanian. They may participate in the present excitement and will assuredly participate in the coming burdens of the war, but they have little of the national feeling which alone can render the excitement durable, or cause the burdens to be cheerfuly borne. *Thirdly*, the expenses of the war will, it is obvious, be enormous, and cannot be *wholly* defrayed by loans. It is by no means certain that loans will be forthcoming to an adequate amount; and it is quite certain that the interest of those loans and the additional revenue that will be needed can only be met by a weight of direct taxation which it is scarcely believable that a fierce democracy will bear. Their new tariff is too heavy to be very productive; and both Customs, Excise, and income tax will have to be levied on a people greatly reduced in numbers and impaired in their prosperity. The expenditure of the war and the consequent pressure of the taxes will be the strongest of all the practical arguments in favour of a compromise. In the *fourth* place, moreover, it is questionable how long the Western States, who do not share in the same extent as the Atlantic States the prevalent excitement, and who are materially injured by the Morrill Tariff, will be content to submit to the double burden of war and *Protectionist* exactions, as soon as they are satisfied that secession will not close the Mississippi to their produce. Indeed, it must be remembered that as the main part of their productions consists of wheat and flour, which suffers, or is liable to suffer, by transmission through a tropical region, their trade to Europe will naturally be more and more carried on through the Atlantic ports, as railway communication is improved. Their personal interest against separation is, therefore, by no means so clear or strong as that of their Eastern brethren. *Fifthly*, and lastly, as the contest goes on and the difficulties in the way of bringing it to a speedy termination become more and more obvious, there looms upon the minds of both parties to the strife the image of a terrible catastrophe, from which both parties shrink at present. The Northerners are beginning to say among themselves, as yet timidly and hesitatingly, that if the conflict goes on much longer and they find themselves as far as ever from success, they may be driven to the desperate expedient of proclaiming negro emancipation and summoning the slaves to a general insurrection. The mere conception *that it may come to this*, has in it so much that is repulsive and dreadful to all the soberer minds even in the Free States, as to weigh strongly with them in favour of terminating a conflict of which so bloody a catastrophe and so questionable a means of triumph has become one of the probable issues. To most Northeners, except the Abolitionists and the more frenzied Unionists, even disruption may well seem less terrible and less calamitous than a servile war,—and a compromise far preferable to success purchased at such a cost and stained by such a crime.

These are the considerations which appear to point to an early accommodation. On the other hand, the best authorities which we have been able to consult agree that the feeling in the North in favour of a vigorous prosecution of the war is as resolute and, to all appearance, as prevalent as ever;—that if the party favourable to negotiation is, as alleged, numerous and influential but suppressed for the present by the dread of popular violence, it at least gives no signs of life; and that very great and well-directed efforts are being made with much steadiness to prepare and discipline the army for further movements. It is not easy to form a reliable opinion as to the facility with which money and recruits will continue to be procured. At present there is no lack of either; and there is obviously every disposition on the part both of Congress and of the people to confide to the President whatever powers may be thought necessary or useful in the crisis. Any transgression of law and constitution by the Federal authorities is quietly submitted to: any utterance of unpopular doctrine by dissentients is crushed by personal outrage, even in law-loving and civilised Massachusetts. In short, it is abundantly plain that no regard for "the liberty of the subject" will be permitted to interfere with the energy or the power of the civil or military rulers.

There is another set of considerations which—even in the event of further disasters, or discouraging inaction, or tedious non-success—will probably disincline the Federal Government from proposing or readily listening to terms of accommodation;—and that is, the very magnitude and difficulty of the questions which will arise immediately that an armistice, with a view to negotiation, shall be agreed upon. If there were any distinct offer before the public, which the Unionists had previously rejected, but might under the pressure of disheartening reverses, be inclined to accept, it might be easy to proclaim a cessation of hostilities and to sign preliminaries of peace. But there is nothing of this sort. The difficulties in the way of a treaty, until one or other party is so decidedly and enduringly successful as to be able to dictate terms, are absolutely enormous. Even if Mr Lincoln were disposed to come to some agreement, he would probably be deterred from doing so by the thought of the perplexing and momentous discussions which must be faced at the outset of negotiations; and if he were required (as he probably would be) to suspend the blockade during these negotiations, and thus lose the benefit of past exertions, and sacrifice the chief hold he has over the South, there would be an additional difficulty in the way. The first question which the Commissioners on behalf of the contracting combatants would have to settle, would regard the division of the Territories. The second would be the position to be assigned to Kentucky, Tennessee, and Virginia, which are nearly equally divided between Slavery and Freedom. Maryland is Northern by situation, but to a considerable extent Southern by sympathy and by institution. West Virginia is as earnestly Free-soil as East Virginia is ferociously Slave-holding. Kentucky is already more than half Northern and Free-soil in its inclinations, and will ultimately, no doubt, become entirely so; and Tennessee will probably sooner or later follow the example. Then, again, how are the liabilities of the old Union to be apportioned? What proportion of the Federal debt will the the South consent to take upon her? "The Union" paid large sums as purchase money for Louisiana and we believe for Florida also:—Are the seceders from the Union to be suffered to take those vast territories, and not to repay the

capital which the North furnished, in an overwhelming proportion, for their acquisition? We may well imagine that even a pacifically inclined Cabinet, met by such formidable questions on the threshold of a pacific course, might be driven back upon a prosecution of the war as the lesser difficulty of the two.

On the whole, we can only reiterate the conclusion at which we arrived three weeks ago. There is every reason why merchants should exercise the greatest caution as to every step they take: there is no warrant for them to feel confidence as to any issue. Nothing is certain: everything is possible.

THE FRENCH PAMPHLET.

THERE is a considerable analogy between the political habits of a democratic Commonwealth like the United States, and a democratic Empire like the French. A recent American writer, speaking apologetically of the faults of the American Press, has described their method of procedure with much vivacity. The newspaper editors, he says, are like the managers of theatres. They have no particular convictions of their own, and are very anxious to tap new veins of popular politics. They are always throwing out pilot-balloons to see how the wind blows. A paper often puts out an editorial, he remarks, recommending,—say a war with England,—as a mere feeler. He has no intention of urging it unless it *takes* and sells his paper. If it does not, he suppresses the suggestion immediately, and would propose the next day a close alliance with England, if there seemed any reason to suppose it the favourite idea of the moment. Something very like the same system is pursued in France by the Imperial Government itself. The tentative novelties prepared by private individuals, even when permitted by the Government, attract very little notice. The French people prefer to leave the initiative to the Government, though they like to have a veto on it. Imperialist ideas will not permit them this veto in any constitutional way, but concede it in an indirect and unconstitutional way. The Government sends out its own pilot-balloons in the shape of semi-official or unofficial pamphlets, which, whether they find favouring or unfavouring buyers, instruct the Government as to the set of the tide, without pledging it. They are very embarrassing things to politicians. Rumour has always a thousand contradictory assertions to make about these "inspired" or "uninspired" feelers. If they are traced to an official source, it only tells us that the Government was anxious to know what the popular feeling would be under a certain political hypothesis; and that hypothesis may after all be one which the Government would be glad to see unpopular. In any case, therefore, the only safe way to consider these tentative experiments, even when deemed semi-official, is not as an outline of policy, but as a list of questions addressed to the French people by its Government. It is equivalent to an interrogatory upon the drift of their wishes. It shows where the Government wishes clear light as to the set of public opinion,—not what its own purpose may be.

The new French pamphlet, "L'Empereur, Rome, et le "Roi d'Italie," may or may not be one of those semi-official pilot-balloons. An eager war has arisen amongst "Our own Correspondents" on the subject,—some of them thinking that it was cast loose upon public opinion by the Emperor's desire, and some that private enterprise has assumed a fac-simile of the favourite Imperial disguise. The *Moniteur's* disavowal yesterday is couched in language so mysterious as to be almost equivalent to an admission of some official hand. "Several foreign journals," it says, "make comments upon the pamphlet, 'The "'Emperor, Rome, and the King of Italy,' *which are "void of all foundation, and to which the Government "opposes a formal denial.*" That is, the foreign journals are disavowed, not the pamphlet. Looking to the simultaneous withdrawal of the Duc de Gramont (a strong Papal politician) from Rome, and of the many official symptoms of an approaching crisis in the Roman question, we are disposed to think that the pamphlet is really a semi-official experiment on French opinion,—that the Imperial ear is listening closely at this political stethescope for the murmurs of approbation or dislike which may escape the nation as it reads and comments. It is, at all events, worth while to know the directions in which the pamphleteer tries to test the strength of French conviction.

The pamphleteer, then, begins by stating that the reactionary party in Italy are conspiring at Rome against Naples, just as the reactionary party in Europe formerly conspired at Coblentz against France. He brings forward proofs of the conspiracy between the dethroned Bourbon and the Pope at Rome. France is the Power which protects the Roman coalition,—and on France, therefore, rests much of the responsibility of the Neapolitan brigandage. Here, then, is the first virtual question,—namely,—whether the French public will fire up or not at the imputation of countenancing, if not causing, the reactionary plots against Naples;—whether they will join in the indignant protest of the pamphleteer, or rebut the charge and boast of their services to the Church? The next division of the subject is the relation between France and Italy. The writer maintains that a strong France has no reason to fear a strong Italy,—much reason to desire it. The fear of a strong Italy is an exploded Orleanist policy. The Emperor's Government, firm in the affections of the people, may dare to apply its own principles to the exigencies of other nations besides France. Here is another interesting question,—can France sacrifice her jealousy of a strong Southern neighbour? or is the feeling which was so prevalent after the Italian campaign still in the ascendant?

In whatever way this last question may be answered, the writer next suggests a still more delicate query. Rome is the question of to-day,—Venetia may be left till tomorrow;—for Venetia is to Italy what Belgium is to France. "Italy "without Venetia is like France without Belgium. But "without Rome she seems only tolerated amongst the nations. "The chief thing, then, at present, is for Italy, Rome. Vene-"tia will come afterwards. We remember that Venetia, given "to Austria by the treaty of Campo Formio, was delivered at "Austerlitz. Who knows if, in our days, similarly, Venetia "abandoned to Austria by the Peace of Villafranca will not "be delivered, in spite of the Quadrilateral, without the effu-"sion of blood in Italy?" The gist of this paragraph we take to be a kind of experimental query addressed to French ambition. 'Suppose for a moment that you cannot tolerate 'a strong and united Italy on your Southern boundary 'without compensation,—yet need that compensation be 'gained at the expense of Italy? Might not French pride 'be better satisfied with gains in other directions, if it is 'really necessary that we should gain something in strength 'for any accession of strength we permit to her? Venetia 'will never be yielded without a struggle either there or 'elsewhere,—but would France prefer it there or elsewhere, '—on the Mediterranean or the Rhine?' A good deal may depend on the way in which this very significant query is answered.

The third division of the subject is as to the temporal power of the Papacy. The writer sounds France as to the extent of her devotion to that idea—an idea by no means suitable to the general policy of France. And then finally the writer advocates the definitive withdrawal of France from Rome and the cession of all civil power to the King of Italy, whose offer of guarantees for the spiritual independence of the Pope is said to be full and satisfactory. This is putting point blank to France the duty of extinguishing the temporal power of the Pope,—and is meant, no doubt, to test the strength of the Ultramontane feeling.

And now, what is the net result, as we may say, of this tentative pamphlet? It is evidence, we believe,—and the faint denials of the French Press, which have grown weaker and weaker as time grows on, culminating in the odd language of yesterday's *Moniteur*, confirms us in this belief,—that the Emperor wishes to sound the public opinion of France in three directions. He wishes to know whether it would weaken his dynasty to withdraw his troops from Rome and abandon the Pope. He wishes to know whether the unpopular side of that proposition would or would not be lost sight of in the popularity attaching to an extension of French territory in other directions. He probably wishes to know in what direction France is most eager for extensions, and his subordinate suggests Belgium as a catchword to crystallise public opinion. We do not suppose that on any of these steps the Emperor has yet either determined or resolved to determine. He will watch

with his usual acuteness the sensitive public opinion of France. But we think that there is evidence,—if the pamphlet has, as we believe, some indirect Government origin,—that the Emperor considers that a complete evacuation of Italy by France, which he thinks desirable, will probably necessitate the application of some counter-irritant elsewhere. This is, in itself, an important result.

To England we would say,—let not this inference, if it be true, draw us into any false position. Let us not be deterred from steadily supporting the Italian cause, by any fear of this diversion of French ambition to other and more dangerous quarters. Let us support steadily the cause of European justice, and we shall have ten times more influence when we are called upon to check the ambition of France, than we can possibly have if, in fear of such a result, we should have allowed the policy of England to be connected in the mind of Europe with the taint of Austro-Italian selfishness, or with obstacles thrown in the way of the Power that is bent on aiding Italy.

THE MORAL OF THE SOUTH LANCASHIRE ELECTION.

The next best thing to gaining a victory is profiting by a defeat. A failure may be of more real value than several successes, if we can so ascertain and lay to heart the causes of our discomfiture as effectually to guard against a recurrence of it. To do this—to turn it to full account in the way of warning, we must allow ourselves time to look at it with calmness; we must permit the first feelings of irritation and disappointment to die out; we must carefully collate all the different indications of secret influences and open operations which those most concerned can furnish us; and deliberately sit in judgment on the whole. The fortnight which has elapsed has enabled us to do this in reference to the defeat of the Liberals in South Lancashire; and we will endeavour to state our conclusions in as inoffensive and moderate a manner as we can.

There is no need to deny that the result of the election was both a serious and a significant fact. South Lancashire—the seat and centre of the free-trade movement, the locality of the most thriving manufacture and the largest export trade of Great Britain, the stronghold of liberal opinion, the most populous as well as the most enterprising emporium of English industry,—South Lancashire, which since the first Reform Bill had scarcely ever returned any except men who were rather Radicals than mere Whigs,—South Lancashire, which already had at the last contest given intimation of its feelings by electing two Tories, has just clenched the warning by electing a third Tory. There was everything to add meaning to this hint of changed opinion and of shaken allegiance. It was a single election, so there was no room for the dodges of cross votes, or any of the ordinary electioneering tactics. The organisation of the contest was admirable on both sides. Expense was spared on neither side. The candidate put forward by the Tories was a man of no personal weight, of no county influence, and by no means especially popular even with his own party. In fact, he had nothing for him except that he was a Tory. On the other hand, the candidate put forward by the Liberals had already represented the county, had made a very fair member, was of unblemished respectability in every way, and had nothing against him except that he had been a Leaguer, and was almost if not altogether a Radical. His committee consisted of Liberals of every shade; and he was supported equally by Mr Bright's particular friends, and by those who turned Mr Bright out of the representation of Manchester. Yet he was beaten in a fight which, if not scrupulously fair, was at least very hotly contested and very skilfully conducted. To what are we to attribute the result?

The answer may be given in two words:—the Tories were in earnest in the matter, and the Liberals were not. The Tories were zealous and exerted themselves to the utmost: the Liberals were lukewarm and hung back. Hundreds who had *pledged themselves staid* away from the poll. Hundreds refused either to promise or to vote. The Tories strained every nerve, and worked like men who knew distinctly what the stake was, and thought it well worth winning. Some who had never taken an active part before, toiled like day labourers now. Some, usually fair dealers, resorted (it is said) to the most daring and unblushing contrivances on this occasion. The very charges of their opponents on this head serve to show how thoroughly their heart was in their work. On the other hand, the Liberals had (we speak of the mass of the party) no very distinct idea of the cause they were fighting for, and no very rooted conviction that it was worth fighting for after all. They did not like many of their associates; they did not particularly love the opinions of their candidate; and they particularly disliked the opinions of some of the candidate's most zealous friends. It was, therefore, in truth, an unequal contest. The Liberals in the county are beyond question both the most numerous, the most wealthy, and the most powerful; but under the circumstances it was scarcely likely they should win.

Why, then, were the Tories so zealous, and why were the Liberals so lukewarm? This is the second question; and the answer to it is almost as clear and as concise as to the first. The Tories were terribly in earnest because they were fighting against a candidate who, rightly or wrongly, they believed to belong to the school of Mr Bright; whom they knew to have been a close ally of Mr Bright; who, it was difficult to deny, had been a nominee of that gentleman on a previous election, and who avowed that he agreed with him on most points and was assumed to agree with him on nearly all. They remembered that Mr Bright had on all occasions ever since he entered public life been a fierce denouncer of their party, both as Protectionists, as country gentlemen, as Conservatives, and as men of property;—that not three years since he had done all that lay in his power to exasperate other classes against them;—that in the warfare he had carried on he had uniformly been not only unmeasured in his language, but as ostentatiously offensive as it was possible to be;—that he had pertinaciously, and (as they thought) blindly and insanely sought to persuade us to neglect our National Defences, and had heaped the most insolent abuse on all who took a different view;—and finally, that he had recently been at the head of a vigorous agitation for a mingled scheme of taxation and of suffrage, which would have laid upon men of property nearly all the burdens of the country and taken away from them nearly all the political power. They felt, therefore, that the contest was a really serious one, and that much was involved in it,—that, in truth, their position in the county was at stake, and probably the security and well-being of the country too;—and men generally win when they are really powerful and really roused.

On the other hand, their antagonists shared many of their sentiments. Two-thirds of the great Liberal party, even in Lancashire—as they have taken every opportunity of showing—like Mr Bright's scheme of democratic reform just as little as his scheme of fiscal confiscation; and they are no fonder of either than the Tories are. They detest his foreign policy; they dread his finance; they are disgusted with his demagogism;—and they could not but feel that Mr Cheetham's victory might not improbably turn to the advantage of all the doctrines which they most disapproved. The success of Mr Bright's friend might do vast mischief: the defeat of Mr Bright's friend would at all events do good as showing how little sympathy South Lancashire had with Mr Bright's extravagances. In any way, it was Mr Cheetham's connection and supposed agreement with Mr Bright that lost him his election. Mr Gladstone would have won an easy victory. A moderate but sincere Liberal who was not committed to direct taxation and to national disarmament might, and we think would, have succeeded. But how could a person, who held or was assumed to hold opinions obnoxious to a large portion of the constituency, be expected to unite their suffrages or to arouse their zeal?

There was one consideration, no doubt, which might have been expected to exercise, and which *did* exercise, great influence in Mr Cheetham's favour. It was known that the Government felt unusual interest in this critical election. It was known that a defeat could not but weaken Lord Palmerston's Ministry, even more than by the loss of an expected vote. It was felt that the maintenance of that Ministry was essential to the successful prosecution of that Liberal foreign policy which has already contributed so much not only to European peace, but to the establishment of Italian independence; and that, even if there were no other reason for keeping them in office, this cause, which the English people have so much at heart, ought to have aroused more zeal on their behalf than appears to have been felt by the electors of South Lancashire. This is quite true; and these considerations brought many hundreds to the poll, who would otherwise have stayed indifferently at home. But even these considerations were insufficient in many minds to outweigh their deep-rooted disapproval of the

section of politicians who would crown a mean and selfish policy abroad by an unjust and ruinous fiscal and organic policy at home. It must be admitted, too,—and it is well that Government should be made aware of the fact,—that the sympathy and admiration generally felt by Liberals for their proceedings in reference to *Italy*, has been largely qualified and damped by the language they have held and the predilections they have manifested in reference to the contest now at its crisis between Austria and *Hungary*.

The election in South Lancashire was in no degree a party struggle, in the ordinary sense of that word. Neither the name of Lord Derby, nor that of Lord Palmerston, was heard in the canvass. The result, therefore, is no real indication of Conservative strength, nor of Liberal decline. But it is idle to deny that it affords a very ominous intimation of what will be the issue of a general election—if such an election should take place soon, and before the present Government have well understood the lesson which Mr Cheetham's defeat teaches, and have decided on their course accordingly.

THE NEW CALCUTTA BUDGET.

It is with much pleasure that we observe that the Indian authorities, in Mr Laing's absence, are relinquishing the most objectionable portions of his policy. When Mr Laing delivered his Budget speech, the Licence Bill proposed by Mr Wilson was still passing through the Legislative Council; and Mr Laing wished to delay it until he should be able to incorporate it in a new measure, which was likewise to supersede Mr Wilson's income tax. Sir Bartle Frere now tells us, however, that the Government is "pledged to the Income "Tax Bill and the Licence Bill as they stand." He has, therefore, passed the Licence Bill, and is prepared to carry out the Income Tax Bill efficiently and with determination. We hope that these declarations of policy will be adhered to consistently. If everything depended on Sir Bartle Frere himself, we should have great confidence in their being so. He has shown far greater financial intelligence than any other Indian statesman, and is likewise remarkable for that vigour and determination for which Anglo-Indian statesmen used to be so celebrated. But these vicissitudes of financial policy are deeply to be lamented. We seem to have at Calcutta the defects of a despotism without its consistency, and the vicissitudes of a free Government without its intelligence.

One circumstance, however, gives great confidence in the permanence of the income tax. We believe that it will be *necessary*. The opium revenue, as we pointed out some weeks since, has fallen off rapidly:—

	£
Mr Laing estimated from opium	6,100,000
Sir Bartle Frere reduces it to	4,900,000
	1,200,000

Not only has the price fallen from 1,745 rupees a chest to 1,400 rupees, but the cost of production has augmented. The Government in this case does not levy a duty, but produces a commodity; every increase, therefore, on the necessary outgoings diminishes the accruing revenue. It has been found necessary to augment the allowance to the ryots from 4 rupees to 5 rupees per seer, or 25 per cent. Some "items of expenditure were overlooked" by Mr Laing amounting to 348,000*l*. And altogether the shadowy character of Calcutta figures on which we have remarked so often is again pressed on our attention. Mr Laing, as our readers will remember, estimated that there would be a fair surplus in the coming year: Sir Bartle Frere estimates a deficit of a million and a half. Under these circumstances it is not likely that the income tax will be relinquished.

As we have to place a permanent reliance upon the income tax, it is satisfactory to hear that its yield is likely to be much greater than Mr Laing said that it would be. We observed at the time, that if the tax were vigorously and properly collected, it must yield more. It was only in effective operation for six months, and even then we *know* that it was not collected with any vigour in very many parts of the country. In those six months it yielded upwards of 1,000,000*l*. Mr Laing's estimate of 1,250,000*l* for the whole year is therefore much under the mark. We hope the unfortunate observations which have dropped from him may not have augmented the reluctance of certain officials to collect the tax, and thereby diminished its productiveness.

TURKISH ADMINISTRATION AND THE TURKISH EMPIRE.

The accession of a new Sultan in Turkey has been accepted by many as an earnest of a new policy for the Government, and of a new career for the Empire. Whatever may be the justice of this expectation, there can be no doubt that an absolute monarchy is peculiarly dependent on the character of the Sovereign; and that this must be the more so in a country in which the executive centralisation is increasing, and in which greater administrative corruption has hitherto prevailed than probably in any other Government of Europe. With the precise scope and bearing of the change which is now taking place at Constantinople, it would be impossible for any one in this country to be at present fully acquainted; and it is more pertinent to point out what the capacities of the Turkish Empire really are, and in what degree they may respond to any such change of government as is now alleged to be in progress. No one would question that an energetic and highly civilised population of the same numerical extent, and in possession of the same territory as the Turkish, would form one of the greatest Empires of the world. The subjects, actual or tributary, of the Sultan, number 36,000,000; and probably some 28,000,000 are directly ruled from Constantinople. Egypt and the Danubian Principalities rank still among the chief granaries of Europe, in spite of modern importations from America; and even in the provinces immediately under Turkish rule, the soil is probably by nature more fertile than that either of France or Germany. The Mediterranean seaboard of the Empire alone stretches along three Continents, and offers a vast variety of produce, while it *might* form an extensive market for the consumption of foreign goods. The Government, too, contrives to manufacture alliances, partly from the direct interest of other Empires in its maintenance, and partly through the conflicting jealousies of its opponents. And perhaps the very variety of the component races would enable an astute ruler to play off one hostile nationality against another. Here is, no doubt, the raw material, though the raw material only, of political greatness.

But it is very common, on the other hand, among those who believe in the eventual regeneration of the Christian provinces, to look upon the Ottoman Empire itself as incapable of revival, and to regard the Turks, after a common phrase, as merely "encamped in Europe." Certainly, Turkish institutions are growing more and more incongruous in Europe, although we do not forget that the problem of the day is their adaptation to modern ideas and Christian manners, and that the Turkish Empire has, apparently, been nearer destruction, in past times, between two different ages of its military splendour than it is now. Much of this question obviously depends on the hold which Mahometanism has taken in European Turkey. It is true enough that those who are Christians by creed and Europeans by descent are in a great majority in the European, as those who are at once Mahometans and Turks are in a corresponding majority in the Asiatic provinces. The former contain a population of 15,000,000, of whom only 1,100,000 or 1,200,000 are Turks. These figures seem at first sight to present the Turkish Government in Europe as a factitious one, and to establish what we will call the encampment theory. But it is certain that if we got rid of the Turks from this continent, we should not thereby get rid of the Mahometans. The truth is, that Mahometanism has crept largely into the Sclavonic and Hellenic populations of European Turkey. It has, therefore, to a certain extent, taken root in Europe. What is perhaps still more surprising than the conversion of provinces of Sclavonic Christians, in past generations, to the doctrines of the Koran, is the acknowledged fact that these Sclavonic Mahometans are by far more bigoted followers of the Crescent than the European Ottomans themselves. It would not be expected that any precise or authoritative census of these populations could be taken, and we find accordingly that the computations of travellers on this head considerably differ. But we believe that while, as we have said, the Ottomans of European Turkey fall short of 1,200,000, the total number of Mahometans is nearer four than three millions. To take an example, we find that in Albania there is a population of 520,000, either Skipetars or Hellenians in

origin. But of this number the Greek Church claims only 80,000, and the Latin Church no more than 60,000, the remaining 380,000 Albanians being Mahometans. Again, in Bosnia, where the population is probably pure Sclavonian, the Greek faith numbers 280,000, the Latin 200,000, and the Mahometan 400,000. In Epirus, too, there are not less than 50,000 Mahometan Greeks. And so on. That these Hellenic and Sclavonic Mahometans are more bigoted than the European Ottomans, is a fact which has been repeatedly evinced by the manner in which they have respectively received the European reforms that have been introduced during the last thirty years into the Turkish Government. It happens singularly enough that these reforms have been calmly received by the latitudinarians inhabiting Roumelia (the province nearest to Constantinople), and who are the European Ottomans, while they have been vehemently resented by the ardent perverts of Bosnia and Albania. The strongholds in Europe of the "old Turkish party," as it is termed, are, therefore, to be found among the Sclavonians, who thus respond to the bigoted Turks of Asia Minor.

We may divide the population of the Empire according to territory, to nationality, and to religion. In Europe we find 15,500,000 inhabitants, in Asia 16,500,000, and in Africa nearly 4,000,000. Among the former, beside the 1,200,000 Ottomans, there are computed to be 7,200,000 Sclavonians, inhabiting chiefly Bulgaria, Bosnia, and Servia; 4,000,000 Roumans, forming the population of Moldavia and Wallachia, which it is now the fashion to term Roumania; 1,500,000 Arnauts, 1,000,000 Greeks, 500,000 Armenians, and smaller numbers of Jews and Tartars. In Asiatic Turkey we find 10,700,000 Ottomans, 2,000,000 Armenians, 1,000,000 Greeks, 1,000,000 Arabs, 1,000,000 Kurds, and some smaller races, such as the Druses. Hence we see that Asia is the natural stronghold of the Turkish supremacy, although that supremacy in Europe is supported by the past conversion of European races. The Mahometans in Asia, as in Europe, are still more numerous than the Turkish race—there being reported to be nearly 13,000,000 Mahometans, while there are but 2,360,000 of the Greek and Armenian Churches, 640,000 Roman Catholics, 100,000 Jews, and a small number of Protestants. In Europe, however, the Sclavonic and Hellenic conversions have not destroyed the numerical majority of the Christian element. Thus we find 11 370,000 of the Greek and Armenian Churches, and some 300,000 Roman Catholics, as opposed to some 3,800,000 Mahometans. We may well imagine, therefore, that these European converts form, with all the inconvenience of their bigotry in these days of reform, one of the main pillars of Turkish supremacy in the South-east of Europe.

But if we detach the semi-independent provinces from those directly ruled from Constantinople, the numerical inequality of Christians and Mahometans in the latter will nearly disappear. Thus Wallachia contains 2,600,000 Christians, Moldavia 1,400,000, and Servia 1,000,000, besides those of Montenegro. All these provinces are self-governed; and thus the Christian element in that part of European Turkey which Turkey governs is reduced to about 6,500,000. The European provinces actually ruled from Constantinople are Roumelia with 2,600,000 inhabitants, chiefly Mahometans; Bulgaria with 4,000,000, nearly all Christians; Bosnia with about 900,000, nearly equally divided between the two religions; the Herzegowine and Montenegro with 500,000, Thrace and Albania with 1,800,000, and the islands of the Archipelago with 700,000. In all of these are both Mahometans and Christians.

If, therefore, the Turkish Government can pay its way, and administer government with vigour and intelligence, we see no reason in the collocation of races and religions to disturb its ascendancy in either continent. An Empire that would bear the test of such incompetence and malversation as the late reign exhibited, would bear almost any test. But time must yet be allowed to put to the proof the worth of the new Sultan's reforms. Enough has been said to show that the Empire possesses the elements of revival, which there is nothing to prevent Abdul Aziz from developing, if he be really the *man that he is* reported to be. Retrenchment and *administrative reform* were, as they ought to have been, his first steps; and if he can carry this so far as to save revenue for material improvements, he may do what he professes for his country. Judgment as yet is premature. The Turkish Empire has hitherto certainly been worse governed even than the Austrian; but it assuredly reposes on a more solid foundation.

Agriculture.

SIXTY YEARS SINCE.

AGRICULTURAL PROGRESS IN NOTTINGHAM AND YORK SHIRES.

A FULL and accurate account of the progress of agriculture in England, or in any district of England, since the commencement of the present century would be full of interest and instruction agriculturally and economically. But who shall write such an account? The requisite knowledge and leisure are seldom combined with such mental and personal independence as would be necessary for supplying a full as well as accurate account of English agricultural progress, involving as it must statements of deficiencies and obstacles, with their causes. In the absence of complete accounts, we must resort to such as are from time to time available, and amongst these are the papers and prize essays which appear in the "Journal of the Royal Agricultural Society." We have more than once had occasion to say, that such essays, for the most part, are tinted rose-colour; they present the brighest aspect of the husbandry of the district dealt which the actual state of its agriculture will permit, and defects and impediments to good farming are either softened down and treated as exceptional, or merely hinted at.

Nor have we far to seek for the reason why the writers of these essays, who obviously have the power of giving more truthful, because more complete, histories of the farming of their several localities, so invariably fall short of completeness. The obstacles and the difficulties of English husbandry are mainly, nay entirely, caused by the landowners and by the system under which the land of this country is held by its proprietors, real and nominal, and the tribunal by which the essays are adjudged, the Council of the Society, is so deeply imbued with the spirit and prejudices of the landowning body, that it is not in the nature of things that the *whole* truth of defective farming should be written in essays intended to be subjected for adjudication. As is natural under such circumstances, the writers dwell chiefly on the "improvements" in the agriculture of their districts, selecting the positive and neglecting the negative results of agricultural history for the periods over which their accounts extend. And everywhere, and in spite of obstacles, there has been so much improvement—partial and individual as it generally proves to be—that scarcely any county can be found wherein its agricultural improvements may not be made the subject of a pleasing and, in some measure, useful essay. We believe that few persons interested in agricultural pursuits can read the papers and prize essays of the "Agricultural Journal" without amusement and instruction.

We would, however, draw deeper and more enduring results from the glimpses of rural difficulties we obtain in these papers on local husbandry, and instead of dwelling complacently on the progress which has been made, would inquire wherefore that progress has been so partial and imperfect. And in urging such inquiry, we do so no less in the interests and for the benefit of the owners of land, than in the interests and for the benefit of the occupiers and the farm labourers. All are injured by whatever prevents the development of agriculture and impedes the application of capital to the increase of the produce of the soil.

In the just-published part of the "Journal of the Royal Agricultural Society," there is a paper by the late Mr John Parkinson "On Improvements in Agriculture in the County of Nottingham since the year 1800." Perhaps few persons were more competent to write on that thesis than Mr Parkinson, whose death at the age of eighty has recently taken place. He had been a land agent, farmer on a large scale, breeder of Shorthorns, and judge at agricultural shows for more than half a century, and was, through life, respected as a man of ability and integrity. He was himself eminent as an advocate for draining and other landlords' improvements, and very naturally came most in contact with landowners who were also improvers. His paper too deals somewhat in generals, and may be said to be somewhat more a summary of results, than a statement of the steps and details of the improvements he has noted. Nor does the form of his paper necesarily involve the notice of anything except improvements.

He says:—"The period of the last sixty years has been one of great and increasing outlay by owners and occupiers of land in the county of Nottingham. Most of the proprietors have expended large sums on buildings required either by the increase of feeding stock consequent on improved cultivation, or rebuilding farm-houses and cottages, of which the latter are generally in a better state than those of most parts of the United Kingdom." Much draining has also been done by landowners at their own expense, *charging their tenants 5l per cent. on the outlay as rent*; and much land has been drained by the tenants, the tiles having been found by the landlords. Roads and fences in this county have also greatly improved. Waste land has been brought into useful cultivation; the rivers Trent and Devon have been

embanked against summer floods, and very great and general improvements in the culture of land, especially on the lighter soils, have been effected.

Mr Parkinson refers to a farm of 400 acres of strong land occupied by himself, and the improvements made upon it. It consists of 270 acres of arable land, 40 acres of meadow, and the remainder pasture. Before 1825, the number of beasts kept "did not on an average exceed 15, and they were usually very poor in spring, having been wintered partly upon hay grown on wet land, but chiefly upon straw; neither were any beasts fattened at that time. On the same farm 25 beasts are now reared, and the general stock of cattle kept on the farm at all times of the year is about 90. Many of these are bought for feeding both in summer and winter. The stock of sheep before 1825 was less than 200, usually sold off lean; not more than 150 were clipped. The loss of sheep by disease was then great. Now nearly 400 sheep are kept, all of them are clipped, and their fleeces average 8½ lbs each. Now the losses of cattle or sheep by disease are most trivial. The grass land has been improved by draining and top-dressing. More than 57 acres have been converted from arable land to permanent pasture, and the whole will now fatten sheep and cattle. More than four times the number of labourers are now employed on the farm than before 1825, and the rent is doubled, yet the occupier's profit is now much greater than then. And it is said the practices which have proved so successful on Mr Parkinson's farm have been generally adopted in that and adjoining parishes. The wages of the men—nine in number—regularly employed on the farm, partly by day and partly by piece-work, vary from 13s to 20s a week, so that the men who have moderate families are enabled to save money. Such wages, says Mr Parkinson, "do not exceed the average of wages paid to each man for agricultural labour in the North-Midland counties, Yorkshire, and Lincolnshire." Of course there has been a great reduction in the poor rates. In one of the parishes to which we understood Mr Parkinson's paper specially to refer, containing more than 1,500 acres, the amount paid for the relief of the poor in 1836 exceeded 2s per acre, now the amount is 5½d per acre.

"The most important among recent improvements in our farm management is the erection of suitable buildings and machinery for cutting fodder and straw, pulping roots, and grinding corn for the consumption of live stock. That system is at present only partially adopted; but the advantages derived from it are so obvious in the economy of fodder and roots, and the superiority of ground over unground corn, as shown by the improved condition of the stock so fed, that no extensive arable-land farmer should be without such means for using his produce of fodder, straw, root-crops, horse-corn, and inferior corn to the greatest advantage." We may safely say that no arable-land farmer would willingly remain without such advantages; but the corner-stone of that system is a sufficiency of proper buildings; and can a yearly tenant be expected to put them up, when, as is commonly the case, his landlord omits or refuses to do so? The conclusion of Mr Parkinson's paper shows his due appreciation of the wants of English husbandry, where he says,—"We have not so much reason to pride ourselves on the achievements of any one farmer of our day, when compared with the leading men of a former generation, as on the general spread of intelligence, and the general interest felt by those connected with the soil in the full development of its resources."

Mr Wm. Wright also writes "On the Improvements in the Farming of Yorkshire since the date of the last Reports in the Journal," and he expressly refers to former prize essays by Mr Legard, Mr Charnock, and Mr Milburn, published in 1848. He divides his subject into landlords' and tenants' improvements, and he commences the former head thus:—"That the improvements made by the landlords of Yorkshire have kept pace with the requirements of the present day would be a bold assertion." Yet those "who have performed their duty are too numerous to particularise," and probably it would not have been thought convenient to particularise per contra those who have not performed the duty of improving their estates. Ordinary observers say the latter class is far more numerous than the former. After referring to twelve heads of landlords' improvements which Mr Pusey in 1850 enumerated as wanting, Mr Wright says:—"Have the Yorkshire landlords responded to these requisitions? We fear to press the inquiry." Of the heads, we may mention the following as almost universally necessary:—Draining, the removal of fences and trees, diminution of game, breaking up grass land, and improvement of farm-buildings. He also dwells on the benefits which might be derived from the sewage of the towns, but where are the men of spirit to be found to undertake the necessary works? Such is the writer's question. He lets down the game nuisance thus gingerly:—"In some parts of the county the preservation of game, and especially of four-footed game, is continued to a prejudicial extent, but considerate landlords have in a great many instances had the numbers reduced, and we trust to see these good examples still further followed." Of the benefit derived from clearing away useless hedge-rows, Mr Wright gives an example:—"In a farm of 450 acres in Howdenshire, a direct saving of 17 acres, and an equal benefit from the saving of a like extent of headlands when under root cultivation, was the result of reducing 51 fields into 17." Of the Wold district, where the waste of straw for want of buildings has often been commented on, Mr Wright says:—"The improvements required of the landlord in this district have been limited to improved house accommodation, and to the erection of those new farm-buildings, which the requirement of the times made almost compulsory; there is yet much to be done in these respects, which it is hoped will, ere long, be fully carried out.....The greatest imperfection is to be found in the farm-buildings and homesteads." The writer brings out two points of great importance in modern husbandry, viz., the good effect of bringing men with commercial habits and energies into the business of farming, and the hopeless condition of a small farming proprietor. On the commercial principle in farming he says:—"One new feature of our time is the number of farms held by men who have had a mercantile education, who bring their commercial ideas to bear upon agriculture; these are intelligent men, full of energy and enterprise, not afraid of investing their capital in a grateful soil, who, therefore, occupy the foremost rank in carrying out hopeful experiments and improvements. The same remark applies to the manufacturer where his tastes lead him to turn farmer." Such men must have security of possession, for otherwise their spirited outlays would be acts of foolhardy hazard.

The farmer-proprietors—the yeomanry—farming 100 to 200 acres of their own land, are diminishing in numbers and importance. "This class has generally been behind their times, and thus it often happens that on the decease of the owner his small estate is put up to auction (his children leaving the old home to seek more profitable employment elsewhere), and the land which had been the pride of their forefathers enrolled among the broad acres of some larger owner." The small tenant-farmer, too, is generally a non-improver, though there is no reason that a farm of moderate size should not be cultivated with profit, though of course less advantageously than a larger farm. For what we can glean from these writers we must be thankful, but a full statement of the condition of any given agricultural district, frankly and fairly telling the truth as to its cultivation by the tenants and the management of their estates by its landowners, the game, the poachers, the cottages, the wages and the labourers, and all that makes up the sum of rural life, is a desideratum yet to be attained.

Literature.

COMMERCIAL LITERATURE.

THE THEORY OF THE FOREIGN EXCHANGE. Effingham Wilson, Royal Exchange.

[SECOND NOTICE.]

THE writer of this treatise begins by showing that the popular notion that the foreign exchanges are regulated by the balance of trade is a mistake, and that it consequently is a mistake to suppose that the power of one nation to draw gold from another, or even from the world in general, is at any particular moment regulated by the balance of its exports and imports, whether from that other country or from the world. It is peculiarly advantageous to have distinct attention called to this fact just now. Of late years political economy is more and more intermixed with what used to be called "Political Arithmetic," and is now called "Statistics." It is rare to meet with any theoretical disquisition which does not at least profess to be illustrated by many figures. Among these figures the tables of exports and imports, which all considerable countries now collect and publish, fill a marked position. Their authenticity is certain, and their magnitude is imposing; and a person who watches the economical discussion of the present day with any care, will often be amused to perceive how often these striking sum totals are introduced into controversies with which they have very little real concern. As this is the case, it can surprise no one that they not unfrequently attract an undue share of attention in controversies where they are important. They then partake of the general advantage which conspicuous and proverbial facts inevitably have over unseen and impalpable influences. What the figures of the Board of Trade Tables say were the exports and imports of the last year or the last month is easily discovered. From these we see the "balance of trade" without difficulty, and we are apt to believe that this is as certainly the sole cause operating upon the foreign exchanges as it undoubtedly is the principal one. In reality there are, however, three subordinate agencies which are always modifying and controlling it.

Nations, like individuals, have other pecuniary relations besides those of purchase and sale. A nation may *lend* to another nation, or to some individuals of that other; it may *hire* another, or some individuals of that other; or it may, and occasionally, though rarely, does, give to another, or some individuals included in it, and each of these three relations has a corresponding effect on the foreign exchange.

First, there are foreign loans and *investments*. The purchase of foreign stocks or of foreign railway shares is indeed sometimes called the importation of foreign securities, and considered to form part of the balance of trade. But this use of the word,

though occasionally convenient, is not scientifically correct. A railway share is the certificate of an interest in a certain railway; the whole of the shares are the title-deeds of the whole of the railway. They are not property in themselves any more than the title-deeds are. International trade consists in the purchase of certain useful and valuable articles transmissible from country to country. If an Englishman sends money to France to aid in the construction of railways, he substantially lends money to France for that purpose. But he nevertheless deranges the exchanges. Our author has examined this subject with great care in the following passage:—

It may not be superfluous to examine some of these international transactions more in detail. As an instance, we may examine the force of foreign loans. Treating the subject, as is at present the case, with a view to the foreign exchanges, a foreign loan will tell against the balance, not of the country which receives the loan, but of that which supplies it.

The loan will certainly have ultimately to be repaid; but, at the time when it is contracted, it acts with the same force as an export upon the country which receives it, and with that of an import to the country which gives it. In fact, the borrowing country exports its securities, which are imported by the capitalists who lend. The force of the axiom that, with regard to the balance of trade, to contract a foreign loan is equivalent to an increase of exportation, will subsequently be more fully felt when the correctives of an unfavourable exchange come to be discussed. It will be seen that when the indebtedness of a country becomes excessive and the liability cannot be liquidated either by shipments of bullion or by an increase of exportation, recourse is sometimes had to a loan, in order to readjust the balance; the country exports public securities made for the purpose, when it has no other available resources left with which to satisfy its foreign creditors. Russia will furnish an illustration of this position.

Or, again, there may be a nation, rich in capital and very self-dependent, importing little, because it contains within its own limits most of its requirements, but exporting very largely. The tendency of such a country would be to become the creditor of all her neighbours. How is the balance to be restored? This case is the converse of the one just now considered; the indebtedness under the present hypothesis is not excessive, but under the mark; such a country often restores the equilibrium by becoming the speculative purchaser and importer of loans and stocks and securities of all kinds; her manufactures are repaid by railway debentures, and the sums which other countries expend on the commodities with which she supplies them, she in her turn expends on the Stock Exchanges of foreign capitals. There is no doubt but what the balance of trade is immensely affected at such times, when any great speculative mania for foreign securities springs up. In the same way as the monetary position of a country may be endangered when it imports more foreign produce than the amount of its exportation, so may it be endangered by the undue purchase of foreign stocks, with the sole exception that the latter are often far more adapted for re-exportation than manufactured goods or produce, on which the charges of shipment or re-shipment are infinitely heavier.

It will appear from the foregoing observations that, when the relative indebtedness or the balance of trade between two countries is spoken of, the permanent debts of one country to another do not enter into consideration,—at least, not until the term of payment has arrived: the balance of trade depends upon the transactions which have to be settled, not upon those which by common consent are held in abeyance for a long term of years. For instance, there is no doubt that the United States owe an enormous amount to England in the shape of American securities in the hands of English holders; but with the exception of the interest of these securities, this indebtedness being one which does not require settlement, exercises hardly any influence on that other indebtedness which has been regulating (or rather disarranging) the exchanges between the two countries since the commencement of the year.

Borrowing, however, does not always present itself in this simple form. When, for example, the Bank of France recently disturbed the foreign exchanges in this country, it did so in a recondite manner, the elementary principle of which is well explained as follows:—

It remains to consider those foreign bills which represent no settlements of indebtedness at all,—bills which are technically said to be drawn in blank, by which the acceptor does not pay his debt to the drawer, but whereby, on the contrary, the drawer incurs a debt to the acceptor. The part which these bills play in all questions of the foreign exchanges is very considerable, and requires careful attention. A portion of them approach very nearly indeed to the character of what in the home trade are called accommodation bills; they may be drawn by merchants in one country on merchants or bankers in another, in order to secure the use of the money which is paid as their price, for the time during which the bills have to run. The purchaser of the bills in this case takes the place of the discounter of accommodation paper, and the transactions may be perpetually renewed in the same way and with more facility than accommodation bills. But there is another function of bills drawn in blank and representing no actual transactions, which is little understood by the general public, but which, nevertheless, is in many cases very important and expedient.

It is very possible, and indeed probable, that the imports and exports of any country will not fall into the same period of the year; and that, consequently, the seasons when the imports have to be paid for will not coincide with the seasons when payment is exacted from foreign countries for the exports. In the case of a purely corn-growing country, for instance, the revenue derived from foreign countries will come in at the conclusion of the harvest, when the cargoes of corn begin to be despatched. There will then be bills drawn against these shipments on the countries to which they are directed. Meanwhile, however, the country in question has been importing manufactures from its neighbours all the year round, and the importers have been requiring bills on foreign countries in order to make remittances, long before the corn-bills could be drawn and become available. If no other device could be found, the importers would, before the harvest-time, have to remit gold abroad in payment of their purchases: and afterwards the exporters, not being able to sell their bills, which the importers would now no longer want, would have to receive back the equivalent of their exports in remittances of gold from abroad. Thus the risk, the expense, and the reduction of circulation, which are consequent on repeated journeys of bullion, would be twice incurred, owing to the different seasons of the exports and imports of the same country. This difficulty is often avoided if the bankers in one country draw upon those in another, at the time when no actual commercial bills representing *bona fide* transactions can be bought, and subsequently square the liability which they have incurred towards the acceptors of their bills drawn in blank, by buying up and remitting the export-bills as soon as the goods have been shipped and are made available for drafts. Thus the importers are able to procure bills from such banking houses at a time when, otherwise, they could buy no bills at all, and the exporters sell to the same bankers later on, at a time when otherwise they would find no purchasers, the importations having been previously paid for. The same object is often sought for and attained by the exporting houses receiving permission from those to whom they sell or consign their shipments, to draw bills in anticipation of the goods being actually despatched; in other words, to sell the bills at a time when there is a demand for them and when a premium may be given for them by the importing branch of the community, instead of waiting for the time when the bulk of the exports are despatched, and when consequently, from the number of those who have to draw bills, they only can be sold at a discount. Great complaints have been made in the Court of Bankruptcy, and in many quarters where the force of such transactions is not clearly understood, of what is called the system of blank credits; in other words, the system of drawing bills from abroad not representing at the time any actual settlement of indebtedness; and evidently for the reason that it is easy to confound such bills with accommodation paper. And it is true, that wherever the existence of these blank credits has been brought before the public, it has generally been owing to some catastrophe where the bill-transactions actually were only undertaken with the intention of raising fictitious capital. But it will have been seen, that blank credits may serve a legitimate and useful purpose, only requiring to be most jealously, and even suspiciously watched. Those who are not versed in the various details of international banking transactions will have some difficulty in understanding how foreign bills, representing mutual accommodation, and merely intended to raise a fictitious capital during the time which the bills have to run, may be distinguished from bills drawn to anticipate actual transactions, and to bridge over the interval which exists between a season of importation and a season of exportation, yet to a certain extent it is feasible, and quite as practicable, as it is to the discounting establishments at home to distinguish between legitimate and fictitious inland drafts. The system cannot be condemned because it is often abused,—certainly not, until it becomes evident that the abuses which follow in its wake are greater than the advantages which it secures.

The disturbing influence of a loan when the principal is paid over, operates against the lending or capitalist country. But it tells in favour of the capitalist country when the interest is received:—

The case of the coupons attached to such stock is very different. The interest which they bear is a constant and important feature in national indebtedness. It constitutes an immediate liability incurred by the borrowing country; it is expenditure in favour of a foreign creditor. A country which has large sums of interest to pay annually abroad, must import so much less or export so much more. Conversely, a rich country with a tendency to import too much, both of foreign produce and of foreign securities, receives some compensation in the annual collection of interest. It sets off these receipts against its excessive expenditure. It may look upon them as capital coming in against capital going out.

A second disturbing cause is the earnings of one nation from another. A great shipowning nation, for example, hires out its ships to foreigners, and thereby obtains a revenue from them which tells upon the exchanges in its favour. Under this head, too, a scientific economist would class the *tribute* which a dominant nation derives from a dependent nation. It is the price paid by the subject nation for being ruled; it is *political earning* made by the superior nation by ruling the inferior one. In like manner our author well observes:—

A country which like England, mediates the transactions of many others, and, being the banking and mercantile centre of the world, is able to secure some slight commission or profit upon all the operations which it assists in conducting, derives no inconsiderable revenue from this source. Formerly, when London was the great emporium of goods for foreign markets, and accordingly supplied the greater part of the Continent (which was itself in no direct trade with India or America) with cotton, coffee, sugar, tea,—in fact, with all the produce of the East and West Indies,—the commissions and profits on this mediation must have been very considerable, and have been an important element in the income secured to the nation from foreign sources. However, the tendency of the age, which is constantly bringing the producer and consumer into closer and more direct connection by eliminating middle men and intermediate profits, is likewise exhibited in the fact that the Transatlantic or Indian producer is brought more and more into immediate connection with the continental consumer. At present the continental shipowners and merchants make their importations from the producing countries direct, thus emancipating themselves from the London market, though not entirely, from London banking facilities. The interest and commissions which are still paid by almost every country to English capitalists, certainly form a noticeable element in the revenue by which England is enabled to discharge her enormous foreign liabilities.

Lastly, it does happen, though it is not very common, that one nation gives money to another. England, for example, governs Corfu,

at a cost exceeding, much exceeding, the revenue derivable from that island. She is at constant outlay in consequence of having that minute dependency. The effect, as far as it goes, is unfavourable to the English exchange. A payment is requisite in foreign countries which is not reducible to, and has no reference to, the ordinary trade in the purchase or sale of desirable commodities.

GENERAL LITERATURE.

THE ORDEAL OF FREE LABOUR IN THE BRITISH WEST INDIES. By W. G. SEWELL. London: S. Low, Son, and Co., 47 Ludgate Hill. New York: Harper and Brothers. 1861.

[SECOND NOTICE.]

PASSING on to the Leeward Islands, Mr Sewell proceeds to describe Antigua, which is distinguished among the West Indian colonies as having been the first to get rid of slavery. "She refused to believe in the virtues of an apprenticeship, or in the doctrine that her bondsmen needed a purgatory to prepare them for freedom. If they were to be liberated, why not at once, and escape the vexation, the heart-burnings, and the suspense of a wretched ordeal? This was her argument, and in 1834 Antigua became a perfectly free colony." Nor has she had reason to regret this course. "In spite of an insignificant area, a soil by no means superlatively rich, and a climate too liable to drought to make the cultivation of sugar a business of extravagant profit, Antigua has managed to retain a prominent position among the West Indian colonies."—(P. 142.)

Mr Sewell thinks that there is more general intelligence among the people of Antigua than among the coloured classes of any other West Indian colony that he visited. "The efforts to educate the masses have been more persevering and better directed in this than in other islands;" and education seems to have raised the standard of morality. "Marriages are much more frequent than they used to be," the number of illegitimate births averaging 53 per cent., while in some other islands it exceeds 100 per cent. The prosperity of the island is not without its drawbacks, but they seem to be of a preventible sort. One chapter is devoted by Mr Sewell to the minor colonies under the dominion of the Leeward Government, viz., Dominica, Nevis, Montserrat, St Kitts, and the British Virgin Islands. "In all these colonies," he says, "the condition of the free peasant rises infinitely above the condition of the slave."

From all these there is an exportation of minor articles which were not cultivated 20 years ago, and which, in estimating the industry of the peoples, are often most unjustly overlooked.....Yet, even in sugar, the exports of the Leeward colonies compare favourably with their exports in the most prosperous days of old, as the following table amply demonstrates:—

COMPARATIVE TABLE of SUGAR EXPORTATION, in pounds, from the LEEWARD ISLANDS.

Islands.	Annual Average from 1820 to 1832.	Exports in 1858.
Antigua	20,580,000	26,174,000
Dominica	6,000,000	6,263,000
Nevis	5,000,000	4,400,000
Montserrat	1,840,000	1,308,000
St Kitts	12,000,000	10,000,000
Total	45,420,000	48,145,000

The imports of the same islands present a still more striking contrast:—

COMPARATIVE TABLE of IMPORTS to the LEEWARD ISLANDS in Pounds Sterling.

Islands.	Annual Average Value from 1820 to 1832.	Value of Imports in 1858.
Antigua	130,000	266,364
Dominica	62,000	84,906
Nevis	28,000	36,721
Montserrat	18,000	17,844
St Kitts	60,000	109,000
Total	298,000	514,835

Excess of sugar exportation with free labour..... 2,725,000 pounds.
Excess of imports with free labour..... £216,835 sterling

(Pp. 164-5.)

The last island which Mr Sewell visited was Jamaica, to which he devotes the latter half of his volume. Landing at Kingston, he was shocked at the dilapidated, filthy, poverty-stricken appearance of the town and its inhabitants. He made a tour through the island, of which he found the country districts very different from the capital. Of this tour, he narrates at length a considerable portion, which is well worth reading, and in which he gives a pleasant description of the Western half of the island, with its mountains, valleys, estates, and villages. Especially interesting are his notices of the coloured population, of whose character and progress he speaks very favourably. "These people," he says, "who live comfortably and independently, own houses and stock, pay taxes, poll votes, and build churches, are the same people whom we have heard represented as idle, worthless fellows, obstinately opposed to work, and ready to live on an orange or a banana rather than earn their daily bread."—(P. 198.) This charge of laziness against the free negro is one to which Mr Sewell makes frequent reference throughout his book, and a large proportion of his investigations were directed to this special point. The proofs which he gives of the falseness of the accusation are overwhelming, and are quite as complete in respect to Jamaica as they are to the other islands. A few of the more important facts we quote:—

The latest Blue Book returns give the number of males and females engaged in agriculture at 187,000—more than one-half of the population of the island—tending in itself to disprove the assertion that the people are averse to the tillage of the soil; but when the farther fact appears that out of this number 50,000 men, with their families, have elevated themselves to a proprietary rank, it speaks volumes, not merely in their own favour, but in favour of general intelligence and a wholesome progress.....I am now attempting to describe the social condition of an average Jamaica peasant, owning one or two acres, though I think a majority are proprietors of five and six. They grow provisions for themselves and families, and for the village market; they raise for sale coffee, pimento, arrow-root, fruit, vegetables, and sometimes sugar-cane; they have their horses and stock, and are about as independent of labour for daily wages as it is possible for any peasantry to be. Yet there are many of them who give to the estates such labour as they can spare from their own properties. It is a transient labour, with which we cannot expect the planter to be satisfied, for it is insufficient for his purposes; but is a labour which reflects no discredit upon the people, and offers no justification for the complaints that have been maliciously made against them. —(Pp. 248-9.)

Mr Sewell then gives a list of "some of the minor articles grown or collected now exclusively by small settlers," comparing their production with that of "the same articles by large proprietors prior to emancipation," when attention was mostly confined to the cultivation of sugar.

	Exports—1834.	Exports—1859.
Logwood.....tons	8,432	14,006
Fustic.....tons	2,126	2,329
Mahogany.....feet	1,936	35,000
Succades.....cwts	None.	279
Cocoa-nuts.....number	None.	712,913
Ebony.....tons	None.	28
Beeswax.....cwts	None.	770
Honey.....gallons	None.	6,954

—(P. 249.)

Mr Sewell reminds us that, in estimating the industry of the coloured classes, "the immense quantity of provisions that the settlers grow for home consumption must also be taken into account; and it is partly demonstrated by the diminished importation of necessary articles of food."

I think that the position of the Jamaica peasant in 1860 is a standing rebuke to those who, wittingly or unwittingly, encourage the vulgar lie that the African cannot possibly be elevated.....The most ignorant work whenever they can get work. There are fully 20,000, of both sexes, who work for the estates, and who may still be regarded as a labouring class. There are probably 10,000 who work as domestics. There are 3,000 at work now upon the roads, where scarcity and idleness of labourers are made no grounds of complaint. The small proprietors work on their own lands and on the estates also whenever they can. Very large numbers work as merchants, mechanics, and tradesmen, and not a few of the ex-slaves of Jamaica, or their children, are members of the Legislature, and fill responsible offices under Government. In the Assembly alone there are 17 black and coloured members out of a total of 47. The whole people of Jamaica work; and if their work is often misdirected and wasteful, the blame does not surely rest with the unlettered classes. They work, as I said before, up to the light they possess, and when I look at the feebleness of that light, I am utterly amazed at the progress they have made.—(Pp. 254-5.)

With respect to the morals of the coloured classes, Mr Sewell thinks that the licentiousness which still widely prevails in all the emancipated islands ought not to "discourage or astonish those who have any conception of the immorality that slavery not only engendered but enforced." In Jamaica, marriages are much more frequent than they were, and "patient investigation will prove that the prevalence of social vice is but an evidence of the island's very recent deliverance from a state of actual barbarism, and of the very little that has been done to civilise and educate a willing people."—(P. 191.) "The planter's policy," he elsewhere tells us, "has been to keep the people uninstructed, and the Government has never even encouraged education, much less insisted upon it." —(P. 255.) It is not wonderful, therefore, that negro civilisation in Jamaica is still in a very crude form. The peasantry "have not the remotest idea of economy in labour. Their implements are of the most primitive kind," and "in all they grow they may be held to waste five times as much as they reap." "No friendly settler from abroad has ever appeared among them to stimulate their exertions by showing them what science has accomplished in other lands. They are utterly without training."—(Pp. 252-3.) But they are "a peaceable, law-abiding peasantry" (p. 202.), remarkably temperate, although "the spirit manufactured in the island can be obtained for a very trifling cost" (p. 217); courteous, kindly, and full of buoyant life. "Each man, woman, or child that you meet along the road—I speak exclusively of the peasantry —gives a hearty 'Good mornin', massa,' and a respectful salutation."—(P. 187.) They are eager in attendance on public worship, and in the better class of cottages Mr Sewell "invariably found books—always the Bible, and not unfrequently the ponderous works of one William Wilberforce, the West Indian's demigod." —(P. 196.)

That emancipation has thus incalculably benefited the negroes, Mr Sewell abundantly shows; but how has it affected the planters? Of course it has tended to diminish the amount of available labour for the estates; but Mr Sewell thinks that this result has been greatly accelerated by the illiberality and harshness of the planters themselves, who never heartily accepted the new order of things. The negroes cling to the estates on which they were born, and do not willingly leave them, even for better prospects; but "for years after emancipation, the planters pursued a policy of coercion that compelled the negroes, in simple self-defence, to abandon estate-services."—(P. 292.) But Mr Sewell shows that this has not been the only cause of the decline of the Jamaica planters, for that before even the abolition of the slave trade, they were in great

difficulties. In 1792, "the Jamaica House of Representatives reported that within 20 years 177 estates had been sold for debt. Again, in 1807, the same body reported that in the five years preceding the abolition of the slave trade 65 estates had been abandoned."—(P. 28.) "The planters of the day, when they petitioned Parliament in favour of the slave trade, "based their grounds for redress on the expense of the slave system, which prevented them from competing, without a constant supply of fresh labour, with those colonies and countries in which the African slave trade had not been abolished."—(P. 231.) But when the British Government announced its determination to abolish slavery altogether, the planters veered round to the opposite argument, and attempted to demonstrate the *cheapness* of slave labour as compared with free labour. Emancipation, they said, would ruin them. But they were already in a declining condition. "Nine out of ten estates, at the time of emancipation, were mortgaged far beyond their value."—(P. 236.) It is plain, therefore, that emancipation is not to blame for the ruin which has overtaken so many of the Jamaica planters, which is really owing to other causes, some of which were commercial, some arising necessarily from the evils of slavery, and some from the follies and mistakes of the planters themselves, especially from their improvident habits and their absenteeism. But a new class of resident planters, Mr Sewell says, has appeared within the last ten years. "They work their estates with prudence and economy, though they lack the advantages that latter-day science has given to American and Cuban proprietors.....Many Jamaica planters who look after their own business have relieved their estates from incumbrance, and are, even now, making handsome fortunes. Since 1853 as many properties have been resuscitated as abandoned."—(Pp. 242-3.)

While showing the old complaint of the planters, that the free negro will not work, to be an entire calumny, Mr Sewell quite admits that there is great difficulty in procuring as much labour as is required for the cultivation of the sugar estates. He shows that this deficiency also is in great measure due to the errors of the planters; but however incurred, the deficiency still requires to be met, and Mr Sewell wishes to see it met by coolie immigragration. He gives an account of the Jamaican immigration law of 1858, which is substantially similar to that of Trinidad,—and of the arguments that have been urged against it. He shows that while the great resistance made to the bill by English philanthropists was mainly induced by their very natural distrust of the Jamaica planters, they were quite in error on some of the most important points of the scheme; a scheme which "cannot, under any circumstances, be considered a triumph of the planting interest," but rather as "a victory of the Anti-slavery party of Jamaica, whose views the planters have been compelled to adopt."—(Pp. 304-5.) And not only for the sake of the planting interest does our author recommend immigration, but as a means of developing the rich resources of Jamaica, which now only "supports a population of 350,000, when she could support with ease a population of 4,000,000."—(P. 295.) Neither does he urge the immigration of labourers alone. "The island is in want of settlers and farmers from Europe and America, who will stimulate, by the force of example, the sluggish energy of the Creole peasantry,.....and who will elevate the middle classes of Jamaica far above the present standard of questionable civilisation." "If her present proprietary are unequal to the work of regeneration, others will be found to take it up and carry it out to the uttermost limit of completion."—(Pp. 308-9.)

Mr Sewell's style is usually good, barring a few Americanisms. The only point to which we must take exception is his peculiar use of the term Creole, which he applies to the coloured population, whereas it properly designates the children of European parents born in the West Indian (or Spanish American) colonies, as distinct from the European-born residents or the half-castes. In conclusion, we recommend Mr Sewell's book to all who desire to study the present state of the British West Indies, as a storehouse of representative facts, carefully compiled, well condensed, and agreeably told.

THE MAGAZINES.

THE CORNHILL MAGAZINE. September. Smith and Elder.
MACMILLAN'S MAGAZINE. September. Macmillan.
TEMPLE BAR. Temple Bar Office.
THE SIXPENNY MAGAZINE. No. 3. Ward and Lock.

THE monthly crop of periodicals is of fair average quality. In the "Cornhill" we have the accustomed two chapters of "Philip," who is at present happily located in Paris as correspondent of the Pall Mall Gazette, near his beloved Charlotte. The latter with her family are staying at a boarding house conducted by Madame de Smolensk. This, with its inmates, is described with some of Mr Thackeray's best humour; but the story takes no hold of us—we have no real interest in it. "An Old John Bull" is a somewhat affectedly quaint sketch of the wooing of George Witten,—at least we presume it is he who is introduced to the reader under the title of Master George. "Keeping up Appearances" is not "Love against the World," like the title of a recent comedy, but "the World against Love." The moral of it seems to be that it is more virtuous to make your fortune and marry, than to marry and make your fortune. The author overlooks, in the zeal with which his subject inspires him, the melancholy fact, that having climbed the difficult hill of prosperity, an indifference, not to say hardness, has too often stolen over the heart,—and if a man marries then, it is frequently more for motives of convenience than anything else. There is much good practical sense in the article, but rather of a hard and worldly kind. We believe ourselves to be very far from romantic and imprudent, and yet we cannot but think that with so much prudence and so much waiting, much of the finer edge of domestic enjoyment may be worn away, unless that should be thought to consist, as we may justly infer from this writer, in a suitable posse of nursemaids and an unlimited number of clean pinafores for the children. But, seriously, we do not think that a man ever devoted himself with less energy to a profession because a wife and family were dependent on it for their subsistence. We are, in truth, sorry to see what we must call the worldly side of the question of early marriages for young men so much advocated just now. This writer altogether ignores the many ways in which they will indemnify themselves for the want of a home, and surely this is a mighty argument on the *im*prudent side. As to the "things which for their children's sake they dare not do, and the subjects of the deepest importance on which they dare not think, because they cannot take the responsibility of teaching their children the result of their thoughts," we think the less such things are done and such subjects thought of the better. The present rage for expensive advertising is well ridiculed in "The Struggles of Brown, Jones, and Robinson," who in the present chapters select their house of business, and having painted it Magenta colour and christened it Magenta House, open it with great pomp. There is a good deal of dry humour in the description of the *ruses* practised by Robinson to attract the public. Mr Brown, the senior partner, who will insist on paying instalments of ready money and so ruining the credit of the concern, and who particularly remonstrates against the "eight thousand African muffs," is also well done. On the opening day the first article demanded over the counter was a real African monkey muff, very superior, with long fine hair. "The ships which are bringing them have not yet arrived from the coast," answered Jones, who luckily stepped up at the moment. "They are expected in the docks to-morrow." Many other things of the present day are like monkey muffs—"expected in the docks to-morrow."

Mrs Stowe's tale improves, but we still lament her choice of a subject. In the character of Old Elsie, a little of her graphic New England humour comes out, and makes us think how much more we should have enjoyed reading her story had the scene been laid there. As it is, the staple of the tale is exactly of the calibre of those parts in her New England tales that she has always been most successful in—the sentimental and theological. For a woman who can draw an Uncle Sam and a Candace to descend or ascend to angelic maidens and remorseful cavaliers is painful, and we must repeat our protest against it. There is some pleasant historical and traditional gossip in "From Dan to Beersheba through Ashridge Park," and "My Neighbour Rose" is a string of lively verses, pretty and *piquant*. The article on "Negroes Bond and Free" is written in a flippant style, and shows but half-knowledge of the facts with which it deals. It is undoubtedly true that the cultivation of sugar and of the ordinary tropical exports has fallen off in amost all the islands except Barbadoes since the emancipation, but it is not true that this is mainly due to negro idleness. The fact is, that the value of the products raised by the free negroes on their own lands has increased, even in Jamaica, so rapidly and largely, that it goes far to compensate the loss in sugar and planters' produce. The tone, too, in which the writer speaks of the intellectual possibilities of the African race, shows little intimate knowledge of it.

Mr Sala, in "Temple Bar," sustains his character for disagreeable cleverness very satisfactorily. Mrs Amytage, the pretty and wicked little heroine, is nearly caught in the toils of the hunters. We presume an *éclaircissement* is not far off, when the various and mysterious threads of the story will be disentangled, and virtue and vice will have their rewards duly apportioned to them. In the art of keeping up a strong interest through details and characters often simply revolting, Mr Sala, perhaps, is unrivalled: it is a doubtful excellence. The other papers worth notice are a rather interesting account of Lady Fanshawe as one of the "Daughters of Eve"; a popular discourse on "Limestones and Marbles;" and a paper on the, at present, interesting subject of Convicts, in which a cheerful view is taken of the present system, and the writer mistakenly affirms that the results have been fully equal to any that have been secured in Ireland.

The "Sixpenny Magazine" continues to supply a fair sixpennyworth of desultory amusement and information. It is by no means the lowest in the scale of our monthly literature.

"Macmillan's Magazine" for this month is not very brilliant. Mr Henry Kingsley's story is, as usual, since the close of "Tom Brown at Oxford," the principal attraction; but the instalment in this number is somewhat extravagant. The "Law of Bode," by Professor Kelland, is a curious and striking paper, written in a very defective style,—the would-be-amusing scientific style. The review of Alexander Smith seems to us favourable far beyond what is just; and the notice of Mrs Browning's Imperialist

sympathies is rather ineffectual and unmeaning. No one attributed any but noble motives to the eccentricities of the authoress of Aurora Leigh. Few of the papers have much substance in them.

A Survey of Human Progress, from the Savage State to the Highest Civilization yet attained. By Neil Arnott, M.D., F.R.S., &c., Author of "The Elements of Physics," &c. London: Longmans. 1861.

The main ideas of this book seem to be the high importance of a systematic view of the field of human knowledge, and the necessity for giving a greater prominence in education to certain branches of modern culture than has hitherto been done to any great extent. The book is written with a very earnest desire to promote the general welfare, and one cannot but respect the kindly and liberal spirit which animates it; but truth compels us to say that neither as a summary of facts nor as a theory of human affairs is it likely to be very useful. The whole tone of the author's thought is bald in the extreme, and cramped by some of the narrowest theories of the utilitarian schools. As an instance, we may refer to his desire "to build up an art of Happiness, easy to learn and practise," (p. 123)—and to the definition which occurs in the curious sketch of this art (Appendix, pp. 172-7)—"Duty designates the conduct which persons must follow not to deserve punishment." He regrets that "to teach this science and art [of happiness] is not a part of general systematic education" (p. 176), and regards it as the "one great and harmonious whole" (p. 177), of which all other arts are but portions. This will sufficiently show the external and unethical point of view from which the book is conceived. We take leave to think, nevertheless, that some impulse far more generous than a desire "not to deserve punishment" instigated Dr Arnott to write this little work, of which we are sorry not to be able to praise the execution as well as the intention.

The Turkish Bath; with a View to its Introduction into the British Dominions. By David Urquhart. Effingham Wilson, 11 Royal Exchange.

Mr Urquhart is a fanatic for the bath. He comes down upon the Western nations with as impetuous a charge as ever did the Mussulman of old. If we will not yield an unconditional surrender, he condemns us without reprieve to a state of hopeless uncleanliness: there shall not be water enough in the wide world to make us clean. He will have the vapour bath,—the Turkish bath,—or nothing. Without this it is in vain that we seek to wash and be clean. Cold fresh water is useless,—salt water "horrid" and "impure"; sea-bathing a thing to be simply shuddered at; soap little better than a pernicious invention; the old familiar tub of our childhood, so dear to the Japanese—who, at any rate, if he does "dabble in dirty water," fulfils one of Mr Urquhart's desiderata in the sociability of his ablutions—is consigned to the limbo of the past as a mockery and a snare,—a mere pharasaic pretence at purification. We are a benighted race, who, when all is done, put on clean shirts over dirty bodies, and have never even "known what it is to be clean." Mr Urquhart pathetically says that in returning from Turkey he felt as if passing from a refined to a rude condition of society. We humbly allow the truth of his accusations. We confess that we have never had a contortion given to the small of the back,—a jerk to our neck by the hands holding the temples,—nor even our heel bitten at the conclusion of the ceremony. All this we penitently own; and, carried away by Mr Urquhart's eloquence, we are almost persuaded to shut our eyes to facts, and to believe that Eastern nations are the representatives of the purity of Eden; that they have no skin diseases, no loathesome leprosies among the poor; that in relation to them we must stand on one side crying "Unclean, unclean." But it becomes a little too much for even our humbled state of mind to have the taunts of a German cast in our teeth; to be told by one whose customary ewer is a cream jug, his basin a slop bowl, his towels pocket handkerchiefs, his soap *nil*, that the "dull English" are the worst washed of all nations. Mr Urquhart should beware how he tries us too far. After such an insult as this we become indifferent to our fate, and calmly await that Mahometan conquest faintly deprecated by our author, which is to restore us to primeval purity, and to force from our lips the fine concluding sentiment of his book:—"*These* barbarians, who, Providence-like, have come to compose our troubles—Roman-like, to teach us to be clean."

Seriously, Mr Urquhart tears a passion to rags. He throws ridicule upon the cause he most wishes to serve. Taken in moderation, we have no doubt the bath he labours to introduce will be a fresh means of health and enjoyment to the healthy, and a powerful remedy in some kinds of disease. The question is, what is moderation? Mr Urquhart himself allows that its daily use is enervating. We think that to most Englishmen its weekly use will prove to be so too. The Turks are scarcely an energetic people. If Mr Urquhart appeals to their resistless energy at the time of their European conquests, he will remember that by his own statement "they were at that time the filthiest of mortals." We are far from thinking that cleanliness *per se* has been the cause of their present degeneracy; but possibly the hot bath may have had something to do with it, as the difference of climate undoubtedly has with the freedom from restless anxiety, the temperance, and other blessings, which he unhesitatingly attributes to the bath alone.

The Family Save-All: a System of Secondary Cookery, supplying Excellent Dishes for Breakfast, Luncheon, Dinner, and Supper, from cold and other Fragments, with Invaluable Hints for Economy, in the Use of every Article of Household Consumption. By the Editor of "Enquire Within," &c. London: Published for the Proprietor, by W. Kent and Co., 23 Paternoster row. 1861.

We are by no means sure that what this author calls "secondary cookery" is an art that deserves extensive encouragement. The cold mutton which the author despises as a "cheerless repast" is much more really nourishing and wholesome than the savoury hashes and stews into which he would metamorphose it. Still, in winter time, when the warmth of a dinner is in itself a desideratum, the art of "re-serving" is, within limits, certainly a useful one, and among these 1,160 "Hints," no doubt good housewives may find profitable instruction. For our own parts we confess that, like the people who are said "to have nothing to do with the laws but to obey them," we have nothing to do with cooked food (secondary or otherwise) but to eat it; otherwise we should be tempted to indulge in sceptical remarks on some of the Hints. It *may* be true that "beans, roasted, form an agreeable substitute for coffee, with chicory" (p. 285), and that "stale bread, after being steeped in water and re-baked for about an hour, will be nearly equal to new."—(P. 286.) Not having brought these triumphs of "secondary cookery" to the test of personal experience, we abstain from forming any dogmatic opinion thereupon. But our prepossessions are rather in favour of a *primary* development of loaves and coffee. The author has prefixed a full index to his book, and has interspersed the receipts with a quantity of jokes and aphorisms, many of which are very amusing, and will doubtless promote the circulation of the volume.

A Guide to the System of Tours in Scotland, under the Direction of the Principal Railway, Steamboat, and Coach Companies, commanding the Highland Excursion Traffic. By Thomas Cook, Tourist Manager, Leicester. With a Series of new Sectional Maps, drawn and engraved especially for this work, by W. and A. K. Johnston, Edinburgh. London: Tweedie, 337 Strand; W. H. Smith and Son, 186 Strand.

This is a sort of "Bradshaw" of Scottish excursions, the comprehension of which is facilitated by four sectional maps of different tours, and a large map comprising them all. The compiler of the Directory is himself the manager of the excursion arrangements. The sentimental talk which alternates with the details of tickets and fares might have been omitted with advantage.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

Paris, Thursday.

M. Michel Chevalier, in his recent remarkable speech in the Council General of the Hérault, stated two important facts: the first, that the treaty of commerce with England has already begun to be advantageous to that department as regards the export of its productions, of which, as is known, wine is the principal: the other, that "there is reason to believe that the English tariff will be so modified as to allow all the wines produced in the department of the Hérault to be imported at the lowest duty, that of 28 centimes the litre." The distinguished economist confirmed too what he said at Dublin as to negotiations for a commercial treaty having been opened with the new Kingdom of Italy; and he predicted that the example set by France in commercial matters will be imitated by other nations, and that thus "the entire civilised world will gravitate towards liberty of commerce and the mutual dependence of nations." He then paid a well-merited tribute of praise to the Council of Hérault for what it has done towards the promotion of commercial reform:—"The spectacle of free trade which is being presented to you, and of which you can distinguish the future greatness, is for you, my dear colleagues, a legitimate subject of joy and pride; for when the cause of liberty of commerce seemed lost in France, when by the silence of France it seemed to be without support on the European continent, you never ceased to maintain its flag and to present to it your homage. Every year a resolution which you unanimously adopted appeared as an energetic pretext against the domination of the protectionist spirit, and as a solemn demand for the principle of commercial liberty. The Council General of the Hérault is thus certain to have a page set apart to it in the annals of our times."

M. Michel Chevalier next remarked:—"Such is the power of truth, such the authority of right, that public opinion was almost instantaneously converted by the fact of the treaty of commerce with England having been entered into. Enlightened by the

admirable discussion of the session of 1860, the Legislative Body has voted this year by an imposing majority, I might almost say unanimously, two important measures inspired by the principle of commercial liberty—the bill which abolishes the sliding scale on the importation and exportation of grain, and that which frees the colonies from the oppressive grip of an excessively restrictive system."

M. Michel Chevalier, in the rest of his eloquent speech, pointed out the necessity for a further extension of railways in the South, and dwelt on the efforts which the Emperor's Government has made to promote the welfare of the agricultural populations by the establishment of the Credit Foncier Company, the loan of 100,000,000f for draining, the decree for according 25,000,000f for making cross roads, &c.

An Imperial decree enacts that sailing or steam vessels constructed in the United States of America or carrying the Union flag may be made French on payment of these duties:—If in wood, 25f per ton French measurement; if in iron, 70f; hulls of vessels in wood, 15f; in iron, 50f; and engines on board either wooden or iron vessels, 25f the 100 kilogs. Another decree allows wheat to be imported free of duty into France to be ground, subject to the condition of an equivalent quantity of flour to that obtained from the said wheat being re-exported. A third decree allows fabrics in pure wool, or mixed with cotton, silk, or hair, to enjoy the privileges accorded by the decree of the 13th of February, 1861, to certain other fabrics; and a fourth permits tanned hides, and carded, combed, or spun wool of Algeria to be imported into France free of duty. The decree relative to the grinding of flour is considered of great importance to the millers' trade.

Under the title of "Notes on Hungarian Wines," M. Barthelemy de Szemere, who was at one time Minister of Justice in Hungary, has just published (in Paris) a pamphlet which is of considerable commercial importance, its object being to show that it is possible to establish a large trade between Hungary and England by selling the wines of the former country in the latter. He affirms that Hungary produces annually at least 360,000,000 gallons of wine of the value of 8,000,000l sterling—a quantity and value rather more than half those of France: and he shows from reports of English diplomatic agents in Austria presented to Parliament, that since the wine disease broke out in France, Hungarian wines have been largely employed to replace those of that country even in France itself,—also that Hungary might easily be made the largest wine-producing country in the world. On the same authority, he declares that a considerable quantity of Hungarian wine is already sold in England as Port. He says that the Hungarian wines are infinite in variety and colour, and he enumerates not fewer than eight sorts (at the head of them the world-renowned *Tokai*) of liqueur or dessert wines, and eighteen ordinary (red or white) which might be drunk at table with food in place of beer. As to quality, M. de Szemere states that Hungarian wines are generally stronger than the French or Rhenish, and in proof of this he shows that whilst the latter wines, though dosed with brandy before being imported into England, never reach 18 deg. by Sykes's measure, the majority of the Hungarian, without any addition of brandy whatever, run from about 21 deg. to about 23. He shows likewise, that Hungarian wines are more nutritious and wholesome than any others; and this he proves by translating a long report from a celebrated German chemist, Dr Kletzinsky, giving an account of chemical analyses of different sorts of European wines,—also by the testimony of the renowned Professor Liebig. On the subject of expense, he is not quite so explicit as might be desirable, but he says that "taking wines of the same age and quality, and equally pure and genuine, the Hungarian are at least one-third cheaper than the French and Rhenish": but he admits that expense of conveyance from Hungary is considerable. On the whole, M. de Szemere proves that Hungarian wines are excellent in themselves—would be peculiarly palatable to the English—and may be supplied in almost unlimited quantities to the English market.

Business on the Bourse has not been very active during the past week, but quotations, with the exception of those of the Credit Foncier, have slightly improved.

Contrary to expectation, no change has yet been made in the rate of discount by the Bank of France.

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, in the last week, prices have advanced, and yesterday the quotation was 80f to 85f the sack of 159 kilogrammes disposable, and marks of first choice 87f. Four marks for the current month were 84f 25c; for the last three months, 85f 25c. In foreign, some lots of American went at 75f to 77f, delivered at the railway station.

WHEAT.—At *Paris*, yesterday, prices advanced, the quotation being 45f to 48f the sack of 120 kilogs; in foreign, Baltic and California delivered at railway station were 46f; Hungarian, 43f to 46f; Dantzic, new, 46f 50c; Denmark, dry, 40f to 41f; English, old and new mixed, 47f 50c; English, new, 49f; Chili, 48f; American, 43f to 44f 50c. In the French provincial markets, 62 present a *rise* of from 15c to 2f 25c the hectolitre, 22 a *fall* of from 10c to 1f 50c; 21 are reported firm, 46 without variation, and 5 calm.

COTTON.—At *Havre*, in the week ending Friday, the sales were 16,577 bales, and the arrivals only 246. The closing prices were 2f to 3f higher for very low sorts, 1f to 2f for low and for very ordinary, and 1f for all other sorts. Very low New Orleans was consequently 104f the 50 kilogs; low ditto, 115f; very ordinary ditto, 120f. On Friday the stock was 244,480 bales, against 209,500 bales in 1860, and 81,440 bales in 1859. On the first two days of the present week, sales were not numerous, but prices were firm. Yesterday, only 500 bales were disposed of, and no change took place in quotations.

COFFEE.—At *Havre*, in the week ending Friday, business, though less important than during the preceding week, was rather animated, and prices advanced. 1,500 sacks Hayti, Port-au-Prince disposable, went at 79f 50c to 80f in bond the 50 kilogs; 1,515 ditto and Jeremie for delivery 79f 50c to 80f; 325 Cape and Gonaives, disposable, 82f to 82f 50c; 2,000 Rio not washed, disposable, 60f to 70f; 203 ditto for delivery, 76f; 90 Santos, disposable, 79f; 174 Cears, 81f; 389 Porto Cabello, 87f 50c; 70 San Jago, 88f; 1,000 Ceylon for delivery, 107f 50c, duty paid; 2,739 Malabar for delivery, 109f. By auction, 1,063 Hayti damaged were also sold from 75f to 78f the 50 kilogs in bond; 32 Padang, duty paid, went at 104f to 106f. The arrivals were only about 150 sacks. This week, Ceylon has been at 108f duty paid; Hayti, 80f in bond; Rio, 68f to 73f 50c. Some lots of damaged Rio, Hayti, and St Marc have also been disposed of. At *Nantes*, last week, a quantity of Reunion went at 130f; 100 bales Hayti, 80f to 82f 50c. This week, some Singapore has been sold at prices not stated; some Macassar at 101f 75c. At *Bordeaux*, last week, Mysore, 530 sacks, disposable, went at 108f 50c to 112f; ditto, 379 sacks, 113f 50c; ditto, 2,074 for delivery, 112f; Rio, 500 sacks, 90f; a lot of Santiago disposable, 100f, and another at 93f to 98f; Java, 2,614 for delivery, 116f to 116f 50c; Guayra, 380 sacks, *non-gragé*, 86f; 1,350 *gragé*, 93f. This week, a small lot of Caracoly has been taken at 112f, and one of Santiago at 99f. At *Marseilles*, business was active. 2,000 sacks Macaraibo went at 82f; 5,100 Malabar, 82f; 1,500 Rio ordinary, 60f; 380 Rio, 65f; a lot of Santiago and 1,800 Rio, 62f to 72f.

SUGAR.—At *Havre*, business, in the week ending Friday, was but little animated. 561 casks French West India "usine" went at 51f to 54f the 50 kilogs, duty paid; 71 Cuba, 44f 50c. 1,052 Havana damaged were sold by auction from 24f to 36f 50c the 50 kilogs in bond. The arrivals were about 10,000 casks. This week, Havana has been at 35f; French West India, 45f 50c; ditto "usine," 50f. At *Nantes*, last week, 300 sacks Reunion went at 51f; 636 Mayotte, 38f. This week, Reunion "gros grain" has been at 54f. At *Bordeaux*, last week, no business was done in Reunion and foreign, but of French West India 361 sacks went at 45f 75c to 46f. This week, Reunion has been at 49f 75c to 50f; French West India, 45f 75c to 46f.

INDIGO.—At *Havre*, in the week ending Friday, business was more active, and prices advanced, owing to the receipt of news from the East Indies of an unfavourable character as regards the next harvest. 55 chests Bengal were sold at 1f 50c above the established prices; 10 Kurpah and a small lot of Guatemala at prices kept secret. The arrivals were 43 chests. This week, there have been no sales. At *Bordeaux*, last week, 39 chests Kurpah, 8 Vellore, 20 Madras, and 160 Bengal were sold, part of the latter at 2f 82c above the established prices; the rest at quotations kept secret. This week, some Madras, Kurpah, and Bengal have been sold; prices not stated.

HIDES.—At *Havre*, in the week ending Friday, business was active, and prices advanced. The sales were 3,473 Plata dry, disposable, at 96f to 120f the 50 kilogs; 2,000 salted ditto, saladeros ox, at 71f to 72f 50c; 200 ditto mataderos, 51f 25c; 6,968 Monte Video salted saladeros, for delivery, 68f; 902 Tampico dry, 77f 50c to 87f; 300 Rio Janeiro salted, 50f; 200 Valparaiso ditto, 59f for cow and 63f for ox; 3,164 New York salted, disposable, 42f to 45f; 931 ditto, damaged, 42f 50c; 931 ditto kips, 38f; 10,000 New York salted, for delivery, 41f 50c; 1,000 horse, salted La Plata, 83f 50c the 100 kilogs. The arrivals were about 3,800. This week, Martinique salted has been at 56f; Buenos Ayres salted saladeros, 70f; ditto dry, 104f; Monte Video, 71f; Valparaiso, 63f; New York, 43f 50c to 45f; Rio Janeiro salted, 50f; Buenos Ayres horse, 83f 50c the 100 kilogs.

WOOL.—At *Havre*, in the week ending Friday, 110 bales Plata, not washed, were sold at from 1f 65c to 2f 80c the kilog; 23 Rio Grande, washed, 2f 5c; 5 bales Russian Donskoy, 2f 2½c. The importations were only about 1,400 bales. This week, Buenos Ayres, unwashed, has been at 1f to 2f 53c; La Plata sheepskin, unwashed, 1f 10c; Monte Video, unwashed, 1f 30c to 1f 50c.

TALLOW.—At *Havre*, in the week ending Friday, 25 casks New York were sold at 60f the 50 kilogs for delivery, and 4 Rio Grande, disposable, 59f. The arrivals were about 300 casks. This week, there have been no sales. At *Paris*, yesterday, the 100 kilogs were 116f 50c—an advance on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 degs., disposable, were 89f; Montpellier, disposable, of 86 degs., 115f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc were 110f; beetroot, first quality, 92f.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 4th day of September, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,973,300	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,323,300
		Silver Bullion	..
	26,973,300		26,973,300

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,360,300
Rest	3,783,761	Other Securities	17,702,085
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 284,485	Notes	6,674,390
Other Deposits	12,196,813	Gold and Silver Coin	794,801
Seven Day and other Bills	714,017		
	35,532,076		35,532,076

Dated the 5th September, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,012,927	Securities	28,159,385
Public Deposits	4,284,485	Coin and Bullion	13,118,101
Private Deposits	12,196,813		
	37,494,225		41,277,986

The balance of Assets above Liabilities being 3,783,761*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£589,781
An INCREASE of Public Deposits of	219,776
A DECREASE of Other Deposits of	577,578
An INCREASE of Government Securities of	225,000
An INCREASE of Other Securities of	300,690
An INCREASE of Bullion of	13,779
An INCREASE of Rest of	307,490
A DECREASE of Reserve of	531,051

Notwithstanding the steady influx of gold into the Bank, the above return shows only a trifling addition to the bullion, coin having apparently been withdrawn for the provinces. The reserve has experienced a considerable diminution. The other unfavourable features are a large increase in the other securities, and a falling off in the other deposits. The Bank appears to have again been purchasing Government stock.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,591,684	£ 20,784 067	£ 22,224 417	£ 22,151,429	£ 21,012,927
Public deposits	8,093,413	7,535,733	7,789,691	6,496,821	4,284,485
Other deposits	8,121,481	12,267,046	13,067,400	13,431,519	12,196,813
Government securities	13,464,216	10,955,269	11,220,018	9,563,511	10,360,300
Other securities	13,193,878	15,362,692	19,016,870	20.161.934	17,702,085
Reserve of notes & coin	8,927,016	12,500,905	9,793,982	9,214,957	7,469,191
Coin and bullion	14,296,391	18,039,465	16,636,422	16 170,047	13,118,101
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	4 p. c.
Price of Consols	96¼	97	95¼	93⅜	93
Average price of wheat	38s 9d	45s 3d	44s 0d	60s 11d	52s 6d
Exchange on Paris (shrt)	25 10 15	25 20	25 10 15	25 12½ 20	25 42½ 50
— Amsterdam ditto	11 18 18½	11 16½ 17	11 14¾ 15½	11 14½ 15	11 19 19½
— Hamburg (3months)	13 9½	13 8½ 9	13 5⅞ 6	13 5½ 6	13 10½ 10⅝

In the corresponding period of 1851, the absolutist monarchs of Germany were studiously repressing all signs of popular life, the late King of Prussia in particular having destroyed the last vestige of the freedom of the Press in his dominions. The Emperor of Austria had also officially announced his determination of in future reigning despotically. A severe earthquake had taken place in the Kingdom of Naples, causing great loss of life and destruction of property. The invasion of Cuba by General Lopez, with about 450 men, had occurred, but the invaders had been almost immediately defeated with great loss. The important discovery of the Australian gold-fields had just been announced. The London money market continued easy, and the general rate of discount was below 3 per cent.

In 1858, the bullion movement continued remarkably favourable. The money market was extremely easy, although a payment of 350,000*l*. had just been made on the Turkish loan of three millions, and the final instalment of the first Indian Debenture loan was coming due. Numerous investments were being made in public securities, and Consols were at 97. The Atlantic Telegraph, after working a short time, was at fault, to the great disappointment of the public.

In 1859, the rate for money was very low, the banks and money establishments not allowing more than 1½ to 1¾ per cent. on deposits. 2,750,000*l* had been paid into the Indian Treasury on account of the Indian loan, which had risen to 3⅝ to ¾ premium. The Indian Council were lending money on Government securities at 2 per cent.

In 1860, a ministerial crisis had taken place in Naples, and, after some vacillation, the King had determined on quitting his metropolis. The arrival of Garibaldi was hourly expected. From America intelligence had arrived of another piratical attempt of Walker on the republic of Nicaragua. At home there was rather more confidence on account of the improvement in the weather, and the London money market remained easy. A serious collision had taken place on the Lancashire and Yorkshire Railway, causing much loss of life.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 5,072,447*l*; in 1858, a deficiency of 3,095,646*l*; in 1859, a deficiency of 5,949,470*l*; and in 1860, a deficiency of 6,670,415*l*. In 1861, the deficiency is 5,505,272*l*.

DISCOUNT AND MONEY MARKET.—The money market was easy during the greater part of the week, the general rate remaining at 3⅝ per cent., but this afternoon there has been rather more pressure, and the bulk of the transactions were at 3¾. At the Bank, to-day, there was also an increase in the applications for discount. From the decrease in the other deposits, and the increase in the other securities, shown in the last Bank return, it would seem that the preparations this week for the 4th of the month were on a more considerable scale than had been previously supposed. No revival of activity, however, appears in any branch of commerce.

On the Stock Exchange there is an abundant supply of capital, and short loans on Government securities are offered at 2½ per cent.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4⅜
Vienna	6	5
Berlin	4	2⅝
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	4	4
Hamburg	...	2½
St Petersburg	7	...

ENGLISH FUNDS.—Consols have again exhibited considerable buoyancy until this morning, when a reaction took place. The opening quotation to-day—93⅛ to ¼—was the highest experienced during the week, but a decline then occurred, and the final prices were 92⅞ to 93 for money, and 93¼ to ¼ for the 10th of October, or a fraction better than last Friday. The settlement shows that the late rise has been partly due to speculative operations, and the usual relapse has consequently followed, the movement being stimulated by a rather large sale. The abundance of money continues to exercise the chief favourable influence in this department.

Another improvement has taken place in India bonds and Exchequer bills, owing to the ease in the money market, the closing quotations of the former being 7s to 11s premium, and of the latter, par for the March issue, and 5s to 8s premium for that of June.

India Five per Cent. scrip experienced a further rise in the commencement of the week, transactions taking place at 104⅜, but the price has since relapsed to 103¾ to 104. The old stock closed at 103½ to ¾. A few realisations appear to have been effected on the late improvement.

FOREIGN STOCKS.—The transactions in the foreign department have not been very extensive this week, but some rather important changes have occurred. The news that peace will be maintained in La Plata has caused a rise in Buenos Ayres bonds, especially the Six per Cents. Turkish Six per Cents. of 1858, which had been previously rather

flat, suddenly improved yesterday and to-day, the public appearing to have been again buyers of this stock, and the supply in the market being very limited. The price is now quoted ex the half-yearly dividend. Peruvian descriptions have been less steadily maintained, the purchases for the sinking fund having been brought to a conclusion. Brazilian stocks have been more inquired for, and are firmer now than for some time past. A heavy fall has taken place in Mexican, on the further unfavourable news from Mexico, and although a slight tendency to recovery has since been shown, the price of this stock remains dull and flat.

The closing quotation of French Three per Cents. in Paris this evening failed to arrive. The price yesterday was 69f 25c, showing another rise over last Friday of three-eighths per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

CONSOLS,

	Money Lowest.	Highest.	Account. Lowest.	Highest	Exchequer Bills. March.	June.

RAILWAYS AND OTHER SHARES.—In the railway market this week, there has been further animation, and in most cases an advance has taken place. Caledonian has been especially firm, some rather large orders to purchase having again come from Scotland. Midland, Lancashire and Yorkshire, and South-Eastern have also been in demand, the traffic returns continuing good, notwithstanding the unsatisfactory feeling in the manufacturing districts. The Metropolitan Extension B preference shares of the London, Chatham, and Dover have improved to ¼ dis. to par on the vigorous prosecution of the works of that branch, and the expectation that it will be ready for opening for the Great Exhibition of next year. This afternoon, the general tendency was less firm.

In the colonial market, Indian guaranteed stocks continue to improve, and Cape shares, which have been for some time depressed, are also higher. Canadian descriptions remain without much change, but rather dull.

The principal movement in foreign railways has been a rise in Great Luxembourg and Lombardo-Venetian. American securities are about the same as last week.

There has been a better demand for mining and joint stock bank shares, Ottoman Bank especially rising to 18½ to 19 on the satisfactory statements at the half-yearly meeting. The shares of the new Fire Insurance Companies are quoted lower, Mercantile leaving off at ⅛ to ¼ premium, and Commercial Union par to ⅛ premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.

FOREIGN EXCHANGES.—The rates this week have been generally firm, the quotation for Hamburg especially showing a rise.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and the movements in Indian rupee paper:

Gold.—The Bank of England is now largely increasing its stock of bullion, having purchased, since the date of our last circular (29th ultimo), about 280,000*l*. Further large amounts are likely to be sent in, there not being the least demand for export. The Magdalena, from the Brazils, has brought 157,166*l*; and we have also to report the arrival of the Water Nymph, from Melbourne, with 203,000*l*. We have now but 155,000*l* of gold on the way from Australia, but the coming mail will doubtless report the sailing of additional ships, with large amounts. The Africa has taken 25,373*l* to New York; the Atrato 5,040*l* to the West Indies; and the Ceylon 16,000*l*, in sovereigns, to Alexandria.

Silver.—The bar silver ex Shannon has been sold at 60½d per oz standard, and the market is now firm at that rate. For the bars containing over five grains of gold per lb, a good price has been obtained, viz., 60¾d per oz standard, a much greater difference in price than is usually to be had; but this description of silver, or, as it is called, doré silver, is in demand just now for refining purposes. The Ceylon has taken 37,060*l* to India and China; and the Magdalena has brought 7,225*l* from the Brazils.

Mexican Dollars.—The dollars ex Shannon have been sold at 59d per oz; at this price they were nearly all taken for the Continent, and we consider the market very firm at that quotation.

Exchange for banks' drafts at 60 days' sight, on Bombay and Calcutta, is 1s 11⅛d to 1s 11⅜d; on Madras, 1s 11⅝d. Bills with documents, 1s 11d to 1s 11⅛d.

India Government Loan Notes.—A very considerable business has been transacted in these securities during the past week; prices remain as last quoted by us, viz., 96½ to 97 for the 5 per Cents., and 103½ to 104 for the 5½ per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold, refinable, 77s 11d per oz std.; Spanish doubloons, 76s 6d to 77s nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0⅛d per oz std, bar silver, containing 5 grs gold, 5s 0⅜d per oz std; Mexican dollars, 4s 11d per oz; Spanish dollars (Carolus) in demand, scarce.

About 37,000*l* in gold was bought by the Bank yesterday, and 80,000*l* to-day, making 117,000*l* since the date of the last return.

The Kangaroo has taken 6,535*l* for America, and the New York 1,061*l* only, the demand for specie for the United States being without revival.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The stoppage is announced of Messrs Braun and Kortoske, wholesale hat and cap manufacturers, a respectable house, with a large connection in the American trade. The liabilities are not expected to turn out very extensive. The failure has arisen from the non-arrival of remittances from Canada, and, acting under professional advice, one of the partners has proceeded to Montreal. It is believed that the accounts will ultimately show a considerable surplus.

Messrs Kesteven Brothers, fancy woollen warehousemen, have also stopped payment.

The suspension has taken place at Liverpool of Messrs John Tomlinson and Sons, in the corn trade, with liabilities for about 70,000*l*. The estate shows about 4s 6d in the pound, and it is said that some unfavourable features are involved in the case.

The advices from Rio by the present mail announce several failures, one of which is said to be for 120,000*l*.

PUBLIC COMPANIES.—A half-yearly meeting of the Ottoman Bank was held on Wednesday, when the report was adopted, and a dividend declared at the proposed rate of

8 per cent. per annum, free of income tax. It was stated that the business of the bank during the last six months has been of a restricted character, owing to the depression in trade, which has been peculiarly felt in Turkey. That country has also suffered from political and religious disturbances, and especially from foreign intervention. The profits have, therefore, been lessened, but much valuable experience has been gained. At Beyrout, the cash credits have been reduced from 67,972*l*, the amount at which they stood twelve months ago, to 3,056*l*. At the outbreak of the Syrian disturbances, the outstanding accounts at that branch amounted to 100,000*l*, and the Directors anticipated a loss of 20,000*l* on their realisation. This estimate was subsequently reduced to 10,000*l*, and it is now found that the ultimate deficit will be little more than 4,000*l*. That the loss should be so small is held to be a great credit to the commercial community of the town, considering not only the great losses by the civil war, but also the temptation it afforded to dishonesty. At Smyrna, it has been necessary to exercise much caution, and the profits have been proportionably diminished by the limited character of the business. A steady improvement, however, is now taking place. At Galatz, the operations have been on a large scale, and more capital is being employed in that branch at a relatively larger profit. The Board have under consideration a proposal from influential quarters to establish a branch at Bucharest. With regard to the amount due from the Turkish Government to the bank, 152,000*l* including interest, arrangements have just been made for its repayment, and special securities have been assigned for that purpose. Mr Gilbertson, the secretary of the bank, has been appointed local director in the place of the late Mr Falconnet, and he has also been recommended to fill the office of syndic of the loan of 1858.

It appears that endeavours are being made to effect some arrangement between the Victoria and other Dock Companies, by which the present competition will be mitigated, and a return to more remunerative charges adopted. It is also said that there is a strong probability of the movement being successful.

It is stated that the Directors of the Bank of Turkey are about to issue a full report on the affairs of that Company.

The Mercantile Fire Insurance Company have completed all their arrangements, and have now commenced business.

Silver in bars (standard)	0 0 0

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 5 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 4-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107¼ to 107½ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a continued demand for new English wheat at Mark lane to-day, for export to France, and, the supply on offer being small, the trade was decidedly active, whilst prices improved quite 1s, in some instances 2s, making an advance, compared with Friday last, of 3s to 5s per quarter. Foreign wheat was very firm, and the quotations were 2s per quarter higher than on this day week. Barley, oats, beans, and peas were not in active request; nevertheless, the currencies were fully supported. The flour trade was firm, at extreme rates. This week's imports amount to 3,880 quarters of wheat, 310 barley, 21,500 oats, 150 sacks and 13,610 barrels of flour.

At Liverpool, this morning, wheat sold at further enhanced rates, and the value of other articles was well maintained.

The advices from America per Europa holding out no hope of a compromise between the belligerent States, the Liverpool cotton market this week opened very firm. Though the demand was not very extensive, full prices were currently paid for all descriptions, and to-day's quotations are even partially 1-16d to ⅛d above those of last Friday. The total sales of the week amount to 77,500 bales, of which 38,500 are taken by spinners, 24,500 on speculation, and 14,500 for export. To-day, 8,000 bales are sold; market steady.

For nearly all kinds of tea, there has been a steady demand, and previous rates have been fully supported.

The trade for raw sugar has been in a most inactive state. Good and fine qualities have sold at late currencies; otherwise, prices have ruled the turn in favour of buyers. Refined goods, however, have changed hands steadily at full quotations.

The following is from Messrs Trueman and Rouse's colonial circular:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Seven Months ending 31st July, 1860 and 1861.

Coffee has met rather an active sale at extreme rates. The supply on offer has been small. Cocoa has supported last week's currency. In rice, a full average business has been transacted, and prices have ruled firm.

New currants have come to hand. Patras and Vostizza are selling at 35s to 40s, and Gulf at 35s per cwt. In new raisins very little is doing, at the opening price of 46s per cwt. Fine old fruit sells freely at late rates.

Most kinds of rum have been in improved request, and the late decline in prices has, in some measure, been recovered. Brandy is firm, though not dearer.

English wool has somewhat advanced in price, and the inquiry has been more active.

Messrs Ronald and Son report as follows on the Liverpool wool trade for the past month:—Our wool market has continued rather quiet, transactions being confined to the supply of absolute wants only. Although the weather, which has been all that could be desired for harvest operations, combined with successive reductions in the Bank rate of discount, has imparted a more cheerful feeling, still the protracted, unsatisfactory state of American affairs continues to exercise a somewhat depressing influence generally.

For hemp and flax the market is firm, at full quotations.

Annexed is Messrs Grant, Hodgson, and Co.'s monthly report of the tobacco trade:—"The business of the past month has not been characterised by any transaction of magnitude, although the various sales made, total no less than 850 hhds, comprising 420 hhds Kentucky strips, 125 hhds Kentucky leaf, 12 hhds Virginia strips, 130 hhds Virginia leaf, and 160 hhds Maryland, for all of which full rates were obtained, holders being unwilling to proceed with sales except at our highest quotations, being influenced in a great measure by the recent advices received from the States. There are several parcels still withdrawn from the market. Imports—2,369 hhds. Deliveries—922 hhds, against 949 hhds in the corresponding month of last year. Stock—26,520 hhds, against 17,997 hhds in 1860; 15,089 hhds in 1859; 8,767 hhds in 1858; 9,566 hhds in 1857; and 5,977 hhds in 1856."

With regard to the leather trade of the past month, Messrs Powell and Co. observe:—The business in leather during the past month has been more diversified in character and larger in extent than we have had to report for some time; a steady demand has existed for almost all articles, with a fair supply to meet the requirements of the trade, excepting of heavy sole leather, both English and foreign, for which there has been an active inquiry, and an advance has been obtained on most tannages of heavy butts, leaving the market very bare of stock. Other articles show very little change in value. In raw goods no change of importance has occurred. The imports have been moderate. The sales of River Plate hides continue limited in extent, without any alteration in prices, whilst of salted Australian hides considerable sales have been made at rather improved rates, and in East India kips there have also been larger transactions at somewhat advanced prices.

From Messrs Churchill and Sim's timber circular, we extract the following:—

COMPARATIVE STOCK of TIMBER at the PUBLIC DOCKS, Sept. 2.

	1861.	1860.	1859.
Foreign deals... ..... pieces	1,066,000	1,007,000	797,000

In metals, no change of importance has taken place. Most descriptions have changed hands to a fair average extent at about previous rates. Scotch pig iron 51s 7½d to 51s 9d, and spelter, on

the spot, 18*l* 7*s* 6*d* per ton. The shipments of pig iron from Scotland during *August* were 43,934 tons, against 51,464 tons in the same month last year, making the total since Jan. 1, 397,908 tons, against 361,966 tons in the corresponding period in 1860.

Linseed oil has ruled firm at 33*s* per cwt on the spot. Other oils have not materially altered in value from last week. American spirits of turpentine are now worth 70*s* per cwt.

The tallow trade has been rather excited, and Petersburg Y. C. has advanced to 48*s* 6*d* per cwt on the spot. Town tallow, 48*s* net cash.

"In business circles," observes the New York *Shipping List*, of the 24th ult., "the week closes with about the same features of general inactivity and depression, which have been the leading characteristics for a lengthened period. The dry goods business has received a *fresh stimulus*, and trade in domestic goods is becoming quite active, and though it does not vie with that of former years, there has been done a considerable business in some of the leading styles, while holders in several instances have been enabled to obtain a still further advance in prices. There is a much better feeling generally in this important branch o trade. The export trade is scarcely so important as formerly, however, though some important purchases are still making for shipment, chiefly to South American ports. Inland navigation is being prosecuted with renewed vigour, and all the great channels of communication are taxed to their utmost in the transportation of breadstuffs to the seaboard, where a steady demand for them for shipment exists, and whence millions of bushels have been exported during the past few months, to make good the deficiency in the crops of foreign countries. The receipts at the West continue very heavy, and stocks are large. The money market remains in substantially the same position, and there is comparatively little doing at the following quotations, which are nominally unchanged. We quote:—

	Per cent. per annum.
Loans on call, stock securities	4 to 5
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

At the Stock Exchange nothing has transpired calling for especial remark. The Bank statement is about what we predicted. The specie line is not quite up to the mark, however, though there was in bank at the close of the week 50,202,182 dollars. This is undoubtedly the maximum, as the banks will soon commence paying out to the Government. The statement is as follows:—

	Loans. dols	Deposits. dols

There has prevailed a more active demand for home consumption, which has induced some speculative feeling, under which prices may be written somewhat higher, closing with still an upward tendency. The sales foot up 6,000 bales. We quote:—

NEW YORK CLASSIFICATION.

	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	15⅜	15⅜	15⅝	15⅞

A good deal of excitement remained in the cotton market during the first few days of the past week, and a further advance of price took place in the more current grades of American. A few sales were made fully ⅛d per lb above our last quotations. The market has, however, since become much tamer, and though some speculative feeling is still apparent, prices have resumed the level of last week. Egyptian and Brazil have not altered in value. East India are in fair demand, but the supply by import is much above the deliveries, and thus meet only a heavy market. The sales to-day are 12,000 bales. The market is quiet but steady. The reported export amounts to 14,580 bales, consisting of 8,820 American, 30 Brazil, and 5,730 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand from the manufacturing districts still continue unfavourable. The present high value of cotton has checked operations in goods, both for home use and export. Prices, however, are well supported, owing in some measure to the limited stocks in warehouse. There has been less business doing in iron, at barely late rates, and the demand for coals has somewhat fallen off.

MANCHESTER, Sept. 5.—This market has been more dull and languid than even in the last dull weeks. Spinners remain nominally firm, but meet little or no inquiry, and manufacturers find the tendency of prices in the little which is being done ruling against them. Shirtings may be quoted almost 1/2d per piece lower than last week, and in the more varied class of goods prices are irregular. Indian advices to-day (to August 8) report Calcutta lower for piece goods and others, with prospects from up-country very unsatisfactory, which, with our heavy exports thither for some months past, will not tend to improve matters here. Since last week, there has been a slight, but still very immaterial increase in the working of short time, but the few contracts which were given out on the commencement of American hostilities have now pretty nearly expired, whilst stocks have accumulated, so that the urgency for diminished production has become more palpable.

BRADFORD.—There is considerable firmness in our market; indeed, wool is quoted by some as rather dearer. Sales might be made pretty freely at old prices, but business is checked by the staplers asking an advance. The yarn market presents much the same features as last week. There is a fair demand for the home trade, chiefly in coloured yarns for fancy goods, but not much is produced for other markets. Very little yarn is going to Russia. Pieces—The home merchants continue busy, and there appears to be generally a healthier tone in the market.

BELFAST.—The month just closed has been a dull one in most lines of finished goods. Except in a few instances, and those peculiar ones, the transactions with New York or the other large cities of the States have been nominal. The home trade, though still quiet, is progressing. Stocks of wefts have been reduced materially, and prices rule at least one point above those current three weeks ago. Warps are held at full quotations. There is a steady business done in the export trade.

LEICESTER.—There is still a satisfactory amount of business doing for the period of the year, and the warehouses continue tolerably active. There is an inquiry for most kinds of goods, and business generally has a healthy appearance. At Loughborough and Hinkley there is a little doing in most descriptions of articles made in those localities. Yarns are in fair request, and spinners are well engaged. There is no important change in wools, but the market remains firm.

NOTTINGHAM.—Upon the whole, there is a shade of improvement in the lace trade generally. Manufacturers are looking forward for a better state of things shortly. The plain net branch is yet very dull, but a few have been finished this week. There are a few articles in silk goods wanted, but many workmen are yet unemployed, and no stock is made. In hosiery there is rather more doing for the home market, with improved prospects. The export trade is by no means lively. Yarns are high in price, and have still an upward tendency.

LEEDS.—The markets in the cloth halls present no feature of change. The attendance of buyers has not been very large, and they have purchased cautiously; yet, upon the whole, more business has been done. Meltons, pilots, knickerbockers, and other fabrics for autumn and winter wear are the chief goods in demand. The home trade continues steady, but the foreign demand is but flat. Wools and goods alike keep steady in price.

ROCHDALE.—The sales in flannel have somewhat increased, but they are still confined chiefly to home trade buyers. The export houses are slack, but the trade in the aggregate is better than lately reported. There is more doing, too, in Yorkshire low goods. A moderate business has been done in wools at about last week's prices, and the purchases have been mostly for immediate consumption.

WOLVERHAMPTON.—A fair amount of animation prevails in the demand for most kinds of iron, and prices are well supported.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 24.—The demand for State and Western flour continues moderate both for the home trade and shipment, and though prices have been subjected to slight variations, the closing rates yesterday were substantially the same as our last quotations. Canada flour remains steady under a fair demand at previous quotations. There has prevailed a moderate inquiry for Southern flour at previous rates:

EXPORT from 1st to 20th Aug.

	1861. barrels	1860. barrels
Wheat Flour	187,431	137,142

The market for wheat presents few new features. The unfavourable European intelligence has had a rather depressing influence, though without checking the demand for shipment, which continues tolerably active at about our previous quotations. The receipts have been fair, and are increasing. The demand for corn continues tolerably active, and the sales for the three days have been heavy at about previous rates; the sales aggregate 410,000 bushels, including 185,000 yesterday, at our quotations.

EXPORT from 1st to 20th Aug.

	1861. bushels	1860. bushels

Corn.....	1,026,298	83,015

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

As most of the farmers have been much occupied in the fields, very little new English wheat has been on offer, this week, in the various markets of consumption. The demand has ruled somewhat active, and prices have advanced from 2s to 3s per quarter, at which good clearances have been effected. Foreign wheat has continued in request on French account; the quotations have, therefore, improved 1s to 2s per quarter. There has been more inquiry for barley, at extreme rates, and malt has commanded rather more attention. Good sound oats have realised quite as much money; but low and damp parcels have hung on hand. Beans, peas, and flour have sold at full currencies.

In some counties, nearly, or quite, the whole of the wheats have now been secured in excellent condition. There is still some quantity of spring corn in the fields; but another week or ten days of fine weather would enable the growers to carry it. The yield of barley and oats is turning out very large.

On the Continent, wheat commands very full prices, and most other articles are held at extreme rates. In America, breadstuffs have ruled about stationary, with full average supplies on offer. The accounts having reference to the produce of the crops generally are favourable.

The Scotch markets have been scantily supplied with wheat and other kinds of grain. The demand has been somewhat restricted; nevertheless, prices have been well supported.

In Ireland, fine wheat, barley, and oats have changed hands steadily, at extreme rates. Otherwise, the trade has continued in a sluggish state.

Messrs Sturge, of Birmingham, write as follows with regard to the corn trade:—"The fine weather of the past month has enabled the farmers in this district to secure nearly the whole of their corn in finest order, and indeed quality and condition are almost perfect, but the yield on the heavy lands is much complained of. The demand for France continues, and has prevented the fall in the value of English wheat from exceeding 3s per quarter; the new wheat being much sought after, not only for home use, but also for export. The price of foreign, arrived on the coast, has risen nearly as much as that of home-grown has declined. The imports of wheat and flour for June amounted to 925,745 quarters, or nearly 50 per cent. more than in the preceding month; whilst those of the twelve months were equal to ten and a half millions, or about two-thirds of the estimated consumption of the country for a year; showing that only about one-third of the quantity required for the support of the population had to be supplied from home-grown. The exports to the end of July were only 26,131 quarters. The crops of wheat in the United States and Canada are said to be large (but the French demand has caused an advance of nearly 6s per quarter in the quotations at the American ports). Those of Eastern Europe appear, on the whole, to be good; though many districts have suffered seriously from drought and others from wet. The deficiency in the French harvest is confirmed, but we think it probable the purchases making in the ports of the Baltic, America, the Danube, and the Black and Azoff Seas, added to shipments from England, and floating cargoes ordered from ports of call, will soon exceed the demand, and that, as in former instances, a portion of the later arrivals will have to be re-shipped to this country, though it must be admitted that up to the present time the imports have barely kept pace with the demand. Notwithstanding the many foreign shipments direct to France, the number of grain-laden vessels on passage to the United Kingdom from ports within the Straits of Gibraltar continues to increase, particularly of wheat, the total being now above 500."

At Mark lane, to-day, the supply of English wheat was small, and the trade for new qualities ruled active, at a further advance of 1s to 2s per quarter. There were several purchasers on French account. Foreign wheat was very firm, and in some instances prices improved 1s per quarter. Floating cargoes of grain were in demand, on higher terms. Barley, oats, beans, and peas realised extreme rates. The flour trade was firm, at full currencies.

The following observations, in reference to the *floating* trade, are furnished by Mr Ed. Rainford:—There have been 71 arrivals off coast for orders reported since the 28th ult., comprising 22 cargoes of wheat, 30 maize, 10 beans, and 9 miscellaneous, viz.:—Wheat, 3 from Marianople, 1 Odessa, 8 New York, 7 Taganrog, 1 Berdianski, 1 Odessa, 1 Montreal; wheat and flour, 2 San Francisco; rye, 1 Galatz, 1 Odessa; maize, 1 Giurgevo, 7 Ibraila, 12 Sulina, 4 New York, 4 Galatz, 1 Poti, 1 Saffi; barley, 2 Ibraila, 2 Galatz; beans, 2 Larache, 2 Casabianca, 3 Mazagan, 2 Saffi, 1 Alexandria; dari, 1 Scala Nova. A number of these had previously changed owners. The demand for France continues active, at improving prices, and maize is in considerable request for Ireland, at higher rates. The following are transactions since this day week:—Wheat, arrived, per 492 lbs, for the United Kingdom, Taganrog Ghirka, 50s 6d and 51s; Marianople, 53s; for the Continent, Berdianski, 53s 10½d; hard Odessa, not perfect, 47s 6d; Taganrog Ghirka, equal to about 51s 6d, and 2 cargoes at 51s, United Kingdom price—additional freight to be paid by buyers; on passage, per 480 lbs, Milwaukee, 48s 6d, allowing 1 per cent. for presumed deficiency. Rye, shipping, per 480 lbs, for the Continent, Taganrog, 31s. Maize, arrived, per 492 lbs, for the United Kingdom, Galatz, 32s 6d and 33s; ditto, not perfect, 32s 3d, 32s 9d, and 32s 10½d; Poti, 32s 6d tale quale; on passage, Galatz, 32s 9d and 33s 6d; Odessa, 33s 3d; per 480 lbs, arrived, Ibraila, not perfect, 30s 6d and 31s 3d; Bulgarian, not quite perfect, 30s 9d, 31s 6d, and 32s; ditto, perfect, equal to 32s 2d and 32s 6d; mixed American, slightly imperfect, 30s; on passage, Ibraila (June shipment), 31s 6d; ditto, 3,000 quarters, black with a few lay days, 30s 9d; shipped or shipping, yellow American, 30s 6d. Barley, on passage, per 400 lbs, Egyptian, for London, 25s; new Taganrog, for the United Kingdom, 24s 6d; shipping or shipped, Egyptian, for London, 25s. Beans, arrived, per 480 lbs, for the United Kingdom, Mazagan, 33s; Barbary, 33s; on passage, Egyptian, 33s. Dari, arrived, per 480 lbs, Scala Nova, slight dry warmth, 30s.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The colory Porto Rico in yesterday's sales met with a good competition, and realised high prices to an advance of 1s per cwt on the valuations. There was not, however, any general improvement in the demand, and the market remained quiet during the three days. Soft middling descriptions of East India are least in demand, and some good Gurpatta date Bengal sold at easier rates. The transactions in West India amounted to 1,470 casks, including Barbadoes by auction at 33s 6d to 41s; Jamaica, 32s 6d to 37s 6d per cwt. Floating cargoes do not show any alteration. The landings continue in excess of the deliveries, consequently the stock has been further augmented to 85,600 tons. Deliveries for consumption from the commencement of the year were 8,230 tons below those of 1860, but for the United Kingdom this season's still show some increase according to the latest returns.

Penang.—2,734 bags partly sold at 32s 6d to 37s per cwt for brown to middling greyish yellow.

Singapore.—1,910 bags partially found purchasers at 29s 6d to 34s per cwt for dark brown to soft low middling grey.

Madras.—1,000 bags native realised 30s to 31s per cwt for middling to fine brown.

Bengal.—987 bags rather more than half sold: good Gurpatta date, 40s to 40s 6d. Business has been done in low brown Bengal privately at 30s to 30s 6d per cwt.

Foreign.—1,805 boxes Havana, by auction, were bought in: brown to florettes, 34s to 47s 6d; grainy white in bond, 31s 6d to 32s. 243 baskets Java withdrawn above the value. 506 casks 94 barrels Cuba muscovado went as follows: brown, 33s to 34s; low greyish to good yellow, 34s 6d to 38s 6d. 847 casks 242 barrels Porto Rico: very bright grocery, 41s to 45s; brown to good yellow, 34s to 40s 6d. 128 casks 40 barrels St Croix part sold at 43s to 44s 6d. Four floating cargoes of Cuba have sold for the United Kingdom at 22s 6d to 23s; two of Havana for near ports, No. 10 to 11, at 25s 9d to 26s per cwt.

Refined.—No change in prices has occurred, the stock of goods being moderate, and the demand steady. Pieces and crushed are saleable to a fair extent at the quotations.

MOLASSES.—A parcel of good Antigua is reported at 15s 6d, and one of St Kitts at 14s. Some Surinam at 14s 6d per cwt.

MELADO.—Several contracts have been made at 22s 6d to 26s 3d per cwt

RUM.—A steady demand prevails for common kinds: Leewards, 1s 6½d to 1s 7d; fair Demerara, 1s 8½d up to 1s 10½d for superior, according to packages; East India, 1s 6d per proof gallon.

COCOA.—This article is firmer. 225 bags Trinidad, by auction, realised 51s to 60s for grey to fair red. Privately, small sales of Guayaquil have brought 54s 6d to 55s per cwt.

COFFEE.—Business, this week, has been chiefly confined to East India descriptions, these commanding very high prices. 1,549 cases 770 bags Neilgherry sold at 72s to 78s; 54 casks Wynaad plantation at 72s to 73s 6d. There are buyers of plantation and native Ceylon at last Friday's advance. 35 casks Jamaica, by auction, were withdrawn at 80s. 500 bags Rio privately realised 51s 6d to 52s 9d per cwt.

TEA.—The market is steady, with a fair inquiry by the trade, and Tayshan congous still attract the attention of speculators. No public sales are declared.

SAGO FLOUR.—By private contract, 15s 6d has been accepted for current quality. 7,130 bags just landed were offered in public sale, and withdrawn at 16s to 16s 6d per cwt.

RICE.—Extensive sales have been made by private contract at 3d advance: Ballam, 9s 9d to 10s; low broken to fine white Bengal, 10s to 15s 6d; new Rangoon, 10s 4½d to 10s 6d; old Arracan, 9s 7½d to 9s 9d. By auction, 3,985 bags Bengal went at 10s to 13s 6d per cwt for low broken to good white. Six floating cargoes of soft grain have been sold at 10s to 10s 7½d per cwt, according to quality and condition.

IMPORTS and DELIVERIES of RICE to August 31, with STOCKS on hand.

	1861.	1860.	1859.	1857.

Stock	39265	43900	49150	93000

SPICES.—630 cases East India ginger sold at 41s to 45s for small to middling bold mixed; 128 barrels Jamaica, 43s to 59s per cwt. 4,487 bags Penang pepper: common, 3¾d to 3¾d; Tranq, 3¾d to 3¾d per lb. A few lots of nutmegs and mace sold without variation in prices. Pimento is firmer, and the supply keeps light; good quality keeps scarce, commanding 3d per lb. White pepper meets with more inquiry.

SALTPETRE.—During the week, 1,100 bags Bengal have sold at 34s 9d to 35s 3d per cwt for refraction 7 to 5½ per cent.

IMPORTS and DELIVERIES of SALTPETRE to August 31, with STOCKS on hand.

OTHER DYESTUFFS.—There is not much doing in Cutch. The market for Gambier is firm at 16s 6d to 17s 6d per cwt.

DYEWOODS.—210 tons Nicaragua were bought in at 7*l* to 9*l*. 47 tons Manilla Sapan at 6*l* 15s. A floating cargo of St Domingo logwood has sold at 5*l* 15s per ton for the Continent.

INDIA RUBBER.—Fine Para has sold at 1s 8d to 1s 8½d per lb.

JUTE.—There has again been rather a better feeling in the market, and 6,140 bales, by auction, about three-fourths sold at 13*l* to 19*l* 15s per ton for low middling to good quality. The stock is reduced to 9,000 tons.

HEMP.—Russian is firm at the recent advance. The stock of Petersburg clean on the 1st inst. was 2,005 tons, against 2,315 and 2,300 tons in the two previous years. Manilla cannot be obtained unless at an advance: 19*l* 10s to 21*l* per ton paid for roping quality.

LINSEED.—The market keeps active. Bombay, 60s; Calcutta, 56s 6d to 58s 6d. Several cargoes of Black Sea and Azoff have sold at 56s 6d per quarter.

OIL.—Olive is higher: Mogadore, 51*l* 10s; Sicily and Gioja, 56*l* to 57*l*; Gallipoli, 58*l* per tun. Fish oils inactive. More inquiry prevails for palm at 42s 6d. Cocoa-nut is much firmer at an advance of 1s to 1s 6d: Cochin, 45s 6d to 46s; Ceylon, 44s 6d to 45s. 6d less for cash. Linseed steady at 33s 3d. Refined rape quoted 44s to 44s 6d; brown plentiful at 41s to 41s 6d per cwt.

TURPENTINE.—Rough from store has sold at 18s. A large business has been done in American spirits at 67s to 69s per cwt.

METALS.—The tendency to improvement in this market last week has continued. Further sales of spelter have been made at 18*l* 5s to 18*l* 10s,

and 18*l* 10s to 18*l* 12s 6d per ton for arrival. The stock is 3,715 tons, against 4,350 tons at the same period of last year. Latest sales of Straits tin were at 118s to 118s 6d per cwt, being again higher. Lead has been sold at higher rates for English. No change to notice in copper. British iron is the same as last quoted. Scotch pig iron has sold at 51s 7½d to 51s 9d per cwt. The late speculative demand appears to have subsided.

TALLOW.—The market has again become active, and the quotations rule about 1s to 1s 6d higher than on Friday: viz., 1st sort Petersburg Y. C., 48s 6d to 49s; for delivery to the end of the year, 48s 6d to 49s; first three months of the next, 49s to 49s 3d. By auction, Australian sheep sold at 46s to 47s 9d; beef, 42s 6d to 43s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, September 2.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—1,637 bags Gurpattah date Bengal, offered by auction, were chiefly bought in. 1,484 native Madras partly sold at 30s 6d to 31s 6d. 446 casks Barbadoes and 77 casks St Croix at previous rates.

COFFEE.—46 cases 42 barrels Neilgherry realised 80s to 89s. 551 bags Cannon's Mysore, 97s to 104s. 1,485 bags Munzerabad mountain, 80s to 92s. A few lots of Jamaica, 66s 6d to 89s per cwt.

COCOA.—312 bags Trinidad, 53s to 70s per cwt.

SPICES.—131 barrels Jamaica ginger, 43s to 67s. 30 cases Calicut, 45s to 56s. 159 bags African part sold at 38s to 40s per cwt. 11 cases mace, 8d to 10d. 9 cases Penang cloves, 1s 1½d to 1s 3d. 31 cases brown nutmegs, 1s to 1s 2d. 416 bags Penang pepper part sold, at 3⅜d to 3½d; the rest bought in at 3⅜d per lb.

RICE.—3,361 bags Bengal, by auction, part sold: broken to good middling white, 10s to 12s 6d; cargo, 9s 3d to 9s 6d. 760 bags Bassein, 10s to 10s 6d.

SALTPETRE.—242 bags Bengal, refraction 6¼ to 1⅛, sold at 34s to 35s per cwt, being 1s per cwt lower.

SHELLAC advanced 5s per cwt.

TURPENTINE, 70s per cwt.

TALLOW.—Town advanced to 50s 9d. Y. C. quiet at 48s 6d to 49s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues without any alteration worth noting. Some few sales of crushed have been made at 33s 6d in barrels. In Dutch crushed, since our last, 200 tons of S & T superfine, at 33s 6d; 250 tons V O, at 32s 9d; and 150 tons B & H, No 1, at 32s 10½, all in barrels; also 50 tons W & Z, at 31s 3d in hogsheads, are reported to have been sold f.o.b. in Holland.

GREEN FRUIT.—The market continues good, the scarcity of home-grown fruit causing an extra demand for foreign.

DRY FRUIT.—The currant market is very unsettled, the entire range of price being from 30s to 40s. Considerable difference of opinion prevails in valuing samples. Valencia raisins continue in their original position, and the sales for this article are of a very diminutive character. A small lot of new muscatels in layers have arrived, but not in sufficient quantity to establish a quotation.

ENGLISH WOOL.—Rather more doing in deep-grown wools, at a little better prices.

COLONIAL WOOL.—No change.

FLAX unaltered.

HEMP.—Market firm, and but very few sellers.

COTTON.—Sales of cotton, from Friday, 30th August, to Thursday, 5th Sept., inclusive:—3,500 bales Surat, at 7⅝d to 7¾d for good fair to good sawginned Dharwar, 7d for good fair sawginned Broach, 6¾d to 6 13-16d for good fair new Broach, 5¼d to 6¼d for middling to fully fair old Dhollera, 5⅞d to 6¼d for middling fair to fully fair new Omrawatty, 5¼d to 5⅝d for middling fair to good fair Compta; 200 bales Tinnevelly, at 6d to 6⅜d for middling to good; 50 bales Western Madras, 5⅜d for good fair; total, 3,750 bales. The demand continues good, and a fair amount of business has been transacted at very full prices for Western Madras and Tinnevelly; for Surat, in some cases, rather higher prices have been obtained, and sawginned Dharwar has again advanced ⅛d per lb, the market closing with great firmness. Yesterday, 69 bales Carriacou, 28 St Vincent, and 84 Surat, the latter all faults, were offered at public sale, of which 33 good fair Carriacou were sold at 10½d, and 84 Surat at 3½d to 5⅜d per lb; the St Vincents were bought in at 10½d per lb.

SILK.—Silk market very quiet; prices nearly the same, perhaps a shade lower for inferior qualities. Still dependent upon American affairs for a revival of business.

TOBACCO.—Our market has been generally quiet during the week; prices remain very firm.

METALS.—A better tone generally prevails in our metal markets, produced not so much by a healthy demand, as by a speculative feeling engendered in the minds of both buyers and sellers by the easy state of the money market. Iron, lead, and tin plates, being the metals more immediately affected by want of American demand, participate least in the improvement.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	9
Fat by ditto	2	6½
Yellow Russian	50	0
Melted stuff	36	0
Rough ditto	20	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Prime Waterford bacon very scarce; former prices fully maintained. Hamburg lower in price, with a very dull sale. Friesland butter in good demand at 114s: quality fine.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 2.—The total imports of foreign stock into London, last week, amounted to 10,988 head. In the corresponding period in 1860, we received 13,707; in 1859, 12,659; in 1858, 10,673; in 1857, 11,404; in 1856, 7,805; and in 1855, 7,873 head.

To-day's market was largely supplied with foreign stock, for which the trade was in a sluggish state on easier terms. The arrivals of home-fed beasts to this morning's market were seasonably good as to number, and, on the whole, their quality was tolerably prime. For all breeds the demand ruled heavy in the extreme, and, in some instances, prices were the turn in favour of buyers. The primest stock realised 4s 8d per 8 lbs. From Lincolnshire, Leicestershire, and Northamptonshire, we received about 2,100 Shorthorns, crosses, &c.; from other parts of England, 850 of various breeds; from Scotland, 52 Scots; and from Ireland, 500 oxen and heifers. With most breeds of sheep we were moderately well supplied, and the mutton trade was in a most inactive state at a decline of 2*s* per 8 lbs. The few prime Downs and the primest half-breds sold at 5s 2d per 8 lbs. The quality of the English sheep was good. The supply of lambs was very small, and the demand for them was tolerably active at from 5s 10d to, in some few instances, 6s per 8 lbs. The show of calves was only moderate; nevertheless the inquiry for them ruled slow at Thursday's currency; the highest price being 4s 6d per 8 lbs.

SUPPLIES.

	Sept 3, 1860.	Sept 2, 1861.
Beasts	6090	5370
Sheep and lambs	30100	30350
Calves	300	297
Pigs	280	570

THURSDAY, Sept 5.—To-day's market was moderately supplied with beasts. Prime breeds moved off steadily at, in some instances, rather higher prices otherwise, the beef trade ruled inactive at Monday's currency. The general top price was 4s 8d per 8 lbs. The supply of sheep was also extensive, and the demand for most breeds exhibited a slight improvement at fully previous quotations. Lambs—the show of which was limited—sold steadily at full currencies, viz., from 5s to 6s per 8 lbs. There was a large falling off in the receipts of foreign calves, and the trade was somewhat active at an advance of from 4d to 6d; the top quotation being 5s per 8 lbs. Pigs changed hands slowly on former terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	4	10	5	2
Second quality ditto	3	4	3	6	Large coarse calves	3	10	4	4
Prime large oxen	3	8	4	4	Prime small ditto	4	6	5	0

Coarse and inferior sheep	3	0	3	2	Small porkers	4	6	4	10
Second quality ditto	3	4	3	10	Suckling calves.....each	21	0	29	0
Prime coarse-woolled do.	4	0	4	8	Quarter old store pigs	23	0	30	0

Lambs, 5s 0d to 6s 0d.

Total supply—Beasts, 1,620; sheep and lambs, 9,890; calves, 270; pigs, 440.
Foreign supply—Beasts, 430; sheep 990; calves, 110.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 6.—Somewhat increased supplies of meat have been on sale here. Prime qualities have continued firm in price; otherwise the trade has been inactive, but without leading to any material change in the quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	10	3	4	Middling mutton	3	8	4	2
Middling ditto	3	6	3	8	Prime ditto	4	4	4	8

Large Pork	4	0	4	6	Lamb	4	8	5	4
Inferior mutton	3	2	3	6					

HOP MARKET.

BOROUGH, Monday, Sept. 2.—We have no alteration to report in our market, which continues inactive and depressed. The plantations have further improved, and the duty is freely backed at 150,000*l*. A few pockets of the new growth have reached this market, and those recently sold have realised from 10*l* to 12*l* 12s per cwt.

FRIDAY, Sept. 6.—Picking is progressing in several districts, but the yield is not large. The duty is 150,000*l*. Most kinds of hops are in slow request, on former terms.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 2.—Since our last report, the arrivals of home-grown potatoes have been somewhat on the increase. The demand, however, for all qualities has continued steady, and prices have been well supported. Shaws are selling at from 70s to 90s, and Regents 85s to 105s per ton.

FRIDAY, Sept. 6.—Fair supplies of potatoes are on offer, for which the demand rules steady, at 75s to 85s for Shaws, and at 85s to 105s for Regents.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover ditto, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 4s to 1*l* 12s per load. Trade steady.

CUMBERLAND.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 5s to 1*l* 12s per load. Both hay and straw were in steady request, at full prices.

WHITECHAPEL.—Old meadow hay, 2*l* 0s to 5*l* 0s; new ditto, 2*l* 0s to 4*l* 0s; old clover, 3*l* 10s to 6*l* 0s; new ditto, 3*l* 10s to 5*l* 0s; and straw, 1*l* 4s to 1*l* 12s per load. A fair demand.

COAL MARKET.

FRIDAY, Sept. 6.—Walls-end:—Hetton, 18s—South Hetton, 18s—Braddyls Hetton 17s—Russell Hettons, 17s—Heugh Hall 16s 6d—Kepier Grange 16s 9d—Tunstal 15s—North Pelton 13s—Wylam 15s 6d—Tanfield Moor 12s 9d—Hartlepool West Hartley 15s 3d—Hastings Hartley 16s 3d—Howard's Hartley 16s 3d. 66 ships at market.

LIVERPOOL MARKETS.

WOOL.

(From our own Correspondent.)

Friday, Sept. 6.—A moderate business is doing at firm rates, and as the harvest is now all but secured, the general opinion appears to be that prices will not be lower. All useful descriptions of a medium and low class are likely to show an upward tendency soonest.

METALS.

[From our own Correspondent.]

Friday, Sept. 6.—The market for manufactured iron remains with little or no alteration, but, if anything, it has a firmer tendency, more particularly as regards bar iron. The easy state of the money market has produced a more favourable effect on Scotch pig iron, and the business transacted has been at higher rates. In copper there has been little doing, and present prices are almost nominal. Spelter maintains its late advance. Lead is dull of sale.

The Gazette.

Tuesday, Sept. 3.

BANKRUPTS.

J. T. Sheldrick, Stainsby terrace, Stainsby road, Poplar, and Woodbridge street, Clerkenwell, timber merchant.
F. N. C. Jardine, Tottenham Court road, and Pembridge villas, Bayswater, licensed victualler.
G. Selig, North buildings, Finsbury circus, dealer in watches.
A. Spark, Great Coram street, Russell square, watchmaker.
E. Fontanella, Lime street, merchant.

J. L. Fuggle, neck tie manufacturer, Gutter lane, Cheapside.

SCOTCH BANKRUPTS.

D. Gardener, cooper, Glasgow.
D. Smith, shipbroker, Leith.
J. Walker, baker, Troon.
A. M'Lachlan, scow trader and agent, Glasgow.

COMMERCIAL AND MISCELLANEOUS NEWS.

By the last mail, we have received the following:—Advices from Buenos Ayres are up to the 30th of July. The arrivals of dry ox and cow hides at Buenos Ayres had been mostly from the rivers. The news from Europe and the United States, added to the present unsatisfactory state of politics at Buenos Ayres, had in a great measure discouraged buyers. Nevertheless transactions in some classes had taken place at reduced prices, while other kinds remained nominal. Nothing doing in kids and calfskins. Dry horse hides continued in demand for Havre; very few coming in, and no stock. At Rio, business had been very restricted since the 1st of August. The arrivals had been very numerous, amounting to 44 vessels from the 1st to the 4th, and 45 had arrived up to the latest date. In the coffee market there was a greater stir in business, the sales from then to the 18th having amounted to 77,000 bags, at a gradual advance of 200 to 300 reis in all descriptions, the chief demand having been for the better qualities, which continued to arrive as sparingly as before. After the receipt of the unfavourable advices per Navarre, the market suddenly became very quiet. In the sugar market there had been sales of 250 cases Campos brown, at 2,400 to 3,200 reis. The market closed very firm. At Bahia, sugar continued in demand, and regular descriptions had been purchased at 2,100 to 2,200 reis. Stock to the 8th of August, 4,832 cases, 123 boxes, 6,660 bags and barrels. Coffee sales at Nazareths had been effected at 4,500 reis per aroba.

From Pernambuco, we have news to the 13th ult.:—The weather is still unsettled, and prevents the long-looked-for improvement in trade, which is expected to take place with arrivals of sugars of the new crop. The delay is not, however, judged prejudical to the crop, and planters appear to be sanguine of a very good yield this season. The import trade is not brisk, dealers buying very sparingly. Prices of sugar are 1,900 reis to 2,350 reis per aroba for browns, or at exchange of the day equal to 16s 4d to 19s 9d per cwt, free on board, exclusive of freight; whites, 2,650 to 4,000 reis per aroba, or 22s 7d to 32s 10d per cwt. Shipments to England about 12,000 bags. Cotton is in active demand, but supplies are very small. Pernams are quoted 8,800 to 9,000 per aroba, or 8 1-64d to 8 5-64d per lb on board. Maceios nominal, at 8,700 reis, or 7 1-16d per lb. Paraibas 9,650 reis, for Spain, or 7 27-32d per lb. Hides, 180 reis per lb, or 5½d on board. Freights, 35s to 42s 6d and 5 per cent. for the Channel for orders; for Liverpool, 25s to 27s 6d and 5 per cent. sugar ballast; 9-16d to ⅝d and 5 per cent. per lb cotton. Exchange opened at 25d. Government took 30,000*l* at that rate. Subsequently the rate dropped to 24⅞d, which is the quotation to-day.

An Account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 24th day of August, 1861:—

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 24th of August amounted to 587,347*l*, and for the corresponding week of last year to 576,501*l*, showing an increase of 10,846*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 276,149*l*, and for the corresponding week of 1860 to 268,678*l*, showing an increase of 7,471*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 2.—The railway market to-day showed increased buoyancy, and nearly all the leading stocks left off at an advance of ½ to 1¼ per cent. Lancashire and Yorkshire and Midland were chiefly in demand. South-Eastern partially relapsed in the afternoon on the unfavourable traffic return. Great Northern was rather less scarce than of late. The market at the close was generally steady, except for Sheffield and Eastern Counties, which were slightly lower. In the colonial market, Indian guaranteed stocks continued to improve, and Grand Trunk of Canada was steady at 20 to ½. Foreign descriptions were firm, Bahia, San Paulo, Northern of France, and Victor Emmanuel obligations showing a slight rise. Lombardo-Venetian were also higher during official hours, but afterwards relapsed to 1⅛ to ¼ pm. Canada, Cape of Good Hope, and Victoria Government debentures improved. American securities closed without material change. Mines were again in better demand at an occasional advance.

TUESDAY, Sept. 3.—The railway market relapsed to-day, partly in sympathy with Consols and partly from realisation on the late rise. The accident at Kentish town, which took place on the London and North-Western line, and not, as alleged, on the North London Railway Company's property, also caused a dull feeling. *Bona-fide* sales, however, continued limited. Towards the close there was a rather better tendency than at one period, but, compared with yesterday, the final prices of the leading stocks generally showed a decline of ¼ to ½ per cent. Caledonian remained exceptionally firm. In the colonial market a slight reaction took place in Indian guaranteed stocks, while Cape shares were higher. Foreign descriptions were steady, Lombardo-Venetian improving to 1½ to ⅝ pm.; Canada, Victoria, and New Brunswick debentures continued in demand for investment. American railway securities closed without material change. Mines were quiet, but showed an occasional advance. No variation of importance occurred in joint stock banks or miscellaneous descriptions.

WEDNESDAY, Sept. 4.—The railway market was unfavourably affected by further realisations, and closed to-day at an average decline of ½ per cent. Sheffield and South Eastern were especially heavy. North British, on the other hand, slightly improved. The general business was very limited. No movement of importance has occurred in the colonial market. In foreign descriptions, Lombardo-Venetian shares receded in the morning to 1⅛ to ¼ pm.; but recovered after official hours to 1½ to ⅝. Bahia were a fraction lower. In American securities, Virginia Six per Cents. were quoted higher. Mines again showed increased firmness. Joint stock banks closed about the same as yesterday. In *miscellaneous* descriptions, East and West India Docks stock and Royal Mail Steam shares advanced.

THURSDAY, Sept. 5.—The railway market to-day showed renewed buoyancy. Caledonian, Midland, and Lancashire and Yorkshire were chiefly purchased, the former especially experiencing an advance of 1 per cent. South-Eastern and Sheffield was also in demand, and in most of the leading stocks an improvement of ¼ to ⅜ per cent. took place. North-Eastern descriptions were exceptionally flat. The Metropolitan Extension B preference shares of the London, Chatham, and Dover advanced to ¼ discount to par. The market generally closed with a firm appearance. In the colonial market, Indian guaranteed stocks were firmer. Cape shares likewise improved, while Grand Trunk of Canada closed without change at 20 to ½. Foreign descriptions were steady; Great Luxembourg advancing to 8⅝ to ¾, and Lombardo-Venetian to 1½ to ⅝ pm. Victor Emmanuel obligations were also higher.

FRIDAY, Sept. 6.—Except as regards Caledonian stock, which experienced a fresh rise of ⅜ per cent., the railway share market to-day was dull. A decline of ¼ to ⅜ per cent. took place in Midland, Lancashire and Yorkshire, and South-Eastern. Lombardo-Venetian Railway shares were quoted 1⅜ to 1½ pm. Great Luxembourg experienced a fresh rise. East Indian Railway stock was likewise in demand. Mines were in good request, at full currencies.

The Economist's Railway and Mining Share List.

GLENFIELD PATENT STARCH,
USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

EXTRAORDINARY DISCOVERY—NEW THEORY.
(Medicines Superseded.)
NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and Instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

FRAMPTON'S PILL OF HEALTH,
Price 1s 1½d and 2s 9d per box
This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.
Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.
These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

HOLLOWAY'S OINTMENT.—Be Comforted.—Nothing is more distressing to the mother or well-disposed nurse than to see a child rendered feverish and restless by the skin affections attacking infancy. Holloway's Ointment immediately soothes and ultimately removes such cutaneous complaints. Thousands of testimonials from all quarters pronounce its action to be excellent, speedy, and safe. Its application has been attended with the greatest success by all who have tried it. It cures chafings, sore ears, dandriff, blotches, and pimples, so frequently attacking childhood and even lasting to a later period. No sedative can be found equal to this admirable Ointment for eradicating root and branch all those affections of the skin which annoy in infancy and blemish in after life.

DR HUGO'S MEDICAL ATOMS give immediate relief to all disorders of the head, heart, and stomach. Their action is immediate, they are small, and agreeable to the taste, so that they may be swallowed whole, or eaten as confectionery. Want of appetite is immediately removed by a few doses. All bilious disorders are immediately relieved and speedily cured by them. In indigestion and all disorders of the stomach, one dose immediately gives relief. Bad breath is immediately cured. They are the best aperient and antibilious medicine ever discovered; they are small, and have a most agreeable taste. Wholesale agents, Da Silva and Co., Bride lane, Fleet street. Sold in packets, at 1s 1½d, 2s 9d, and 4s 6d, by all respectable druggists.

ARMY CONTRACTS.—
Commissariat, South Camp, Aldershot,
5th September, 1861.
Tenders will be received at this office until noon on the 3rd October from persons who may be willing to enter into Contract for the supply of FORAGE, in such quantities as may be required from 1st November, 1861, to 31st October, 1862, for the use of Her Majesty's Land Forces, stationed at Aldershot Camp, and within the Command.
The tenders must be properly filled up and signed, and delivered at this office under closed envelope (marked on the outside Tender for Forage), before noon on the 3rd October next, and no tender will be noticed unless made on printed forms, obtained from this office.
ALFRED SALWEY, Deputy Commissary-General.

LAMBERT BROTHERS,
Walsall, Staffordshire, (Established 1830,)
Manufacturers of
WROUGHT-IRON WELDED TUBES & FITTINGS,
Chandeliers, High Pressure Steam and Water Valves.
Patent Metallic Bedsteads for exportation.
*** Illustrated catalogues on application.

TRADE [B/P] MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR,
In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.
Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.
BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.
EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.
Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

PATERSON'S AMERICAN POWDERS, recomended for immediate relief of Indigestion, Sick Headache, Acidity, Heartburn, Flatulency, Loss of Appetite, and Nervousness. The above Powders are also made into Lozenges, for the convenience of travellers, or those who may object to Powders. Powders, 4s per box; Lozenges, 2s per box.—Agents, WILCOX and CO., English, French, and German Dispensing Chemists, 336 Oxford street.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

ROYAL HORTICULTURAL SOCIETY'S Grand Show of Dahlias and other Cut Flowers at South Kensington, Wednesday next, September 11. Open at One. Tickets, 2s 6d each; on the day, 3s 6d; at the Gardens and of the principal music sellers and librarians.

ROYAL LYCEUM THEATRE.
Manager—Mr Edmund Falconer.
Triumphant success and fourth week of the new Comedy WOMAN; or Love against the World, every evening. Principal characters by Messrs Walter Lacy, Addison, Herman Vezin, Joseph Robins; Mrs Charles Young, Mrs Weston, Miss M. Morton, and Miss Lydia Thompson. Every performance of the Comedy elicits most enthusiastic applause from a crowded audience. (See opinions of the Press.) To conclude with, every evening, the new successful Farce of THE FETCHES; or the Inconvenience of a Single Life. Tim O'Reilly, Mr Edmund Falconer; Mary Brady, Miss Lydia Thompson, in which she will dance her celebrated Irish Jig. Prices as usual. Doors open at half past 6, to commence at 7. Box office open from 11 to 5.

NEW THEATRE ROYAL ADELPHI.
Sole Proprietor and Manager, Mr B. Webster.
This Theatre will re-open on Monday, Sept. 23, when Mr and Mrs Dion Boucicault will re-appear in THE COLLEEN BAWN. This drama will be played for a limited number of nights, during the preparation of the new American drama by Mr D. Boucicault, entitled THE OCTOROON, or LIFE IN LOUISIANA. Box office open on Thursday, Sept. 19.

POLYTECHNIC INSTITUTION.—Return of J. H. Pepper, Esq., F.C.S., A. Inst. C.E., who will receive pupils and perform analyses in the Laboratory, and deliver his popular scientific Lectures on VENTILATION for one week longer, daily at 3 and 8 o'clock, except Tuesday and Wednesday. New Musical Entertainment, entitled "The Rose, the Shamrock, and the Thistle," by G. A. Cooper, Esq., assisted by Miss Grace Barrow and Miss Amelia Talma, every evening. Re-engagement of Master Arlidge, the youthful pianist, accompanied by Master Jefferys, the juvenile pianist, daily at a quarter to 4, and Wednesday evenings. The New Series of Magnificent Dissolving Views, with descriptive lecture, by J. D. Malcolm, Esq., illustrating "The Citizen of the World." All the other Entertainments as usual. Open from 12 to 5, and from 7 to 10. Admission to the whole, One Shilling.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of their most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

KEATING'S PERSIAN INSECT DESTROYING POWDER.
This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.
Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension as it has no qualities deleterious to animal life.
Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.
Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

KAMPTULICON FLOOR CLOTH.

E. GOUGH AND CO., ORIGINAL PATENTEES & MANUFACTURERS,

12 BUSH LANE, CANNON STREET. MANUFACTORY—GREENWICH ROAD.

TRELOAR'S CORK FLOOR CLOTH,

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.

.. for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 5s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

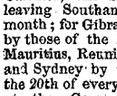
"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

STEAM NAVIGATION OF THE DANUBE.

—The magnificent Steamers of the Imperial and Royal Danube Company, Vienna, are now plying from Linz to VIENNA, Pesth, Basiasch, GALATZ, CONSTANTINOPLE, ODESSA, &c. From London to CONSTANTINOPLE (by railway from Czernavoda to Kustendje) in seven days. Excellent accommodation for passengers. Merchandise and personal effects forwarded at through rates by Charles Nugent and Co., Custom House and Forwarding Agents, 30 London wall, E.C.—For particulars apply to Messrs Pietroni and Draper, 31 London wall, E.C.



OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX. The following, or other vessels, are appointed to sail from Liverpool, calling at CORK to receive the mails:—

NIAGARA, for BOSTON, Saturday, Sept. 21.
*ASIA, for NEW YORK, Saturday, September 28.

*Taking Passengers and Goods for Nassau, to be transferred at New York on board the R.M.S.S. Karnak.

Passage money, including steward's fee and provisions, but without wines or liquors:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage.—Apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. MacIver, Queenstown; or D. and C. MacIver, 8 Water street, Liverpool.

BLACK BALL MONTHLY AUSTRALIAN CLIPPERS.

LONDON to SYDNEY.

PLANET, A 1, at Lloyd's, 11 years, (special survey), 667 tons register, to sail 10th September. This well-known high-class Australian clipper is famous for the delivery of cargo in the most perfect order, is now loading in the London Docks. Has spacious full poop accommodation for passengers.

LONDON to ADELAIDE direct.

HARWICH, A1 9 years, 613 tons register, J. Franklin, commander. This favourite regular trader made the last passage to Adelaide in 83 days, and offers the best opportunity to shippers of season goods and passengers.

LONDON to MELBOURNE direct.

BLUE JACKET, 1,442 tons register, loading in the East India Docks, receiving goods until the 20th September, unless previously full. This far-famed ex-Royal Mail Ship landed the mails from England in the colony in 68 days, and is celebrated in the trade for the regularity of her passages and sound delivery of cargo; offers the best opportunity to shippers of fine goods, and passengers.

LONDON to QUEENSLAND.

Under arrangement with the Queensland Government. Free grants of land. Passage money, £18 and upwards. Packet for September.

SALDANHA, A1, 1,563 tons register, 3,000 tons burthen. This magnificent three-decked clipper has a flush deck forming a promenade of 200 feet; her saloon and between deck accommodation for all classes of passengers are unsurpassed, and, being the largest and finest ship ever sent to the colony, offers the best opportunity to passengers and shippers. Free land grants, under the Government regulations, to the amount of £30, given to all persons paying their own passage by this ship. All further information given by applying to H. JORDAN, Esq., representative of the Queensland Government; to JAMES BAINES and CO., Liverpool; all Agents for the Black Ball Line; and to T. M. MACKAY and CO., 1 Leadenhall street, E.C.

*** Paris service daily.

IMPERIAL LIFE INSURANCE

COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.
James Gordon Murdoch, Esq., Deputy-Chairman

Thos. G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend *sums* of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

THE MERCANTILE FIRE

INSURANCE COMPANY.—The Board of Directors having determined to institute a careful examination of the Tariff of Rates for the Insurance of Merchandise in the port of London, have resolved to transact provisionally this class of business at the rates adopted by the existing Companies, but with the undertaking that if the result of their examination should be a reduction of their rates on any class of risks within three months from the present date, they will return the difference on all insurances effected before the commencement of their revised tariff.

31 Threadneedle street, London, Sept. 2, 1861.

Charles Richard Harford, jun., Esq. (Lloyd's.)

BANKERS.

Messrs Glyn, Mills, and Co., Lombard street.

SOLICITORS.

Messrs Bircham, Dalrymple, and Drake, 46 Parliament street, Westminster.

The Directors have pleasure in stating that they are now prepared to entertain proposals for insurance on all classes of risks in the United Kingdom. The rates of premium in all cases will be as moderate as possible, and governed in each case by a careful consideration of the risk proposed.

The Company, in arriving at the rate to be charged, will give the insurer the full benefit of any improvement that may be made in the peculiar features of the risk or on the construction and arrangement of the premises.

The Company will ever distinguish itself in its promptitude and liberality in the settlement of claims.

The importance of the subject of insurance being now fully understood and appreciated, it becomes indispensably necessary that every company which undertakes to replace the loss occasioned by fire should be enabled to show its undoubted ability to perform its engagements.

As ample evidence of the standing and position of THE MERCANTILE FIRE INSURANCE COMPANY, it may be stated that its subscribed capital is Two Millions Sterling, and that the capital already paid up and invested amounts to Two Hundred Thousand Pounds.

Forms of proposal and every information will be furnished on application at the temporary offices, 31 Threadneedle street, London, E.C.

ANNUITIES.

NATIONAL ASSURANCE AND

INVESTMENT ASSOCIATION.

THE LANDS IMPROVEMENT COMPANY

(incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere, with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

DEBENTURES.—SCINDE RAILWAY COMPANY.

—The Directors are prepared to receive applications for Debentures at par, bearing guaranteed interest at five per cent. per annum, for the purposes of the Indus Steam Flotilla.

The Debentures are for five years, and may be renewed for five years at the same rate of interest.

The Debentures may be converted into Indus Steam Flotilla Capital Stock, at the option of the holder.

Full particulars may be obtained at this office.

THOMAS BURNELL, Secretary.

Scinde Railway Company, Gresham House, Old Broad street, August 15, 1861.

MADRAS RAILWAY COMPANY.

—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

A GENTLEMAN, well acquainted with Accounts and Bookkeeping, and who has had considerable experience in China and America, is desirous of obtaining employment at home or abroad. The advertiser understands the Chinese language, and can give unexceptionable references.—Apply to K. C., care of Messrs Sawyer, Brothers, Castle court, Birchin lane.

CLERK.—A YOUNG MAN IS desirous of obtaining a situation in a Merchant or Ship Broker's Office. He writes a good hand, is quick at figures, and knows something of bookkeeping. He has also a little knowledge of manufactures (piece goods), and how to buy them. Would have no objection to go abroad.—Letters addressed to A. B., care of Mr Roberts, 17 Brompton row, Brompton, will be punctually attended to.

WEST INDIES.—THE Advertiser has had many years' experience in the West Indies, and offers his services to any House engaged in the Trade, to go out to any of the islands as a Partner or Manager, or to take consignments. First-class references can be given.—Address, S. M., Mr Chas. Everett, 75 Old Broad street, City.

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

TAYLOR WATT AND CO., Merchants, Auctioneers, Commission Land and Estate Agents, Wanganui, Province of Wellington, New Zealand.
London Agent:—BERNARD LEWIS, Wine and Colonial Merchant, 1 St Michael's House, Cornhill, London.
No charge for storage on goods consigned for sale.

TO BANKERS, INSURANCE COMPANIES, BROKERS, AGENTS, and OTHER CAPITALISTS, &c., &c.
LOAN OF MONEY.
The Corporation of Dublin, being empowered by "The Dublin Corporation Water Works Act, 1861," to Borrow, on Mortgage, for the purposes therein specified, the sum of £300,000, on the security of the Municipal Rates leviable under said Act, and being desirous of immediately raising a portion of the said sum of such security, will, before the 1st day of October next, receive Written Tenders from all persons willing to advance the same, or any part or parts thereof, for such term or time, and at such rate of interest as may be agreed upon.
To facilitate the sale, transfer, or other disposition of the securities, the Corporation will grant, at the option of the lenders, one or more mortgage or mortgages for the sums to be advanced by them respectively, but no instrument will be issued for any sum under £100 sterling.
For farther particulars as to the nature and value of the security, and the statutable powers and provisions in reference to the same, apply to Alexander Farquhar, Esq., Town Clerk, City Hall.
All tenders to be under cover and seal, and addressed to "The Water Works Committee," City Hall, Dublin.—By order,
ALEXANDER FARQUHAR, Town Clerk.
City Hall, September, 1861.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

12 AND 13 FETTER LANE, LONDON, E.C.

ROYAL INSURANCE COMPANY,

HEAD OFFICES:—29 LOMBARD STREET, LONDON, AND ROYAL INSURANCE BUILDINGS, LIVERPOOL.

Branch Offices:—Manchester, Birmingham, Bristol, Leeds, Dublin, Glasgow, and Edinburgh.

Extracts from the Report for the Year 1860.

"The success of the Company, even in its earliest years, received the marked attention, and elicited the surprised comments of writers best acquainted with the history of Insurance Companies.

"Fire Premiums for 1860 equal the Total Fire Premiums for the Seven Years 1845 to 1851.

"Life Premiums for 1860 exceed the Entire Life Premiums for the Eight Years ending 1852.

"Purchase of Annuities in 1860 largely exceeds the similar receipts for the first Ten Years 1845 to 1854.

"This progress, it is believed, is unsurpassed, considering that it applies to each of the three branches of the business."

FIRE BRANCH.

"The Fire Branch has certainly shown no exhaustion during the year 1860 of that impetus which had previously brought it to a position of the first magnitude among the Insurance Companies of the United Kingdom. The Fire Premiums in 1859 had advanced to the sum of £228,314 7s 3d. In 1860, the amount of Fire Premiums has arrived at a sum of £262,977 19s 11d, showing an increase of £34,663 12s 8d, exceeding the large advance of the preceding year, so that in two years the Fire Revenue of the Company has been enhanced by the enormous sum of £66,829 17s 5d.

"The Parliamentary Report of Returns of Duty paid to Government for the year 1860 exhibits the augmentation of the business in a more prominent way, as it affords the means of comparison with other Companies. The Proprietors will be gratified to learn that the increase of Duty paid by the Royal in the last year is more than double that of any other Company, either London or Provincial, whilst only one of those Companies even approaches to 50 per cent. of the advance of this Company. Our increase actually equals 30 per cent. of the entire increase of the whole of the Metropolitan Offices combined, whilst of the Provincial Offices it forms upwards of 30 per cent. of the total advance of the other 28 offices established out of London."

LIFE BRANCH.

"The Reports of the Company for several years have had invariably to announce a constant periodical expansion of Life Business, the new Policies of each succeeding year showing an advance over the one that had immediately preceded it. A similar result is shown in the year 1860, the Premiums of New Policies, after deducting Guarantees, being £15,079 17s 10d, which is an increase in that item of £1,993 17s 5d above the amount received for the year 1859.

"But even this advance is small when compared with the sudden and remarkable momentum which has been given to this branch of the business in the present year (1861).

"It was not until the commencement of the year that the public seemed to have become fully acquainted with the fact that the Royal Insurance Company had published late in the last year an account of the investigation into the assets and liabilities of its Life Department, under a novel form, and in as plain and intelligible a manner as the abstruseness of the subject admitted, together with the entire statements and valuations necessary for that purpose.

"It is conjectured from the extensive notices of this pamphlet and its accompanying diagrams, which have appeared in the periodicals of the day, that it has largely attracted the attention of vast numbers of persons in all parts of the United Kingdom as well as in other parts of the world. Indeed, a most satisfactory and conclusive evidence that such is the case is afforded by the fact that the sum assured on new policies in the six months to the 3rd June of the present year is actually fifty per cent. in excess of the sum assured in the corresponding months of the year 1860, although the latter amount in itself exceeded the sum assured in any like previous period of time.

"If this success be continued, the Royal Insurance Company would, with respect to the amount of its new business, be at once placed (at least with one or two exceptions) at the head of all the Insurance Companies doing business in this country, and the anticipations of the last report, to the effect that the details of the life business then to be published would form an epoch of the establishment, will have a speedy and a very happy realisation."

SPECIAL ADVANTAGES OF THE LIFE BRANCH.

PROFITS.—Large proportion returned every five years to policies then in existence two entire years.
Expenses chiefly borne by the Fire Branch, in order to increase the bonus to be returned.

LIFE BONUSES DECLARED,
Two per cent. per annum on the sum assured; the greatest bonus ever continuously declared by any Company.

SECURITY FOR BOTH FIRE AND LIFE BRANCHES.
Capital, Two Millions sterling.
Accumulated funds in hand exceeds £600,000.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary.

ANNUITIES.

NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION.

3 Pall Mall East, London.
Empowered by Special Act of Parliament, 17 Vic. cap. 43.
Established A.D. 1844.

IMMEDIATE ANNUITIES granted on very favourable terms.

The Tables for Reversionary and Deferred Annuities are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age and the uncertainties of health and fortune.

PETER MORRISON, Managing Director.
Prospectuses sent free on application.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.
64 Cornhill, E.C., January, 1860.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

Charles Richard Harford, jun., Esq. (Lloyd's.)

BANKERS.

Messrs Glyn, Mills, and Co., Lombard street.

SOLICITORS.

Messrs Bircham, Dalrymple, and Drake, 46 Parliament street, Westminster.

The Directors have pleasure in stating that they are now prepared to entertain proposals for insurance on all classes of risks in the United Kingdom. The rates of premium in all cases will be as moderate as possible, and governed in each case by a careful consideration of the risk proposed.

The Company, in arriving at the rate to be charged, will give the insurer the full benefit of any improvement that may be made in the peculiar features of the risk or on the construction and arrangement of the premises.

The Company will ever distinguish itself in its promptitude and liberality in the settlement of claims.

The importance of the subject of insurance being now more fully understood and appreciated, it becomes indispensably necessary that every company which undertakes to replace the loss occasioned by fire should be enabled to show its undoubted ability to perform its engagements.

As ample evidence of the standing and position of THE MERCANTILE FIRE INSURANCE COMPANY, it may be stated that its subscribed capital is Two Millions Sterling, and that the capital already paid up and invested amounts to Two Hundred Thousand Pounds.

Forms of proposal and every information will be furnished on application at the temporary offices, Threadneedle street, London, E.C.

KENTISH TOWN COLLEGIATE SCHOOL, N.W.

—Head Master, DR SHERRIN, F.R.G.S.—The above school offers high advantages to parents seeking for their sons sound practical tuition, combined with domestic comfort, and careful moral and religious training. Premises very commodious. Situation most healthy. Masters selected with great care. For prospectus and references, which are unexceptionable, apply to Head Master, Leighton House, Kentish town.

THE DUTY OF THE BANK OF ENGLAND IN TIMES OF QUIETUDE.

The year 1861 has been singularly fertile in monetary discussions. In the early part of the year the high value of money gave rise to many comments; at the present moment the low value suggests almost as many. As a few months since everybody asked 'Where will the Bank go *up* to?' so now every one asks 'Where will the Bank *go down* to?'

It is impossible to deny that the duties of the Bank in times of quiet and plenty are at least as important as those which fall to their lot in times of scarcity and disaster. The duties of a time of ease are quieter and tamer and less conspicuous, but they have ultimate consequences as momentous, whether for evil or for good, as those of an awful momentous crisis. It is in times of plenty that the seeds of disaster are scattered; it is in times of plenty that there is an opportunity for financial discretion. During the extremity of a crisis, and even for a long previous period, the course of the Bank of England is scarcely *optional*. A definite course of conduct is chalked out before it by pressing necessity. But in times of quietude there is a choice really open to it. It can actually select the policy which it desires; and it is, therefore, very important to consider which it should select.

Two extreme doctrines are laid down for the guidance of the Bank. One of these was advocated by the late Mr Tooke, and was imbibed from him by several influential thinkers. According to this the Bank should fix on some arbitrary rate, say five per cent., or four per cent., or three per cent., below which it should not under any circumstances be induced to descend. However large might be its funds—however idle those funds might be lying—however low the market rate might be,—the Bank should, according to these teachers, hold resolutely aloof,—discount no bills and seek to discount no bills,—but augment its reserve as much as it can, and preserve the mercantile public from the fatal consequences of an "excess in money."

A directly opposite school of teachers say that the Bank should always make as much money as it can; that it should look to itself; that it should consider only its proprietors, and be watchful only about its dividends; and that to increase its profits it should always struggle for a share in the business of the day, if not at any one rate, then at a different and lower rate.

But neither of these doctrines is commonly accepted by the mercantile public, and neither is in itself correct. It would be almost impossible for any Bank to say it would never charge less than a stated sum for money. The Bank of England have very many valuable discount customers who bring their bills to them exclusively. They cannot in fairness say, 'You 'shall never pay less than a fixed rate, though we reserve to 'ourselves the option of charging you at our discretion any 'rate however high.' Nor would it be desirable to withdraw the vast funds of the Bank from the market at any one arbitrary point. Nothing could be more disturbing in its practical effect than a hoard of money at certain moments to be suddenly abstracted, at others to be as suddenly discharged upon the transactions of Lombard street.

Nor is it desirable that the Bank of England should be always eager for every possible sixpence of immediate profit. No wise man of business looks to momentary gain without considering ultimate results. The ultimate interest of the proprietors of the Bank, we believe, will be best advanced by the most complete discharge of the Bank's duty to the nation. They have a national function. *They keep the sole bullion reserve* in the country. It is their duty to keep it, so that our trade may be secure and our credit ample. If they do so, they will, as last half-year's accounts show, pay a good dividend to their proprietors; but if they do not do so, they run the risk of having no money to pay their way, of breaking the existing law, of putting themselves and their proprietors at the mercy of a Government from whom they have had to crave a letter of licence.

The duty of the Bank Directors in a time of ease and quiet is to move with the market, or *after* the market, but not to move too rapidly. Before they make a new reduction, they should see that their reserve had augmented since the last reduction. They should be sure that they were taking the legitimate advantage of the times. At each stage they should see that they had accumulated some money against a day of future difficulty. They should not remain immovable far above the market rate, as some have recommended; nor should they vainly try, by suddenly reduced rates, to snatch at business which their competitors in Lombard street will certainly prevent their really obtaining. They should strengthen themselves gradually in the easy times which alone admit of their doing so, and they should at the same time take care to be near enough to the market rate to preserve their long-established and profitable connection, and to retain the vast business which is the true source of their influence and their power.

RUMOURED INTENTIONS OF THE BRITISH GOVERNMENT.

The New York papers state, on the authority of their Washington correspondents, that advices have arrived from Mr Adams, United States Minister in this country, of the intention of the British Government speedily to recognise the independence of the Southern Confederacy. Some of the English papers appear to believe the allegation, and comment upon it with much severity. We confess that we give it little credit. It is not in itself probable, and the paragraphs in the American journals, said to give the sense of Mr Adams' despatches to his Government, scarcely bear out the statement. The *Tribune's* account is this:—"Mr Adams, Minister at St "James's, writes that in the British mind the independence

"of the rebels is fully admitted as a military and political "necessity; that their acknowledgment by England is but a "question of time and prudent courtesy; that while "Britain is impatient to get cotton from the South, in ex- "change for manufactured goods, she is anxious not to lose "Northern markets, and is unwilling to part with her hope "of breaking down the Morrill Tariff, by the same means "with which she chained the North with the Walker Tariff; "and that two or three more successes like that of Bull Run, "would entitle the Slaveocracy to immediate recognition."

There can be little doubt that our Ministers, in common with nearly every one on this side the water, consider Secession as an irrevocable step, which the Secessionists will be able to make good against the most strenuous efforts of the North; and that as soon as it is made good, they will be prepared to accept it as a *fait accompli*. But this is a very different thing from an intention to recognise the new Republic before its separate existence has been fully established, either by a prolonged maintenance of the position it has taken up, or by such signal successes as should place its final triumph beyond a doubt. No one can say that the contest as yet has reached either of these phases. The battle of Bull's Run, though of good augury for the South, was in no sense a decisive conflict. The real relative strength of the two parties has not yet been in any degree tested. Any formal recognition of the Southern Confederacy by this country would therefore be premature, and would give just offence to the United States. We do not apprehend that our Government have seriously entertained any such design. It would be contrary to our usual practice, and no substantial benefit could arise from it.

Our principle is, and has been for a very long period, to acknowledge all Governments *de facto*, as soon as the fact is certain and has a reasonable aspect of permanence,—but not till then. When we have departed from this practice, it has been in the direction of delaying our recognition too long—not of making it too early. We did not acknowledge the independence of Greece till she had maintained a bloody struggle against the Turkish Empire for a long series of years, and till it appeared that her population would have to be exterminated before they could be subdued. We did not acknowledge the Republics of South America till all the efforts of the Spanish Government to subdue them had obviously and entirely failed. Much as we are interested in the Italian cause, we abstained from recognising Victor Emmanuel as King of Italy till Gaeta had fallen and Francis II. had fled. To act with less reticence and deliberation in the case of America, would be to betray a partiality which we have hitherto taken especial pains to avoid having imputed to us with any appearance of justice.

Moreover, we can conceive of no object which would be served by such premature recognition. If indeed recognition of Southern independence would terminate the war, or put an end to the blockade, there would exist a strong motive for stretching a point on the occasion. But it would be a mere barren diplomatic proceeding, and would in no way affect our action in reference to the pending struggle. We have already conceded to the Seceding States all the established rights of belligerents; and we could do no more were they admitted as members of the regular commonwealth of nations. We have accepted the blockade of their ports wherever it is *bonâ fide* and effective;—and our recognition of their national existence could involve no modification of this arrangement; for by the law of nations any country has a right to blockade the ports of any other if it can, whether it calls that country a rebel, or considers it as an independent enemy. The concession to the new Confederacy of the claim to send us an Ambassador would be of little service either to them or to us; though as soon as they have fairly conquered and maintained their position, there has been nothing in their conduct towards England since this unhappy contest began, which should induce us to delay such concession or to grant it with reluctance. On the contrary, their behaviour has contrasted most favourably—as far as this country is concerned—with that observed by the Northern Republic. From Mr Seward and Mr Seward's *employés* we have met with little but discourtesy. Indeed, the proceedings of the whole Federal Cabinet have throughout been marked by a degree of injudiciousness and clumsiness amounting almost to incapacity. Their correspondence with General Butler in reference to the treatment of the slaves in Virginia was strangely indicative of confusion and perplexity; and their views do not seem much more consistent or clear now, if we may believe a recent telegram;—according to which they have decided to emancipate the slaves of all *Secessionists* in Missouri, but *to confirm the slavery of those belonging to Unionist masters*,—a decision which, if genuine, must bring them into curious collision with their Abolitionist supporters, and which signally betrays the hollowness of the anti-slavery pretensions put forward on their behalf, on which we have commented in another article. They are waging, too, a vehement war against the freedom of the Press,—in which they are worthily seconded by the city mobs,—seizing and suppressing all journals that venture to express anti-Unionist or pacific opinions, with a peremptory and lawless despotism which could not be surpassed either in France or Austria, and which would seem to betray the existence of an opposition party in the North, too numerous and too dangerous to be allowed to speak their sentiments. In the short space of sixteen days *fifteen* newspapers have either been seized, suppressed, or otherwise interfered with, by legal or illegal violence,—tarring and feathering of the obnoxious editors having been resorted to in more than one instance. Surely, if the Federalists are strong to conquer the South, they should be strong enough to endure the free speech of Southern sympathisers.

Other arbitrary interferences with personal liberty have been resorted to with greater or less reason. But perhaps the most remarkable occurrence of all is the resort of *the* free Government *par excellence*—the model Republic of the world—to the discarded and discredited contrivance of tottering European monarchies, the Passport System. Mr Seward,—Secretary of State of a country which lives by its unfettered intercourse with the world at large, which annually receives a quarter of a million of emigrants, which every day sees enter into its harbours crowded steamers from every State in Europe,—has issued a notice, that "no person shall in "future be allowed to land in the United States or to leave "them without a passport regularly signed" by the foreign authorities, and countersigned by the American authorities! He has actually issued this notice without either consulting the foreign Ministers at Washington, or officially communicating it to them. This is strange and silly and indecorous enough, but if our accounts are to be trusted, he has since promulgated another order (which was published in some of our papers last week) intended to modify the above. In this latter document he informs the public that it is not intended to interfere with the regular passenger traffic on railways; and that therefore British subjects may come from Canada without passports; but that if the United States agent at the frontier stations shall think fit, he may *detain* any person whom he suspects, *until he has communicated with the Secretary of State at Washington!* Is this mere incapacity in high places, or something worse? If such men manage the affairs of the Union, we may be prepared for any discomfiture, for any blunder, for any—even the suddenest—collapse. The Confederates, if inferior in wealth and numbers, have assuredly the advantage in military and administrative ability.

AMERICAN COMPLAINTS AGAINST ENGLAND.

TIME and reflection might have been expected to bring the Northern Americans to a fairer and more reasonable tone of feeling in relation to the conduct of Great Britain, but they do not appear to have done so. It was not unnatural that in the first moments of irritation and alarm, some disappointment and even anger should be felt when it was found by the excited Unionists that we in this country, however deeply and anxiously interested in the strange events which were taking place, did not share their somewhat exaggerated sentiments. Therefore, when American journals raved, American Abolitionists whined, and American *senat*[illegible] menaced, and even American diplomatists blustered in public in a fashion which covered them with shame, we contented ourselves with quietly explaining our proceedings, and awaited without indignation and in patient confidence the return of reason and of temper,—satisfied that justice would be done to us at last. But when day after day the old charges are reiterated, and the strongest proofs are given that the old

soreness still remains; and when a lady of the reputation of the author of "Uncle Tom's Cabin" writes a formal letter of reproach and accusation to an English Earl; and when a politician of the standing of Lord Shaftesbury sends Mrs Beecher Stowe's letter to the newspapers,—it is high time to endeavour to place facts and principles in their true light,—to point out what we really feel and what we have really done,—and to show how utterly unjust and irrational are obloquy showered upon us alike for our action and our inaction, for our speech and for our silence. We feel the more called upon to say a few words on this score, because one or two very respectable English journals have been led away by their strong anti-slavery predilections to indorse some of the reproaches and to connive at much of the injustice.

It is not easy to make out with any great definiteness in what our offence consists. Neither Mrs Stowe nor her British echoes condescend to specify anything in particular which we have done wrong. We did, indeed, at the outset announce that we should acknowledge in both parties equally the usual rights of belligerents; but it is now admitted that we could not decorously have done otherwise,—not indeed have done otherwise at all without a virtual violation of neutrality; and the Federal Government has found itself obliged to do a few months later what the British Government only did a few months earlier. Every Confederate prisoner whom the United States have omitted to hang as a rebel, every privateer seaman whom they have failed to hang as a pirate, is an additional confession on their part of the correctness of the course adopted by this country. This clause of the indictment, therefore, is not now repeated; yet the concession alluded to is in reality the only overt act we have committed. All that we have actually *done*, then, is confessedly unimpugnable. But Mrs Beecher Stowe says that our *sympathies* are astray, and the *Spectator* alleges that we are *meditating* wrong. As far as we can extract any distinct charges from the long letter of the American lady, she declares that we have been false to our anti-slavery antecedents; that we have encouraged and wished success to the rebels; and that we have acted thus out of a mean regard to our own pecuniary interests;—in truth, that we wish success to the South because we are anxious about our supply of cotton, and prize this above all higher considerations. That a Transatlantic Abolitionist should transmit such reproaches is natural enough. That an English journal should adopt and repeat them is less explicable and less excusable.

In the first place—and the misrepresentation has so much in it that is mischievous, not to say malignant, that it is high time to speak out upon the subject—the assumption that the quarrel between the North and South is a quarrel between negro freedom on the one side and negro slavery on the other, is as impudent as it is untrue. The conflict may reach this isssue, may assume this form; but it did not originate in this; it has not even now reached this;—and if ever it does do so, it will be without the design and against the most strenuous endeavours of those who inaugurated the strife and of those who have hitherto conducted it. Can we forget, and does Mrs Stowe suppose we have forgotten, that Abolitionists have habitually been as ferociously persecuted and maltreated in the North and West as in the South? Can it be denied that the testiness and half-heartedness, not to say insincerity of the Government at Washington have for years supplied the chief impediment which has thwarted our efforts for the effectual suppression of the slave trade on the coast of Africa; while a vast proportion of the clippers actually engaged in that trade have been built with Northern capital, owned by Northern merchants, and manned by Northern seamen? Is it not notorious that the detestation and oppression of the coloured race in the Free States have been quite as bitter and almost as unmeasured as in the Slave States, and have been manifested in a manner perhaps even more revolting to English sentiments of decency and justice? Why, it is only yesterday, when the Secession movement first gained serious head, on the first announcement of Mr Lincoln's election, that the Northerners offered to the South, if they would remain in the Union, every conceivable security for the permanence and inviolability of the obnoxious institution,—that they disavowed in the most solemn manner all intention of interfering with it,—that their leaders proposed compromise after compromise in Congress *all based upon the concession that Slavery should not be meddled with*, and that the "Personal Liberty Laws," which were supposed to neutralise the action of the Fugitive Slave Law, should be reconsidered with a view to their modification or repeal. Since then—since the war has been actually commenced—Generals and other constituted authorities have distinctly announced that they had no idea of liberating slaves or of interfering with the rights of negro ownership; and they have felt the disposal of the slaves who flocked to their camp to be one of the most obnoxious and embarrassing questions which could have been forced upon them. The very last arrival from America brings a curious comment on these philanthropic pretensions in the announcement that in Missouri the slaves *of Rebels only* were to be emancipated, while those of loyal subjects were to be retained in servitude!* In the face of all these facts, it surely argues something more than zeal and something less pardonable than blindness on the part of Mrs Stowe to draw up an indictment against England because she did not at once regard and treat the struggle as an anti-slavery one, and side enthusiastically with the Northerners as Emancipationists in the mass,—because she did not, intuitively and resolutely, put an interpretation upon the civil war which its authors and leaders anxiously laboured to guard against,—and which (we may add) nothing in their antecedents would have warranted us in fixing upon them. It is true enough that it was the aim of the Republican party which elected Mr Lincoln to prevent slavery from spreading into the unsettled Territories, unless by the deliberate resolve of those Territories when erected into States. It may be true that the success of the North, if complete and unconditional, would enable them to confine slavery within the 15 States which have already adopted it, and *might* thus lead to its eventual extinction,—though this is rather probable than certain. It is no doubt honourable to Mrs Stowe, and to that earnest and devoted abolition sect of which she has in Europe been the stirring mouthpiece,—that they are determined to make the present disastrous civil struggle an anti-slavery conflict, and to convert what was a war for political supremacy into a war for negro emancipation. If they can do so—if they can thus educe good out of evil, without resorting to means which look very like doing evil that good may come—we shall rejoice most earnestly at the beneficial result. But it is to say the least something premature to require that we should from the outset have recognised in the contest a character which, even up to the present hour, *they have failed to imprint upon it*. Unprejudiced spectators have repeatedly deplored as the inherent weak point of their cause that there was no distinct or noble moral purpose stamped upon it. We have heard abundance of misty declaration about patriotism and freedom on both sides,—and not more definite on one side than on the other; but it has been impossible to say what great principle was in reality at stake. And there is really something staggering in the audacity which now demands our sympathy for the Northerners on the ground of that very moral grandeur in their cause, *the absence of which* has prevented our sympathy from being enlisted on their side. Let the conflict once become avowedly and honestly and irretrievably a war for the extinction of Slavery, and we suspect the enthusiasm and excitement of Great Britain would rival that of the Americans themselves.

This, therefore, *not* being a war for the emancipation of the negro race, but on the contrary being waged on the part of the North by men who, in an overwhelming proportion, have hitherto dreaded and deprecated such emancipation as involving the probable ruin of their Southern customers and debtors,—on what other ground can we be fairly called upon to sympathise so warmly with the Federal cause? *Apart from the slave question* we really do not see what ground can be alleged. It is true that the conduct of those Southern politicians who, while holding high office under the United States Government, employed their official position to prepare the success of the Secession movement by arming the South and denuding the North was simply villainous and base, and their violence and intemperance at the commencement of the movement blameable in the extreme. And no one can say that

* We understand, however, that other versions speak of the proclamation as applying to ALL slaves. Probably all or nearly all the slaveholders in Missouri are Secessionists.

the unanimous opinion of Great Britain on these transactions was not expressed in the plainest and most indignant language. But what is there, what has there been, in either the recent or the habitual conduct of the United States Government or people that should entitle them to *command* our sympathies or our wishes for their triumph, or to complain, in the tone of men who have been hurt or wronged, because those sympathies and good wishes are lukewarm or undecided, or even altogether withheld? They have themselves, and themselves only, to thank if Great Britain looks on somewhat calmly on their difficulties. Never did a nation, not avowedly inimical, labour so hard to alienate all friendly feeling. They have habitually treated England in a way which England would have borne from no other country. How did they behave to our Consuls and Ambassadors during the height of our Crimean difficulties? With what vulgar insolence and thoroughly unkind feeling did too many among them take the opportunity to express their sympathy with our antagonist? Not a year has elapsed since a Senator from the North, well acquainted with this country, and recently received here with every kindness and attention, and now holding the responsible position of Secretary of State under Mr Lincoln, openly avowed his wish that the seizure of Canada should be made to compensate for the secession of the South. In the height of the strife, New York papers and New York politicians were not wanting who exhorted the combatants, now that they had large armies in the field, to employ them, not against each other, but against Great Britain—to compromise their internal quarrel *(the Slave question included)* and invade the British territory without notice and with overwhelming force. And, even if these exhortations might be passed over as the ravings of mere individual ill-feeling,—what is to be said with reference to the avowed and virulently expressed animosity of the three *accredited* Ambassadors of the Northern Federation, who not long since astounded the diplomatic world of Paris by their indecent harangues,—and not one of whom has been recalled, or (so far as we know) even reprimanded for the discreditable exhibition? Lastly, and not to extend needlessly the list of grievances, is the Morrill Tariff a title to our gratitude and our sympathy? or is the certainty that, in case of Northern triumph, that Tariff will be extended over the whole Republic a reason why we ought to be clamorously anxious for their success?

But putting aside—as perhaps we ought to do—all natural resentment, and all merely English considerations, why should we desire such a complete triumph and conquest on the part of the North as could not fail both to confirm all their national defects, and to stimulate their insatiable ambition? With their warlike spirit whetted by a war, and their habitual arrogance augmented by so signal a success, what chance of peace and comfort would there be for any other State that was unfortunate enough to have any relation with them? Ought we to sympathise with them (as they plead) as being the special champions and the choicest specimens of freedom? They claim this character, we know; but we entirely demur to the admission of their claim. For a long time the true liberty of individual citizens has been as little regarded and as ruthlessly trampled down in the United States as in Austria or in France—and in Washington and New York as in Charleston or Louisiana. The oppression has been exercised in a different name and by a different despot—that is all. The violent suppression of unpopular opinions, the ostracising of the more moderate and wise of the public men, the Lynching of the few courageous citizens who stood up for their conscience and their civil rights, have not been confined to the wild West or the slavery-stained South. Real liberty, as *we* understand it,—liberty to act and think and speak as each man chooses,—we have no scruple in saying, did not exist in the United States before the disruption, and does not exist there now;—would have no chance of raising its head if the triumph of the North were to be signal and complete; and is far more likely to be promoted by their defeat than by their victory. This language will, we are too well aware, be unwelcome to Americans and to the admirers of American institutions; but its deplorable truth cannot be gainsaid. What candid man will say that there is personal and moral freedom in the Free States now, or that there is likely to be when all opposition shall have been put down by the sword?

This article has already extended to an undesigned length but we must add a few words in reference to the charge that our want *of* sympathy with the North is to be attributed to our interest *in* an undisturbed supply of cotton; that we are backing up the South because we want their crop more than we disapprove their institutions; in a word that, as one of our contemporaries indicates, we have stopped our ears with cotton wool against the cries of the maltreated slaves. The accusation on the part of Mrs Stowe might have been passed over as a natural ebullition of irritated disappointment; but it ought not to have been reiterated and supported by a journal like the *Spectator*, so respectable for its moral earnestness, so distinguished by its marked ability. Nothing in the language or conduct of this country since the beginning of the contest has given warrant for the sneer; on the contrary, everything has tended to manifest its singular baselessness and injustice.—The blockade threatens to deprive us of what is nearly as necessary to us as food, to throw some millions of our people out of work, and to inflict unexampled loss and misery upon our most populous industrial districts. The gravity of the case might almost have excused some interference on our part. But what have we done? At the very outset, our Government announced its intention to respect the blockade, however injurious to ourselves, provided only it was carried on in conformity to the recognised law of nations. They showed also, to say the least, no disposition to facilitate the depredations and reprisals meditated by the South on the commerce of the North, when they prohibited privateers from bringing their prizes into British ports. Our merchants and manufacturers, far from urging the Government to break the blockade or to insist on its abandonment, have not, we believe, raised a single voice in support of such a pretension. On the contrary, they have submitted without a murmur to the warnings and occasional detentions inflicted on their ships by the United States cruisers; and instead of preparing to disregard or violate the blockade, have taken the matter with wonderful calmness, and set themselves vigorously to work to investigate their means of procuring supplies of cotton from other quarters. No doubt, our partial dependence on America for the chief raw material of our manufactures renders us very desirous that the civil war should cease, but we do not know that it need induce us to wish for one issue to it more than for another:—the effectual discomfiture of *either* party would answer our purpose equally well;—and we are quite sure that it is simply untrue and unfounded to allege that our political sympathies have in this case been warped by our mercantile interests. They might be supposed to have been so; but our conduct and language from the first have negatived the supposition. Our *interest* as cotton consumers, we repeat it, is in favour of a termination of the war, but it is not more in favour of a Southern than of a Northern victory—unless in as far as the Protective Tariff of the foolish Federalists has made it so.

We trust that we shall hear no more of these unworthy and unwarrantable accusations. We fully admit that we, in common with the majority of Englishmen, do not believe that the Northern States will be able to reconquer the Southern ones. For many reasons, which we have stated on several occasions, we do not greatly desire that they should;—but both our belief and our desire are wholly independent alike of any attributed indifference to slave-emancipation, and of any selfish anxiety about slave-cotton.

THE ENGLISH MAZZINIANS.

THE English friends of Mazzini are again hard at work. This party, which is represented in the House of Commons by Mr James Stansfeld, the able and eloquent member for Halifax, propose to agitate in England for further means to assist the policy of the "party of action" in Italy, and to shape the course of the English Government so as best to serve the Italian cause. We are not easily tired of re-hearing the pleas of Mazzini's party, because, though we hope little from their modesty and nothing from their wisdom, they have all contracted from their leader so pure and high a purpose that we know, if once they could secure a lucid interval, they are high-minded, able, and disinterested enough to become the most important allies of the Italian

cause. No one can deny that Mazzini did more than any other man to root in Italy that great idea of national unity the practical development of which he has since done so much to hinder. We hope, therefore, even against hope for an improvement in his party's practical policy. And we are always anxious to detect the best elements in their usually flighty and dangerous manifestoes.

In their present appeal there is one and only one very healthy element. They are exceedingly anxious to have done with the intervention of France, and to complete the great work that has been begun without any further French aid. This is quite a legitimate object for an Italian party to take up, and quite a desirable one for English sympathy to aid. There can be no question that if Italy can finish, what it is pure madness to say she could have achieved, *alone*, it ought to be,—nay, that it is worth a considerable risk that the Italian nation should resolve that it will owe no further weight of military obligation to France for the attainment of Italian independence. Thus far we are quite willing to admit that the Mazzinians and their English friends have set before themselves a noble object,—and one which is assuredly not foreign to the wishes of the nation at large, not even to that section of it which they term in reproach the "moderate party." Still no doubt there are different views of the amount of risk at which this independence of French aid ought to be maintained; and, for anything we know, the Ministerialist party may be prepared to accept it with less reluctance and under less pressure of necessity than would be justifiable. Every one knows what England thinks and wishes in this matter,—that the less Italy owes to Napoleon, the better we shall be pleased. But we do not see that any English organisation could be other than an injurious intermeddling with Italian politics. It is for Englishmen as Englishmen, rather than as Italian sympathisers, to sway the foreign policy of the nation. And though none would rejoice more than we to see the English Government supporting Italy, by armed force if necessary, against any unprovoked aggression from the Austrians, or any undue pressure from France,—we are not able to see that the friends of Italy, as such, can do much in the matter. On this head, therefore, though we cordially agree with the views of the Mazzinian party, we do not concur in their wish to re-establish a little English league for the purpose of supporting their efforts.

But when the friends of Italy suggest that Italian organisation is needful because the Government of Italy is too little Italian in heart and hope,—because it "dreads the "claim which might be made by the people to a large par- "ticipation in the political life of their country, should the "national existence be achieved by their own efforts,"—because the South finds itself "annexed to Piedmont, "instead of merging with Piedmont in Italy,"—we say they are spreading mischievous and false ideas which strike at the very heart of the cause they are advocating. If anything can be achieved in Italy now, it is clear that it must be *through* that noble Government which has never flagged for one moment,—not even when deprived so suddenly and awfully of its great head,—in the arduous task of concentrating and guiding the purpose of the nation in times of deadly peril. We say that the one great virtue of Italy, in the strength of which it conquers, has been its calm loyalty to the King and the Administration, the steadiness with which it has followed every movement of the captain's hand, and sometimes even anticipated his thought. It has been the great fault—we might almost say the great shame—of the party of Young Italy that it has endeavoured to shake this unanimity of loyalty,—that it has refused to yield to the Government that kind of deference and willing action without which all Government is powerless. And now this fault, this grave error, has become something like a crime. After all that the Italian Administration has achieved,—after the overwhelming evidence given in the Italian Parliament that it does represent the will of a united nation,—to put forward any views which can sap that confidence and weaken that unanimity is the most dangerous, the most unpatriotic act of which an Italian or a friend of Italy can be guilty.

Can any one, except a Mazzinian, doubt for a moment that Baron Ricasoli yearns for the day when the Italians may enter Rome and Venice with a yearning a thousand times more powerful than any which an English friend of Italy can feel,—with one which is at least as strong as that of Mazzini himself. If Ricasoli holds the hand of Italy, if he says the time is not yet,—the nation should wait without a murmur. The great end is dearer to him than to any other Italian,—the only difference being that he has the knowledge and the judgment to count the cost and to prepare the way. There is no possible method in which Italians can so far hasten Italian freedom and unity as by sustaining their leader, and giving him that mighty power, moral and physical, which is wielded by any man who knows that his lightest word will be implicitly obeyed by a great nation. This is the kind of loyalty which has nearly expelled the foreigner from Italy, and it is the only power which can complete the task.

We say that to impute the motive of "fear" to the present Italian Government,—to hint that it is the reluctance to concede to the people a due share of power over the Government of the country which prevents them calling out two million volunteers as Garibaldi proposed,—is an ignoble thrust at the only moral power which can ever free Italy. What popular right is there which is not already accorded to the Italian people which is possessed by the English people? Or do these Italian sympathisers wish to hint at their favourite scheme of a republic as the probable result of a successful popular demonstration? We trust not. We cannot believe they are so impervious to the great contagion of Italian national feeling as to cling still to a futile *doctrinaire* conception, when the substantial reality of a constitutional monarchy, most dear to the affections of all true Italians, has already been acknowledged by the civilised world. We can only express our belief that their perverse insinuations against the actual Government of Italy will find few friends in England. Whatever England can prudently do to aid the Italian Government in its great work, we are ready to urge her to do. But to help the Italian people to distrust and hamper the noblest Government Italy has ever known, is not likely to be an English task. On the contrary, we will urge the Italians to the last to stand by their Government with patient fortitude, however long it may think it needful to delay the signal for a further step. Where a nation can absolutely trust the spirit, the courage, and the intellectual resources of any Government, there in all matters of judgment it ought to trust and to defer.

MR WILSON'S REASONS FOR GRADUATING THE INCOME TAX SO AS TO RELIEVE INDUSTRY.

THE following is from a Memorandum, of which a portion appeared in the ECONOMIST of January 12, 1861:—

I will now proceed to consider the grounds set up in favour of discriminating rates upon different classes; how far they are founded upon tenable grounds; and how effect can best be given to the claims, on broad principles, affecting classes and not regarding cases of individual exceptions.

In the first place, there is no doubt that the name given to the tax, of "Property and Income Tax," has tended to mislead and to give rise to many of the objections taken. All taxes ought to be paid out of income, and even in the case of what is properly called a Property Tax, the property or capital charged would only be the measure of the tax, and it would not necessarily be the less paid out of income, than if income had been taken as the measure. But it is obvious that, from the first, this tax was meant purely and in every respect as an *Income* Tax only, though from a feature introduced into it in 1842, to which I shall hereafter advert, it has now one element of a *Property Tax*. But the title of the Acts is conclusive of the object: it is an Act to grant out of "*profits*." And I fear, in place of calling it what it was simply, an *Income Tax*, recourse was had to the title of *Property and Income Tax*, with a view to make it more popular at the expense of a misunderstanding of its true character. But I will treat it now as an *Income Tax* only.

In the views which have been adopted by the public in reference to the incidence of this tax, it is plain that two main considerations have directed their conclusions: 1st, the origin of the tax, and the analogy which its incidence ought to bear to that for which it is a substitute; and, 2nd, what

really constitutes income, in the sense which renders it a fair object of taxation.

1. The origin of the Income Tax was to provide a substitute for customs and excise duties repealed and reduced. In the advantages derived from those reductions, it is obvious that all persons, from whatever source their income was derived, participated in proportion to their *expenditure;* and therefore that the incidence of the substituted tax should be as nearly as possible determined by that consideration. It may be said, and with some apparent force, that as the customs duties, which were repealed and reduced, were contributed at the same rate by all persons, whatever the amount or source of their income, therefore the substituted tax should also be at the same rate on all incomes from whatever source derived. But to this argument there is a plain and conclusive reply. In the case of customs duties, the rate was the same, but the amount on which it was paid was determined by the voluntary will of each person in proportion to his *expenditure*, and not in proportion to his *income*, such part of which alone he expended, as the nature of its source justified. If all men expended the whole of their incomes, then it is true that a uniform rate of Income Tax would be equivalent to customs duties. But the actual difference of the fact it is, probably, which has suggested that the fairer method would be to charge the tax on expenditure in place of income, which no doubt in its incidence would be as nearly as possible the same as the tax collected from customs and excise duties. But the objection to taxing expenditure in place of income is, that it would be impracticable. At present, out of 5,589,000*l*, there is collected at the sources, without any return being required from the taxpayer, and without the slightest inquisition into his affairs, no less than 4,039,000*l*, while only 1,550,000*l* is collected from incomes for which returns are required. If the same returns and inquisition were required for the whole tax that are for the 1,550,000*l*, it could not be maintained for a day; or if it were, it could only be under such lax regulations that half would be evaded. But such would obviously be the case if expenditure were the measure of the charge, in place of income. But though such a change be impracticable, still public opinion is strongly influenced by the force of the obvious principle which it involves, although it is not reasoned out in a logical or intelligible manner. In adjusting the tax we must bear this principle in mind, in order to apply it in the most convenient and practical way.

2. What constitutes income in the sense which makes it a fair object for taxation, and especially in connection with the consideration of the tax for which it is a substitute? It is obvious that one man is richer than another, in proportion as he has the command of the greatest quantity of other men's labour, of necessaries and luxuries; in short, in proportion to the amount he is in a condition to expend. It is equally obvious that the same incomes of different men form no exact and accurate test of that ability, viz., to expend; and therefore that income is not a measure of wealth or of the proportion which different classes are bound to compensate the Exchequer for the repeal of customs and excise duties. A person with 1,000*l* a year, in the shape of a perpetual annuity, from rents of land or dividends in the funds, is in a condition to spend the whole of it without impairing his prospects for the future; while a person deriving 1,000*l* a year from a trade or profession has to provide generally against one contingency in the former case, and two contingencies in the latter case. In the case of trade his income stops, at least, with his life; in the case of professions, the income is suspended during sickness or accident, and stops altogether with life. The same amount of income in these three cases obviously represents very different means of present expenditure; and if, for the reasons I have pointed out, expenditure should be the measure of the Income Tax, then the three should be charged at different rates. The habit of public opinion sufficiently indicates the different character of these incomes. In public estimation, which in the long run is generally well founded, 1,000*l* a year from land or funds is very differently estimated, compared with the same sum from a trade or profession, however honourable.

Independent of the difference of incomes derived from those different sources, on the ground that in one case nothing need be deducted in order to make provision for the future, while in the other cases, a large sum should be deducted, and in practice is deducted with that view, there is yet another and very important reason which makes a marked distinction in the true value of the incomes derived from trades and professions, and which shows that those incomes are in many cases rather nominal than real. The profits of trades and professions and of the use of capital, bear some proportion to the risks involved;—whether it be of sickness, loss of health, shortening the ordinary duration of life, or accidental occasional losses to which a pursuit is exposed. In all those cases, by the common law of profits, the gross profit of the year will include the ordinary rates of profit when no such risks exist, and an indemnity for such extra risks. The latter portion of the nominal profit, should be regarded rather in the light of a reserved fund than as income. This principle is recognised in the provision of the Act which makes trade profits to rest upon an average of *three* years. Many who had paid Income Tax from 1842 to 1847, upon large sums, lost more in that year than all they had made during the preceding five years. To meet these losses, a large annual reserve must be laid aside, which, though it is taken as profit for the year, is really used to repay the losses to which the nature of the business necessarily exposes the trader.

It is then plain that, as compared with income from real property, that derived from trade and professions is subject to reduction: first, for a provision against the contingencies to which they are exposed from their precarious nature; and, second, for a reserve fund to meet the risks to which they are exposed.

To remedy the former, it has been proposed to deduct a sufficient sum from such incomes as their recipients pay for the insurance of their lives. No doubt this remedy would be fair if such a reduction were made from all such incomes, whether the recipients insured their lives or not, but it would be a most partial remedy if the allowance extended only to those who availed themselves of that mode of providing for the future. With equal prudence and forethought, and equal self-denial at the moment, different persons pursue different plans, as best suited to their special cases, to arrive at the same object. One man who has a thriving business finds it more profitable to retain his savings, to provide for the future in his own business, where it improves the profits of succeeding years, and adds to the tax; others purchase land, or lend on mortgage; others may invest in railways. So that nothing could be more partial than to attempt to cure this inequality by remitting from the annual income, sums paid for life insurance.

This, then, brings us to the conclusion, that regarding the income tax in relation to those duties for which it was substituted, and admitting that all persons have been benefited generally by the repeal of such duties in proportion to their expenditure, and looking to the character of various incomes with reference to the power of expenditure which they confer, there are three clear and distinct classes, between which an intelligible distinction can be drawn, viz.:—

1. Incomes derived from real property, or from capital alone.

2. Incomes derived from capital and skill combined, in trade, &c.

3. Incomes derived from skill and labour only.

The case of terminable annuities stands upon an entirely different and independent ground, which I will consider hereafter. It has been argued even by some who are in favour of discrimination, that the two latter distinctions (2 and 3) should be placed together; because they say, that although no capital is involved in the exercise of some of the professions, yet, inasmuch as a considerable capital had been involved in education, they are in reality the same as trade. To this argument there are two obvious replies. *The first is,* that if capital is expended in the education of the physician or the lawyer, so it is in that of the merchant and the banker, often, including necessary travelling, greater than the former, altogether independent of that employed in their respective trades. The second is, that in the case of professions, whatever capital has been expended in education, is entirely sunk for that purpose, and is subject to all the contingencies to which skill and labour are—to its profitable-

ness being suspended by sickness or entirely lost with life; while the capital of the trader is always to the fore,—available in all cases during life, and for the provision for a family at death. The distinction between the two classes is therefore plain and sustainable.

But the most feasible argument which has been relied upon against any discrimination, even although a strong *primâ facie* case existed for it, has been as follows: and I will notice this the more, because out of it arises the only other important general principle, which, in addition to the two that I have already noticed, I think it needful to rely upon, in order to determine the just grounds on which discrimination can be made.

It has been argued, and very ably, in an article in the "Edinburgh Review," and again by Mr Maitland, that however unequal the incidence of taxation may be in the first instance, there is a strong tendency to self-adjustment in the course of time. And it is therefore said, that however unequal the income tax may now be, the ordinary law of competition and the tendency which profits and wages have to equalise themselves, will bring all classes to a level in the course of time by adjusting their profits or fees in accordance with the payments they are called upon to make; and they push the argument so far as to say, that if a discrimination were made between the rate of income tax paid by a barrister or a physician, as compared with the recipient of permanent incomes, the law of adjustment would bring more barristers and physicians into the market, and would reduce the fees in proportion to the advantage given by the discrimination effected. But it is obvious that, even admitting the full force of this argument, which in practice I cannot, that such a result assumes that all parties *are equal now*, and that by any discrimination adopted in favour of professions, they would be placed upon a footing more advantageous than others, which advantage would in the course of time be reduced by self-adjustment. It is, however, admitted that professions are now placed at a disadvantage; only it is said that time will adjust them. The obvious answer is, if they are adjusted now by a discriminating charge, we do at once that which time would accomplish years hence, and that fees and salaries would remain as they are, in proportion to other incomes.

But, however unquestionable this principle may be in its general application to taxation, and however justly it may be recognised as true, yet in its practical operation it is subject to so much limitation as not in all cases to be relied upon in legislation. So far as the *tendency* to self-adjustment goes, I will admit that the principle is of universal application; but so far as the actual effect of it in practice is concerned, it cannot be depended upon. There is no axiom in taxation more true than that which asserts that a reduction of duties tends, through an increased consumption, to enlarge the trade of the country and to restore the revenue surrendered; but, however true that may be, it is equally certain that extremely small reductions, which make no perceptible alteration in prices, although if extended to many articles they might create a large loss to the revenue, would altogether fail to effect any perceptible restoration of revenue. So with regard to the argument of adjustment. In dealing with real property, no doubt there is a great facility for adjustment to take place immediately, and in the most minute degree. But with regard to the profits of trade, the fees of professions, and the wages of skill and labour, the operation of adjustment must, under any circumstances, be a very slow one; and when the disturbance of equality is trivial, will probably never take place at all.

I insist more upon this distinction, because it not only dispels the argument as it affects professions, but also because it brings to view an important principle in relation to the charge upon incomes derived from real property, to which I shall hereafter advert. It is quite plain that any change in the incidence of the taxes which affect different kinds of real property as between each other, or all real property as compared with the public funds or other investments, will produce an almost immediate adjustment, and in a degree precisely corresponding with the extent of the change. For example, relieve house property of a charge to which it is subject, and place it upon land, the net annual value of the former is immediately increased, and that of the latter is diminished, and the purchase-money of both will at once be correspondingly altered. In like manner, place a new tax on real property generally, which does not apply to the funds or other well recognised investments, and it is clear that in proportion as that charge affects the *net* income from real property, its purchase value will become less, and be adjusted in relation to the price of the funds and other recognised securities. And no matter how small such new charges may be, they are capable of exact and immediate application.

But the case is very different in relation to the profits of trade, the fees of professions, the reward of skill, and the wages of labour. These are all determined, no doubt in the long run, by the general principle of supply and demand, and the supply in each individual trade or profession is determined by the temptations which it holds out to the public to enter it; and there is, therefore, a constant tendency to self-adjustment in the numbers which enter each. But suppose that professions are over-taxed in relation to real property, by *one and a half per cent.*, and trades by *three quarters per cent.*, is it possible to conceive that in any length of time self-adjustment would take place by raising a physician's fee from 20s to 20s 3½d; and the cost of a lawyer's letter from 6s 8d to 6s 9½d; or the profits of a trade which at present are 8 per cent. by the inappreciable amount which a difference of ¾ per cent. on the income would make on the amount of the trade from which the profit was derived? It would be as reasonable to argue that a reduction of a farthing a pound in the tea duty would lead to a reduction in the price of tea sold at 5s per lb.

So far, therefore, as this argument has been relied upon, against discrimination in favour of professions and trades, it is obviously worth nothing, and a consideration of it only the more shows the necessity of applying adjustment in the first place by a difference in the rate. But were this argument worth all that the writer in the "Edinburgh Review" and Mr Maitland contend for, it is clear on their own showing, that even, if too great a distinction should be made in the the rates charged on different classes of income, no harm would follow to the public, because adjustment would immediately take place. The argument, if worth anything, clearly cuts both ways.

But so far as this principle is applicable to real property, I shall have occasion hereafter to show that it has a powerful practical bearing.

Another argument against discrimination which has been relied upon is, that no persons who have entered professions or trades since 1842 can fairly complain, because they did so, subject to the existence of the tax. This, of course, only applies to a very small portion of those now charged with the tax; and in respect to those it may conclusively be contended, that when they entered their different callings the income tax was imposed for a limited period, which would expire before they would be affected by it.

Another reason, and it is the last I shall notice, which has been insisted upon against discrimination is, that under Schedule D, great evasion of the tax takes place, and that any inequality which exists in the tax is practically equalised by fraud. However true such an assertion may be in numerous cases, yet it is obvious that such an argument could not be used by a Government, for to do so would, I fear, in some measure tend to justify such a course; it would be saying to the world: "We know our tax is unequal, "but we leave you to modify it, each of you according to "your own estimate." Another obvious reply to the argument is, that the cure thus proposed applies only to unscrupulous persons, who do not hesitate to defraud the Government, while it offers no relief to the honest and conscientious trader, with regard to whom the inequality is thus aggravated.

Agriculture.

THE CAPITAL REQUISITE FOR FARMING.

THERE is but one business in this country for which the necessary capital is not forthcoming, and which, as a rule, is carried on with insufficient capital. That business is husbandry. Let there be but a fair opening in foreign or domestic trade, in mining, in manufactures, or in any of the thousand businesses subservient

thereto, and in all or any of them the required command of capital is obtained by the efforts of those who see their way to its remunerative employment. They require no extraneous stimulus. They need not aristocratic patronage, nor the encouragement of prize essays. They carry on business under conditions which enable them to offer to capitalists, who utilise their capital by lending it to others, the price and security they deem satisfactory.

In farming, and farming only, all this is reversed. The farmer, as a rule, is deficient in the amount of capital he ought to employ to render the farm he occupies as productive and profitable as he knows it might be made. Yet what capitalist, as such, would dream of making advances to a farmer? Nevertheless societies are formed under the influence and patronage of landed magnates to encourage good farming. Prizes are offered for essays on all possible branches of husbandry for the instruction of the farmer. He is urged to improve. He is advised how to increase the produce of his land. He is told what capital he might, could, or should employ in his business. In short, everything is done for him save that which in all other trades is found amply sufficient to ensure success,—namely, to afford him security for his capital, give him freedom of action, and leave him alone.

Now the amount of capital required for cultivating a farm, or which may be profitably so employed, depends on so many circumstances and conditions that it is difficult to lay down any positive rule on the subject. Doubtless it is easy enough to show what is the minimum amount of capital necessary. The popular notion is that a farmer should command 10*l* per acre for every acre of land he occupies, and such a capital would in many instances enable the farmer to manage his farm with considerable advantage. But even that estimate assumes that the farmer has no employment for his capital save simple farming operations. Yet how seldom is that the case? In nine cases out of ten he must, if he would use his land to advantage, sink much capital in work which it is properly the province of the landlord to execute. And even if he had none but the work of farming proper to perform, that amount of capital would sometimes be insufficient. Take the present position of a farmer on strong land. In 1860 his corn crops were failures, while his expenses were greater than usual; his land, in spite of the most diligent efforts, became foul, and must have been cleaned during the present year at considerable expense; and the crops of this year will assuredly prove much less than an average. For two years then he must live upon his capital, and if he is to recover lost ground,—lost, be it noted, entirely from circumstances beyond his control,—his expenditure in preparation for next year's crops must be increased, not diminished, in consequence of the deficiencies of the past and present years. Such estimates of the minimum of capital required in farming as that to which we are about to refer, can therefore be regarded as little more than speculative, fair weather kind of calculations. Yet it is certain the great mass of English farmers do not, in the actual state of things, possess the amount of capital so commonly estimated to be necessary.

A prize was awarded by the Royal Agricultural Society to an essay written by the late Mr Charles Wratislaw on "The Amount of Capital required for the Profitable Occupation of a mixed Arable and Pasture Farm in a Midland County." The writer's data are derived from his personal experience, and his paper may be deemed a fair business calculation, according to the actual system of husbandry as now conducted in the midland counties. As such it possesses much practical interest. He describes his farm (in Warwickshire) as "at one time a cold wet clay; but, under the influence of drainage and cultivation, it may now be described as a very retentive loam, having a subsoil of blue lias clay, with veins of sticky yellow clay coming within ten inches of the surface in many places." And he says "this may be considered a type of the moderately-rich clay lands of the county." He treats the farm as consisting of 200 acres, half arable and half pasture and upland meadow, and assumes the entry to take place at Lady-day. The difference of capital required for a Lady-day or Michaelmas entry is, he says, in reality nothing, because, though with a Lady-day entry the farmer will sooner be able to convert his live stock and part of his corn into money, he will have to pay the outgoing tenant for cultivations which in a Michaelmas entry he would effect himself, in all probability in a better manner. We have no doubt that a Michaelmas entry is the best, as it places the farmer's outlay more completely under his own control. The less a farmer pays for valuations the better, for there is nothing in which there is so much uncertainty as to getting value for his money.

The writer's land will not bear treading by cattle in the winter, and he finds the Welsh cattle bear the confinement of yards and do better on worse food than other cattle. He prefers cows and heifers to oxen, because more saleable in the country and come sooner to perfection. Welsh cattle he also likes best for the dairy, as they yield as much butter, though less milk, as the Shorthorn, and cost less to purchase. He would feed 70 acres of his grass land and mow 30 acres. His arable land will be 50 acres of wheat, 10 acres of vetches, 20 acres of spring beans, 10 acres of clover, and 10 acres of bare fallow. This scheme, it will be observed, ignores root crops altogether, and adopts the somewhat obsolete plan of a bare fallow. It certainly is not high farming.

His live stock will be 51 Welsh cows and heifers for feeding and the dairy at from 8*l* to 10*l* each, 65 sheep on his pasture land at 50s each, 84 sheep on his arable land at 40s each, six plough horses 210*l*, and 4 pigs, making a total of 1,013*l*. He will pay the outgoing tenant 263*l* 18s 4d for seed and acts of husbandry, and he will expend 163*l* 6s for hoeing and getting in his crops at hay-making and harvest. His implements will cost 206*l* 17s 2d. These sums will make a total of 1,647*l* 1s 6d, or 8*l* 5s per acre. The different items are given in detail; and it will be seen that the whole sum is actually invested on the farm, leaving no margin for contingencies or unfavourable seasons. We may therefore add the 1*l* 15s per acre to Mr Wratislaw's estimate, or 275*l*, which is the least sum the farmer should have at his banker's in addition to the live and dead stock and crops of his farm. Nothing is here estimated for oil-cake or other feeding stuffs, and the cattle bought are of the cheapest kind. No roots are assumed to be grown, though it is scarcely likely that an enterprising farmer would be content to cultivate 100 acres of arable land without growing from 10 to 20 acres of roots. This would involve further outlay. Where the pasture land is of a somewhat richer description, the writer calculates 1,217*l* for the purchase of live stock, and makes the total capital required to be 9*l* 10s per acre.

It is not enough to employ the capital; the farmer must use his intelligence also. And in nothing can he show his intelligence more than in dealing with his labourers. They should be rendered willing and contented workmen. Mr Wratislaw says that on entering his farm he found "the labourers dissatisfied and only partially employed, and even sent home at eight or twelve o'clock in the day if the weather turned out unfavourable after they had come to work in the morning, thus being allowed to make only part wages, however willing they might be to work." His first work was to observe the labourers at their employments, and he then selected such as were likely to suit him. The wages paid for a week's work were 11s from Michaelmas to Lady-day, and 11s to 12s, with a quart of beer daily, from Lady-day to Michaelmas. At harvest time there was an extra allowance of one quart of beer and one gallon of ale per man per day. He estimated the beer allowed to each man cost yearly 3*l*, and there were constant disputes and discontent about beer allowances. He therefore determined to substitute a money allowance. The men were at first disposed to murmur at the change; but on asking them whether the beer was worth a shilling per week to them, they admitted it was not, and gladly accepted 13s a week from Lady-day to Michaelmas in full for wages and beer money, to be constantly employed in all weathers. The first hay-making produced, notwithstanding the arrangement, a demand for beer, but an offer to release any of the men from their engagement on their returning the extra money they had then received, and the prompt dismissal of a prominent grumbler, put an end to the matter, the men returned to their work, and nothing had ever since been said about beer. At Michaelmas Mr Wratislaw gave to each man who had behaved well half a ton of coals delivered; and every man readily made an engagement for the ensuing year at 13s shillings a week. From that time he never had a dispute with his men, and he found them do their work more cheerfully and with better will than the labourers of other farmers who adhered to the old system. Besides, his men worked as well in his absence as when he was present, and they were admitted to be the best conducted men in the village. This is an instance of the importance of establishing a good understanding between farmer and workmen by the exercise of a firm and just authority on the part of the master. It is a point too often neglected by farmers. And it is obvious that men who farm without sufficient means are almost driven to adopt a niggardly, though unthrifty, method of dealing with their labourers. To the labourers, then, no less than to the farmers, that system which prevents the application of capital to husbandry is most injurious. Now a system, which involves yearly tenancies, game reservations, and all the concomitant evils, such as prevail in most parts of England, operates to prevent the employment of capital in husbandry to anything like the extent it ought to be so employed in this country.

Literature.

COMMERCIAL LITERATURE.

THE NEW BANKRUPTCY LAW. The Act to Amend the Law Relating to Bankruptcy and Insolvency, Arranged and Simplified, with an Explanatory Introduction, by B. PEVERE, Attorney and Solicitor, Coleman street, City; and C. H., Reporter, Insolvent Debtors' Court. London: Houlston and Wright, 65 Paternoster row. 1861.

THIS little book gives in a compendious and convenient form the principal alterations in the law of Bankruptcy effected by the new Act, which will shortly come into operation. We can concientiously recommend it to those of our mercantile readers who may be terrified by the evident length and apparent complexity of the Act itself.

INCOME TAX TABLES at the Current Rates of Ninepence and Sixpence in the Pound, on Sums varying from 2s 3d to 1,000,000*l*; with Tables and Schedules of former Rates, and of the Acts of Parliament. By JOSEPH K. ASTON, of Lincoln's Inn, Barrister-at-Law. Eighth Edition. F. Passmore, 124 Cheapside.

THESE Tables are likely to be useful to the parties for whom they are intended, and are clear and well arranged.

GENERAL LITERATURE.

THE AMERICAN CRISIS CONSIDERED. By CHARLES LEMPRIERE, D.C.L., of the Inner Temple, Law Fellow of St John's College, in the University of Oxford. London: Longmans. 1861.

THE author of this slight and flimsy work begins by professing to have "no political bias," and ends by "heartily wishing God speed" to the Southern Confederacy. He says in his preface,—"I hardly think we in England are quite competent to decide on the question of Slavery, as it exists in the Southern States, upon the evidence before us;" but it is the one object of his volume to whitewash and applaud the pro-slavery party as the only right, patriotic, and constitutional heroes of the American Republic. His attempt is too shallow and superficial in its distortion of facts and its absence of reasoning, to impose upon any readers who have at all studied the subject. Nevertheless, such a work from an English pen ought not to pass unrebuked, especially at the present time.

Mr Lempriere admits (p. 204) that "in a moral and religious view slavery is indefensible;" but he evidently regards this as a trifling consideration of no practical importance. The ground he takes is this:—

At the time of the formation of the Federal constitution, the law of nations recognised lawful property in African slaves throughout the civilised world. In that country they had been so held in every part of it from its earliest settlement. No colony was without owners of black property, and none doubted the legality of the holding. It was not surprising that the generous-hearted of our own statesmen should have adopted the seductive but untried theory, and hesitate about the rightfulness of "holding property in man." Nevertheless, the fact of the property in negroes existed, and the constitution was framed in the recognition of it.—(P. 197.)

But although the constitution recognises slavery, it also reserves to itself the power of changing the national policy in regard to it.

The instrument of union, while it provided for the extinction of the slave-trade, which then formed so large a portion of Northern traffic, contained also a provision for black representation in the Southern States, stipulating that that representation should not be changed till 1808, and thereafter only by a vote of three-fourths of all the States. That provision has been the groundwork of that constant Northern aggression upon Southern interests, which has so successfully gained on the Federal power until now it imagines the desired three-fourths is within its reach, when the South, with its interests, will be at the feet of the Abolitionists. The South has stood steadily on its defence, but while the circle has narrowed in upon it, the North has not ceased to clamour against Southern aggression.—(Pp. 42-3.)

The anti-slavery bias of the founders of the Union must (according to our author) be attributed to their ignorance of the future necessities of American commerce.

At the time of the adoption of the Federal constitution, the condition of slaves was very different at the South from what it has since become. At that time there was no large branch of industry to engage, and their future fate was matter of anxiety. The progress of the cotton culture has changed that, and the interests of millions of whites now depend upon the blacks. The opinions of statesmen of that day were formed upon existing facts. Could they have seen fifty years into the future their views upon black employment would have undergone an entire change. The blacks were then prospectively a burden; they are now an absolute necessity.—(Pp. 37-8.)

The real and only reason why the Northern States abolished slavery in their borders was that slave labour did not pay in those latitudes; in the Southern States it does pay, and has therefore been retained. Emancipation is out of the question, as "the experiment has thoroughly failed" (p. 47); an assertion supported by seven pages of calumnious misrepresentations from Mr Trollope's "West India Islands" and articles from the *Times*. In the Southern States the negro "is provided and cared for by law, and is confessedly the happiest and merriest of mortals in any subordinate capacity."—(P. 49.) Yet the North has persisted in opposing slavery on every occasion when slave interests came up for discussion in the national councils, and "has warped the truth in relation to the real position of the Federal Government in regard to the blacks, until the doctrine has acquired strength, that one species of property, recognised by the Federal constitution, is without protection on Federal soil."—(P. 196.) When we add that Mr Lempriere accuses the Northern proselytisers in the States south of the line of a "systematic interference" which was conducted in a manner "as ruffianly as it was otherwise in defiance of all law and reason" (p. 21); that he talks of the "atrocity" of the *North* in the matter of Kansas (p. 44), and calls the present defenders of the Union "that political party which threatens with fire and sword every hearth, with violent death every Southern man, and with dishonour every Southern female, amid a saturnalia of blood" (p. 144),—our readers may judge how far he is justified in describing himself as "having no political bias." Not, be it understood, that we quarrel with him for having an opinion and maintaining it. Let us know, by all means, what the advocates of slavery have to say in its defence. But Mr Lempriere attempts nothing beyond a guerilla fight. He gives us no connected history of events, he ventures on no deliberate acceptance of the main acts of the Southern party, still less on any discrimination between what might be reckoned as their wise or unwise steps. But, on the other hand, he never *disclaims* any of the Southern feats, and he writes as if thoroughly wedded to the pro-slavery policy. His position throughout is that the Southerners are the moderate, law-loving constitutionalists, who have "stood steadily on their defence" against the anti-slavery party, which is "based wholly upon sectional aggression," and is permitted by the North to "attack their best customer, and seek to destroy his means of purchase, and all for a chimera." He attempts to support this view by a variety of extracts from speeches and documents on both sides, loosely strung together by random assertions of his own; and by a long argument to show that for commercial reasons it is both foolish and ungrateful of the North to quarrel with the South, as she could not stand alone. As this is the most plausibly-written part of the book, a few words on its statements may be useful.

Both the South and the West have vast natural resources to be developed, and the time for that development is only retarded by the present profits that the North derives from supplying each with those things that they will soon cease to want. The North has no future natural resources. In minerals both the other sections surpass it. In metals it is comparatively destitute; of raw materials it has none. Its ability to feed itself is questionable.—(P. 76.) The barren hills of New England.....afford no material for the employment of her busy people, not even a sufficiency of wool.—(P. 73.)

Let us now turn to the authorised statistics on these points. In the Appendix to Ellison's "Slavery and Secession" will be found some of the latest complete returns then issued. We take thence the following figures for the year 1850:—

	Free States.		Slave States.
Bushels of wheat produced.....	72,270,830	...	27,893,426
— oats produced	96,682,167	...	49,882,973
— Indian corn produced.....	242,636,291	...	348,992,271
Pounds of butter and cheese produced	349,860,803	...	2,445,779
— wool produced	39,676,982	...	12,797,329

This does not look as if the North were behind the South in agricultural and pastoral produce. Even in Indian corn, the ratio of production has increased in the Free States, in the ten years between 1840 and 1850, 88 per cent., while it has only increased in the Slave States at the rate of 35 per cent. in the same period. In the production of wheat, the change between 1840 and 1850 is still greater; for the crops of the Free States exhibit an increase of 22 per cent., while those of the Slave States show a *decrease* of 7 per cent.—(Ellison, pp. 217-18.)

Another point on which Mr Lempriere challenges comparison is the relative amount of railroads. With respect to the length of rail laid down he gives the following estimates (p. 84):—

	1853. miles.		1860. miles.
North	7,222	.....	9,665
West.....	5,535	.....	9,191
South	4,663	.....	9,053

Upon which he remarks,—"We have then the fact that the South has as many miles of railroad as either of the other sections"! Not to insist on the fact that 4,663 is considerably less than 7,222,—it is a palpable subterfuge, when discussing the relative merits of free and slave labour, to confuse the issue by dividing the States into *three* sections. Turning to Ellison's statistical tables (p. 364), we find that in 1859 the railways in operation in the Free States comprised 19,657 miles, while those in the Slave States only amounted to 9,729 miles. This will show in what a disingenuous way Mr Lempriere deals with facts and figures.

As to the secession movement, he not only justifies but highly applauds it. Lincoln's election, he says, carried no votes from the South; therefore they were not bound to obey him. "There are times and there are occasions, when, in self-defence and in self-preservation, men appeal to higher laws than are to be found in the Statute-book, and the Southern States affirm that such a time has come, such an occasion has arisen."—(P. 98.) There *is* a "higher law," then, after all; but it is not the law of conscience pleaded by the Northern citizen, which forbids the rendition of fugitives, and would abolish the property in man,—it is the law of self-interest, which justifies the South in breaking solemn contracts, in seizing Federal property, repudiating Federal debts, and bombarding a Federal garrison. It has not been usual in civilised countries to regard this sort of conduct as the offspring of law, much less of "higher law," but rather as the result of those lower impulses which all law is designed to hold in check, and which no society can permit and live.

To sum up; this book is written with a fatal disregard of facts; with an avowed contempt for a moral basis to civilisation; and in a flippant, slip-shod, careless style, which is as unworthy of a gentleman as the author's principles are of an Englishman.

THE BOOK OF GOOD COUNSELS. From the Sanskrit of the "Hitopadesa." By EDWIN ARNOLD, M.A., late Principal of the Poona College. Smith, Elder, and Co., Cornhill.

THIS "Book of Good Counsels" has a twofold claim upon our attention; from its extreme antiquity—it dates in its older portions

"as high as 1300 before Christ," and lies at the root of all ancient and modern fables, sending up, as it were, offshoots in "Esop," "Pilpay," and "Reynard the Fox";—and from the insight it gives us into the Hindoo mind, with its curious and contradictory characteristics; its turn for philosophical speculation, and its close clinging to old prejudices; its mingled acuteness and credulity; its theoretical aim at perfectness and its practical aversion to reform; its sensitiveness to points of courtesy and decorum, and the barbarism that lurks under this courteous exterior. The Hitopadesa instructs kings in the virtues essential to good government. It, in the most ingenious manner, deduces moral lessons from the adventures of animals; and wise precepts and sagacious views of statesmanship are to be gathered from their discourse. The following conversation between two lions is applicable in a wider extent than to a petty Eastern court, of which, however, the whole tale furnishes a graphic picture:—

"'Good brother,' observed Stiff-ears, who had heard what the Bull said, 'these Jackals are your Ministers of Home and Foreign Affairs; they should not have direction of the Treasury. They are old servants, too, and you know the saying—

'Brahmans, soldiers, these and kinsmen—of the three set none in charge;
For the Brahman, though you rack him, yields no treasure small or large:
And the soldier, being trusted, writes his quittance with his sword,
And the kinsman cheats his kindred by the charter of the word;
But a servant, old in service, worse than any one is thought,
Who, by long-tried license fearless, knows his master's anger nought.'

"'Ministers, my royal brother, are often like obstinate swellings, they want squeezing, and yours must be kept in order.'

"'They are not particularly obedient, I confess,' said Tawny-hide.

"'It is very wrong,' said Stiff-ears; 'and if you will be advised by me—as we have banqueted enough to-day—you will appoint this grain-eating and sagacious Bull your Superintendent of Stores.'

"'It shall be so,' exclaimed the King.

These fables are still the favourite reading of the Hindoo; they retain under various titles "the delighted attention of young and old." Yet, if the science of good government were diligently studied by native Princes, its practice can scarcely be said to have been successfully pursued. They, for the most part, like the King's sons in the opening chapter of this little book, "were altogether going in the wrong way"; nor did the study of the "Sacred Writings" or of the "Books of Policy" suffice to give them the "second birth of Wisdom." Mr Edwin Arnold tells us, in his preface, that "a lively desire to subserve the advancement of the Hindoo races has led to this translation and selection from their ancient writings. "Justice is not yet done," he says, "to their past development and present capacities." His book is certainly a testimony to the former. "The wit, morality, and philosophy of these beasts of India" will probably "surprise" many; but as to the present capacity of the Hindoos it speaks nothing, or, if anything, it rather tends to show how little they have profited by, or improved upon, the wisdom of their ancestors.

The work opens, as we have said, with the discovery by a certain King that his sons were uninstructed in Policy. He therefore assembles his wise men, and seeks from among them one who is capable of teaching them to comprehend its principles.

"Childless art thou? dead thy children? leaving thee to want and dool?
Less thy misery than his is, who is father of a fool."

Thus exclaims the old King, who is comforted by the assurance that the offspring of a royal family are royal minded; and that six months' instruction will suffice to make them acquainted with the rules of Policy.

The method adopted by the ancient Pundit is a pleasant one, and probably would not be objected to by children of the present day, "royal minded" or otherwise. He assembles his scholars at their ease on the balcony, and thus addresses them:—

"Hear now, my Princes, for the delectation of your highnesses, I purpose to tell the tale of the Crow, the Tortoise, the Deer, and the Mouse." "Pray, Sir," said the King's sons, "let us hear it."

Now begins a series, intricately involved one with another like the ivory boxes of a Chinese puzzle, of tales; in each of which some point of morality, discretion, propriety of behaviour, or some royal virtue is enforced. They are roughly classed under four heads:—The "Winning of Friends"; the "Parting of Friends"; "War"; and "Peace." Animals, as we have already said, are the *dramatis personæ* of these amusing fables, whose sole drawback is in the weaving of one story into another, so that the beginning of the original one often escapes our memory before we have reached its conclusion. At the end of the Pundit's lessons, his royal pupils assure him that they "have heard and comprehended the perfect cycle of kingly duty, and are content." We think every youthful reader of this entertaining book will feel inclined to say the same, only without reference to the especially royal character of the lessons they have imbibed.

We have only space for one of the tales that Mr Arnold has so ably translated; and that one we must select more with reference to its length than to its especial merit:—

In a town called "Well-to-Dwell," there lived a mighty hunter, whose name was "Grimface." Feeling a desire one day for a little venison, he took his bow and went into the woods, where he soon killed a deer. As he was carrying the deer home, he came upon a wild boar of prodigious proportions. Laying the deer upon the earth, he fixed and discharged an arrow and struck the boar, which instantly rushed upon him with a roar louder than the last thunder, and ripped the hunter up. He fell like a tree cut by the axe, and lay dead along with the boar, and a snake also which had been crushed by the feet of the combatants. Not long afterwards, there came that way in his prowl for food, a jackal, named "Howl-o'-nights," and cast eyes on the hunter, the deer, the boar, and the snake lying dead together. "Aha!" said he, "What well! Here's a grand dinner got ready for me. Let me think; the man will be fine pickings for a month; the deer with the boar will last two more; and, as I am very particularly hungry, I will treat myself now to this bit of stinking gut of the bow-horn." So saying he began to gnaw it asunder, and the bow-string slipping, the bow sprang back and resolved Howl-o'-nights into the five elements by Death. "That is my story," continued Slow-toes, "and its application is for the wise."

Sentences of studied wisdom nought avail they unapplied;
Though a blind man hold a lantern, yet his footsteps stray aside.

The proverbial verses so freely scattered through these fables are, Mr Arnold tells us, from the textual Vedas, the ancient sacred writing of the Hindoos. Some of them seem to us puerile enough; while others contain a true and noble philosophy; and others again remind us, in tone of thought and expression, of the Proverbs of Solomon. A few instances will suffice. The following seems like a familiar friend in a new dress:—

True Religion!—'tis not blindly prating what the priest may prate,
But to love, as God hath loved them, all things, be they small or great;
The true bliss is when a sane mind doth a healthy body fill;
And true knowledge is the knowing what is good and what is ill.

And again:—

Half-known knowledge, present pleasure purchased by a future woe,
And to taste the salt of service; greater griefs no man can know.

The duties of hospitality are strongly enforced:—

Pity them that ask thy pity: who art thou to stint thy hoard,
When the holy moon shines equal on the leper and the lord!

This last may remind us of one "greater than Solomon," but the following has the true ring of the wise King's philosophy:—

Trust not water, trust not weapons; trust not clawed nor horned things;
Neither give thy soul to women, nor thy life to sons of Kings.

One more, and we will conclude:—

Seek not the wild sad heart; thy passions haunt it;
Play hermit in thine house with heart undaunted;
A governed heart, thinking no thought but good,
Makes crowded houses holy solitude.

THE DUBLIN UNIVERSITY MAGAZINE. Hurst and Blackett.
THE ST JAMES'S MAGAZINE. W. Kent and Co.
THE ENGLISHWOMAN'S DOMESTIC MAGAZINE. Beeton.

THERE is little of much interest in this month's number of the "Dublin University Magazine." "Primitive French Industries," like all the former papers on the same subject, is well worth perusal. "French Views of Irish Questions" is a sensible and well-written view of the more moderate tone of sympathy with "oppressed Ireland" that now prevails in France. "The Rescued Infant" is a curious and genuine Chinese tale. A fair critique on Macaulay's last volume is the only other article of any importance.

"The St James's Magazine" takes up the defence of depreciated England. The Rev. J. E. Cox labours to disprove the calumny that England is not a musical nation, and has no school of music. Anthony Trollope defends the National Gallery, building inclusive, from the attacks of the discontented. Mrs S. C. Hall gives a pleasant description of that little offshoot from Aix-la-Chapelle, Borcetta, and continues her very poor tale. Mr Hall contributes a cheering paper on the progress of Irish prosperity. Altogether this number is neither better nor worse than its predecessors.

Fashions and needlework play the most prominent part in the "Englishwoman's Domestic Magazine"; they are even more than usually pretty and abundant in this month's number.

THE ENGLISH WOMAN'S JOURNAL. September.

THE chief articles of interest in this number are the opening paper on "The Condition of Working Women in England and France," read by Miss Parkes at the Social Science Association, and a long review of Jules Simon's recent work "L'Ouvrière," which treats, in an excellent spirit, of the serious evils attendant on the systems of female labour which prevail in France, especially in the silk manufactories, where the extensive employment of married women almost destroys family life altogether. There are also two other papers read at the Dublin meetings, one by Miss Faithfull on "Women Compositors," and one by Mrs W. Fison on "The Institutions of Hofwyl," besides a report of the Ladies' meeting held at Dublin to form a committee for promoting the employment of women. A good memoir of "Margaret Beaufort," a curious paper on Algerine animals, and a continuation of "Fruits in their Season," help to fill up the number. Some French verses by Madame Amable Tastu are graceful but morbid. The English lines by "E. B. P." are healthy in sentiment, but wanting in power.

THE ART-JOURNAL. September.

THE steel engravings in this number are Guido's "Death of Cleopatra," in which the character of the face is as different from Cleopatra's as one woman can well be from another,—and Turner's "Phryne going to the bath as Venus,"—an exquisite landscape, with which we could wish to have pleasanter associations than such a title calls up. There is a paper by Mr Fairholt on the mutilation of the ancient monuments in Egypt, which is painful to read, but which seems to be only too true. We have also continuations of Mr Robert Hunt's "Visits to Art-Manufactories," of Mrs Theodosia Trollope's interesting notes on recent Florentine sculpture, and of Dr W. Bell's inquiry into the "Origin and Nomen-

clature of Playing Cards," the present chapter of which is very curious and entertaining. There are also two illustrated papers—the continuation of "The Hudson," and a paper on Henry Warren, containing wood-cuts of three of his pictures, "The Ford of the Jordan," "The Dying Camel," and "Joseph's Coat brought to Jacob," the last of which is particularly well executed. The illustration of sculpture in this number is "The Angels; Life, Death, and the Resurrection," a funeral monument by M. Noble, of great beauty and simplicity.

PHILO-SOCRATES. Part I. Among the Boys. By WILLIAM ELLIS, Author of "Religion in Common Life," "Outlines of Social Economy," &c., &c. London: Smith and Elder. 1861.

THE author of this small volume describes it as "a series of papers, wherein subjects are investigated which, there is reason to believe, would have interested Socrates, and in a manner that he would not disapprove, were he among us now, gifted with the knowledge, and familiar with the habits and doings, of our times." This programme would scarcely help even the most ingenious of readers to divine the nature of the book, which is to develop, in the form of question and answer, the views of an intelligent and benevolent teacher on the subjects of Conduct, Industry, Intelligence, Economy, Honesty, and Character, which are treated in successive conversations. They proceed after the following manner: "P." who, as he is not the parent, we take to be "Philo-Socrates," engages his pupils in a prospective and "systematic inquiry into what you ought to do, and what you ought to avoid doing, as men and masters of your own actions," in which process he puts a variety of intricate and difficult questions, to which "the boys" (who are never individualised, and always reply collectively) return the most ready and complete answers imaginable. One can scarcely imagine any writer seriously putting such speeches as these into the mouths of boys.

P. What would you answer to them [those who maintain that children are naturally prone to evil]? B. That they are giving in to an opinion not only based upon no evidence, but contrary to such evidence *as we have been able to collect.* Young children, knowing nothing of *the distinctions drawn by grown-up men*, seek after things which give them pleasure, and turn away from things which give them pain. The only good that they recognise is pleasure, the only evil pain. Unless, then, they are prone to pain, they cannot be prone to evil. They may be led by teaching and training to seek pleasure or good through pain, and to turn away from a pleasure that leads to pain or evil. We can discover no *propensity* to evil in all this.—(P. 122)

In another place these precocious youths inform Philo-Socrates that "experience shows that the formation of character is a slow work, which ought to be begun in childhood." The ludicrous absurdity of attributing such speeches to young lads needs no comment. Mr Ellis says in the Preface, that he thought "few readers could care for a more elaborate or detailed exposition of the methods and of the intermediate steps whereby boys have been led on to form their judgments," and he has therefore given, in several instances, "the condensed expressions of answers and corrections of answers by numerous classes of boys at different times to similar questions." He could scarcely have chosen a more infelicitous plan, and one less useful to both master and pupils. A literal report of one real conversation with a dozen boys, each of whom could speak for himself, would have been far more valuable than this "condensed and corrected" talk, in which there is little more individuality than in the moralising chorus of a Greek tragedy.

MISS GWYNNE OF WOODFORD. By GARTH RIVERS. 2 Vols. Smith, Elder, and Co.

THIS is a pleasant and readable novel, and having said this much, we had perhaps better say no more. It would be ungracious to inquire too closely into the question whether such average novels are worth the time that they consume in writing and reading. Harmless they certainly are,—didactic to a certain extent, if this be a merit; but they leave no clear impression on the mind,—the characters themselves fade away quickly from the memory,—*life* is wanting to the book,—the spark of genius to illuminate the lay figures,—the inexpressible something which Miss Austen possessed, which makes Miss Bates and Mrs Jennings—commonplace and even vulgar as they are—*real*, interesting, and impossible to forget. The novel before us does *not* possess this impalpable something; but it would be unfair not to give it credit for what it does possess—perception of original characters, though there is a partial inability to reproduce them—a strong appreciation of the beautiful and picturesque in nature, and a certain warm graphic power of drawing home interiors. The Irish characters are the best drawn. A Dr Philip Bryan, his mother, and pretty worthless cousin Kate, are very well put in; but Stephen Forrester the hero, whose rapid deterioration, chiefly owing to a hasty and ill-assorted marriage, and equally rapid ascent to a more than ordinary level of respectability and propriety, are somewhat surprising, and Maud the rather strong-minded heroine, are not, we think, equally successful. Still the book is agreeable reading as we have already observed, and we should be ungrateful if we did not confess to having spent several pleasant, if not very *profitable*, hours over its pages.

JEST AND EARNEST; or, the Ludlam Papers. By GODFREY TURNER. W. Kent and Co., Paternoster row.

THIS is one of the first volumes of a new contribution to railway reading. If the publishers of the First-class Library mean to intimate by this title that they do not wish their works to be read beyond the select circle who occupy first-class carriages, we can make no demur to its propriety, however much we may to its wisdom; but if, as we rather suppose, the excellence of the letter-press rather than the travelling status of the reader is referred to, then we must say that neither the work before us, nor those advertised as "now ready" or "in the press," at all bear out the not over humble assumption of its name.

"The Finest Girl in Bloomsbury," "Criminal Celebrities," "The Baddington Peerage"—these are not our idea of first-class literature; nor do Mr Turner's frothily clever tales come nearer the mark. The discrepancy between the outside promise and the inside performance is perhaps the best jest the little book can offer to its purchasers. At the same time these tales are readable enough. They have that sort of cleverness that results from a ready wit, a practised pen, some observation of what is called "life," and a close study of Dickens. The best is perhaps that of "A Welsh Will."

ROUTLEDGE'S ILLUSTRATED NATURAL HISTORY. By the Rev. J. G. WOOD, M.A., F.L.S., &c. Part 30. Routledge.

OF the August Part of this excellent work, the first half is devoted to the partridge and grouse tribes, and the latter half to the Cursores or Running Birds. The engraving of the common partridge is beautifully done, and the plates of the Ostrich, Emeu, Cassowary, and Apteryx, are bold and life-like. A good deal of new and curious information is related of the Cursores, among which will be found a very entertaining account of the Mooruk,—a recently-discovered (Australian) species of Cassowary, three specimens of which were presented to the Zoological Gardens last May, by Dr Bennett.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

A marked rise has taken place in the price of flour in the Paris market. On Saturday the 31st ult. the sack of 159 kilogs was 76f to 82f; on Saturday last, it was 85f to 91f; and yesterday, as you will see by your market report, it was 86f to 91f and 92f. The *Bulletin des Halles*, an authority on such matters, in its number of last Saturday ascribed the rise chiefly to drought having dried up a number of small rivers and prevented mills from working; also to stocks having run low in places near Paris. The *Echo Agricole* of the same day said:—"It is difficult to state positively the causes of this sudden rise; but from correspondence and from declarations made at different meetings, and especially at the market of Toul, it appears that the deficit in the production of wheat in France is at least as important as at first supposed. The millers, foreseeing the difficulty of obtaining wheat, and whose operations are besides greatly impeded by the lowness of water in rivers, naturally raise their prices."

In consequence of the deficit of grain in France, French dealers not only made large purchases in England, but the Greek houses of Marseilles ordered enormous quantities in the Black Sea provinces, and large portions of them have since arrived,—sometimes as much as 150,000 hectolitres in the course of a day. The demand for vessels to make the importation naturally occasioned an advance in freights, but still sufficient ships cannot be procured. In the Sea of Azoff there are considerable quantities of grain, but the season is too far advanced to render the sending of vessels there desirable. The Italian Government has allowed the export of grain from Naples, but thus far the Marseilles firms have not taken much advantage of the permission.

"The drought," says the *Bulletin des Halles*, "compromises in all the South the crops of maize, millet, and buck wheat. This will be a new deficit which will have to be made up from rye, and already have demands for the latter grain been received in Paris from Bayonne and places in that direction."

It is known that the Municipality of Paris, by order of the Emperor, undertook some years back the onerous task of supplying the Parisian population with bread at less than the cost price, subject to the condition of being allowed to sell it dearer when, from good harvests, the price of flour should fall. From a note just published by the Municipality in reply to some observations of a newspaper on this subject, it appears that from 1853 to 1856 not less than 53,000,000f (2,120,000*l*) were disbursed in selling bread cheaper than it cost; but that since 1856, 51,000,000f have been got back again by selling it dearer. From the prices which now rule in the flour market, the Municipality must not only give up all hope of recovering the sum due to it, but must—if the system is to continue—be prepared to make a very large outlay in the coming winter.

From a statistical return just published, it appears that at the end of last month the stock of cotton at Havre was larger than at the same date in any one of the last twenty-three years; also that the sales in the first eight months of the present year were larger than were ever before known in the same period. But as

everything that concerns cotton is of great interest just now, it may be well to quote a part of the returns referred to:—

Years.	Stock on Jan. 1. bales.	Arrivals in Eight Months. bales.	Sales in Eight Months. bales.	Stock on Aug. 31. bales.
1861	105,020	537,025	400,875	241.170
1860	45,130	540,680	380,600	205,210
1859	136,690	277,395	332,645	81,440
1858	82,600	347,755	345,205	85,150
1857	46,800	356,810	304,890	98,720
1856	53,650	375,770	338,520	90,900
1855	72,250	332.620	314,960	89,910
1854	21,100	310,685	243,185	88,600
1853	23,830	370,410	295,940	95,300
1852	22,600	346,410	306,160	62,850
1851	42,400	282,640	283,640	41,400
1850	38,000	226,090	229,490	34,600

The following were the prices per 50 kilogrammes (about 1 cwt). It is to be noted that since the 7th May, 1860, the cotton imported by French vessels, or foreign vessels treated as French, has been duty free:—

	Aug. 31, 1861.	Aug. 31, 1860.	Aug. 31, 1859.	Aug. 31, 1858.	Aug. 31, 1857.

Hayti	85 95	68 68	84 93	75 85	99 110

The newspapers say that there is some question of negotiating a treaty of commerce between France and Spain.

The deliberations of the Councils General of departments have not presented much interest this year. Owing to the recent commercial reforms and the treaties of commerce, the Councils were not, in fact, called on, as on former occasions, to pronounce for or against free trade in principle, or for or against such or such tariff stipulations. Recommendations for the prompt execution of public works and especially of railways, for the planting of trees on mountains, for selling wheat by weight instead of by measure, for the sale of wines by a uniform measure, for the destruction of rabbits, for the production and protection of fish in rivers, for equal duties on firewood and coal, &c., &c., have, therefore, been all that need be noticed in the proceedings of most of these bodies. In the Council of the Pas de Calais, a petition was presented from the owners of coal-pits in the department, praying the Council to recommend the complete and definitive abolition of all navigation dues. Among other reasons urged by them in favour of this measure is the competition to which they are subjected by the treaty of commerce. The Council of the Loire makes the same treaty a pretext for demanding a reduction of the railway tariff for the conveyance of coal, and it says that that would largely promote the consumption of Loire coal in the navy, and on board steam vessels, "in which it has lately been employed on a vast scale and with full success."

The Government has just published a table of the length of railway worked, and the receipts obtained in the first six months of the present year, compared with the corresponding period of last year. Subjoined are the more important portions of this document. By the term "old network" is meant, as your readers are aware, the original concessions of lines; by "new network" is meant the prolongations and embranchments on old lines, also new concessions, to which the Government guarantees a certain rate of interest:—

OLD NETWORK.

Names of Companies.	Length. 1861. Total worked on the 30th June.	Length. 1861. Average worked during the first six months.	Length. 1860. Total worked on the 30th June.	Length. 1860. The Bank of France has not reduced its rate of discount, owing to the vast sums being required to purchase grain abroad,—sums which at the very lowest estimate are set down at 250,000,000f, but which certain authorities think likely to attain 400,000,000f or 500,000,000f.

The Bourse has again been devoid of activity, and the following are the quotations:—

Annexed is an account of the markets:—

FLOUR.—At *Paris*, a new and important advance has taken place, the quotation yesterday having been 86f to 91f and even 92f the sack of 159 kilogs for the disposable; a shade lower for delivery. In the four marks also there has been an advance, the prices yesterday having been 90f for the current month, 90f 50c for the last three months. After the closing of the market, however, there was a slight reaction in the four marks.

WHEAT, at *Paris*, yesterday, was more offered than on the preceding market day, but prices made a new advance. The quotation was 49f 50c the sack of 120 kilogs. For some sorts 50f and 51f were demanded, and holders would not consent to a reduction. In foreign, English was at 50f to 52f; Baltic, 46f to 46f 50c; Dantzic, 46f; America, 42f 50c to 46f. American was not readily taken. As to the provincial markets, as many as 120 present a rise of from 15c to 2f the hectolitre; only 10 a fall, which varied from 18c to 3f 20c; 11 are reported firm, 14 without variation, 2 calm.

COTTON.—At *Havre*, in the week ending Friday, the sales were 6,528 bales, against 1,005 arrivals. The closing prices were only 1f higher for the very low sorts; the others unchanged. Accordingly the very low New Orleans was 105f the 50 kilogs; the low, 115f; and the very ordinary, 120f. On Friday, the stock was 233,270 bales, against 199,[illegible] in 1860, and 76,150 in 1859. During the first two days of this week, the sales were 1,900 bales; prices unchanged. Yesterday, the market was calm, and prices very firm.

COFFEE.—At *Havre*, in the week ending Friday, business was animated, and prices rose. 860 sacks Hayti Port-au-Prince disposable went at 80f to 80f 50c the 50 kilogs in bond; 650 ditto ditto for delivery, 79f 50c to 80f; 200 Jacmel for delivery, 81f; 400 Gonaives, 84f; 732 Cape for delivery, 82f; 723 Rio not washed, disposable, 68f to 72f; 450 ditto ditto, 73f 50c; 525 ditto washed, disposable, 87f; 500 Laguayra grapé, 86f; 800 Ceylon native, disposable, 108f duty paid; 3,175 ditto ditto, 108f to 109f duty paid. By auction, 502 Hayti damaged were sold from 76f to 82f in bond; and 395 Rio, 63f to 76f. On the

1st September, the stock was 7,232,800 kilogs (7,232 tons), against 5,462,050 in 1860, 4,545,300 in 1859, and 2,808,855 in 1858. This week, Rio not washed has been at 68f to 74f; Rio washed, 87f to 90f; Porto Rico, 90f; and Hayti, 80f 50c to 81f. At *Nantes*, last week, 313 Singapore and 74 Macassar went at 101f 75c. This week, no business has been done. At *Bordeaux*, last week, business was calm. 325 sacks Guayra damaged went by auction at 82f and 88f 50c; 380 casks Santiago, at 91f to 99f; 62 ditto, Caracoli at 112f. This week, some sales have been made of Santiago; prices not stated. At *Marseilles*, last week, the sales were 1,500 sacks Maracaibo, at 82f 50c; a lot of Mocha of Alexandria, 102f 50c; 500 sacks Rio, 62f; 1,500 ditto, from 62f to 72f. This week, Mocha has been at 105f. This week, there has been an advance in prices, especially of the better qualities.

SUGAR.—At *Havre*, in the week ending Friday, business was without animation. 500 casks French West India were sold at 45f 50c to 46f the 50 kilogs duty paid; 150 ditto "usine," 50f; 1,000 Havana in bond, 33f. The arrivals were about 9,000 casks. This week, Porto Cabello has been at 45f; French West India, 46f 50c; Havana, 33f 50c; Cuba, 45f to 45f 50c. At *Nantes*, last week, the sales were 5,400 bales Reunion, 48f 75c; 6,725 ditto, 48f 50c; 883 ditto, "gros grain," 54f 50c; 691 ditto ditto, 54f; 346 sacks of very common sorts, 35f to 39f; 197 casks and 45 sacks ditto, 45f 75c. This week, Mayotte has been 43f 25c and 48f 50c; French West India, 46f and 46f 25c; ditto "usine," 53f and 54f; Reunion, common, 37f and 40f; Havana, part at 53f 50c, part at prices not stated. At *Bordeaux*, last week, the sales were 700 casks French West India, 46f to 47f; 600 bales Reunion, 49f 75c; 3,225 bales ditto, at 50f; 103 casks and some other lots Santiago, 44f 75c and 45f 50c; 100 sacks Brazil, 54f; a small lot of Santiago damaged, 68f to 70f. This week, French West India has been at 40f 75c; Santiago, 45f 50c; Reunion at prices not stated. At *Marseilles*, last week, some sales of French West India and Bengal were made.

INDIGO.—At *Havre*, in the week ending Friday, business was animated enough, and prices improved. 73 chests Bengal were sold, and a certain number of them at 2f above the estimates. The arrivals were 46 chests. On the 1st September the stock was 1,027 chests, against 1,671 in 1860, 2,306 in 1859, and 2,353 in 1858. This week, some Bengal have been sold at prices kept secret. At *Bordeaux*, last week, business was animated and firm. The sales were 128 chests Madras, 882 Bengal, 88 Kurpah, 79 Guatemala and Mexico, 9 Vellore. This week, no transaction.

HIDES.—At *Havre*, in the week ending Friday, a fair amount of business was done. The sales were 169 Buenos Ayres dry at 104f the 50 kgs; 3,533 ditto Saladeros, 70f to 71f; 500 Rio Grande salted ox and cow, 64f; 1,000 Rio Janeiro salted, 50f; 500 Pernambuco salted dry, 84f 50c; 1,250 Valparaiso salted dry, 63f ox, and 59f cow; 249 Martinique ditto, 56f; 1,693 New York salted, 43f 50c to 45f; 1,200 ditto ditto calf, 70f; 13,313 salted horse La Plata, 83f to 84f the 100 kilogs, for delivery. The arrivals were about 36,700 hides. This week, Monte Video have been at 70f to 70f 50c; Rio Janeiro salted, 50f; Valparaiso salted, 63f; Buenos Ayres dry, 95f to 107f 50c; Monte Video dry, 107f 50c to 112f 50c.

WOOL.—At *Havre*, in the week ending Friday, 91 bales Buenos Ayres, unwashed, went at 1f to 2f 55c the kilog; 6 Australia, unwashed, 3f 10c; 10 La Plata sheepskins, unwashed, 90c to 1f 10c. The arrivals exceeded 400 bales. The stock on the 1st was about 27,000 bales. This week, Monte Video unwashed has been at 2f to 2f 45c the kilog; Buenos Ayres ditto, 1f 60c to 2f 47½c.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 100 casks Russia at 60f the 50 kilogs, and 50 New York same price. On Friday, the whole stock only consisted of 100 casks. This week, no business. At *Paris*, yesterday, the 100 kilogs were 120f 50c—a rise on last week's quotations.

BRUSSELS, Sept. 11.

A commercial treaty between Switzerland and Belgium is on the *tapis*: it has been proposed by the former as the means of obtaining a reduction in the import duties on her silks imposed by Belgium. In virtue of the treaty of commerce with France, the import duty on French soap has been reduced from 10f to 6f the 100 kilogrammes (2 cwts). France on her part has reduced the duty on Belgian soap.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed report is dated Calcutta, July 30:—Produce Market.—Since the 22d inst. no material alteration has taken place. Import Market.—There is no more demand for goods, and the sales reported are in some instances at lower rates than were ruling on the 22d inst. Freights.—Our market for England still remains in the same unsatisfactory and unsettled state, owing to the continued bad accounts of the produce markets at home, coupled with numerous arrivals. Indigo.—The reports are unfavourable from all the indigo districts. Too much rain continues to fall everywhere, reducing produce and retarding the manufacture. The prospects of the crop generally are not so good as last reported.

From Bombay we have the following advices to the 12th ult.:—Reports from the interior continue favourable as to the progress and prospects of the monsoon and the crops. The import market has *relapsed into a languid state, and former prices are no longer obtained.* Notwithstanding the increasing value of goods in Manchester, the accumulation of *stocks here*, the heavy shipments on the way, and the want of demand from the interior, have induced the dealers to draw back, and the importers to be less firm. To effect sales, holders have been obliged to submit to easier rates. The export market is firmer; with the exception of cotton, in which the business is active, there is little doing for other produce in consequence of scanty supplies.

The following report is dated Quebec, Aug. 30:—The past fortnight has been characterised by extreme dulness, our port being unusually bare of shipping. White pine continues to arrive freely, but lumberers are holding off, under the impression that, on the arrival of the fall fleet, the demand will improve. It is evident that the tonnage to arrive will exceed the demands of the trade, and there is therefore no prospect of prices being lower. Common wood is very scarce. Red pine has improved in value. A large lot of 41 feet sold at 10d measured off. Elm—Small is scarce and dear. 57 feet was sold at 12½d, and 60 feet at 13d, both measured off. Oak—Really prime is held at 18d. Birch dull. Staves are held for higher prices. The arrivals fall very short. Deals—No change worth notice. Coals—Scotch steam sold at 21s to 23s 9d per 30 cwts. Salt—Bags are difficult of sale at 2s 1d to 2s 2d. Exchange—90 days' is worth 7½ per cent. to-day.

The annexed commercial intelligence is brought by the last West India mail:—Jamaica advices are to the 24th ult. Everything continued very dull. The weather was everything that could be desired for the planter, fine August rains having fallen all over the island. From Trinidad we learn that the weather during the fortnight had been more moderate and seasonable for agricultural purposes. The growing crop looked promising. Business was dull. From Hayti the quantity of coffee shipped last year exceeded by ten and a half-million pounds the quantity shipped in any single year for the last half century. The export of cotton is becoming considerable. From the district of St Marc alone 1,902 bales have been exported within a short time, and the total crop this year, it is expected, will be more than double that of last year. American immigration has been principally instrumental in bringing about this result. At Demerara the weather had been generally fine. The exports up to the 28th were:—Sugar, 572 hogsheads 11 tierces 1,122 barrels 16 bags; rum, 328 puncheons 100 hogsheads 73 barrels; molasses, 249 casks. At Grenada the crops were over, although very little more than half of the fine canes grown for them with great care and expense had been gathered in. The crop of this year has dealt a heavy blow and great discouragement to the colony; our last ship, the Appolline, has sailed, carrying away about half a load of produce. An account of the exports from January 1 to date shows the following results:—Sugar, 5,359 hogsheads of 16 cwts; rum, 1,057 puncheons of 118 gallons; and cocoa, 7,792 bags of 150 lbs. Compared with last year, there was a decrease of 942 hogsheads of sugar and 243 puncheons of rum, but an increase of 1,842 bags of cocoa. The next cocoa crop promised to be early and large.

An account of the importations and exportations of bullion and specie registered in the week ended 11th September, 1861:—

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 11th day of September, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,479,715	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,829,715
		Silver Bullion	..
	27,479,715		27,479,715

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,450,800
Rest	3,788,270	Other Securities	17,372,545
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 868,009	Notes	7,626,885
		Gold and Silver Coin	819,687
Other Deposits	12,357,680		
Seven Day and other Bills	702,958		
	36,269,917		36,269,917

Dated the 12th September, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,555,788	Securities	27,920,345
Public Deposits	4,868,009	Coin and Bullion	13,649,402
Private Deposits	12,357,680		
	37,781,477		41,569,747

The balance of Assets above Liabilities being 3,788,270*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit:—

A DECREASE of Circulation of	£457,139
An INCREASE of Public Deposits of	583,524
An INCREASE of Other Deposits of	160,867
An INCREASE of Government Securities of	90,000
A DECREASE of Other Securities of	329,540
An INCREASE of Bullion of	531,301
An INCREASE of Rest of	4,509
An INCREASE of Reserve of	977,381

The above return shows a very large addition to the resources of the Bank. The reserve has increased nearly a million and the bullion more than half-a-million. The other securities have run off to a considerable amount, while the deposits, both public and private, exhibit a large augmentation, especially the former. Coin appears still to be withdrawn for the harvest; the actual amount of bullion known to have been taken to the Bank during the week being 689,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,322,054	£ 20,913 550	£ 21 919,652	£ 21,544,878	£ 20 555,788
Public deposits	8,757,770	8 041,078	8,508,922	6,843,436	4,868,009
Other deposits	8,126,065	12,201,959	13,074,640	13,462,663	12,357,680
Government securities	13,464,216	10,970,514	11,220,018	9,663,511	10,450,800
Other securities	13,437 245	15,311,274	18,957,161	19 812,757	17,372,545
Reserve of notes & coin	9,405,568	12,969,925	10,535,462	9,904,117	8,446,572
Coin and bullion	14,516,473	18 643,915	17,120,822	16,233,202	13,649,402
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	4 p. c.
Price of Consols	96⅞	97⅛	95½	93¼	93½
Average price of wheat	38s 5d	45s 1d	42s 9d	62s 10d	53s 1d
Exchange on Paris (shrt)	25 17½ 22½	25 15 20	25 12½ 7½	25 12½ 20	25 42½ 50
— Amsterdam ditto	11 18½ 19	11 16 17	11 14½ 15	11 13½ 14	11 18 19
— Hamburg (3months)	13 9¾ 10¼	13 8½	13 5⅞ 13	13 5⅞ 6	13 10 10¼

In 1851, the approaching period for the simultaneous cessation of office of the President of the French Republic and the dissolution of the French Assembly were exciting some uneasiness, since, by the Constitution, Louis Napoleon (the present Emperor) was ineligible for re-election. No suspicion of a *coup d'état*, however, appeared to be entertained. The accounts from Germany and Italy continued to report arbitrary and despotic acts on the part of the reigning Governments. From the Cape of Good Hope it was stated that the colony was suffering severely from the Caffre war, and that reinforcements were urgently required. Further accounts had been received of the gold discoveries in Australia.

In 1858, the enormous accumulation of gold was causing the funds to rise. Money in Lombard street was worth only 2¼ per cent. The second Indian debenture loan, issued at the reserved price of 97, was quoted 98⅛. The first particulars respecting the proposed new concession of the Lombardo-Venetian Railway had been published.

In 1859, news had been received from China of the disastrous repulse sustained by Admiral Hope on the Peiho, and the certainty of a war with China in consequence. Notwithstanding this circumstance the funds rose to 95¼. Owing to the abundance of money, the rate being 2½ per cent. in Lombard street, a great proportion of the Indian loan, viz., 3,250,000*l* out of 5,000,000*l*, had been paid to the Council of India, while in strictness the instalments actually due amounted to 1,000,000*l* only.

In 1860, Garibaldi had just entered Naples amid great enthusiasm. Insurrectionary movements had broken out in the Papal provinces, and a deputation from the inhabitants of that part of Italy had been received by King Victor Emmanuel. General Cialdini had invaded and occupied the disturbed districts. In consequence of this resolution the Emperor of the French had withdrawn his Ambassador from Turin. It was reported that measures were in progress for effecting a reconciliation between Austria and Russia. At home no event of importance had occurred. The Court of Bankruptcy was still occupied with the disclosures consequent on the great failures in the leather trade.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 5,244,180*l*; in 1858, a deficiency of 3,109,315*l*; in 1859, a deficiency of 5,882,521*l*; and in 1860, a deficiency of 6,350,094*l*. In 1861, the deficiency is 5,014,865*l*.

DISCOUNT AND MONEY MARKET.—The money market has manifested increased ease throughout the week, and the rate for the best paper has fallen to 3½ to ⅜ per cent. Although to-day there was a slight increase in the demand, the majority of the transactions were at the former figures with occasional bargains at even a fraction less. There was an expectation that the Bank would have reduced their rate to 3½ per cent. yesterday, and some disappointment was expressed at no change having been announced, especially when the large augmentation in the reserve and bullion became known. On the Stock Exchange there is an abundant supply of capital, and short loans on Government securities have been obtained as low as 2 per cent., but this afternoon the usual charge was 3.

The following are the rates of discount in the principal cities of the Continent:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5
Berlin	4	2¾
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	4	3½
Hamburg	...	2½
St Petersburg	7	...

The monthly return of the Bank of France, published to-day, shows a decrease in the bullion of 360,000*l*, in the bills discounted of 1,647,000*l*, in the circulation of 30,000*l*, in the Treasury balance of 647,000*l*, in the current accounts of 1,453,000*l*, and in the advances of 32,000*l*.

ENGLISH FUNDS.—The monthly settlement of Consols took place this week, and has been one of the most important for some time past. The market at the commencement was very firm at a further rise, and a considerable additional impetus was given by the announcement that Mr Augustus Cooper, an operator for the fall, with as much, it is said, as a million of stock open, and differences amounting to about 25,000*l*, was unable to meet his engagements. This suspension was followed by seven others, and for some time great consternation prevailed. In order to lessen the embarrassment caused by these stoppages, the Committee of the Stock Exchange adopted the following resolution, by which a delay is accorded in paying differences till Monday next:—

The official assignee having stated to the Committee that there will be unavoidable delay arising from the large and numerous failures in the Consol and Indian markets, and the Committee having received evidence that such delay will cause much difficulty in paying differences due to-day, have resolved that members who have paid less than 20s in the pound on the settlement of their Consol account this day must send in to the Committee on or before Mon-

day, the 16th inst., the names of the parties who have not entirely fulfilled their engagements.

A dividend of 5s in the pound has already been paid to the creditors of the principal defaulter, and a further sum of 1s or 1s 8d is expected to be distributed. Mr Cooper has wealthy and respectable connections.

Consols for money marked as high yesterday as 94, but subsequently relapsed to 93⅝ to ¾ on the announcement that the Bank had made no alteration in their rate of discount. To-day, the opening price was 93¾ to ⅞, the favourable Bank return causing a slight advance, but the improvement was not maintained, and a reaction ensued to 93½ on large sales both of Consols and of Reduced and New Three per Cents. Towards the close, however, there was again a better feeling, and the final transactions were at 93⅝ for immediate delivery, and 93¾ to 93⅞ for the account. The rise established since last Friday is thus about three-quarters per cent.

India bonds have experienced a further advance of 1s, closing at 8s to 12s premium. Exchequer bills were rather dull, the last prices being 2s discount to 2s premium for the March issue, and 4s to 7s premium for that of June.

There have been some unimportant changes in India scrip, but the quotation is now the same as last week, viz., 103¾ to 104. The old stock also stands at that price.

Foreign Stocks.—Rather more business has taken place in the foreign market than for some weeks past, and in several cases an improvement has occurred. New Granada bonds are higher on the confirmed news of the successes gained by the liberal General Mosquera, who has assumed the government of the Republic, and has stated his determination to satisfy the national obligations towards both home and foreign creditors. A rise of more than 1 per cent. has occurred in Mexican, on the statement of the proposed combined intervention in the affairs of that country by England, France, and Spain. Turkish Six per Cents. have been more inquired for, and both the 1854 and 1858 issues show increased firmness. Spanish Certificates have been in demand, and advanced to 6 to ⅛. Peruvian bonds fully maintain their previous value, the purchases for the sinking fund causing these descriptions to be in very short supply. The Three per Cents. this afternoon have been especially buoyant.

The closing price of French Three per Cents. on the Paris Bourse this evening was 69f 10c, showing a decline on the week of an eighth.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

Railways and other Shares.—In the railway market, this week, there has been little business doing, and the general tendency has been rather dull. At the same time the public appear to refrain from selling, on account of the present low value of money and the anticipation of increased receipts next year through the Great Exhibition. The stocks chiefly supplied have been Great Northern and Lancashire and Yorkshire, the latter being especially flat. Caledonian, on the other hand, remains firm. North-Eastern stocks and South-Eastern have experienced a considerable fall. North British is likewise lower on the announcement of the proposed dividend at the rate of 3 per cent. per annum. The general feeling to-day has been decidedly adverse.

In the Colonial department, Canadian descriptions have declined, while Indian guaranteed are comparatively steady. Cape of Good Hope shares maintain the late advance.

The principal demand in the foreign railway market has been for Brazilian shares, at an advance. Lombardo-Venetian also improved at one period of the week, but have since partially given way. The final quotation, however, 1½ to ⅝ premium, is still rather better than last Friday. American securities have generally receded.

In the miscellaneous markets the only feature is a fair inquiry for mining shares. Mercantile Fire Insurance are dull, at ½ to ⅝ premium, and Commercial Union at ¼ dis. to par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

Railways.	Closing prices last Friday.	Closing prices to-day.

Foreign Exchanges.—There was no alteration of importance in the rates last Tuesday, but to-day they have been generally less firm.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—The purchases by the Bank of England, alluded to in our circular of 5th inst., still continue upon an extensive scale, no less than 699,000*l* having been sent in since the date in question. Large arrivals of Russian Imperials and French gold coin are comprised in the above purchases. The Orwell, from Melbourne, with 155,000*l*, is the only vessel at present known to be on her way. One Australian telegram, received this day, states that the shipment of gold since last advices is 122,053 ounces; another telegram reports 12,205 ounces only. The demand for export is exceedingly limited, the only shipments this week having been 1,122*l* per Tyne to the Brazils, 6,535*l* per Kangaroo to New York, 1,061*l* per New York to New York, 7,600*l* per Saxonia to New York, 2,950*l* per Delta for Bombay, 7,000*l* per Delta for Alexandria. The Armenian, from the West Coast of Africa, has brought 13,000*l*.

Silver.—Our market for silver has been in a very unsettled state since the 5th instant, sales having been effected at 60½d, 60⅝d, and 60¾d per oz standard; we quote the price this day as being 60⅝d. The Seine, from the West Indies, has arrived off Hurst Castle, but the amount of specie on board has not transpired. The shipments have been:—9,000*l* per Tyne, to the Brazils; 14,600*l* per Saxonia, the United States; 96,475*l* per Delta, for Bombay.

Mexican Dollars.—Some few sales of dollars have been effected since our last, at 59¼d and 59⅜d per oz; the demand is, however, very limited.

Exchange for Banks' drafts on Bombay and Calcutta, at 60 days' sight, is 1s 11⅝d to 1s 11¾d; on Madras, 1s 11½d. Bills with documents, 1s 11d to 1s 11⅛d.

India Government Loan Notes have not been in quite such demand. The price of the 5 per Cents. is 96¼ to 96¾, and of the 5½ per Cents. 103¼ to 103¾.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0⅝d per oz std; bar silver, containing 5 grs gold, 5s 0⅞d per oz std; Mexican

dollars, 4s 11⅞d per oz; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 60,000*l* in bar gold was purchased by the Bank to-day, and a like sum yesterday, making 120,000*l* since the date of the last account.

The Seine has arrived from the West Indies with 133,000*l*, of which 49,000*l* is in gold and 84,000*l* in silver.

FAILURES AND MERCANTILE EMBARRASSMENTS. — An adjourned meeting of creditors of Mr B. de Cuadra, Spanish merchant, who suspended last April, was held on Thursday, when an amended statement of affairs was presented, showing debts 65,118*l* and assets 75,032*l*. There are, however, in addition to the former, liabilities of 17,468*l* on bills payable, which are expected to be claimed on this estate. Since the last meeting, 5s in the pound has been divided amongst the creditors, and it is proposed to pay 2s 6d more in October, 2s 6d in January next, and the remaining 10s with 4 per cent. interest as quickly as the estate can be realised. A large portion of the assets are at Havana, where the mercantile accounts are still unfavourable, considerable delay being anticipated in winding up the indebted houses there. It was ultimately agreed to allow Mr de Cuadra three years to clear off his debts under the inspection of two creditors. The liabilities on bills payable, which now stand at 17,468*l*, at the time of suspension were about 400,000*l*.

With reference to the affairs of Messrs James Coster, Beater, Dennant, and Russ, warehousemen, who stopped payment on the 7th ult., a pamphlet has been published by Mr Edmund A. Fawcett, of Trump street, Cheapside, on the points at issue between the trade creditors and the executors of the late Mr Coster. Mr Fawcett contends that the capital left in the firm at the death of that gentleman is amenable to the debts of the house, and that, therefore, the executors can only claim after the trade creditors shall have been paid in full. The whole question, however, without doubt, will ultimately have to be decided in a court of law. The following are Mr Fawcett's concluding remarks:—

That the house of Messrs James Coster and Co. did obtain credit upon the impression and belief that the late James Coster's capital was continuing as available capital in the house, for the benefit of his relations, is beyond all dispute; and that the executors have at this moment credit upon the face of a bond for at least 37,000*l* more than they could possibly have realised had the business been wound up at the time of Mr Coster's decease, and upon which they have received about 5,500*l* interest, making in all a sum of say 42,500*l*, which they now seek to obtain a dividend upon, to the injury of the trade creditors, which if legally right is unquestionably morally wrong, and which dividend upon such overcredit would pay the trade creditors 20s in the £, and which there is no doubt Mr Coster would have wished his executors to have done, and which they can easily do, if so disposed, for the Court of Chancery would not refuse its sanction to a friendly bill, supported by the executors and creditors, for such purpose, and which would only be an act of common honesty towards the trade creditors, as it cannot be alleged the estate is unable to pay the debts, or unable to bear so just a claim. Were it not so, or the estate was unable to pay the trade creditors, without subjecting it to an unfair demand, then I should be the last to press its consideration either upon the executors or the trade creditors. But, reviewing the whole circumstances dispassionately, and knowing that there are ample funds to pay with, and that such payment would be equitable, as the executors have acquired an overcredit, as explained, with interest amounting to a sum of 42,500*l*, I certainly think it becomes the duty of every creditor to assist me in every honourable way possible to secure the trade creditors 20s in the £, and thereby establish a principle which may be found hereafter beneficial in protecting the public under similar circumstances.

PUBLIC COMPANIES.—The half-yearly Court of Proprietors of the Bank of England was held on Thursday, Mr Alfred Latham the Governor presiding, when it was announced that the profits in the six months ending the 31st of August were 750,589*l*, making the rest on that day 3,751,654*l*, and that the Directors proposed a dividend of 5 per cent. for the half-year free of income tax, leaving the rest at 3,024,004*l*. There was no discussion, and the recommended dividend was immediately agreed to. The usual vote of thanks was moved by Alderman Salomons, who especially alluded to the earlier publication of the Bank returns as a proof of the desire of the Court to serve as far as possible the interests of the public.

At a meeting of the Crystal Palace Gas Company a dividend was declared at the rate of 6 per cent. per annum, with a bonus of 2 per cent., leaving 83*l* to be carried forward. All the preference shares were stated to have been taken up. The whole of the property of the Sydenham Gas and Coke Company now belongs to the present Company, and a favourable return is fully anticipated from this purchase. The report having been adopted, the proceedings closed with the usual vote of thanks.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 5 per mille premium, and the short exchange on London is 25.45 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107½ to 107⅝ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 136,336 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat at Mark lane, to-day, was very small, and both red and white qualities sold readily, at fully the late advance in the quotations. Several samples of foreign wheat were taken for export to France, and all descriptions consequently realised, or were held at, quite former prices. The show of barley was much restricted, and, in some instances, rather higher rates were obtained. Oats, beans, and peas ruled firm, and the currencies had a slight upward tendency. All kinds of flour moved off freely, at rather higher prices. This week's imports amount to 6,640 quarters of wheat, 2,080 of barley, 26,090 of oats, and 19,950 barrels of flour.

At Liverpool, this morning, the wheat trade was firm, and the late improvement in prices was quite maintained. Flour was rather dearer. Spring corn sold steadily at full quotations.

The wheat trade at Alexandria, for the week ending Aug. 27, was decidedly less firm, in consequence of increased receipts of produce from the interior, and prices had given way 1s per quarter. Linseed, however, was scarce, and fully as dear. The following were the sales, with quotations, free on board, viz.:—Saide wheat, private trade produce, 26,600 quarters, 30s 3d to 32s; Saide ditto, Pasha's produce, 3,000 quarters, 32s 6d to 33s; Beheireh ditto, private trade produce, 17,210 quarters, 29s to 30s 3d; Beheireh ditto, ditto (white), 497 quarters, 31s 2d to 31s 6d; Saide beans, private trade produce, 24,150 quarters, 27s to 27s 10d; Saide beans, Pasha's produce, 1,875 quarters, 28s 9d; Beheireh beans, private trade produce, 3,470 quarters, 25s 6d to 26s 6d; barley, private trade produce, 5,130 quarters, 17s to 18s 6d; ditto, Pasha's produce, 844 quarters, 18s to 18s 6d; lentils, private trade produce, 1,925 quarters, 24s 10d to 25s 10d; ditto, Pasha's produce, 812 quarters, 26s to 27s; ceci, 594 quarters, 30s 9d to 34s; linseed, 1,240 quarters, 43s to 47s 6d per quarter. Freights exhibit a firm upward tendency, owing to the scarcity of shipping. Beans to the United Kingdom for orders may be quoted 5s 6d to 6s; wheat and other grain or seed in proportion. To a direct port, 4s 3d to 4s 9d. By steamer to Liverpool, 4s 6d to 5s.

The Liverpool cotton market during the past week has borne a very firm appearance, though the demand has not been brisk. The news from America did not produce any material change, being of little importance, but still contributed to harden prices, and the quotations are again ⅛d above those of last Friday. The sales amount to 66,000 bales, including 37,000 to spinners, 17,000 on speculation, and 12,000 for export. To-day there is a very good demand; sales 15,000 bales.

The following are the exports of cotton from Bombay, from the 1st January to the 12th August:—

	1861. bales.	1860. bales.
London	64,910	30,979
Liverpool	641,950	286,933
Clyde	5,739	1,404
Hull	655	919
Total Great Britain	713,254	320,235
Continent	26,187	15,114½
China	57,926½	139,273
Total	797,367½	474,622½

Annexed is Messrs Briggs and Co.'s report of the cotton trade of Alexandria to August 27:—"Prices of cotton continue to rise, and the high rates seem to have attracted from the interior what little remained in the country. During the first days of the week, the sales were comparatively large, but have fallen away again rapidly from want of merchandise. The transactions from the 18th have been as follows:—49 bales refuse to low ordinary, at 6½d to 7¼d; 415 bales ordinary to middling, 8d to 8 3-10d; 169 bales good middling to fair, 8 4-10d to 8 9-10d; 46 bales good fair to good, 9 1-10d to 9 4-10d; 22 bales good to fine, 10 6-10d per lb., free on board. Freights per steamer 3-16ths of a penny per lb in full."

By private contract, there has been a good demand for nearly all kinds of tea, and the quotations have been well maintained. No public sales have been held this week.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Aug. 31, 1860 and 1861, with STOCK on hand on September 1, 1860 and 1861.

Good and fine qualities of raw sugar have changed hands to a moderate extent, at full prices. For inferior samples, however, the inquiry has been decidedly heavy; nevertheless, the quotations have ruled stationary. In refined goods, a fair, but by no means extensive, business has been transacted on former terms.

The supply of coffee on offer has been much restricted. Most descriptions, however,—owing to some approaching public sales of Ceylon,—have met a less active market, yet prices have ruled firm. Cocoa has been disposed of at full currencies.

In rice, a full average business has been done, and prices have been quite supported. Fine white Bengal is now worth 15s 6d per cwt.

For new fruit, the trade has continued in an inactive state, at the opening rates. Old parcels, however, of good quality, have sold steadily, at fully last week's currency.

Messrs Durant and Co. remark as follows with regard to the silk trade of the past month:—We have had another month of miserably quiet business in silk, with deliveries even smaller than in July, marking that manufacturers both here and on the Continent continue to diminish their production. Still the mills and even some portion of the looms are going to some extent, and buyers have so completely used up their stocks that from day to day they are obliged to come to market for the little they require. Of China silk we have a second steamer with new silk—a small quantity, but more than is taken off. We fear it is rather bad trade than bad quality that prevents the silk being sold. We doubt the silk being worse than last year, and thus far, at any rate, it is finer in size. In Japan silk some considerable parcels have been sold at low prices: this silk still comes forward in very uncomfortably small breaks. Bengal silk, as shown by the deliveries, continues much neglected. Chinese thrown silk entirely so. In Italian silk some few bales are sold occasionally—the low prices in comparison with former years inducing manufacturers to try to turn them to account.

Hemp moves off slowly at 30*l* 10s to 30*l* 15s for clean Russian. Flax supports former prices, and the value of jute and coir goods is quite supported. The limited business transacted in saltpetre is at previous rates.

Scotch pig iron has changed hands to a fair extent, at 51s 3d to 51s 6d cash, mixed numbers. English tin has further advanced 3*l* per ton.

Linseed oil has advanced to 34s per cwt on the spot. In other respects, the oil trade has been very firm, and prices have had an upward tendency. In turpentine, very little is doing. Spirits are quoted at 67s to 70s per cwt.

The exports of turpentine, &c., from New York from Jan. 1 to Aug. 31, current year, as well as for the same period in 1860 and 1859, were as follows:—

	1861. brls.	1860. brls.	1859. brls.
Turpentine.....	19,465	40,802	64,501
Spirits of turpentine ...	20,026	51,110	46,468
Rosin	194,543	372,326	425,037
Tar	25,115	24,972	18,230

In the tallow trade there has been but little animation. To-day, Petersburg Y.C. is quoted at 48s per cwt on the spot; and at 48s 6d for spring delivery.

"The new Government loan," observes the New York *Shipping List*, of the 31st ult., "continues to form the all-absorbing topic of remark in financial circles, and the liberal proffers of money which are every day made at the Sub-Treasury is a subject of much congratulation everywhere. It is expected that a large proportion of the issue will be subscribed for in this way, and that it will be optional with the banks whether to reserve a large portion for themselves, or to let it be chiefly taken by the people themselves. There is but little improvement perceptible in the state of trade generally. Though there is abundant time for an active Fall business during the next sixty or ninety days, yet, from prevailing indications, it seems probable that those who base their calculations upon such a contingency may be liable to disappointment. The harvests, it is pretty generally conceded, have proved abundant. We are at peace with all the world, outside of ourselves, and there is a fair prospect of a continuance of peace in Europe, all of which are favourable to a revival of commercial enterprise. But, as the large capitalists and leading traders are guided almost solely by political and war signs on this continent, at the present time there appears to be little on which to base the hope of active business operations for some time hence. The receipts of most of the great staples of the West, since the opening of inland navigation, show an enormous increase over previous years, and flour and grain continue to arrive at tide-water as fast as they can be brought forward. This fact, taken in connection with another of equal importance, viz., the partial deficiency of the European crops, and consequent probability of a continental fair demand for flour, wheat, and corn for a long time to come, afford pretty substantial basis for the belief that an active prosecution of trade in the great commercial centres at an early day is highly possible. In the money market there is little stirring, though rates are hardening. Loan calls are now quoted at 6 per cent., though to favourite customers 5 per cent. only is charged. There is very little doing, however, and our rates are almost nominal. We quote:—

	Per cent. per annum.
Loans on call, stock securities	6 to ...
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months.....	8 9
First-class single signatures	7 ...
Other good bills	... ...

The dry goods trade continues to be quite actively prosecuted, and transactions are increasing in volume and importance. The number of buyers in town from the North Western States is increasing, and most them have been purchasing quite liberally. The short credit system occasions some little dissatisfaction, but for the most part buyers offer but few objections to it. Prices of cotton goods continue to tend upward. The stock market has been remarkably quiet for the most part since our last, but holders have generally manifested considerable firmness.

The market remains buoyant, under a more active demand from the home trade and speculators, and prices may be written ⅛c higher, closing with a still upward tendency. The sales comprise 6,000 bales.

There have been no receipts since our last. Total imports since 1st inst., 716 bales. Total import since 1st September, 431,781 bales. Export from 1st to 27th August, 824 bales, against 7,387 in 1860.

NEW YORK, Aug. 31.—There has prevailed a steady fair demand for consumption, and an active demand for speculation during the past three days, and the sales and resales have been heavy, while prices have again largely advanced. The transactions comprise 8,000 bales, the market closing very firm. We quote:—

NEW YORK CLASSIFICATION.

There has been no great excitement in the cotton market this week. The trade, in view of the resort to reduced hours of labour, have limited their purchases accordingly, but speculators and exporters have done a fair business, and a few orders have again been executed for shipment to America. Prices of American still creep up, and our quotations have to be raised fully ⅛d per lb. Long-stapled kinds are still without change, and in fair demand. East India have been largely dealt in, being relatively very cheap. The sales to-day are fully 12,000 bales. The market is very firm. The reported export amounts to 12,150 bales, consisting of 5,240 American, 910 Brazil, and 6,000 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The various markets held in the manufacturing districts, this week, have been extremely heavy. Both for home use and export, the dealings in woollen and some other goods have been limited, and, in some instances, prices have had a drooping tendency. The iron trade has ruled steady, and a fair average business has been passing in coals.

MANCHESTER, Sept. 12.—Manufacturers have, this week, had to decide either to reduce their terms for selling or their hours of working, and probably the majority have chosen the latter alternative. A few have closed their mills altogether until the receipt of orders which would pay; but perhaps three-fourths of the trade have preferred the plan of opening their mills for not more than four days per week. A further curtailment to the hours of daylight on these three or four working days is expected to prevail as the winter advances. Yarns, both for export and the home trade, are, with the exception of the finer numbers, lower; and shirtings, longcloths, T'cloths, madapollams, and jacconets are all more difficult of sale, and consequently irregular. At a meeting in Blackburn last night, it was resolved to reduce spinners' wages five per cent., the first instalment which the operatives have had of the badness of the times.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The improved tone in the wool trade is still apparent. For all deep-grown sorts prices may be quoted a trifle stiffer, though for Down wools the demand is exceedingly flat, and the prices not at all enhanced. There is no disposition to buy in any large quantities, but to cover orders there is a fair steady demand, chiefly for lustre wools. The yarn market is unaltered. Great quietness prevails, and prices show no general improvement. The yarn produced is chiefly consumed by the home trade, the German markets continuing to take but little. In carded yarns there is perhaps a trifling improvement. The market for pieces has been quieter, and few new orders have been placed. French buyers are taking small quantities.

LEICESTER.—The hosiery trade in most branches continues in a healthy state, and there has been a fair amount of business doing during the past few days, business in the warehouses being tolerably active. At Hinckley, Loughborough, and the country districts generally, there is a little doing, and manufacturers are keeping down stock as much as possible. Yarns are selling at prices not materially altered, the market being firm, and spinners well employed. There is no important change in wools, old prices being realised.

NOTTINGHAM.—There is very little alteration in the state of the lace trade; most departments are quiet, but in a few weeks more activity is expected. There have been only a few buyers in the market during the last few days, and purchases to only a small extent have been made. Plain nets are a dull sale, as also are fancies. In the silk branch there is no change to report; very few articles are in demand, and many workmen are unemployed. In the hosiery trade there is as much doing this week as last, and business in the home branch is in a tolerably healthy condition. The amount doing for export is limited, and will continue so until affairs are more settled in America. Yarns are firm and high in price, and the tendency is yet upwards.

ROCHDALE.—Trade generally is quiet, but perhaps a shade better than last week, with a little tendency towards further improvement. In flannel there has been more doing, but decidedly less than usual at this period of the year. For Yorkshire and Lancashire goods there is a somewhat better demand, but the increase of business is trifling, and both merchants and manufacturers complain of dulness. Similar remarks are applicable to the wool trade. The prices of wool are quoted rather higher, but staplers are anxious to sell, and find it difficult to obtain any increase of rates.

LEEDS.—There was an average attendance of buyers in the cloth halls, and a steady but moderate business was transacted. A fair quantity of tweeds and heavy goods was disposed of, but ordinary cloths, especially in the white cloth market, had only very limited sale.

BELFAST.—Very little business has been done in the market for bleached goods. Continental transactions were especially light. There is no evidence of improvement in the American trade, and for the home market sales have been below the usual turn-out of the present month. Reports from the larger cities of Canada are pretty favourably respectieg the prospects of the trade there, and some orders are at hand direct from Montreal. The Australian market has been improving.

WOLVERHAMPTON.—The official list of prices of Staffordshire iron is as follows:—Common Staffordshire bars, 7*l*, at the works; best bars, 8*l*; sheets, 8*l* 10s; doubles, 10*l*; nail sheets, 8*l*; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l*; hoops, 8*l*; gas strip, 7*l*. 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 31.—The market for State and Western flour has continued to decline. The private advices were considered rather more favourable, however, and the market was accordingly more steady yesterday, when there prevailed a fair demand both for export and consumption, under which prices ruled firmer. The aggregate sales for three days are 41,000 bbls, including 14,000 yesterday, the market closing firm. Canada flour is quiet and nominal. The market for Southern flour remains quiet, under a moderate demand, at unaltered prices.

EXPORT from 1st to 27th August.

	1861. barrels	1860. barrels
Wheat Flour	240,384	290,142

With continued liberal receipts, the market for wheat has been heavy, for the most part, and though transactions have been pretty heavy, prices have tended in favour of the purchaser. The European intelligence exerted a rather unfavourable influence, but the private letters proved less unsatisfactory than the published accounts, and, with a steady fair demand for good quality, both for export and home consumption, prices ruled firmer. The sales for the three days comprise 465,000 bushels, of which about 146,000 changed owners yesterday, including 39,800 winter red Western, at 1.12 dol to 1.17 dol; 13,800 inferior ditto, 1.10 dol; 700 red Kentucky, 1.08 dol; 5,800 white Western, 1.21 dol to 1.31½ dol; 9,800 Chicago spring, 98 cents to 1 dol; 28,000 amber Iowa, 1.07 dol to 1.08 dol; and 48,000 Milwaukee Club, 95 cents to 1.06 dol, closing heavy for common and steady for good. There has prevailed a good demand for corn, and the transactions have been heavy, comprising about 560,000 bushels, of which 194,000 changed owners yesterday, the market closing firm at about previous quotations.

EXPORT from 1st to 27th August.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the markets held this week have been but moderately supplied with English wheat, and the demand both for red and white qualities has ruled steady, at a further advance in the quotations of from 1s to 2s per quarter. Foreign wheat has changed hands to some extent, partly for export to France, at 1s per quarter more money. There has been a steady, but by no means active, sale for barley, at very full prices. The malt trade has been devoid of animation; nevertheless, the currencies have been well supported. Good sound oats have commanded extreme rates; but inferior samples have sold on easier terms. Both beans and peas have ruled steady in price, and the value of flour has had an upward tendency.

Nearly the whole of the wheat crop is now carried in England, and the quality of the samples generally is remarkably fine. The yield, however, is certainly less than an average. Barley and other kinds of produce are turning out well, both as to quantity and quality.

The continental markets have become more active for wheat on higher terms. In spring corn, however, the transactions have been on a very moderate scale. Owing to enormous arrivals from the interior, both wheat and flour have sold at depressed currencies in America. The shipments to the United Kingdom continue on a large scale.

The Scotch markets have ruled firm for fine wheat, barley, oats, and flour, at very full prices. Other kinds of produce, however, have moved off slowly on former terms.

In Ireland, wheat and Indian corn have realised rather more money. Otherwise, the demand has been somewhat restricted.

At Mark lane, to-day, the supply of English wheat was small, and the trade for both red and white qualities ruled firm, at fully the late advance in prices. Foreign wheat moved off steadily, in part for export to France, at extreme rates. All descriptions of spring corn sold freely, at, in some instances, higher currencies. Most kinds of flour were in good demand, on rather higher terms.

Mr E. Rainford thus remarks on the trade in floating cargoes:—The arrivals at ports of call for orders reported since the 4th inst. to last night are 10 cargoes of wheat and 8 miscellaneous, viz.:—Wheat, 1 cargo from Marianople, 1 Berdianski, 3 New York, 1 Odessa, 2 Taganrog, 1 Montreal, 1 Trieste; maize, 1 Sulina, 1 New York, 1 Ibraila; barley, 1 Ibraila; beans, 2 Alexandria; peas, 1 Montreal; millet seed, 1 Galatz. A good business has been done in wheat and maize since this day week at advancing rates. The following are the prices paid:—Wheat, per 492 lbs, arrived, for Havre, Marianople, 56s; for the United Kingdom, Marianople, 55s 6d; Berdianski, 55s 6d; Taganrog Ghirka, 51s 6d and 51s; on passage, for the United Kingdom, Taganrog Ghirka, 51s 6d; Marianople, 54s 3d and 54s 6d; per 480 lbs, for the United Kingdom, arrived, red American, imperfect, equal to about 45s 1½d; for the Continent, Milwaukee, supposed about 52s; for Dunkirk, amber Milwaukee, 56s; on passage, for the United Kingdom, Milwaukee, equal to 54s 4d; for the Continent, to be delivered sound, Milwaukee, 55s and 56s. Rye, per 480 lbs, on passage, for the Continent, Taganrog, 35s 6d, United Kingdom price. Maize, per 492 lbs, for the United Kingdom, Galatz, not quite perfect, equal to about 33s 10d; on passage, Odessa, equal to 33s 6d; Galatz, 33s and 33s 6d; ditto, only 4 lay days, equal to 34s 2d; ditto, 34s, 34s 6d, and equal to 35s 1d; per 480 lbs, arrived, Bulgarian, 32s 6d; Ibraila, 32s 6d, 33s, and 33s 6d; Western white American, some warmth, 30s 9d; on passage, Ibraila, 32s 6d; Bulgarian, no lay days, equal to 31s 7d; Mazagan, equal to 32s 3d; now shipping, mixed American (can discharge in 3 ports only), 31s; for shipment in September and October, Ibraila, 33s and 33s 3d. Barley, on passage, per 400 lbs, for the United Kingdom, Egyptian, 26s; to be shipped in October, and delivered sound, new Ibraila, supposed 26s 9d; for the Continent, to be shipped in October, and delivered sound, Odessa, 27s. Beans, per 480 lbs, for the United Kingdom, arrived, Egyptian, 33s; Mazagan, equal to 33s 6d; on passage, Smyrna, 32s 6d.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Good descriptions remain firm, but the general demand is still inactive. Several floating cargoes of foreign have sold for export at extreme quotations. Some of the soft and low sugars brought forward have realised slightly easier rates. According to the returns made up to the 7th inst., the stock at this port was further augmented to 87,100 tons, against 71,500 tons and 76,600 tons in the two foregoing seasons at the same date. The deliveries last week were 4,900 tons, making the net decrease 8,200 tons since the beginning of the year. 3,500 hhds West India sold in the three days at former prices, including the parcels by auction: Jamaica, 33s to 37s; St Lucia, 32s to 35s 6d; Barbadoes, 35s to 41s 6d; dabs and brown, 32s to 34s 6d per cwt.

Mauritius.—6,500 bags 247 baskets principally sold as follows: low to good brown, 29s to 33s; low grey to good pale greyish yellow, 33s 6d to 38s 6d; white, 43s 6d; grainy pale grey and yellow, 43s 6d to 45s per cwt.

Bengal.—1,648 bags partly sold: fair to good Gurpatta date, 39s to 40s 6d; soft low brown date kind, 28s 6d per cwt.

Penang.—2,086 bags sold cheaply for the lower qualities: brown, 31s to 34s 6d; greyish low to fine yellow, 35s to 40s 6d per cwt. Some business has also been done by private contract.

Madras.—473 bags native brought 31s to 32s per cwt for brown and low yellow.

Foreign.—581 boxes Havana were chiefly bought in at 46s to 47s for grainy florettes; 336 boxes grainy, in bond, at 30s 6d to 34s. 645 casks Porto Rico partly sold: brown and low greyish yellow, 35s to 36s; low middling to fine yellow 36s 6d to 43s; a few lots extra fine bought in as high as 46s. 548 casks Cuba, 32s 6d to 38s 6d. Four floating cargoes of Havana have sold for the United Kingdom, Nos. 12½ to 13, 27s 3d to 27s 6d; Nos. 8 to 8½, 23s 6d to 24s; one for Gottenburg, Nos. 9 to 9½, 25s 6d; one of brown Pernambuco, at 21s, for the same destination; one of white Havana, for a near port, at 30s 3d; one of brown Bahia, at 22s, for France; and five of Cuba, at 22s 9d to 23s.

Refined.—With moderate supplies of goods offering, quotations remain unaltered. Common descriptions command 48s 6d; crushed, 46s to 47s; pieces, 41s to 46s per cwt.

MELADO.—232 by auction, partly sold at 28s 6d to 25s 6d per cwt.

MOLASSES.—An extensive demand has sprung up, the market being cleared at the recent decline to 6d recovery. West India, 14s 6d to 16s; Porto Rico, 15s to 15s 6d; Cuba muscovado, 15s to 15s 6d; clayed, 14s to 14s 1½d per cwt.

RUM.—The sales in West India have been limited upon former terms. Some Penang has sold at 1s 6d, and 500 casks Mauritius at the same price. The stock is 31,400 puns, against 28,650 puns last year.

COCOA.—No public sales of Trinidad were held to yesterday (Thursday), and the market is firm. A small parcel of Grenada realised 52s 6d per cwt.

COFFEE.—There has been a further arrival from Colombo, but the market is at present barely supplied, and supports its late firm position. 689 bags Costa Rica sold on terms in proportion with the advance paid on other sorts, from 68s 6d to 78s for fine fine ordinary to good middling quality. Native Ceylon is firm, at 64s to 66s. Plantation supports the late improvement. 440 cases Naidoobatum realised 86s 6d to 91s 6d per cwt.

TEA.—The green teas just landed have been in active demand, transactions of considerable extent taking place at high prices, particularly for common sorts. Congous are in steady demand by private treaty. Public sales will be held on Tuesday next, the 17th instant.

RICE.—The demand for soft grain descriptions continues unabated, and transactions to a fair extent have taken place in parcels on the spot. The latter include Ballam at 9s 7½d to 9s 9d; common Necrancie Arracan, 9s 6d; white Bengal, 10s 7½ to 12s 6d. By auction, 2,828 bags Bengal went at 12s 6d to 13s; 3,809 packets Ballam at 9s 9d to 10s. Two floating cargoes of Necrancie Arracan have sold at 10s 6d, two at 11s to 11s 1½d, fully insured; one of Bassein, 10s 6d; one of Larong Arracan at 10s 4½d for Liverpool or 10s for London; and three of Rangoon at 10s 9d to 10s 10½d per cwt.

IMPORTS and DELIVERIES of RICE to September 7, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Exported	...	8400	14400	12300
Stock	37700	43000	69300	91550

SAGO FLOUR.—Rather more than two-thirds of the parcel bought in last week has sold at 16s per cwt for the sound.

SPICES.—The public sales have been very small during the week. 304 bags dull greyish Penang pepper were bought in at 3⅝d. 17 cases mace partly sold at 7d to 8d per lb. A few lots nutmegs realised previous rates. 13 cases cassia buds, 10*l* 7s 6d to 10*l* 10s. 32 barrels Jamaica ginger sold at 50s to 55s per cwt.

SALTPETRE.—A few contracts have been made at rather lower rates; refraction 10 to 4½, 33s 6d to 35s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to September 7, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	8450	9150	13350	7200
Delivered	8250	8900	12400	10100
Stock	3540	4120	3880	3260

The deliveries last week were 346 tons.

COCHINEAL.—1,400 bags in the monthly sales were rather more than one-third part sold, and prices showed little variation. Teneriffe silvers ranged from 2s 7d to 2s 10d; black, 2s 9d to 3s 2d; Mexican silver, 2s 4d to 2s 6d; black, 2s 8d to 2s 10d; Honduras silvers, 2s 3d to 3s 6d, being cheaper by 1d for the lower qualities but full rates for good; low mixed with dead grain ranged from 1s 6d to 2s, and chiefly bought in; also blacks at 2s 4d to 4s per lb.

OTHER DYESTUFFS.—Gambier continues in demand, 17s 6d to 18s being paid.

SHELLAC barely supports its former position, many parcels being shortly expected to arrive. Good to fine button sorts have sold at 9*l* 5s to 9*l* 15s per cwt.

LAC DYE.—Medium to good marks keep steady.

DRUGS.—At the usual fortnightly sales yesterday, prices of the leading articles were generally well supported, with a steady demand

METALS.—The smelters have raised the prices of British tin 3s: common blocks, 120s. Straits has sold at 117s, and the market is not at all active. A few contracts have been made in spelter at 18*l* 5s, and 18*l* 12s 6d to 18*l* 15s for November delivery. British iron steady, Scotch pig has declined slightly: the last sales were at 51s 1½d to 51s 3d per ton for mixed Nos.

HEMP.—1,600 bales roping Manilla have sold privately at 19*l* 10s to 20*l* 10s per ton, a recovery of about 1*l* per ton from the most depressed period of the market. 40 tons Petersburg clean, by auction, partly sold at 30*l* 10s per ton.

JUTE.—A steady demand prevails for this article, and some business has been done by private contract. At the public sales on Wednesday full prices were obtained, 4,660 bales being about half sold at 13*l* to 20*l* per ton.

HIDES.—130,000 East India sold with spirit, at firm prices.

LINSEED firm: Calcutta, 57s 6d to 59s 6d; Bombay, 60s 6d. 57s per quarter has been paid for the former, to arrive, and the same price for a cargo of Taganrog.

OILS.—The lower qualities of olive have been bought up, including a cargo of Zante, at 54*l*, and one of Mogadore, to arrive, at 52*l*. On the spot, Gallipoli is quoted 58*l* to 58*l* 10s; other kinds, 53*l* to 56*l*. Sperm dull, at 94*l* per tun. The demand for linseed oil keeps in excess of the production; it is now very scarce, and 34s 3d was the last price paid. Foreign refined rape quoted at 44s to 45s. Brown scarce, and a large business reported for forward delivery at 42s 6d. Cocoa-nut has been active at a further rise of 6d to 1s: Cochin, 46s 6d to 47s; Ceylon, 45s 6d to 46s. Palm oil sells freely for export: fine at 43s to 43s 6d per cwt.

TURPENTINE.—The arrivals of spirits are 230 tons, all from the Continent. During the week 300 barrels American have been shipped back to New York. The Sarah Star, with 1,350 barrels, under seizure at New York, and falsely reported released, is still detained. The market has been very quiet during the week; a small quantity could be purchased at 67s.

TALLOW.—The market is much less excited than last week, and the demand rather limited. First sort Petersburg Y. C., 48s 3d to 48s 6d; for delivery in the last three months, 48s 6d; January to March, 48s 6d to 49s; old Y. C., 46s to 46s 6d per cwt. As opinions vary greatly with reference to the future supplies and course of the market, the following remarks are quoted from Messrs Colchester and Woolner's circular:—"The tallow market during the past fortnight has been in such an excited state, and prices have been driven up so rapidly, that we think some explanation may be acceptable, and cause operators to act with more caution. The principal cause of the recent excitement must be looked for in the excessive deliveries from the London warehouses. This was an event quite expected by the trade, as large purchases were known to have been made for exportation to the Continent, the low price of old tallow here drawing all the orders which usually go to St Petersburg to this market. Many parties operating from a distance attributing this large increase in the delivery to extra consumption, in consequence of the decline in price sent orders to buy for forward delivery to such an extent that with but little business done prices were forced up considerably. This advance frightened others who were oversold, and still further added to the excitement, until 49s was paid for the last three months. This advance has not been followed by a proportionate rise in old Y. C., the holders of the tallow belonging to the late Moscow speculators having shown great disposition to quit their stocks, and a rise of about 1*l* per ton only has been established on this article. At the present there are but 13,000 casks left in the hands of the original holders out of a stock of 38,000 they held some weeks back; some 15,000 or 18,000 casks still remain in the hands of speculators, who have bought them for resale. The reports from St Petersburg, received by telegram, state that shipments on a more extensive scale were at length taking place, and that up to Saturday last 27,000 casks were shipped, principally for London; foreigners and outports taking only a small porportion. The price has improved, in consequence of the rise here, to 50 s. r. Exchange was flat at 33⅞d. Consignments to a large extent were being made to this market, and from all we can learn the entire supply will be shipped if they can find buyers, which seems doubtful from the high price demanded; 45s has been accepted for delivery in April to June, notwithstanding the high prices paid for January to March."

PARTICULARS OF TALLOW.—Monday, September 9.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was firm to-day. 1,656 bags Bengal sold at previous rates for Gurpatta date, and 43s to 45s for Cossipore. 6,266 bags Mauritius at previous rates. The week's business in West India amounts to 4,771 casks. A floating cargo of Havana, No. 12½, is reported at 27s 3d; one of Cuba, including clayed and muscovado, at 22s; and one of Porto Rico at 24s per cwt.

COFFEE.—743 bags Costa Rica brought 68s 6d to 73s 6d. 200 bags Malabar pale and greenish, 69s 6d to 70s per cwt.

RICE.—15,300 bags Bengal rice partly sold: low middling to good, 11s 6d to 13s 6d; good cargo, 10s.

SPICES.—19 cases nutmegs realised 1s to 1s 4d for small to fair brown. 12 cases mace, 9d to 11d. 338 bags pimento, 2⅞d to 3⅛d per lb. 283 cases Cochin ginger, 47s to 53s per cwt.

SALTPETRE.—223 bags Bengal, refracting 10, were bought in at 33s 6d per cwt.

RUBBER.—Good East India bought in at 1s 2d, some of indirect import at 1s 0½d to 1s 1d per lb.

CUTCH.—1,240 bags were bought in at 22s to 22s 6d per cwt.

OILS.—42 tuns sperm part sold at 92*l* to 92*l* 10s. 30 tuns seal: brown, 32*l* to 33*l* 15s. 40 tuns Southern bought in at 32*l* 15s to 36*l* per tun. 900 casks cocoa-nut part sold: Cochin, 46s to 46s 9d; Ceylon, 45s 6d to 45s 9d; Sydney, 37s to 43s 6d. 102 tons Manilla bought in at 44s. 650 casks palm part sold at 42s to 43s 9d per cwt.

TALLOW.—Y. C. declined to 48s to 48s 3d for January to March next. 302 pipes South American chiefly sold at 46s to 50s; 642 casks Australian, at 40s to 49s; 89 casks Odessa, at 42s to 48s 6d; and 100 cases East India, at 43s to 47s. 363 casks Taganrog part sold at 45s to 45s 3d; 220 casks P.Y.C. taken in at 46s 6d; and 75 casks North American, at 45s to 46s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues steady; prices rather in favour of the seller. Treacle for the better qualities rather higher. In crushed about 150 tons have been sold for export, at 33s to 33s 3d. Dutch crushed scarce. 100 tons of N. S. R. sold at 32s 8d, f. o. b. at Amsterdam.

GREEN FRUIT.—Demand continues good. Lemons of all kinds sustain their value. A parcel of Lisbon, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. Para nuts cleared from the market; Barcelona 2s per bag higher. Lisbon grapes in request, the quantity being of a limited character.

DRY FRUIT.—The chief demand during the week has been on old currants, parcels of which have been sold from 31s to 37s and 38s. Of the new fruit already arrived, but little has been sold. Arrivals of rain-damaged sorts may be expected during next week. Valencia raisins, though the prices have receded to 42s, are in very little demand. New Sultanas are likely to come to this market in about ten days. The crop is about half rain-damaged, and will be small fruit, and inferior to the old crop. Figs expected shortly.

ENGLISH WOOL.—The English wool trade continues in a similar state to the last few weeks, if anything rather more demand, with prices stationary.

COLONIAL WOOL.—Market without change.

FLAX unaltered.

HEMP.—Market very firm and but few sellers.

COTTON.—Sale of cotton from Friday, 6th September, to Thursday, 12th September, inclusive:—1,600 bales Surat at 6 13-16d 6$\frac{7}{8}$d for good fair new Broach, 6 1-16d to 6$\frac{1}{4}$d for middling fair to fully fair old Dholleras, 6$\frac{1}{4}$d to 6$\frac{3}{8}$d for good fair new ditto, 5$\frac{7}{8}$d to 6$\frac{3}{8}$d for middling fair to fully fair new Omrawatty, 5$\frac{3}{8}$d to 5$\frac{3}{4}$d for middling fair to fully fair Compta; 450 bales Tinnevelly at 6$\frac{3}{4}$d for good; 28 bales St Vincent at 10$\frac{1}{4}$d for good. A steady demand has prevailed throughout the week, but the business has not been large, owing to the small quantity on the market; however, the late arrivals of Surat will be soon landed, which will afford buyers a better choice. Altogether, prices of all kinds are well maintained, and in partial cases Surats are again rather dearer, the market closing with great firmness. 1,000 bales Western Madras have been sold for arrival at 5$\frac{1}{2}$d, guaranteed fair. P.S.—Sales to-day 200 good Tinnevelly at 6$\frac{1}{4}$d, being $\frac{1}{8}$d advance, and for arrival 3,000 new Broach at 7d, guaranteed good fair.

SILK.—No alteration since the 7th, except the arrival of the telegram advising additional settlements of 4,000 bales at previous rates. Exchange 1d higher.

TOBACCO.—The market remains extremely firm, and sales chiefly of a limited character. A good inquiry exists for exportation, which may probably terminate in business to some extent.

TIMBER.—At the reduced prices of the market there is very considerable business doing in wood. The supply has been large, and now the consumer gets all the benefit of the remitted duty.

LEATHER AND HIDES.—During the past week, the activity which previously existed in the leather trade has scarcely been maintained, but the supply of good heavy English and foreign butts continues limited, and the advanced rates are still realised. At Leadenhall, on Tuesday, the supply of fresh goods was not large; the attendance of buyers was, however, small, and a moderate amount of business was done at the quotations of our last week's price current.

METALS.—The tone of our metal markets, this week, has been more quiet than for the last two or three weeks, although prices generally remain unaltered. Smelters have advanced the price of English tin 3*l* per ton, but buyers seem quite indisposed to follow the movement, which appeared uncalled for.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	9
Fat by ditto	2	6$\frac{1}{2}$
Yellow Russian	49	6
Melted stuff	36	0
Rough ditto	20	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The bacon market inactive, at a slight deviation from our last quotations. Prime bacon was offered at 2s less; 75s f.o.b. the highest price made. A fair arrival of Friesland butter to-day of average quality; price in the Dutch markets 49 guilders. York hams are in great demand at long prices.

METROPOLITAN CATTLE MARKET.

THURSDAY, Sept. 12.—Our market, to-day, was but moderately supplied with beasts, chiefly in middling condition. All breeds were in fair request, and Monday's prices were well supported, the general top figure being 4s 8d per 8 lbs. Sheep—the show of which was by no means extensive—met a slow inquiry, at previous rates. The best Downs and half-breds realised 5s 4d per 8 lbs. We have to report a dull inquiry for lambs, on rather easier terms. The top quotation was 5s 8d per 8 lbs. Calves moved off slowly, at late currencies. Pigs were quite as dear as on Monday, and there was rather more inquiry for milch cows.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	4	3	6	Large coarse calves	3	6	4	0
Prime large oxen	3	8	4	2	Prime small ditto	4	2	4	8
Prime Scots, &c.	4	4	4	8	Large hogs	3	10	4	4

Second quality ditto	3	6	4	0	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	2	4	10	Quarter old store pigs	20	0	29	0

Lambs, 4s 8d to 5s 8d.

Total supply—Beasts, 970; sheep and lambs, 8,690; calves, 340; pigs, 380.
Foreign supply—Beasts, 290; sheep 890; calves, 180.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 13.—The supplies of meat are moderately good. For all descriptions the trade is in a sluggish state, yet no further change of importance has taken place in prices compared with our previous report.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	10	3	2	Middling mutton	3	8	4	2
Middling ditto	3	4	3	6	Prime ditto	4	4	4	6

Prime small ditto	4	0	4	2	Small pork	4	8	5	0
Large Pork	4	0	4	6	Lamb	4	8	5	4
Inferior mutton	3	0	3	6					

HOP MARKET.

BOROUGH, Monday, Sept. 9.—The picking has, with few exceptions, commenced in every district of the plantations, and the yield, where the picking has sufficiently advanced to give an estimate, has come short a third, and the duty has in consequence fallen from 150,000*l* to 135,000*l*, with a strong opinion against the lower amount being realised. The quality of the new growth is excellent, and the present range of prices is from 8*l* to 11*l* 11s.

FRIDAY, Sept. 13.—The show of new hops is small, and the business doing in them is at from 8*l* to 13*l* 13s per cwt. Yearling and old qualities move off slowly, on former terms. Duty, 125,000*l* to 130,000*l*.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 9.—The receipts of home-grown potatoes continue on a very moderate scale, and the demand for all qualities rules steady at fully last week's currency. Shaws are selling at from 80s to 90s, and Regents 85s to 105s per ton.

FRIDAY, Sept. 13.—Very moderate supplies of potatoes are on sale, and the trade rules somewhat active, on higher terms. Shaws, 85s to 90s; Regents, 90s to 110s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 4s to 1*l* 12s per load. A slow trade.

WHITECHAPEL.—Meadow hay 2*l* 0s to 5*l* 0s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 4s to 1*l* 12s per load. Trade heavy.

COAL MARKET.

FRIDAY, Sept. 13.—Walls-end:—Tees, 18s 3d—Hartlepool, 17s 9d—South Kelloe, 17s—Heugh Hall, 16s 6d—Eden Main, 16s 6d—Byron, 16s 3d—Walker Primrose, 12s—Tanfield Moor Butes, 12s 9d—Lambert's Hartley, 15s 3d. Ships at market, 55.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 13.—There is a fair amount of business doing in foreign, of a low and medium class, at firm prices. Home wools, however, continue in rather languid request, but as stocks of them are light, prices show no variation.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 13.—Fair attendance at to-day's market, with moderate consumptive demand for wheat at full prices of Tuesday. Flour, very little offering, barrels 6d dearer, with good demand. Indian corn more freely offered at 1s decline; mixed, 31s. Beans without change. Oats and oatmeal, fair business in new, at full prices.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Sept. 13.—There has been rather more business doing in manufactured iron during the past week, at fully previous rates. The market for Scotch pig iron has been quiet, and prices have slightly receded. Copper is firm, and there is an evident reluctance on the part of smelters to sell at present quotations, owing to the advancing tendency of the ore market. Tin has this week been advanced in price 3*l* per ton. The recent advance in spelter is well maintained.

The Gazette.

TUESDAY, Sept. 10.

BANKRUPTS.

F. Clarke, Devon's road, Bromley, licensed victualler.
J. Cooper, late of Wootton bridge, Isle of Wight.
T. Carter, Windsor road, Upper Holloway, builder.
J. Drake, Lansdown place, Upper Norwood, builder.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 31st of August amounted to 593,596*l*, and for the corresponding week of last year to 586,960*l*, showing an increase of 6,636*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 277,521*l*, and for the corresponding week of 1860 to 273,675*l*, showing an increase of 3,846*l*.

RECEIPTS AND EXPENDITURE.—It appears from a Parliamentary return that the aggregate number of miles of railway open for traffic in the United Kingdom at the end of 1860 was 10,433, against 10,002 miles at the end of 1859. The total number of passengers conveyed on those railways in the year 1860 was 163,435,678, against 149,757,294 in the year 1859, showing an increase of 13,678,384. The total traffic receipts for the year 1860 amounted to 27,766,622*l*, against 25,743,502*l* in the year 1859, showing an increase of 2,023,120*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 9.—The railway market to-day was rather buoyant during official hours, but subsequently experienced a reaction on the unfavourable traffic return of the South-Eastern. The latter stock receded fully 1 per cent., and Midland and Lancashire and Yorkshire ⅛ to ¼, Caledonian, on the other hand, again improved, and closed exceptionally firm. Business continued generally limited. In the colonial market, East Indian guaranteed stocks showed a firmer tendency. Canadian descriptions were again flat, Grand Trunk stock leaving off at 19¼ to ⅜, and Great Western shares 9¼ to ⅝. No change of importance took place in foreign railways. American securities closed the same as on Saturday. Mines were in less demand, and in some cases exhibited a relapse.

TUESDAY, Sept. 10.—The railway market opened steadily, but subsequently became rather dull, especially after the recognised hours of business. Compared with yesterday the final prices of some descriptions showed a decline, especially Midland, Lancashire and Yorkshire, North-Eastern stocks, North British, and Eastern Counties. Owing to the excitement in the Consol market the general business in this department was limited. In the colonial market, Grand Trunk of Canada stock receded to 19 to ½, and Great Western shares to 9⅛ to ⅜. Indian guaranteed descriptions were fairly supported, East Indian leaving off at 102 to ½. Foreign railways were steady, Victor Emmanuel obligations especially showing an advance. Lombardo-Venetian remained at 1⅜ to ½ prem. In American securities, Erie shares were lower. Mines again experienced a tendency to reaction. Joint stock banks and miscellaneous descriptions closed about the same as yesterday.

WEDNESDAY, Sept. 11.—There was scarcely any business doing in the railway market, and the tendency in the morning was unfavourable, chiefly from the anticipated effect on trade of the protraction of the American crisis. Towards the close, however, there was rather a better feeling. London and North-Western was firmer on the traffic return; Midland and Great Western also improved, and Caledonian and Great Northern were steady. South-Eastern exceptionally receded. In the colonial market, Great Western of Canada shares rallied to 9¼ to ½, while Grand Trunk stock remained at 19 to ½. No change of importance occurred in foreign descriptions. Lombardo-Venetian were again flat at 1⅜ premium. In American railway securities, Illinois Central shares slightly receded. Mines were inactive, but in some cases showed an advance. Joint stock banks closed without alteration. In miscellaneous descriptions, London Dock stock and Van Diemen's Land shares were quoted higher.

THURSDAY, Sept. 12.—The transactions in the railway market continued of a most moderate character. In the morning prices were firmer with Consols, but a decline subsequently occurred, and the closing quotations of the principal stocks were generally ⅛ to ¼ per cent. lower than yesterday. Great Northern was especially heavy, and receded 1 per cent. Lancashire and Yorkshire was also flat. London and North-Western, Midland, and Eastern Counties have exceptionally improved. In the colonial market no change of importance took place. In foreign descriptions there was a rise in Bahia, San Paulo, and Lombardo-Venetian. American railway securities closed without alteration. Mines again showed a firmer tendency.

FRIDAY, Sept. 13.—In the railway share market to-day attention was occupied with preparations for Monday's settlement. There was a decline of about ¼ per cent. in Great Western, London and North-Western, and South-Eastern stocks, but a fresh improvement of ¼ in Caledonian. The Indian and Canadian lines were steady. Mining shares ruled somewhat active.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

GLENFIELD PATENT STARCH,
USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."
Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and ot a manufactured compound, in which the efficacy of his invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77 STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

EXTRAORDINARY DISCOVERY—NEW THEORY.
(Medicines Superseded.)
NERVOUS DEBILITY AND ITS train of evils, such as self-distrust, timidity, pimples on the skin, loss of memory, thoughts of suicide, trembling of the limbs, depression and prostration of the system &c., immediately checked and speedily cured by the Newly-Discovered Patent Appliance. Advice and instructions post free on receipt of two stamps, by Dr Watson, U.S., F.R.A.S., President of the Medical Reform Society of Great Britain. No. 27 Alfred place, Bedford square, London. Consultations daily from 11 till 2 and 6 till 8 on all these ailments and infirmities peculiar to youth, manhood, and old age, which tend to embitter and shorten life. For distinguished qualifications vide diplomas.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Barton crescent, Tavistock square, London, W.C.

BLAIR'S GOUT AND RHEUMATIC PILLS.—Price 1s 1½d and 2s 9d per box.
This preparation is one of the benefits which the science of modern chemistry has conferred upon mankind; for during the first twenty years of the present century, to speak of a cure for the gout was considered a romance; but now the efficacy and safety of this medicine is so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that public opinion proclaims this as one of the most important discoveries of the present age.
Sold by all medicine venders. See the name of "Thomas Prout, 229 Strand, London," on the Government stamp.

DENT, CHRONOMETER, Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

TRADE 6/P MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR,
In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.
Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.
BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.
EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers thro hout the country.
Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

PATERSON'S AMERICAN POWDERS, recomended for immediate relief of Indigestion, Sick Headache, Acidity, Heartburn Flatulency, Loss of Appetite, and Nervousness. The above Powders are also made into Lozenges, for the convenience of travellers, or those who may object to Powders. Powders, 4s per box; Lozenges, 2s per box.—Agents, WILCOX and CO., English, French, and German Dispensing Chemists, 336 Oxford street.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

DR MARSTON'S LECTURES.—FREE ISSUE.—The following Lectures are ISSUED GRATUITOUSLY by the Professors of the Royal Institute of Anatomy and Science, 369 Oxford street, London, Firstly, as a mark of esteem to their distinguished colleague, Dr MARSTON, M.R.C.S., L.S.A., and Secondly, from a conscientious belief that the Lectures will do a vast amount of good by enlightening the public upon subjects of the highest importance to their moral welfare and physical health, ignorance of which has to the present day been a most fruitful cause of human suffering and misery.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.
CHEAP, LIGHT AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates.
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.
By SAMUEL HARE, F.R.C.S., &c.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
London: John Churchill; and may be had of all booksellers

HOLLOWAY'S PILLS.—Strength Restored.—At this season many persons suffer from prostration of strength, arising in general from some disturbance of the digestion. In such cases the alterative properties of Holloway's Pills exert the happiest effects in renewing digestive vigour. It is wonderful to witness how the pale and emaciated gain colour and weight under a course of these purifying Pills. They stimulate the appetite, augment the secretion of gastric juice, regulate the liver, cleanse the kidneys, and act as gentle, yet efficient aperients, without griping, weakening, or inconveniencing the system. In a vast majority of cases of debility arising from no perceptible cause, Holloway's Pills, judiciously taken, slowly and certainly restore order, and the invalid soon becomes stout and strong.

KEATING'S PERSIAN INSECT DESTROYING POWDER.
This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.
Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry, it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension as it has no qualities deleterious to animal life.
Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.
Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

KAMPTULICON FLOOR CLOTH.

E. GOUGH AND CO., ORIGINAL PATENTEES & MANUFACTURERS,

12 BUSH LANE, CANNON STREET. MANUFACTORY—GREENWICH ROAD.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 3s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

LAMBERT BROTHERS,

Walsall, Staffordshire, (Established 1830,)
Manufacturers of
WROUGHT-IRON WELDED TUBES & FITTINGS,
Chandeliers, High Pressure Steam and Water Valves.
Patent Metallic Bedsteads for exportation.

*** Illustrated catalogues on application.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

STEAM NAVIGATION OF THE DANUBE.

—The magnificent Steamers of the Imperial and Royal Danube Company, Vienna, are now plying from Linz to VIENNA, Pesth, Basiasch, GALATZ, CONSTANTINOPLE, ODESSA, &c. London, Sept. 6, 1861.

NORWICH UNION FIRE INSURANCE SOCIETY.

Notice.—MICHAELMAS RENEWALS.

Losses by fire occurring during the fifteen days of grace are made good to the assured.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368.

A bonus of three-fifths of the profits periodically made to parties insuring, who have thus from time to time received sums amounting in the aggregate to £400,000.

A further sum is applicable for a bonus upon policies renewed in 1861.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, New Bridge street, Blackfriars, E.C.

ST MARGARET'S COLLEGE, CRIEFF.

N.B.—For the Education of Young Ladies.

Principal—The Rev. A. LENDRUM, M.A.

For prospectuses, examination papers, and all particulars, apply to the Rev. the Principal.

N.B.—Pupils may enter for the half-term about the 10th of October.

ST MARGARET'S COLLEGE, NORTH-END, FULHAM, London, S.W., for the Education of Young Ladies.

Principal—The Rev. A. LENDRUM, M.A.

Vice-Principal—The Rev. FREDERICK TAUNTON, M.A.

For prospectuses and all particulars apply to the Rev. the Vice-Principal.

N.B.—All the Pupils are resident in the College.

The present Term commences on the 19th of September, but pupils may enter in the middle of the term by special arrangement.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey,

combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

Baillière's, 219 Regent street, and at the Author's ELECTRO-CHEMICAL BATH Establishment, 9 York place, Baker street, London.

BRITISH AND FOREIGN INVESTMENT.

Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

DEBENTURES.—SCINDE RAILWAY COMPANY.—The Directors are prepared to receive applications for Debentures at par, bearing guaranteed interest at five per cent. per annum, for the purposes of the Indus Steam Flotilla.

The Debentures are for five years, and may be renewed for five years at the same rate of interest.

The Debentures may be converted into Indus Steam Flotilla Capital Stock, at the option of the holder.

Full particulars may be obtained at this office.

THOMAS BURNELL, Secretary.

Scinde Railway Company, Gresham House, Old Broad street, August 15, 1861.

MADRAS RAILWAY COMPANY.—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—

1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.

2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.

Forms of application may be obtained at this office.

JAMES WALKER, Managing Director.

Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

SHOOTER'S HILL, KENT.

MR WHITTINGHAM IS instructed to Sell by Auction, at the Lord Raglan, Burrage road, Plumstead, on Thursday, October 3, at Five for Six in the evening, in about 80 Lots, valuable FREEHOLD BUILDING LAND, near the Royal Military Academy, Woolwich common, on Herbert road, leading to Woolwich Arsenal and Plumstead, being the first portion of the estate known as the Potteries. Nine-tenths of the purchase money can remain on mortgage or contract at five per cent interest to be paid by instalments. Plans, with particulars and conditions of sale, may be obtained of the Auctioneer, 14 Moorgate street; of Messrs Russell and Davies, Solicitors, 59 Coleman street, City, E.C.; and at the place of sale.

ACHROMATIC TELESCOPE.—For Sale, a Telescope of 4½ in. aperture and 6 feet length, with 4 powers, price £15 15s.—Address J. T. G., 2 Keyzor place, Whitton, near Hounslow.

FOR IMMEDIATE SALE.—REVERSIONS.—£8,800 on death of a lady aged 70. £5,250 in several sums on deaths of ladies aged 50, 52, 59, and 72. £800 payable in May, 1862.

BONDS.—Several bonds, well secured, payable in 1862.

SHARES.—20, of £100 each, £50 paid, in the Anchor Reversionary Company, Limited (paying 10 per cent).

Apply to Mr J. H. Wood, Broker and Commission Merchant, No. 10 Cornhill, E.C.

COFFEE PLANTER.—WANTED, a competent and experienced Planter, to take the working management of a considerable Coffee Estate in Southern India. Salary 400 rupees per month, with other ulterior advantages.—Address Z., care of Messrs Hooke, Street, and Gutteres, 1 Brabant court, Philpot lane, City.

PARTNERSHIP.—A GENTLEMAN, having an extensive connection with exporters, grocers, and oilmen, requires a Partner, who can command from £2,000 to £3,000.—For particulars apply to Mr W. R. Buchanan, solicitor, 31 Basinghall street, E.C.

PARTNERSHIP.—Mr H. SALTER has numerous Clients with capital at command from £500 to £20,000, who are Desirous of Commercial Partnerships. Established firms of good standing and sound position will always save much unnecessary trouble and expense by communicating with him.—17 Abchurch lane, E.C.

A GENTLEMAN OF HIGH respectability, active habits, some experience, with a knowledge of several of the Continental languages, and desirous of occupation, is willing to embark, as partner or otherwise, a few thousand pounds in some house of undoubted standing, either mercantile, manufacturing, or of agency.—Address M., care of Mr Musgrave, 70 Chancery lane.

FIRST-CLASS BUSINESS PURSUITS.—Middle and Upper Schools, Peckham, London, S.E.—There is superior accommodation for a few BOARDERS, in the family of the principal, JOHN YEATS, LL.D.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amounts payable up to Dec., 1854.
£	£ s	£ s
5,000	1,937 10	6,937 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1860, amounted to £730,665 7s 10d, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

ANNUITIES.

NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION.

3 Pall Mall East, London.

Empowered by Special Act of Parliament, 17 Vic. cap. 43.

Established A.D. 1844.

IMMEDIATE ANNUITIES granted on very favourable terms.

The Tables for Reversionary and Deferred Annuities are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age and the uncertainties of health and fortune.

PETER MORRISON, Managing Director.

Prospectuses sent free on application.

SOLICITORS.

Messrs Bircham, Dalrymple, and Drake, 46 Parliament street, Westminster.

The Directors have pleasure in stating that they are now prepared to entertain proposals for insurance on all classes of risks in the United Kingdom. The rates of premium in all cases will be as moderate as possible, and governed in each case by a careful consideration of the risk proposed.

The Company, in arriving at the rate to be charged, will give the insurer the full benefit of any improvement that may be made in the peculiar features of the risk or on the construction and arrangement of the premises.

The Company will ever distinguish itself in its promptitude and liberality in the settlement of claims.

The importance of the subject of insurance being now more fully understood and appreciated, it becomes indispensably necessary that every company which undertakes to replace the loss occasioned by fire should be enabled to show its undoubted ability to perform its engagements.

As ample evidence of the standing and position of THE MERCANTILE FIRE INSURANCE COMPANY, it may be stated that its subscribed capital is Two Millions Sterling, and that the capital already paid up and invested amounts to Two Hundred Thousand Pounds.

Forms of proposal and every information will be furnished on application at the temporary offices, 31 Threadneedle street, London, E.C.

IMPERIAL LIFE INSURANCE COMPANY, No. 1 Old Broad street, London, E.C. Instituted 1820.

DIRECTORS—1861.

Thomas Newman Hunt, Esq., Chairman.

Ed. H. Chapman, Esq.	Frederick Pattison, Esq.
Geo. W. Cottam, Esq.	W. R. Robinson, Esq.
Geo. Henry Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £78 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

John Henry Smith, Esq.	Cornelius Paine, Jun., Esq.

Thos. Tallemach, Esq., Secretary.
Samuel Brown, Esq. Actuary.

Life Department.—Under the Provisions of an Act of Parliament, this Company now offers to new insurers Eighty per Cent. of the Profits, at Quinquennial Divisions, or a Low Rate of Premium without participation of profits.

Since the establishment of the Company in 1821, the amount of profits allotted to the assured has exceeded in cash value £660,000, which represents equivalent reversionary bonuses of £1,058,000.

After the division of profits at Christmas 1859, the life assurances in force, with existing bonuses thereon, amounted to upwards of £4,730,000, the income from the life branch £207,600 per annum, and the life assurance and independent of the capital exceeded £1,618,000.

Local Militia and Volunteer Corps.—No extra premium is required for service therein.

Invalid Lives assured at corresponding extra premiums.

Loans granted on life policies to the extent of their values, if such value be not less than £50.

Assignments of Policies.—Written notices of, received and registered.

Medical Fees paid by the Company, and no charge for policy stamps.

Notice is hereby given, that Fire Policies which expire at Michaelmas must be renewed within fifteen days at this office, or with Mr Sams, No. 1 St James's street, corner of Pall Mall; or with the Company's Agents throughout the Kingdom, otherwise they become void.

Losses caused by explosion of gas are admitted by this Company.

DENT, CHRONOMETER, Watch, and Clock Maker to the Queen and Prince Consort, and Maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

THE LIVERPOOL AND LONDON FIRE and LIFE ASSURANCE COMPANY.

Established 1836.

Offices—1 Dale street, Liverpool; 20 and 21 Poultry, London.

FIRE DEPARTMENT.

The Annual Premiums exceed £310,000, and place it in the first class of Fire Offices. Its liberality and promptitude in settling claims have been established in the adjustment of enormous losses: and its influence in determining rates of Premium has uniformly been given to proposals for improving the character of risks, that high Premiums may be unnecessary.

LIFE DEPARTMENT.

The Annual Premiums exceed £130,000; the Accumulated Reserve in this department is £707,000.

RESOURCES.

The invested funds of the Company exceed £1,260,000. The liability of Proprietors is unlimited.

SWINTON BOULT, Secretary to the Company.
JOHN ATKINS, Resident Secretary, London.

Fire Policies due at Michaelmas should be renewed by the 14th day of October, 1861

The Political Economist.

As the American crisis is so very important to the commercial interests of this country, we have made arrangements for a Series of Letters from a Gentleman of great intelligence, practically acquainted with the Cotton Trade, who is now on his voyage to America to learn, as far as possible, the real facts from personal observation.

THE NEW EDUCATION MINUTE.

THE Commissioners appointed some time since to inquire into the present state of our popular education elicited two important facts. They discovered that we were *over-teaching our masters and under-teaching our children.* The Assistant-Commissioners subordinate to them investigated with unprecedented care and accuracy several different parts of the country, very remote from one another, which had been carefully chosen as specimen districts of the whole of England, and from all these researches the same result was made known to us. They found that everywhere our system was cramming the educator and starving the child.

The system which the Commissioners found in operation was first commenced in 1846, and has grown gradually, we may say insensibly, since that time. Its details are necessarily complicated, but its essence is this. The Government pay for five years the whole salary of a certain number of education apprentices, commonly called pupil teachers, who are partly occupied during these years in learning and partly in teaching; and at the end of these five years "provides "them with an amount of help which is nearly equivalent to a "free admission to any training college which they may select." These training colleges are liberally assisted by the State, which pays three-quarters of the whole cost of very many of them. After their education is completed, their salaries are augmented at the public expense with grants up to 20*l* in the case of women, and 30*l* in that of men.

Mr Senior, one of the Commissioners, has so graphically described the practical operation of this system, that it would be a pity to change his words:—

"It is a system of the highest pressure. A girl of thirteen, in many cases of the humblest birth, is apprenticed for five years to a certificated mistress. At the end of each year she is examined by the inspector, and if she passes, receives a payment rising from 10*l* to 20*l*—a larger sum than she or her parents ever saw before, equal, perhaps, to all her father's wages for six months. To enable her to devote her whole time to working for it, she is spared every domestic service. In her father's family she is a little goddess, raised as far above them as an Irish cottier's son is when he quits the cabin to enter the seminary. At eighteen she competes for a Queen's scholarship, and if she obtains one, receives tuition, board, lodging, washing, and medical attendance from the college, and a small sum for personal expenses, clothes, and pocket money, subject, however, like the pupil-teachers' pay, to the result of annual examinations. This may last one, two, or three years, at the end of which she obtains one of eleven different kinds of certificates, all depending on success at the examinations, which, according to its class, entitles her, on her appointment to a school, to a salary, partly supplied by the Government and partly from the school, amounting, when lowest, to 20*l* a year, and when highest, exceeding 60*l* a year, and a house. For seven years, therefore, her mind is in a state of constant tension; she goes through struggle after struggle, in each of which defeat is ruinous."

The nature of these examinations is illustrated by the following questions:—

"1. Describe the chief points of difference between the first Prayer Book of Edward VI. and that now in use.

"2. Name the principal events in the lives of Ridley, Grindal, Abbot, Tillotson.

"1. Give some account of St Alban, Paulinus, Bede, Anselm, and Thomas à Becket.

"2. Name the chief teachers of the Christian Church in the first two centuries, and give some account of their life and writings.

"3. What heresies were most prevalent in the early ages of the Church? Name some of the writers by whom they were refuted.

"4. Name the most illustrious martyrs of the first four centuries, and describe the death of Ignatius or Polycarp.

"5. What points in the character of early Christians appear to have produced most effect upon the heathen?

"6. Give some account of the first and fourth Councils.

"7. Name the principal events in the history of our Church under the dynasty of the Stuarts, with dates.

"8. Name the chief prelates and ecclesiastical writers in the reign of Elizabeth; and give some account of *one* of them.

"9. Who were employed in the the preparation of the Thirty-nine Articles, and in the revisions of the Prayer Book, in the reigns of Edward VI. and Elizabeth?"

These questions are designed to discover whether a girl is fit to teach the children of the poorest classes the rudiments of writing, reading, and arithmetic. The literary functions of the class of teachers educated at the public cost are confined to this simple task. The children of the lower orders do not continue at school later than eleven; as a rule, they do not continue so long. What can such children by possibility have to do with St Alban, or Paulinus, or with the chief prelates in the reign of Elizabeth, or with the writers who refuted the heresies of the early Church?

It may be said that is is desirable to give a general

training to the minds of the educators, even if there be no scope for employing all the information communicated during that training in the course of their after life. But an elaborate inculcation of miscellaneous information, so far from strengthening the mind, rather weakens it. The mind is advanced not by what is put into it, but by what comes out of it. It is improved if it is stimulated to self-exertion, if it is directed and aided in that exertion. But there is no such stimulus and no such aid in the compulsory accumulation of out-of-the-way facts for an occasional examination. These facts are not taught for the sake of knowledge, but for the sake of showing off knowledge; they are forgotten as soon as they have served their momentary purpose. Some of the Assistant-Commissioners asked the schoolmasters and schoolmistresses if they were fond of reading. "No," the answer was; "all that was *taken out* of us by the weary round of "note-books and things we had to get up while we were in "training."

As might be expected, persons so absurdly trained in a manner superior to their work do not do that work well. A person who has received so elaborate an education is disheartened and discontented when removed to a remote village to teach the poorest children the lowest kind of knowledge. He sighs for something better; asks any one whom he thinks can serve him for something better; and, notwithstanding that he is fairly paid, often hates his calling and wishes he had chosen another in which the preparatory beginning and the active end were more suitable to one another. In consequence, the aim which the State had in view in establishing this elaborate and costly apparatus is not attained. The children of the elementary schools are not, the Assistant-Commissioners tell us, instructed in the elementary matters which are all they can really learn, and all which it is advisable to attempt to teach them. The following evidence from one of the most intelligent of the local Commissioners is distinct, and will be assented to by all who have any acquaintance with the subject:—"Good reading—by which I mean distinct articulation, proper expression, and an intelligent apprehension of the drift of the passage read—is a treat that I was very rarely permitted to enjoy. The children appear to fall into slovenly habits,—indistinctness of sight as well as of speech,—in the lower classes, which become ineradicable. The modern method of discovering the pronunciation of a hard or previously unknown word seems singularly infelicitous. There is a reading lesson in the Third Irish Book, which I was fond of using as a kind of test. It is the story of a congress of birds summoned by a swallow to discuss the proper course to pursue in reference to a field which a farmer was sowing with hempseed. It begins easily enough to tempt the children to start glibly, but in the second or third line there comes the adverb 'unanimously,' a long but by no means difficult word to articulate for children who have ever been taught to regard the *syllabic* arrangement of letters, but upon which the second class invariably, and very often the first class, broke down. There would be first an uncomfortable pause, then a wistful eye cast on the teacher; then, on my request that the word might be spelt, a rapid gabble of the eleven letters of which the word is composed; at the conclusion of this process, the same helpless incompetence to proceed; then the eye once more turned upon the teacher; and finally, in most cases, the frank confession of the latter that it was her habit always to help the children at this point, and that when they had repeated the letters, she gave them the pronunciation of the word. I venture to assert that the girls in the Hereford workhouse were not taught to read in this way. Such teaching will never enable its pupils '*nare sine cortice*.' Another phenomenon that you frequently observe in hearing a class read, not perhaps the very highest in the school, but the second and third classes, and which certainly, I think, indicates the absence of some very important qualifications in the teacher, is that, if you quietly stand by and give the children their head (so to speak), for five minutes, without stoppage or correction of any kind, you will be perfectly amazed, if it is at all a difficult passage, at the quantity of utterly unintelligible gibberish that you will have listened to. I remember once hearing at the inspection of a school, though not in the course of this inquiry, the head girl in the first class read St Luke, iv. 14, thus:—'And there went a *flame* of him through all the *religion* round about,' with perfect self-satisfaction, and in utter unconsciousness of the absurd blunders she was perpetrating."

It is to remedy this absurd state of things that the New Education Minute is mainly designed. It provides that the assistance given to an elementary school by the Government shall be proportionate to the amount of elementary information which it gives, and provides a periodical inspection for the purpose of seeing how much of that sort of information is given and how much is not.

An objection has been raised in some quarters to this proposition. It has been said that it makes no account of the moral and religious condition of the children, and that it confines its pecuniary aid to proficiency in the secular elements of reading and writing and arithmetic. But in the present position of the education this is all which is required from the State. The motive with which schools have been founded has mainly been a religious motive; they are generally closely superintended by a clergyman of the Established Church, or a minister of some denomination; its managers are almost always those whose zeal for religion,—even not unfrequently for sectarian religion—far surpasses their zeal for the communication of elementary knowledge. Not half or a tenth of the schools in the country would have been in existence, if their founders had not believed that they were going to communicate something which they justly conceived to be more important than that. While the actual managers of schools are predominantly actuated by the wish to give religious instruction, the State may fairly leave it to them. It should concern itself with the tame and dull matters which are likely to be neglected, rather than with those which at present are always zealously, if not always wisely, attended to.

It is evident, too, that it would be impossible to determine the relative moral and religious condition of different schools with any such accuracy as would be necessary for the precise graduation of a pecuniary grant. The highest kind of mental and moral improvement is given by a daily, gradual, insensible influence, not by specific teaching. It would not be tolerable that the children should be "brought "on" in the external appearances in morals and religion, in order to please the Inspector and to get more money for the school.

It is, indeed, probable that this part of the Education Minute would scarcely have been opposed if it had been introduced alone. But certain others of its provisions will tend to make the education of the teachers in all likelihood shorter and less costly, and hence have arisen cries of dissatisfaction from two not disinterested quarters:—First, from the teachers, who allege that in defiance of plighted faith they are to be placed on a level with an inferior class of men; secondly, from the training colleges, who say you encouraged us to erect a costly apparatus to educate superior teachers, and now you select inferior teachers.

In themselves these complaints would not be entitled to very much attention. The education of our present teachers is, as we have shown, out of place and absurd. Their efficiency is not augmented by their unsuitable education, but is impaired. The principal aims (whatever may be said of the minor details) of the New Code are certainly important and certainly right. But, unfortunately, we might say provokingly, the time at which it is promulgated is a reasonable ground of complaint. The Committee of the Privy Council have crept into enormous powers; they possess, as we see, the power of issuing a set of statutes saying what an education should be, and what it should not be. This power is an anomaly in our constitution,—possibly beneficial, but still peculiar and exceptional. It should be exercised with great care and great precaution. *Because* we believe the main objects of the new code to be sound and to be very important; *because* we wish the framers success; *because* we are sure that public opinion will support them if they have a chance,—we regret that its main object and purpose was not deliberately explained to Parliament, that the House of Commons had not an opportunity of exercising its constitutional control over its provisions, that any persons possibly aggrieved by its minor details have not had the opportunity of being heard before it was on a sudden enacted.

THE PROPOSED ALTERATION OF THE MODE IN WHICH THE BANK OF ENGLAND VARIES ITS RATE OF DISCOUNT.

It has been suggested that the Bank of England should vary its rate of interest more frequently and more easily than it has been accustomed to do. Until now the rate has only been changed by a Court of Directors (usually held on a Thursday), and on one or two exceptional occasions by the Governor on his individual responsibility. The latter occasions, however, have been very rare, and it may be generally said that the Governor has no power to alter the fixed rate of the Bank; that the Court of Directors alone can do that; that whenever it has been done by a lesser authority it has been distinctly an exceptional act, grounded on urgent circumstances and peculiar reasons, and requiring in some sort an act of indemnity. It is proposed now that the Bank should vary their rate without so much formality whenever they like, and, to use the City expression, "as Overends do," or as a joint stock bank does.

It is undeniable that the public would derive considerable benefit from a somewhat easier and less cumbrous machinery for regulating the Bank rate of discount. The periodical meetings of the Court on a Thursday are often watched for with an impatience which is undesirable, are made the subject of undue discussion, and are forced into an importance to which they have no valid or intrinsic claim. But there are two very material considerations which must be borne in mind before making any change in the present arrangements, or we may discover too late that in making an incidental improvement of detail, we have lost a security of primary importance.

The Bank of England hold the sole bullion reserve of the country,—the sole *real* treasure on which we rely for protection against internal panic and for meeting foreign payments. In former times, we have found that by permitting that reserve to run very low, its managers have brought upon us the exact evils against which they were to guard, and have exposed the mercantile public to disaster and to ruin. The only way, as experience shows, in which the Bank can effectually act on the rate of discount is by changing their rate of interest. If they manage that important engine *right*, all will be well; if they manage it *wrong*, all will be *ill*.

Two consequences are evident. We should know, 1st, how the Bank are managing their rate of interest; and 2ndly, who is responsible for managing it, and is to be blamed for mismanaging it. Now we have both these advantages. We now always know what the Bank rate is, and we know that we are to blame the Court of Directors if, on the one hand, they omit to change it when they ought, or, on the other, change it when they ought not. We at present possess the two principal conditions of satisfactory management, and we should not allow them to be abandoned for any reason however specious. Public opinion has now a great and beneficial influence on a distinct responsible body charged with the very important national function of preserving our *one* reserve of bullion. The public press is able to comment on the policy of that body with adequate knowledge of the necessary facts, and with no fear of blaming the wrong persons.

If the Bank Directors choose to delegate the function of guiding the rate of interest either to a committee of their own body or to any other person or persons, there can be no objection on the part of the public, so long as the control of public opinion is unrelaxed—so long as we know what the authorised managers are doing, and can blame them if we think they are doing wrong. But there would be great danger if we did not know what the Bank were charging,—if we did not know whom to censure if the charge was excessive or inefficient,—if the bullion reserve was being drained away under the mismanagement of unknown persons, who would be sheltered from public observation by the privacy of their persons and the secrecy of their actions.

THE LAST MOVEMENTS OF THE NORTHERN AND THE SOUTHERN CONFEDERATION.

The tactics of the Federal Government appear of late to have changed greatly for the better, and to be assuming a character both of vigour and of discretion which has not hitherto distinguished them. The Commander-in-Chief *is* steadily *preparing* his forces for future action, in place of venturing with them on enterprises for which they are not yet ripe. In addition to this, the Washington leaders have adopted a plan which promises to be attended with marked success. By detaching expeditions to important and assailable parts of the enemy's territory, such as General Butler's to Cape Hatteras and General Fremont's to the Mississippi, they are at once gaining specific and sometimes signal advantages, and weakening the Confederate army on the Potomac by drawing off detachments for the defence of the menaced States. Already we learn that the attack on Cape Hatteras has caused most of the North Carolina troops to be recalled home. In all probability the forward movements of Fremont may cause the whole or a portion of the contingents from Missouri, Arkansas, and Louisiana to be similarly withdrawn from the central army and summoned back to their respective States. By this means the force concentrated near Richmond may be so reduced as to place Washington in safety, and perhaps even to allow McClellan to assume the offensive with a fair prospect of success.

These new operations of the Northerners, and other similar ones which have long been feared, have probably more to do than the fancied determination of the South not to sell their produce, with the decision announced as follows a few days since:—"The following is an extract from a letter received at "Mr Reuter's office from a reliable Southern source:— "'The Confederate Government has determined not to per-"'mit the removal of a bale of cotton or a hogshead of tobacco "'or tierce of rice from the plantations of the Confederate "'States until the blockade of the ports thereof is raised. "'The planters of the South will probably place at the dis-"'posal of the Confederate Government cotton, tobacco, "'&c. &c., to the value of 50,000,000*l* sterling, and take the "'bonds of the Confederate States at par as an advance "'thereon.'"

The Secessionists are well aware that the maritime superiority of their antagonists was pretty certain sooner or later to induce them to undertake some enterprise of moment against the more exposed and accessible ports, and that in consequence all produce would be far safer on the plantations than in the commercial cities. Nor, indeed, was there any temptation to send forward commodities which no ships were in harbour to receive. Moreover, as regards cotton, we have more than once called attention to the fact that notices like the above are a mere *brutum fulmen*, since there is no cotton yet gathered which could, under any circumstances, be sent down the rivers. With reference to tobacco, the case is not very different; and as some alarm has been expressed lest there should be any long-continued interruption to the importation of an article on which so large a portion of the revenue of this country depends, a few remarks on the subject may not be considered out of place.

The revenue annually levied on tobacco is about 5,600,000*l*. The annual importation varies from 40,000,000 to 60,000,000 lbs, and averages about 50,000,000 lbs. The quantity retained for home consumption reaches 35,000,000 lbs. The present stock in bond in the United Kingdom is 50,000,000 lbs, or a whole year's importation, and more than a year and a quarter's supply. We have, therefore, nothing really to fear, either as regards our revenue or consumption, unless the unhappy confusion in America should be prolonged for above twelve months more, which we believe no one anticipates. As regards the shipment from America, we find that considerable stocks of the article exist at New York, so that there will be plenty ready to come forward the moment the blockade shall be raised, even if all the coming crop should be retained on the plantations, as recommended. We have already received in the first seven months of this year considerably more than our usual importations, and so can afford to wait. The arrivals up to the end of July were:—

	lbs.
1859	6,860,000
1860	9,800,000
1861	13,670,000

Large quantities, however, have come forward which have not yet found their way into the official returns. The crop, we believe, is usually gathered about the month of September, but is seldom exported till towards May or June of the following year. It would appear, therefore, that the present

position of the cotton and tobacco crops of the United States is nearly the same:—that is, last year's produce has been exported, and this year's growth is not ready and cannot be ready for some months to come. The recommendation, therefore, to store it when it *is* ready, on the plantations instead of the seaports, is a measure of precaution rather than of bravado, and can have no immediate effect whatever.

It would seem, however, that the Government of the Confederate States do really intend to advise and perhaps even to enforce the retention of the several crops at their place of growth; and if so, the plan, though inoperative at present, will produce its effect in a few months. Viewing it as a *bonâ fide* and deliberate scheme which is to be persisted in, it does not give us a high idea of the sagacity or good sense of the Government which conceived and adopted it. It appears, at first sight, very like co-operation with their enemies—at least if it be prolonged when apprehensions of an attack upon the ports no longer exist. The Federal Government says:—"Not a bale of cotton or tobacco shall leave our harbours." The Secession Government says in reply:—"Not a bale shall even come down to the harbour for shipment." The blockading force says:—"We will destroy your whole export trade, by preventing any cargo from leaving the shore." The blockaded merchants answer:—"We will save you the trouble, and do the work for you; for no cargo shall even come within reach of the sea-coast." Both belligerents combine to put an entire stop to the traffic by which hitherto the Southerners have lived. Probably the motives for this singular proceeding are complicated and confused; assuredly the originators of it can scarcely have fairly worked out the matter in their own minds. The Secessionist hatred of the North makes them resolve to inflict suffering upon the Northerners by depriving them of the cotton which their manufacturers require; and they cannot even bear the idea of their obtaining any *indirectly* by way of Europe. Perhaps, too, they grudge them the profits which would accrue to the Federal cruisers from any vessels they might seize in an attempt to run the blockade. It is believed, too, that they still entertain the extraordinary notion that by *starving* France and England—by the loss and suffering anticipated as the consequences of an entire privation of the American supply—they will compel those Governments to interfere on their behalf, and force the United States to abandon the blockade. If they really expect such a high-handed violation of all international usage on our part, we can only say their leaders are less sensible and experienced men than we have hitherto supposed. There is not the remotest chance that either Power would feel justified for a moment in projecting such an act of decided and unwarrantable hostility against the United States. We are less dependent on the South than the South is upon us, as they will ere long begin to discover. It is more necessary for them to sell than for us to buy. As we have more than once shown, the worst that can happen to us from a continuance of the blockade will be that our mills will have to work *two-thirds* time;—and it is by no means sure from present appearances whether the aggregate demand of the world would suffice to take off much more than three-fourths of a full production even if we had cotton in abundance. On the other hand, if the Southern Americans sell nothing—if they and their enemies agree to forbid any cargoes leaving their shores, they will have to do without the 40,000,000*l.* or 50,000,000*l.* which they are accustomed annually to raise by the sale of their produce. Whether they can forego this vast annual income they only can judge—for they only know how much poverty and privation their political passions will enable them to endure. Their reported scheme of selling or mortgaging their crops to Government will not really put them in funds. It will be no actual sale. The planters will be paid merely in *promises to pay—i.e.*, in Treasury notes, which, though they may be made the basis of a new form of paper currency, will be in no degree available for the real increase of the resources of the country. The cotton and tobacco will neither have been sold nor paid for, nor exchanged for any actual commodity: they will merely have changed hands within the territory,—the new holder promising to pay the original holder for them at some future time.

We still adhere to the opinion we have expressed from the beginning. We believe that so soon as the Confederate States are satisfied that "Cotton is *not* King"—and that France and England have not the slightest intention of intervening in the strife,—all the Southern produce will come down the rivers as fast as is safe and as soon as is necessary; and that considerable cargoes will contrive to evade the blockading squadron—in quantities pretty exactly proportioned to the European price of the article required.

THE NEW ZEALAND CRISIS.

The latest intelligence from New Zealand is scarcely of a satisfactory kind, except to those who think with some of our contemporaries that it is desirable to drive the colonists of that country into conducting their own war with the natives on their own resources. This view is so widely held in England because it is supposed to be the pacific and the humane policy. For ourselves, we believe that it is the most fatal policy to the Maori race which can be carried out. The impression that it is a pacific view rests entirely on the *economical* hypothesis that the settlers will not spend their own money if they can help it, though they may be very glad to spend our money. This may be true, and yet the result of giving them fair notice that they are to rely for aid chiefly on their own resources will most probably be the reverse of what is hoped and expected by our contemporaries. It will have two effects:—(1) The settlers will insist on being allowed to carry out their own policy in their own way, if they are to bear the greater part of the burden themselves, and will render it a very difficult matter for the Imperial Government to interfere. (2) The settlers will think,—perhaps justly,—that it becomes them to put the quickest possible finish to the struggle that is certain to be *final*; but they will think more of a final and permanent settlement than of a mere temporary truce. They will say—'If we are to be thrown on our own resources, 'let us avoid that most trying of all conditions—a condition 'of suspense and recurring distress,—let us have it over and 'win the right to settle down to our work without fear 'of future molestation.' That is what the settlers are pretty certain to say. It is true that the peace or Wellington party, as it is called, have now got a temporary predominance in the Assembly, and have succeeded by a majority of one in defeating the present Ministry. But the peace party have triumphed in great measure by the help of those who, if hostile to the present Government, are so, not because they think it too warlike, but because they think it not warlike enough,—by the aid of the malcontents who always attribute public calamity and military ill success to the mal-administration of Government, and who vote against existing rulers from disgust, without any preference for the rulers who are to succeed them. But once let the peace party as represented by the Wellington men (Messrs Featherstone, Fox, &c.) be installed in power, and the lingering suspense of a chronic struggle return upon the colony, and we shall soon find the strong war party among the colonists gaining rapid head. The Taranaki settlers will not long endure the miserable state of suspended animation in which they now live,—none of them who have bought land in the bush beyond the boundary of the settlement venturing to return to it lest they should be attacked and murdered by the prowling tribes in the neighbourhood. The Auckland settlers are not likely to endure long that suspense which the "war of lips," so earnestly advocated by Wiremu Tamihana (William Thompson) as to the Maori King movement, must entail. A prolonged "war of lips" as to claims which, in fact, are inconsistent with the British authority in the island, with a sword hanging over the controversy throughout, is scarcely a pleasant condition for a colony of farmers when the lip-warriors have also arms and head-quarters within less than one hundred miles of their settlement. Rather than live perpetually in such hot water, we shall expect to see the war-feeling gain ground the more rapidly and more steadily, the more the English settlers feel that they are left to their own resources. They will say:—'If 'we must pay, let us have war, and let it be short, sharp, and 'effectual;—anything is better than this unstable equilibrium 'between Maori and British power.' And the result, we believe, would be a gigantic effort on the part of the settlers

of the Northern island, and the offer of terms of peace to the Maories, which would be equivalent to their entire subjugation, and which could not, therefore, be accepted until death had so thinned their ranks as to leave scarcely a remnant of this noble though savage race.

This, we say, would be the result of the economical and so-called pacific policy advocated by some of our contemporaries of throwing the burden, and with it the responsibility of the war, mainly on the New Zealand settlers. It was pointed out a year and a half ago by Mr Richmond in the memorandum to which Sir George Lewis sent a reply. Mr Richmond stated that the native power and the English power in the Northern island were at present very nearly balanced; that the English settlers were, naturally, much irritated against the natives; and that the Government, who were most anxious to protect both, could only do so by means of such a force of Imperial troops as would completely extinguish any hope of successful rebellion in the Maories, while yet leaving the policy of the war entirely under the control of the Governor rather than under the Colonial Legislature. Of course there is much justice in the comment of Sir George Lewis that England undertakes only to defend her colonies against *external* enemies, and that to require her to furnish the means of extinguishing what is in effect a civil strife, is unfair to English tax-payers. But the question is not so much what we are bound in justice to do, as what the nation would really prefer to do. And we do not believe that the English nation would wish to surrender entirely the control of the native *policy* in New Zealand, which is almost a necessary consequence of declining to furnish military aid at our own expense.

One of the arguments urged in favour of the new policy,—that of leaving both pecuniary and political matters as much as possible to the Colonial Legislature of New Zealand,—is that the late Colonial Government have pursued a bungling intermediate policy worse than any more decisive line. It is said that they first encouraged, or at least did not interfere with, the Maori King movement,—that when the Waitara war broke out, and they began to see the general disaffection in the island, they became alarmed, and withdrew their acquiescence;—and that now they are on the eve of a new war, of which the object is to put down the very political movement which they had previously sanctioned. That this is the case no one can deny. But we do not see that there was any error which could have been rectified without the painful experience of the recent war. It is unquestionable that the Maori King movement was in itself originally a harmless and almost a meritorious one. The Colonial Government themselves bore witness to this fact some years ago. The self-government of the Maories was in its infancy. They were not fit for European legislation, and any attempt to apply European law would have caused instant war. William Thompson (Wiremu Tamihana), the king-maker as he is now called, has himself explained his motives for supporting this movement. There were frequent inter-tribal quarrels about land, he says; murders and battles were of constant occurrence; and this condition of things could not have been remedied by any European title-law. It seemed absolutely essential to elect some native authority as arbiter in these matters. Thus arose the Maori King movement, and, as the Ministry acknowledged a year and a half ago, there was at first no pretence of resistance to the authority of the Queen,—the Maori King being a mere referee in native disputes. Moreover, by universal consent it has proved for its purpose not ineffective. It did diminish in a very marked way the native quarrels. Had the Government,—as our newspapers now discover that they ought,—interfered to put down this movement, while it was thus harmless, they would have drawn upon themselves the imputation of wilfully discountenancing the only germ of political order which the Maori tribes were then capable of receiving. The cry that we had nipped in the bud Maori efforts at self-government, and had preferred to see them quarrelling among themselves, and enfeebling each other by constant quarrels, would have been loud and would have seemed justified. It was not till towards the end of the recent Waitari war that it became obvious that this Maori King-party would favour the disaffected subjects and was disposed to throw off the English rule. Then, and not till then, we submit, the Government were called upon to suppress the movement, and we cannot see in their course anything but that wise caution which, even when it is most judicious, cannot always issue satisfactorily.

On the whole, we must express a strong hope that the Governor of New Zealand will not be thrown upon the colonists for the whole or greater part of his pecuniary resources, and that the policy of the Government in holding the scales even, between the Maories and the colonists, may be sustained, while a strong Imperial military force dictates terms to the natives which they will be obliged to accept and respect until happier relations grow up between them.

THE NEW FEATURE IN THE AMERICAN CIVIL WAR.

THE account which we gave with some feeling of doubt last week, of the *partial* character of General Fremont's proclamation of Negro emancipation in Missouri, is fully borne out by the document itself, which has now reached us. The passage relating to the liberation of the slaves is as follows:—"The property, real and personal, of all persons, in the State "of Missouri, who shall take up arms against the United "States, or who shall be directly proven to have taken an "active part with their enemies in the field, is declared to "be confiscated to the public use, and their slaves, if they "have any, are hereby declared free men."

This is a new feature in the civil conflict, and may well inaugurate an entirely new phase. Its importance cannot be over-estimated, and demands the most careful consideration. Missouri contains about 100,000 slaves—most of them no doubt belonging to so-called "Rebels"; for nearly all Slaveowners adhere to the Southern Confederacy, either heartily or from policy and necessity, and the Slavery feeling in Missouri has always been peculiarly strong. It was from this State, our readers will remember, that there were sent forth those notorious "Border Ruffians," who endeavoured by the most violent and lawless outrages to make Kansas a Slave State. To set free 100,000 semi-savages, without preparation, without caution, without security against their possible conduct on receipt of their unwonted liberty—is of itself a startling measure. To *select* certain slaves for freedom, while virtually and by implication sanctioning and confirming the servitude of others, not on account of any difference of condition between the two sets of sufferers, but solely in reference to the different politics of their masters, is more astounding still. But if, as would appear at first sight, the proclaimed liberation of Secessionist slaves in Missouri is to be assumed as involving a similar proceeding in all the rest of the Seceding States,—if the Federalists are prepared to act everywhere as their General has acted in one place,—no words can well do justice to the magnitude and terrible significance of the step.

The first point that suggests itself is the question: "Was "this proceeding taken with the sanction of the Supreme "Government, or has General Fremont ventured upon it "on his own unsupported authority?" We know nothing; but we apprehend the latter. Fremont is well understood to be a far more determined anti-slavery man than leading politicians in America generally are; and we have seen nothing hitherto in the language or the conduct of the President or of the Secretaries of State to indicate that they were at all prepared to adopt so extreme and desperate a measure. On the contrary, they have hitherto been remarkably cautious and silent on this topic; in their original professions they avowed their determination not to interfere with Slavery *as existing;* where they have been compelled (as in their correspondence with General Butler) to speak at all at more recent periods, they have been guarded even to obscurity; and on one occasion expressly *reserved* the fate of all fugitive slaves, even from rebel owners, for decision at the termination of the war. Moreover, it is well known that nearly all the Democratic party in the North, especially the mobs in the great towns, were, at all events till very recently, anything but friends of the Negro, and far more inclined to sympathise with the Slaveholders than with the Abolitionists. A month or two ago—whatever may be the case now (and we do not see any reason for believing that it has materially changed)—comparatively few of the rank and file of the Unionists, and fewer still of their leaders, were in the least degree disposed in favour of emancipation; and the effect upon them and their loyal adherence to the Federal Government of any

decided abolition movement was far too doubtful for Mr Lincoln or his advisers to have ventured on the enormous and incalculable risk. We feel pretty certain, therefore, that General Fremont, in issuing his bold proclamation, must have acted without the orders, and probably against the wishes, of his superiors. Even if it be so, however, though he may have disobeyed and embarrassed them, he has, we fear, effectually *committed* them. He is too important a man to be lightly disavowed; he is employed on an expedition of vast consequence and peril, in which any interference with his authority and free action may be fatal to success; he may be able to plead something very like necessity on behalf of his daring assumption; and be this as it may, a rescinding of his proclamation by the Supreme Government would be now peculiarly difficult. It would betray the divergence of feeling in the several sections of the party on one of the most imminent and vital questions involved in the strife; it would go far to cool the zeal, if not to effect the entire alienation of the Abolitionists, who are the most energetic and determined supporters of the Union;—and it would virtually be a promise to the Secessionists that the terrible weapon of Negro insurrection would never be used against them,—as we feel tolerably confident it never will.

If, however, the Government at Washington, in the view of the difficulties before them, should have determined upon crossing that Rubicon which cannot be repassed; if they should either have authorised General Fremont's emancipation proclamation, or should adopt and act upon it now that it has once been promulgated,—what is the inevitable influence, and what must be the practical result? There can be no reason for pursuing one course in Missouri, and another in Virginia, Kentucky, and Tenessee. There can be no consistent plea for not proclaiming emancipation to the slaves (at least to the slaves of Secessionist owners, who are nine-tenths or more of the whole number in the Southern States) wherever the conflict is being carried on,—wherever in a word the Federal arms penetrate or desire to penetrate. The commonest and most obvious consistency must surely compel Mr Lincoln either to recall the promised freedom from the slaves in Missouri, or at once to extend a similar boon to those of Virginia, especially of Eastern Virginia. Now the slave population of that State numbers 400,000. The commonest and most obvious consistency must ultimately (and why not immediately?) compel them to offer freedom to the whole Negro race throughout the South. Now the slave population of the South amounts to 4,000,000.

Can it be for a moment believed that the Federal Government are ready for such a trenchant and fearful measure? Have we any reason to suppose that their prospects are so desperate as to necessitate so questionable and so terrible an expedient? Will not the merchants of Boston and New York recoil from a proceeding which, if it produces the effect anticipated from it, will inflict utter ruin and universal desolation on those fertile territories from whose prosperity so large a portion of their own has always been derived; and which, if it be not effective, will have manifested a design and a temper which the Southern planters can never pardon? Will not all the soberer, and wiser, and gentler spirits of the Union, however earnest and sincere be their political predilections,—will not all who shrink from suffering, and loathe rapine, and abhor blood,—cry out against the inauguration of a policy which, if it means anything, means Negro insurrection, servile war, outrages and horrors without number and without name? Will not, in a word, every one whom the intoxication of war and passion has not utterly blinded and hardened and perverted, rise to drive from power a Party whose incapacity has brought the country to so dreadful an emergency, and who in their folly or their phrenzy do not scruple to let loose four millions of Africans against eight millions of Anglo-Saxons—or, on the most favourable supposition as to the result, to liberate 4,000,000 of ignorant semi-savages, unaccustomed either to provide for themselves or to control themselves, without making any arrangements to guard against the possible consequences of so unparalleled a step? It appears to us, we confess, that General Fremont's proceedings, if disavowed, must shake the Federal Government most seriously, and if adopted and followed up, must produce results, of which any shock to that Government will be by far the most insignificant.

But there is another point of view in which this extraordinary proclamation requires to be considered, and which still further enhances its singularity. Fremont proclaims emancipation *only to the slaves of Rebels*. He does not liberate the Negroes out of affection for their race, but out of enmity to their masters. He sets them free, not as an act of sublime justice, but of military policy. His edict is a hostile weapon against the Slaveowners, not a message of mercy to the slaves. It can be justified on no abolition principles, and it ought to command no abolition sympathies. Conceive the position in which, if sanctioned and consistently carried out, it will place the residual States—the United States as they still call themselves. The slaves of Secessionists—that is the slaves of the South, the slaves of the Slave States, as a rule—are to be set free; *but those only*:—the Slaves of "loyal subjects," that is of adherents to the Free North, are not to be meddled with. *Their* fetters are unbroken,—*their* servitude is confirmed and sanctioned. Suppose this policy to be persisted in and the authority of the Federal Government to be ultimately re-established over the whole country —(and established possibly by means of the servile war created by this very policy which Fremont has inaugurated) —it will follow that the only slaves that will be tolerated *will be those of the Free-soilers*,—the only men entitled to hold slaves and to perpetuate slavery will be the devoted followers of the party who have made war upon the slave-holding South, and whose advocates here and there would persuade us that they have made war in the name and with the object of emancipation!

Was there ever an instance in which want of principle and self-contradiction reached such gigantic dimensions?

THE GREAT EASTERN:—IS SHE A FAILURE?

COMMUNICATED BY ONE OF THE PASSENGERS ON BOARD THE GREAT EASTERN AT THE TIME OF THE LATE ACCIDENT.

Is the "Great Eastern" destined to revolutionise ocean voyaging as her sanguine projectors have anticipated? or, is she fated to be ultimately moored in some river as a floating hospital and exhibited to our passing grandchildren as one of the most monstrous crazes of the nineteenth century? The disastrous voyage from which she has just returned will give weighty support to the latter view; but a narrative of the passage will probably be read, by those who are conversant with nautical affairs and sufficiently interested to give it attentive consideration, as not being *conclusive* of ultimate failure.

After much confusion connected with the choice of berths at the agent's office at Liverpool, and still more in getting our luggage on board, owing to the inconsistency of the actual arrangements with the notice on our tickets, to the crowd of porters allowed on board the steam tender, and to the absence of organisation generally, we finally, at about three o'clock on Tuesday afternoon, 10th September, parted from our friends who accompanied us down the river to the Bell-buoy; the magnificent engines were set in motion, a high rate of speed was attained, and everything seemed propitious for a rapid and delightful voyage. By noon of the following day (about 21 hours from our start) we had made 304 miles, or upwards of 14½ knots per hour, placing us in the vicinity of Kinsale, and we found ourselves passing at a rapid pace the bold headlands and rocks which form the southern bulwarks of the Emerald Isle, near enough to enable us to distinguish very clearly, by the grand surging of the waves against the rocks, that the motion of the sea was considerable, and very much greater than indicated by our steadiness of motion. In the neighbourhood of Cape Clear we passed the ship "Underwriter," a large New York packet, pitching heavily, while the motion on board our ship was hardly perceptible. Our deck was like a sea-side esplanade on a holiday; ladies and gentlemen promenading, sitting chatting, reading, and laughing; children playing hide and seek round the deck, and even playing ball in one of the holds! On board any other ship afloat, nine-tenths of these women and children and two-thirds of the men would have been in the agonies of sea-sickness. Our spirits rose. Even the poor fare at table, inadequacy of attendance, general want of organisation under deck, and domineering incivility of the functionary who was responsible for the saloon bed-room and luggage departments, were accepted as minor evils, and compliments to the great ship were on every tongue. To one she was *Versailles*, to another the *Crystal Palace*, to all *a city afloat*, and the common

determination was never to cross the Atlantic in any other ship while she should remain in the trade. Some remarked that she cannot remain in it, as she does not pay; but the ready answer to this was, let her once establish her character, let her be managed as she deserves, and peace be restored in America, and she could not accommodate the number of travellers whom she would tempt to leave their homes!

Such were our circumstances and the state of feeling on Wednesday night when we retired to rest. How great the change on the morrow! On Thursday morning the sea was rather higher, and there was a little motion—about enough to cause squeamishness in those who would be sick crossing the Mersey in a ferry boat or the Channel in a calm. In the afternoon the wind increased, and towards dinner time (four o'clock) it was blowing a gale. Our course was about W.N.W., and the wind appeared to be about W.S.W., and became fearfully violent. To ascertain its strength we mounted one of the ladders half way to the bridge between the paddles. We cannot say that the storm was the most violent that we have ever experienced. Certainly we have seen a much higher sea, and the rush of wind we experienced on this occasion may have been partly the deflection of a current from the side of the ship, or a concentration of its force into the angle formed by the paddle boxes and the ship's side; but we have certainly never found it so hard to hold on, and never so impossible to keep our eyes open while facing a storm. Still the ship behaved admirably, rolling considerably, but riding easily and "labouring" but little. Probably three-fourths of the usual number of passengers presented themselves at the dinner-tables, showing that there was little sea-sickness. But who shall describe the scenes which rapidly followed the dinner hour? All who have visited the "Great Eastern" are familiar with the grand saloon and ladies' saloon, with their elaborate ornamentation. Here, as throughout the ship, much of the furniture was either not fastened at all or very slightly so. Tables, chairs, couches, everything were one after the other lifted out of their places and thrown violently across the room; till all got adrift, and then interlaced in one great mass, the whole went sliding or dashing, according to the violence of the lurch, from side to side. The smashing was fearful, the noise awful, and the scene beyond description. One of the magnificent mirrors was broken into fragments, which joined the *melée*, and as each new concussion dashed the fragments into yet smaller pieces, the noises became more and more alarming. And this was only a small sample of what was going on all over the ship. Precisely the same scene was being enacted in each of the dining saloons,—the plates, dishes, &c., supplying the place of the broken glass. The same was going on in the pantries, where all the crockery and glass in the ship seemed to be let loose and supplying the place of footballs to all the fiends in Hell. And the same again on a smaller scale in every sleeping cabin. And rising at intervals above these smaller and nearer noises, which we may consider the musketry of the action, the boom of artillery was well supplied by two iron oil tanks weighing some tons each, and by the enormous chain cables in the forward hatches, all which had got loose and were falling from side to side at each roll of the vessel, with the heavy thunder of cannon, dashing to atoms the frail barricades formed by the seamen's bunkers, and speedily clearing for themselves free access to the hull of the ship. The iron walls were too strong for them. They hardly show an indentation!

While such scenes were being enacted below, what was passing outside? Perhaps the greatest violence of the gale was experienced between four and six o'clock. The Captain, a slightly built, nervously organised, and rather undersized Scotchman, of apparently about 35 years of age, stood on the bridge and issued his orders with remarkable self-composure. The direction of the wind was across our course, but slightly ahead, placing us in the trough of the sea. Hence the rolling, which produced the scenes just described below. When it became evident to the Captain that this position was too distressing to the ship, he ordered the helm hard a-starboard to bring her head up in the wind. Had this been accomplished, there is little doubt that she would have ridden out the gale with trifling damage beyond that already sustained by the imperfectly fastened cabin furniture. But, to the dismay of all, she did not answer the call, but dashed on in her course; and as the sea, lashed by the continued fury of the storm, now ran mountains high, at each roll of the leviathan it seemed she must at last fall on her broadside or go completely over. All this was bad enough, but it was but the beginning. Crash went the stairs to the engine-room, and the paddle-engines had to be stopped to clear away the *debris*. Then a jib was hoisted, but blown to ribbons by the first puff. A second sail was tried, but did not last an hour. Still we bore on in the trough of the sea rolling as violently as ever. The paddle-engines were again set in motion, when an extraordinary noise proceeded from one of them like the rumbling of near thunder. It ceased, and the groaning paddle-wheel had disappeared below the waves. We were now entirely dependent upon the screw, and the second paddle, finding its occupation gone, followed its mate. Once or twice huge waves mounted above the towering bulwarks and flooded the decks, but this was exceptional. Generally the ship was dry. These monster waves played sad havoc with our boats. Some were carried off bodily, and others "stove" in. It is said eight were put "*hors de combat*." Our cows were washed out of their house. One died and the other had to be killed. Meantime, however, all on board were happily, till about midnight, in ignorance of the worst calamity of all which had befallen us as early as five o'clock that evening. The shaft of the rudder was broken right across, and this it was that accounted for the ship's refusal to answer the helm. The passengers were spared the knowledge of this till the following morning, when the gale had somewhat moderated, and most fortunately so, for the horrors of the night were already almost beyond endurance. But to add to this disastrous intelligence, a sad sight presented itself with daylight. A large portion of the passengers' luggage had, through the most culpable carelessness of the officer whose duty it was to take charge of it, been left scattered about the large cargo space on the lower deck by which we entered the ship, in the immediate vicinity of a quantity of loose iron bars, instead of being properly stowed in the room provided for the purpose. The greater part of this was smashed into atoms and mixed with salt water, rolled back and forward with the motion of the ship, till the whole was almost in a state of pulp. Thus many of the poorer passengers have lost all they were worth in the world.

Friday, Saturday, and Sunday were spent in efforts to construct a steering apparatus, either independently of, or in connection with, the old rudder. These were at last so far successful as to give the Captain a temporary and partial command of the ship—enough, while favoured with fine weather, to hold out prospects of our safely reaching Queenstown. The ship's head was set thitherward on Sunday evening, and we arrived off the harbour in the afternoon of Tuesday, where steamers shortly came alongside to render assistance or convey the passengers ashore. On the same afternoon a meeting of the passengers was held, when a series of resolutions was agreed to, expressing gratitude to Providence for our escape, highly complimentary to Captain Walker for the "courage, energy, industry, nautical skill, and untiring perseverance" which, under Providence, had been so instrumental in our preservation; also to the Captain of the brig Magnet, of Halifax, N.S., who had lain by us for nearly 24 hours, at a most critical period, from Saturday evening till the rudder was in working order on Sunday; also to the "extraordinary strength and perfection of construction of the ship." Coupled with these, other resolutions denounced in the strongest terms the state of the ship and her fittings, the want of adequate ballast, the absence of proper organisation among the stewards, the defective stowage of the luggage, and a host of other grievances.

Never in the history of navigation was a ship more severely and completely tested, and from the experience of this voyage very definite conclusions may be arrived at as to the qualities and powers of the Great Eastern. In the first place, her steadiness is a myth. Never did a vessel roll more frightfully. But this was probably mainly due to the insufficiency of her ballast. In this respect, it is probable that any other steamer would have been worse if sent to sea so light. We have known most of the Collins' line of steamers particularly—and their models are considered the most perfect afloat—roll nearly as badly in a light cross sea, without wind, occurring in the last few days of their passages, as the Great Eastern in this frightful gale; but their furniture, fittings, &c., being properly fastened, their rolling signified comparatively little. It is evident, however, that the Great Eastern is not exempt from the rules of other ships in respect to rolling. It can only be avoided by ballasting her sufficiently. It is different, however, as regards her *pitching*. Of that we have had positively none; and

as her rolling was slow and dignified, there was hardly any sea-sickness on board. We have seen more in crossing from Folkestone to Boulogne on a calm day, than among our 400 passengers for the week we have been to sea. In this respect, then, we consider the principle of the ship a great success. Any one who would be sick on board of her would suffer in the same way crossing the Mersey on a windy day. Secondly, as to the strength and safety of her hull. In this respect she is all that her advocates have ever represented. It is difficult to conceive of any circumstances short of a hurricane on a rocky lee shore which could seriously affect her hull. We feel that the public may dismiss from their thoughts the possibility of its wreck in the open sea. The machinery, too, is magnificent. The ponderous paddle-engines worked with the steadiness and patience of a London dray horse, and seemed to be under as perfect control. And while the whole labour was thrown upon the screw-engine, it never failed. With it alone we were propelled at the rate of eight to nine knots, without, I presume, working up to a high pressure, which would have been considered unwise under the circumstances.

The deficiencies of the ship then, glaring as they have proved, were not in the primary essentials, but rather in the accessories. It is evident that the strength of the paddles was not in proportion to the size of the ship, while to make them safe they should probably be in more than proportion, for while the recoil of an ordinary ship from the blow of a wave saves her outworks in some degree from the violence of the concussion, the Great Eastern receives the blow almost with the unflinching firmness of a rock. Attach a wheel to the cliffs of Achill or Rathlin, and of what strength would it require to be to stand a western gale? The paddles of the Great Eastern are not much better placed. The same remarks apply to the rudder, and indeed to all the outworks of the ship to which the waves have access. But there is another requisite to the safety and success of the Great Eastern not less important, and upon this subject we must as a public duty be candid, and "nothing extenuate nor set down aught "in malice." She needs the proprietorship or management of men who understand the business they have undertaken. It would require columns of our space to enumerate the examples which have been presented on every side, from the day we first called at the Company's office to take our state-room down to that of our leaving the ship, of the most utter ignorance of what has been done for years by other Companies to overcome the difficulties involved in carrying a large number of people several thousand miles in an orderly and comfortable manner, though across a stormy ocean—ignorance which has often suggested to the mind the adventure of the hardware merchant, unfamiliar with the tropics, who sent a consignment of warming pans and skates to the West Indies, and was disappointed at the result of his venture. But in all this, let it be understood that we distinctly except Captain Walker, who had only joined the ship a few days before sailing, and who seems to me to deserve every word of the high compliment paid to him by the committee of passengers. No one knows so well as he now does what the Great Eastern can do, what she can bear, and what she requires. It is, therefore, to be hoped that whatever becomes of the Company, whoever may supply their place as owners of the ship, the policy of changing the master every voyage will not be continued.

Agriculture.

GAME AND THE GAME LAWS.

Perhaps there never was a season in which more injury has been inflicted by the game on farms where game is preserved than during the present year. The crops, wheat especially, being thin, were more injuriously affected by the ravages of the wild animals which infest the fields than is the case when the plant is thick, and every plant was this year of importance, as bearing ears of great value. The dry spring and summer too were favourable to the multiplication of game animals. Hares, rabbits, pheasants, and partridges, have all increased in a greater degree than they have done for some years past. We are, therefore, quite prepared to hear in the course of the coming autumn and winter deep and numerous complaints from farmers of the losses and vexations they have suffered from game preservation. It is quite time that farmers should generally and strenuously resist game reservations. Except to persons afflicted with the mania for game preserving, it would seem impossible to state the actual position of the tenant-farmer on whose farm game is preserved by the landlord, without exciting astonishment that anything so monstrous and absurd should be submitted to by the one and required by the other. Conceive an arrangement by which the occupier of the land, for which he pays rent, rates, tithes, and other outgoings, expends his capital and his time in cultivating each field to the utmost of his means and ability, in the expectation of the crops repaying his outlay and his labour, and has his land overrun by wild animals kept by another person. The first element of his success would seem to be that he should have exclusive possession and control of his land. What is the first step in agriculture? Why, the appropriator of land, say a colonist, encloses his fields to keep out the wild animals, or the roving flocks and herds of a pastoral district, from his cultivated crops. He thus expects to reap where he has sown. But how stands the occupier of a game farm? Why, his landlord has reserved to himself and to any other persons he may appoint, the right to breed and preserve on the farmer's land any number of hares, rabbits, pheasants, and partridges the game-preserver may think proper. The farmer's substance feeds these wild creatures, which wander without let or hindrance over the whole farm. And the animals are watched and protected by gamekeepers, appointed and paid by the landlord, who roam wantonly and recklessly over the farm, often committing scarcely less damage than the game itself, while they constitute an endless source of vexation, oppression, and bickering to the farmer. On a farm adjoining our own, which is occupied by a most industrious and active farmer, who uses his, perhaps not superabundant capital, with great judgment and skill, the game is reserved to the landlord and preserved. Hares and rabbits greatly abound, while the pheasants run about the corn crops like chickens. Here, morning and night, the landlord's gamekeepers go with dogs round the outside boundaries in order to drive the game back upon the tenant's farm, and prevent any of the animals coming on our land, from whence, perchance, they might not return. And such is the ordinary practice on game-preserved properties.

Of course tenants complain, but they get no redress. They have entered on their farms with a reservation of the game to the landlord, who may, of course, exact his pound of flesh; "the law allows it, and the judge awards it." There is really no remedy but for farmers to resist game reservations altogether. If the landowner has such an all-pervading mania for game as to make it a primary object in the enjoyment of his property, he must occupy the land himself. Then he will find the capital for cultivation, appoint his bailiff and his gamekeeper—or unite the two offices in one person—and fairly and honestly preserve his game at his own expense.

And in spite of the general prevalence of game reservations, tenant-farmers do not willingly assent to them. They are told, when taking their farms, that, though the game is reserved, it is not intended to keep a great head of game, that they shall not be injured, that they shall be compensated for any game damage, and the like. But all such promises are as frail as lovers' vows. No sooner has the too confiding farmer invested his capital in the land than he finds out his mistake. He is flouted by the gamekeeper, and bullied by the steward or the landlord, and finds himself in the dilemma of either backing out of the farm with a large immediate loss, or going on with its cultivation under a state of things certain eventually to exhaust his capital, but hoping that something in the way of relief "may turn up."

Now, the question is, can English farmers break down the system of game reservation? or is English agriculture to continue to be impeded as it is by the notions English landowners entertain about game? For it must not be imagined that the mischief caused by game is confined to the estates of landowners who have actual personal enjoyment of the sport of shooting. The game is considered a seignorial right, of which it is befitting the dignity of the landlord he should retain the control. Gamekeepers are as essential an indication of the importance of acres as a butler and footman. It has thus become a part of the code of rural gentility that tenant-farmers should not be permitted to have the control of the game to be found on their farms. And when once the game has been reserved, and that incubus on landed property the gamekeeper hired, it is a mere accident whether the farmers on an estate are devoured alive by game or not. The landowner may not care much for shooting himself, but his sons do; or he or his sons may like to invite their friends to a grand battue three or four times a year; or he may choose to let the game, fearing, perchance, his tenants may become too prosperous and independent if they have the complete possession of the farms for which they pay rent. Such and other kinds of motives, over and above the personal fondness for shooting, influence landowners in requiring reservations of game. And with many of them it is as much a fashion, or a sort of wish to keep themselves and their farmers in "their places," as anything else. And many of them would without great difficulty be influenced by better and more rational motives if farmers would insist more strongly than they commonly do on obtaining the control of the game, which, in the absence of express reservation, the law would give them.

The feeling of many landowners on the subject of game was harshly and offensively, but perhaps not inaccurately expressed, by Mr Henry Villebois, a landed gentleman, who was examined before the Game Law Committee of 1845-6. Mr Villebois had rented the game upon the farm of a former witness, who had been previously examined, and who had stated some particulars in which he had felt himself wronged by Mr Villebois. The land belonged to Sir Hanson Berney, and in course of a somewhat sharp cross-

examination, Mr Villebois had stated he could if he pleased have preserved 10,000 partridges and as many hares on that land, that he had shot over the same farm during the tenure of three farmers before Mr Lock (who had given evidence), that he could not recollect their names, and added, "I do not think it is of much importance; it is Sir Hanson Berney's land, and whether it was Jack or Tom who occupied it does not much signify." Then afterwards, as a sort of explanation of the views he had expressed, which even Mr Villebois' obtuseness could not avoid recognising as indiscreet, in their public expression at all events, he said, "Perhaps it would be as well for me to tell you that Sir Hanson Berney called upon me one day, and he said 'Would you like to continue the right of shooting over my property?' I said, 'By all manner of means.' '*Because*,' he said, '*no power on earth shall make me give permission to my tenants to shoot anything*; therefore, if you do not like to have the manor I shall take it myself,' and I said, 'Very well, I agree to go on,' and he let me go on." Being then asked if he could give any explanation of Sir Hanson Berney's reason for persisting in refusing to allow his tenants to kill game on his estate, Mr Villebois replied, "Because I do not think myself, that one ought to give the tenants the right of shooting. If I had myself 100,000 acres of land, no tenant of mine should ever take a gun to shoot over them." Such were the opinions at that time prevailing amongst the English landowners, nor have they since been materially modified by the great body of them, although here and there there are indications of sounder and more rational views on the subject.

Thus we learn from the local newspapers that "Sir Bourchier Palk Wrey has made over the whole of the game on his North Devon property in the parishes of Tawstock, Tawton, Justow, and Braunton, to the occupying tenants. Each tenant will have the game on his own farm, by the payment of a small sum for each farm per acre per annum." Such an act is wise and commendable; but why retain the badge of feudality by requiring a small payment of rent per acre for the game? It is not likely that Sir B. P. Wrey requires his tenants to buy up his power of doing them injury; that he means to levy a sort of black mail upon them. He merely requires an acknowledgment for giving up the game. The true way of doing this worthy act is to surrender the reservation of the game altogether. Then it passes to the occupying tenants with their farms, and no more need be said about the matter. The value of the game which can be properly kept on an English farm is very trifling. Partridges and a few hares may be kept without any serious or material injury to the crops, and when the farmer has the absolute control of the game he will know where to draw the line between the quantity of game which will and the quantity which will not hurt him. For the privilege of shooting over a farm thus moderately stocked with game, to be granted by the farmer himself season by season, the ordinary rate of payment is from 6d. to 1s. per acre. Of course no landowner would dream of exacting from his tenants such a modicum of rent for the game for the sake of the money, and therefore any sum required from farmers for game rent can only be as an acknowledgment, a feudal homage.

This had better be avoided. It belongs to a past state of things. A judicious landowner and a prudent tenant will simply contract to let and take the land without any game reservation whatever, and the law will do all the rest. Then we shall no longer hear of such scandals as that recently reported in Suffolk, where Lord Henniker prosecuted his tenant for game law penalties incurred by killing game on his own farm,—for destroying animals which had been reared and fed on his own crops. The truth is game laws ought to be altogether repealed. They constitute a noxious code, productive of great social and moral evils. But apart from that question, the reservation of the game from the control of the occupiers of farms is now, directly or indirectly, one of the most serious obstacles to the advance of English agriculture, and the matter is one which ought to be seriously taken up by the agricultural community.

COMMERCIAL LITERATURE.

INDIAN RESOURCES APPLIED TO THE DEVELOPMENT OF INDIA: in Letters addressed to the Right Honourable Sir Charles Wood, Bart., M.P., Secretary of State for India, His Grace the Duke of Sutherland, and the Honourable Arthur F. Kinnaird, M.P. By ROBERT BENSON, Esq. London: Smith, Elder, and Co., 65 Cornhill.

THIS book contains a very careful exposition of carefully-formed ideas for the improvement of our Indian Empire. The following passage sufficiently shows their nature:—

A deep study of the subject has convinced the writer that the Government of India has at its disposal the means by which India can provide its own capital for those reproductive works which are essential for the development of its resources, without abstracting from this country, by means of loans or guarantees, that capital which may be requisite for the wants of our agricultural, commercial, and railway interests.

By commuting the land tax of India, and selling the waste lands on equitable terms, sufficient capital could be raised, not only to provide India with railways, works of irrigation, and other reproductive works necessary for the development of its resources and the wants of its teeming population, but likewise to extinguish its debt and the liabilities the Government of India have incurred by the guarantee of railways and other public works.

Those measures, if carried out, would effect this double object:—1st India would be able to provide the capital for its own development. 2ndly The landed, railway, and funded interests of this country will be relieved from the competition which at present exists between mortgages and railway debentures on the one hand, and Indian debentures and guaranteed railway stocks on the other.

WHAT IS CONTRABAND OF WAR AND WHAT IS NOT. Comprising all the American and English Authorities on the Subject. By JOSEPH MOSELEY, Esq., B.C.L., Barrister-at-law. London: Butterworths, 7 Fleet street.

THIS is by far the most careful and elaborate book on the subject of which it treats, which may soon become the most important part of maritime law.

GENERAL LITERATURE.

THE LIFE AND LETTERS OF CAPTAIN JOHN BROWN, who was Executed at Charlestown, Virginia, December 2, 1859, for an Armed Attack upon American Slavery. Edited by RICHARD D. WEBB. Smith, Elder, and Co., 65 Cornhill.

IT is said that the late Theodore Parker once exclaimed, in reply to some one who was making depreciatory comparisons between the subject of this memoir and one of his coadjutors in the struggle of the free-soil settlers in Kansas against their lawless opponents, the slaveholders of Missouri,—"Do you know what you say, Sir? John Brown is one of the most extraordinary men of this age and nation."

The form of this encomium, ludicrously suggestive as it is of the immortal Elijah Pogram, provokes a smile; yet in substance it is correct enough. John Brown *was* a remarkable man, and would have been so in any age or nation into which he had chanced to have been born. As a Covenanter in the troubled times of the Scottish Church,—as a Puritan in the ranks of Cromwell's army,—as a reformer fighting against spiritual oppression and corruption under the banners of Luther,—as a Swiss or Montenegrin defending faith and liberty among the passes of his native mountains,—in any one of the great struggles of mankind for freedom, his indomitable courage, urged on by an ardent enthusiasm and supported by a firm faith in the final triumph of his cause,—his coolness, self-possession, and power of swaying the wills and winning the love of his followers, would have made him a noted leader. As it was, with a passionate love of freedom, and a philanthropy almost as wide and intense as that of our own Howard, he found himself among a people who, while enjoying unbounded freedom themselves, held four millions of their fellow-men in slavery. It is little to be wondered at if he took part with the oppressed, or even if he believed himself commissioned, like Moses of old, to deliver a people out of bondage. When we read the apparently mad attempt at Harper's Ferry by the light of this biography, we find the key to it in the religious enthusiasm (as we do to the almost universal respect and sympathy felt by the practical and by no means slave-loving people of the North for a fanatical and unsuccessful adventurer)—the singular strength, simplicity, and genuine nobility—of Captain Brown's character. Party spirit, no doubt, entered, in some degree, into the feelings that made this rugged and honest old man into "a martyr and saint," but it was the truth, courage, and resolute daring of the man, as shown in all the incidents of his capture, imprisonment, and trial, that kindled admiration in the hearts even of those who least approved of that enterprise in which he perished. The Americans delight in strong characters. They might have a worse hero than old John Brown. A glance at the chief events of his life will best enable our readers to form some idea of the character of the man, free, as far as we can make it, from the too partial estimate of friends.

Captain John Brown was born in 1800 of poor but respectable parents, inhabitants of Torrington in Connecticut. On the father's side he was descended from one of the emigrants in the Mayflower; and he retained in a singular degree the primitive habits and Puritan faith of his ancestors. In his early youth his family removed to Ohio, then "a wilderness of beasts and Indians." Here he enjoyed all the freedom of action essential to his ambitious and enterprising nature. At twelve years old he was intrusted more than one hundred miles from home with droves of cattle, "and he would have thought his character much injured if he had been obliged to be helped in such a job." He thus early acquired habits of self-reliance and command. A younger brother says of him, that "he was a king against whom there was no rising up." Yet the natural tenderness of his disposition showed itself in his love for domestic pets, and in strong compassion for an ill-used slave lad of his own age, whose wrongs first kindled the fire of indignation against slavery that never afterwards died out within his heart. From fifteen to twenty he acted as foreman to his father, working at the tanning and currying trade. He was indefatigable in business, and resolute to succeed in all he undertook. "This was so much the case that he habitually expected to succeed in his undertakings."

For a short time he had an intention of studying for the ministry in the Presbyterian Church, to which he belonged; but an inflammation of his eyes threw him back upon a life more congenial to his nature than even warfare with spiritual weapons. Yet he was at this time a man of peace,—would neither train nor drill, "and got along like a Quaker until his age finally cleared him of military duty." Here is another exemplification of the natural pugnacity of the partisans of peace. Of all men one would not have dreamt of John Brown, the defender of Kansas, the invader of Missouri, the leader of the Harper's Ferry exploit, objecting on principle to war and bloodshed. At twenty he married and set up in the tanning trade, combining with it the rearing of sheep and cattle. In this part of his business he was eminently successful, and his cattle excited "great attention," and were thought to have much improved the breed of the country. He afterwards entered into partnership with a Mr Perkins as a wool-stapler, "and was noted for his skill in testing and recognising different qualities of wool." While engaged in this business, he visited England and the Continent. Even so early as this "he divulged a plan which he had formed for liberating the slaves to some prominent Abolitionists" in England, "who, however, gave him no encouragement."

On his return he removed with his family to a wild and desolate farm in North Elba, a settlement among the Adirondack Mountains north-east of New York. A large tract of land had been given up in this locality to free coloured people by a Mr Smith, of New York; and Captain Brown's object in settling his family among them was both to cast in his lot with a despised race, and to find among them fit instruments for executing the divine commission he believed himself to hold "direct from God to act against slavery." Here he "reared his children in habits of industry, independence, and filial obedience." A strict, he was also a kind father; and in all his after-career the efforts and sacrifices he demanded of his children were always readily responded to, and cheerfully met. The true saying that "no one is a prophet in his own country" was scarcely true of John Brown. "His business habits were orderly and systematic;" he was "diligent in business, frugal and careful in his style of living, and possessed of uncommon energy and shrewdness." Yet he never made more than sufficed to keep his large family from want. True to his determination to devote his life to win freedom for the slave, he ordered all his affairs so that he could quit every worldly business at a week's notice, and follow what he believed to be a divine call.

Where a character has any strong natural bent, circumstances are never wanting to call it forth. The disturbances in Kansas were the first trumpet tones that roused the spirit of John Brown to war. He was fifty-five years old when his two eldest sons emigrated to the new territory of Kansas. Every one knows about the fierce struggle that followed the passing of Mr Douglas' bill virtually repealing the Missouri compromise, and throwing open Kansas to the settlement of slaveholders. For two years John Brown led the Free-soilers in this war,—at first of defence against the brutal attacks of Missouri ruffians, and then of aggression within the boundaries of their enemies. The settlers indeed were content with repelling the inroads of their invaders, and with establishing freedom within their own territory; but John Brown, who here gained his title of Captain, found in this warfare but an incentive and aid to his wider plans, and set himself to train a band devoted to the same cause with himself, who should carry the war into the heart of the Slave States. "Brown was in hopes," says his biographer, "that should the Kansas difficulties cease, the youth thus trained would follow him to Harper's Ferry, which he had years before selected as his point of attack on slavery." Until this, his favourite scheme, was more matured, he employed his recruits in raids into Missouri, from whence they brought away many slaves and conducted them in safety to Canada.

To carry off slaves into a free land was not, however, the end Captain Brown had in view. He desired to establish a free settlement of released slaves among the mountains of Virginia,—a settlement that should serve as a refuge and rallying place for freedom till it should gain such strength as to make slavery impracticable within the State. For this purpose he resolved to seize upon the arms and stores of Harper's Ferry, to call upon the slaves to join in the exodus, and, if possible without bloodshed, to retire with them to the mountains, taking with him such portion of the slaveholders' property as might be thought a fair compensation for their slaves' unpaid labour in past years, and also some few planters of chief influence as hostages for the release of a wider circle of slaves. A wilder and more visionary scheme was perhaps never before planned with such deliberation and forethought. A constitution for the new free community was drawn up in Canada at "a secret convention of the friends of freedom." "There were no white men at the convention save the members of our company," says Cook in his confession. This company consisted at the most of twenty individuals; all the rest were coloured men. The constitution contained forty-eight articles. "It gives minute details for the organisation and maintenance of a provisional government, well adapted to preserve order in the community of liberated slaves he hoped to form."

With this constitution, seventeen white followers and five Negroes, Captain Brown, on the night of the 16th of October, 1859, attacked and took possession of the works at Harper's Ferry, captured upwards of fifty white men, liberated some slaves, and waited vainly for that influx of slaves and confederates which he expected would follow upon the striking of a decisive blow. This utter failure may be partly accounted for by a sudden alteration in the time appointed for the attempt, but still more by the unprepared state of the mass of the Negroes, and the shrinking of white Abolitionists from the chances of a servile insurrection. The handful of conspirators, instead of following out their original intention, and carrying off their prisoners and spoil to the mountains, remained at Harper's Ferry till they found themselves surrounded by 500 armed men. The greater number fell fighting to the last; one was murdered in cold blood by the young men of the town after he had surrendered; Captain Brown and six young men were taken prisoners and afterwards hanged; a few escaped. Thus ended the dreams and aspirations of John Brown's life. The slave, helpless and degraded in his slavery, had not risen to welcome his deliverer; the attempt was condemned by the sober-minded of all parties; to all appearance it was a total failure;—yet, by the terror and agitation it raised in the Southern States, it revealed their weakness, quickened their hatred of the North, and added doubtless one more incentive to the growing spirit of disunion.

The friends of John Brown—who cannot acquiesce in the failure of his mission—point to this as the crowning result of his efforts. Dissension and bitterness is after all but a poor result of a life of unselfish devotion to a good cause. A better may be found in the hearty echo that the brave and uncompromising words of the prisoner on his trial wakened throughout the Northern States, showing that the curse of slavery had not eaten out the heart of generous compassion for the unfortunate, and that while condemning the means he used, Americans yet own the fundamental righteousness of his cause.

Beeton's Illuminated Family Bible.

Beeton's Boy's own Library. Wild Sports of the World. Vol. I. No. 4. S. O. Beeton, 248 Strand.

Mr Beeton is indefatigable in supplying the literary needs of family life. From a Bible to a cookery book nothing is beyond his range. Of his illuminated Bible we can only remark that its distinguishing points are very shining paper, intensely German illustrations, and a sprinkling of red letters among the ordinary type. His "Wild Sports of the World" contains much correct information about the structure, habits, and habitats of the various wild beasts; with copious extracts from the latest travellers' most exciting adventures, and some excellent drawings. No boy, we feel sure, would think his sixpence ill spent upon one of these monthly parts.

A House in the Suburbs Socially and Architecturally Considered. By Thomas Morris, Member of the Royal Institute of British Architects. Second Edition. Simpkin, Marshall, and Co.

This book is a jumble of sense and nonsense,—of good practical suggestions to those about to build, and of absurd twaddle about social organisation, the true sphere of women, and other equally appropriate topics, discussed in most unique phraseology. Without, as our author would express it, "becoming emotional from their grandeur," we may fairly allow that the principal plan in this volume is handsome and complete,—the others neat, compact, and well-arranged. Mr Morris, however, would have done well to confine himself to architecture in bricks and mortar, and to leave "social systems" alone. It may be that "delightful alike to spinster and matron, to youth and age, are the suburban soirées." We will not now stay to contest the point. Yet few, we think, will be additionally tempted by his descriptions of suburban gaieties,—of "delightful and rational *réunions*," ending with refreshments confined to "sandwiches and *gateaux*,"—of "picnics exempt from pluvial convulsions," or dinner parties where fair *vis-a-vis* retort upon their clerical opponents' mild allusions to "an incident in Eden" with the lively rejoinder, "Ah! Adam was a sneak,"—to commission him to build for them a "House in the Suburbs."

French Commercial Letter-Writer. A Complete Series of Letters, Circulars, and Forms, suited to all the Requirements of Trade and Commerce. By Dr F. Ahn.

Trubner's Mercantile Library. Trübner and Co., 60 Paternoster row.

Dr Ahn has done his work in a very complete and satisfactory manner. His opening essay on "Commercial Letter-Writing" contains much good and sensible advice; the rules and directions are plain and practical; the examples of letters and forms embrace all the ordinary and some of the more occasional subjects of business correspondence, and are written in a style at once concise and clear.

Hooks for Thoughts. By James Peddie. James Blackwood, Paternoster row.

This book seems to have been written with the purpose of trying how much nonsense could be got into the smallest possible compass. It is small, and that is all we can say in its favour,—for more utter or vulgar rubbish it has seldom been our lot to read.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

A number of French merchants have, it appears, been tormenting the Minister of Commerce, M. Rouher, with complaints of the inconveniences to which they are subjected by the blockade of the ports of the Confederate States of America. In consequence, he has addressed a circular to the Chambers of Commerce explaining what is the international law on the subject. He says that when a neutral nation is in presence of two belligerents—and the French Government does not, he declares, deny that quality to the contending States in America—it must admit that they possess all rights of war under international law, which rights are to injure each other by all legitimate and direct means, to seize each other's possessions, besiege each other's towns, blockade each other's ports. "The exercise of the right of blockade," he says, "has for its natural consequence to interdict access to the blockaded places to other Powers. It is incontestable that the latter will have to suffer thereby from the interruption to their usual commercial relations: but they have no right to complain." He further explains that the blockade is effective "when there are near the spot to which the belligerent wishes to interdict access, sufficient forces to prevent any one approaching without certain danger; and in that case the neutral is obliged, whatever prejudice he may sustain, to respect the blockade." He says, also, that a blockade is valid even though it may not have been notified diplomatically; also for vessels which may have sailed from their country before a notification was received. Is it not strange that intelligent French merchants should have needed ministerial instruction on such A B C points as these?

In the last number of the organ of the Protectionists, the *Moniteur Industriel*, is this paragraph:—"The Bourse has been astonished and surprised by the decline in the value of shares in mines, and principally of coal-pits. For the shares of the coal-pits in the departments of the North in particular, the decline is very large. It is not necessary to say to what causes it must be ascribed. On seeing imported on very low terms, coal, cast iron, iron, and even articles in foreign metals, the holders of shares in mines have become alarmed, and have, as far as possible, endeavoured to protect themselves against what is coming."

In order to ascertain whether or not the preceding statement was exact, I referred to a collection of the *Credit Minier*, a journal which records all transactions in coal pit and other mining shares. If the assertion had been correct, it would simply have proved that the treaties of commerce with England and Belgium are doing what they were intended to do—making coal cheaper; but it is not true. In the value of some coal-pit shares a decline has undoubtedly taken place; but that is owing to accidental circumstances, to bad management, &c. In the great majority of the pits, the shares have either remained nearly stationary in value or have augmented. The fact appears to be that the demand for coal in France is now so great that, notwithstanding the introduction of that of England at a reduced duty, no diminution in the sale of the productions of French pits has taken place. In proof of what is here alleged, I quote from the *Credit Minier*, the value of shares in some of the principal coal-pits of France at the beginning of the year and at present:—

	January 5.		September 17.	
	f	c	f	c
Anzin	...		...	
Agincourt	1450	0	1275	0
Blanzy	725	0	725	0
Carmeaux	330	0	315	0
Chazottes	600	0	600	0

Rive de Gier	210	0	207	50
St Etienne	145	0	152	50

In connection with this subject, it may be as well to state that, according to an official return, the extraction of coal in the department du Nord in the course of last year, from the 62 pits worked, was 18,327,805 hectolitres, which were 578,705 more than in 1859, and that the sum realised by the sale (deduction made for the quantity consumed by machines, pitmen, &c.) was about 21,200,000f. In the department of the Pas de Calais, the extraction from 29 pits was in 1860 nearly 6,000,000 hectolitres, whereas in 1859 it was only 5,266,952, and the average obtained for the sale was from 1f 10c to 1f 30c the hectolitre.

The Chamber of Commerce of Marseilles affects to believe (according to a resolution adopted in a recent meeting) that the abolition of the drawback on the export of soap, effected by the decree of the 24th of June last, "will be a fatal blow to the exportation of French productions, and will have for consequence the admission into France of Belgian and English soap at duties inferior to those which will continue to be imposed on Marseilles soap."

Among the resolutions adopted by the Councils General of departments in their recent session, was one by that of the department du Nord, to the effect that greater fixedness in Customs legislation is very desirable. In proof of this, the Council pointed to the facts that in January last an Imperial decree suppressed the extra duty of 3f on foreign sugar imported by foreign vessels, imposed by a law of 1860; that a decree of June last made a new modification of the import duty on foreign sugar; and that a reduction in the import duty on alcohols fixed for the 1st of October, was carried into effect on the 1st of June. "Such unexpected modifications," says the Council, "cause doubt and disquietude in commerce and manufactures, and prevent affairs at long dates from being entered into." But the good Council entirely forgets that these "unexpected modifications" were inevitable, when on the one hand the Customs tariff of France was so monstrous as to need sweeping reforms, and when on the other hand the Protectionist interest was too strong to prevent those reforms from being made radically and definitively at once.

The ports of Marseilles, Bordeaux, Nantes, Rouen, Havre, and the custom houses of Mulhouse, Lyons, and Paris, are by Imperial decree to be opened for the direct importation of, and the payment of duties on, English and Belgian tissues: the other ports and the other custom houses on the Belgian frontier can only receive such articles in transit. The import of certain species of cotton and woollen yarn is to be allowed at Dieppe; and imports of Belgian and English tissues into Algeria are to be made by no other port than Algiers.

In February last, it may be remembered a decree was issued authorising the importation free of duty of foreign cotton goods to be printed, subject to the condition of their being re-exported. An official paper shows that since then the quantity brought in and printed has been not less than 70,000 pieces of 46 yards each,—45,000 of them having come from Switzerland and been printed at Mulhouse, 25,000 from England and printed at Rouen. The printing costs from 28c to 30c the metre, and nearly doubled the value of the goods. The decree has opened up a new and profitable branch of business for France.

At a recent meeting of the shareholders of the Swiss Banque Générale de Credit International, Mobilier et Foncier, the announcement was made that the general expenses had been reduced to nearly one-half what they were in 1858, and that for the year ending the 30th June the interest per share would be 10f.

The liquidators of the Caisse Mires have obtained from the Civil Tribunal a judgment condemning that person to pay them 1,700,000f as the balance due on his private account.

The following are the quotations of the Bourse:—

Annexed is an account of the markets: the important rise in the prices of cotton and flour will be specially noticed:—

FLOUR.—At *Paris*, yesterday, the quotation was 88f to 95f the sack of 159 kilogs, and 1f more for some superior qualities. The four marks for the current month and other epochs were 94f.

WHEAT, at *Paris*, presented a rise on last week's quotations, prices varying from 46f to 52f the sack of 120 kilogs. In foreign, English was 48f and 50f; American, 44f to 46f; Dantzic, 47f to 48f 50c and 49f; California, 49f; German, 48f; Hungary, 47f. Business was not active. As to the provincial markets, 21 present a rise of from 10c to 3f 35c the hectolitre, 6 a fall of from 25c to 50c; 7 are reported firm, 14 without variation, 4 calm.

COTTON.—At *Havre*, in the week ending Friday, business was animated, and prices advanced. The sales were 14,272 bales, and the arrivals 641. The closing prices were 2f higher for the very low qualities, 1f to 2f for the low and good ordinary. 1f for the other sorts. Very low New Orleans was consequently 107f the 50 kilogs; low ditto, 116f; very ordinary ditto, 121f. The stock on Friday was 225,620 bales, against 183,150 in 1860, and 75,260 in 1859. In the two first days of this week, the sales were very considerable, and prices advanced between 6f to 7f. Tuesday, the very low was quoted 114f, and the low 121f. Yesterday, the very low was the same, and the low 121f to 122f.

COFFEE.—At *Havre*, in the week ending Friday, there was a good demand, and prices rose. The sales were: 360 sacks Hayti Port-au-Prince, disposable, at 80f 50c to 81f the 50 kilogs in bond; 3,550 ditto and Jacmel for delivery, 81f to 81f 50c; 510 Cape, 82f 50c to 84f; 2,300 Rio, not washed, disposable, 66f to 73f; 155 ditto, washed, 91f; 3,500 ditto, not washed, for delivery, 69f 50c to 75f; 120 ditto, washed, 87f; 544 casks and 1,554 sacks Porto Rico, 90f; 1,200 Ceylon, disposable, 108f duty paid; 11,348 sacks Manilla, 108f duty paid. By auction, the following lots of damaged were disposed of: 56 sacks Hayti, 84f to 85f

in bond, and 93f to 112f duty paid; 141 ditto Rio, 62f to 69f in bond, and 92f to 96f duty paid; 6 Santiago, 95f in bond; 1,613 native Ceylon, 104f to 109f duty paid; 27 casks ditto plantation, 116f to 122f duty paid. The arrivals were 16,687 sacks and 279 casks. In the first two days of this week business was active and prices advanced. Rio in bond, 70f; ditto, washed, 77f 50c to 92f; Ceylon duty paid, 109f to 112f; Malabar, 111f to 112f. Yesterday, Hayti, 83f; Cape, 84f to 85f; Jacmel, 82f 50c; St Marc, 86f; Rio, not washed, 77f 50c; and Ceylon, 110f. At *Nantes*, last week, no business was transacted. This week, the same stagnation. At *Bordeaux*, last week, 361 casks Santiago were sold at 95f to 96f; 11,350 sacks Malabar, 112f to 114f. This week, Mysore has been at 115f duty paid. At *Marseilles*, last week, no sales were made. This week, a quantity of Maracaibo has been disposed of at prices not stated. Guayra, 89f to 95f.

SUGAR.—At *Havre*, in the week ending Friday, business was more active, and prices rose 50c to 1f, principally on French colonial. The sales were 912 casks French West India, at 46f to 46f 50c duty paid the 50 kilogs; 92 ditto for delivery, 40f; 150 ditto, "usine," 52f 50c; 800 Cuba, disposable and for delivery, 45f to 45f 50c, duty paid; 200 ditto, 47f; 3,270 Havana, disposable or for delivery, 33f 50c in bond. The arrivals were above 2,900 casks. This week, in the first two days business was dull. French West India, 46f; Havana, 33f to 33f 75c. Yesterday, no business was done. At *Nantes*, last week, business was animated, and prices improved between 50c and 1f. The sales were 400 sacks Reunion, very common, at 39f; 5,387 Mayotte, 48f 25c; 168 casks Guadeloupe, 46f 50c; 82 ditto, 46f; 12 ditto usine, 54f; 24 ditto, 50f 50c; 601 casks Havana, 55f 50c; 90 ditto, 54f; 577 ditto, prices not stated. This week, in the first two days no sales. Yesterday, Reunion, common, went at 40f 50c to 40f 75c; ditto, 49f 45c to 49f 65c; French West India, 47f 90c. At *Bordeaux*, last week, business was not very active. The sales consisted of 1,600 bales Reunion, at 40f 50c; and 2,400 ditto, at 56 f; 56 casks French West India, 47f; 137 ditto Santiago, 45f 50c. For the first two days of this week, Santiago was 45f. Havana prices not stated. Yesterday, Havana, 50f; Reunion, gros grain, 56f.

INDIGO.—Business, at *Havre*, in the week ending Friday, was rather brisk, and prices were firm. The sales consisted of 124 chests Bengal, of which a part went at 2f 20c above the estimates. The arrivals were only 12 chests. This week, during the first two days business was very active, and the advance on estimates of Bengal was from 2f 28c to 2f 52½c. Yesterday, no business. At *Bordeaux*, the sales, last week, consisted only of 36 chests Madras and 19 Kurpah, at prices not stated. In the two first days of the week business has been more animated.

HIDES.—At *Havre*, in the week ending Friday, the sales were 2,750 dry La Plata, at 95f to 112f 50c the 50 kilogs; 4,350 ditto salted Saladeros, 70f to 72f; 405 ditto Mataderos, 51f 25c; 2,525 salted Rio Janeiro, 50f; 3,000 Pernambuco ditto, 52f 50c; 200 salted oxen, Valparaiso, 63f; 50 dry Tampico, 90f; 50 dry Porto Cabello, 85f; 49 salted Martinique, 55f; 200 salted Scotland, calf, 65f; 180 Ireland salted, 52f 50c; 1,475 salted horse La Plata, at 83f 75c the 100 kilogs; 152 dry ditto, 6f each; 12 *vachettes* East India, 50f to 65f the 50 kilogs. The arrivals were 18,390. During the first two days of this week, Buenos Ayres dry were 105f; ditto salted Saladeros, 81f; Maragnon, salted green, 51f 25c; Pernambuco, 60f. Yesterday, Buenos Ayres dry, 105f to 124f; Monte Video salted, 70f 50c; Rio Janeiro, 50f; Pernambuco salted, 55f 50c.

WOOL.—At *Havre*, in the week ending Friday, some business was transacted in consequence of a reduction in prices. 120 bales La Plata not washed went at 1f 50c to 2f 47½c the kilogs. 5 bales Chili ditto, 1f; 14 Russia washed, 7f 50c. The arrivals were 1,531 bales wool, and 256 bales sheepskin. This week, Monte Video unwashed has been 1f 20c; ditto washed, 2f 40c.

TALLOW.—No sales were made at *Havre* in the week ending Friday. The arrivals were 40 tons and 46 casks. This week, there have been no sales. At *Paris*, yesterday, the 100 kilogs were 122f, a rise on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first quality, were at 89f the hectolitre; Montpelier disposable, of 86 deg., 115f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc were 130f; and beetroot, first quality, 92f.

TURIN, Sept. 17.

The negotiations relative to the commercial treaty between France and Italy are nearly completed. The principal items are:—Absolute reciprocity in all which concerns commerce and navigation, including the coasting trade; the two States are to be equally favoured as regards the loading and unloading of cargoes in the ports, dockyards, &c., as also as regards dues on tonnage, pilotage, quarantine, and the use of docks, &c.; no differential duties are to be charged on the agricultural and manufactured products of any nation imported or exported by vessels of either party; the productions of both nations, exported or imported from the one to the other, are to enjoy the same privileges as those of the most favoured nations; the coral and other fisheries are to be subject to the same duties by both nations; any advantages which may in future be accorded by either country to any other nation are to be equally accorded to the other contracting party. The Italian Ministry also asks for reduction on the duties on rice, hemp, fruits, madder, &c., on their entry into France, and that the reductions accorded by the treaty of May last to Belgium be extended to Italy. In the event of direct imports, certificates of cargoes are to be abolished. Negotiations of Italian securities at the Paris Bourse and French securities at the Bourse of Italy is to be allowed. Abandonment of transit dues and of all charges in cases of shipwreck is also agreed to

ROTTERDAM, Sept. 17.

The total importations of coffee into Holland in the first eight months of the present year were 17,684 tons; in the corresponding period of last year they were 17,382 tons; of the year before 18,050; and of 1858, 19,987. The stock on the 31st of last month was 8,555 tons; whilst at the corresponding date of last year it was 12,564 tons; of 1859, 19,419; and of 1858, 19,841.

A Belgian return shows that at Antwerp the imports of coffee in the first eight months of 1861 were 206,961 bales; same period of 1860, 171,226; of 1859, 180,170; and of 1858, 101,911. The stock on the 31st of last month was 28,000 bales; same date of 1860, 20,000; of 1859, 35,500; and of 1858, 47,000.

MADRID, Sept. 15.

The statement made in the Paris journals and noticed in your last Paris letter, that a treaty of commerce is being negotiated between France and Spain, is most positively contradicted by the Government newspapers. No commercial negotiations whatever have, it is affirmed, been entered into with France.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1860 are added:—

DEBTOR.	Sept., 1861.	Aug., 1861.	Sept., 1860.

From Australia, the following advices have come to hand:—Sydney, July 20.—Wool—In this market the transactions are necessarily limited, owing to the small quantities coming to hand. Since the departure of the June mails, only 60 bales were brought forward, and disposed of at auction at prices fully up to the rates obtained during the sales of the previous month. Sheep Skins—The market has been well supplied, and prices have been fully maintained. Over 9,600 came to hand during the month, all of which were disposed of at full rates. Tallow—The price during the present month for prime shipping parcels of beef may be quoted at 40*l* per ton, but it is generally anticipated that after the departure of the mail prices will give way. Hides—Since the 22nd ult. nearly 5,000 were brought forward at our weekly sales, and disposed of at satisfactory prices. Over 900 were catalogued for this day. Prices as follows:—50 at 6s, 30s at 14s, 58 at 13s 6d, 143 at 14s 9d, 17 at 12s 9d, 37 at 16s 3d, 3 at 11s, 15 at 11s, 3 at 8s 6d; calf-skins, 8 at 1s 6d, 3 at 2s 4d each. Horns—1 lot sold at 15s per 100. Freights to London—Wool, ¾d to 1d per lb; hides, 25s to 30s per ton; tallow, 55s to 60s per ton; oil, per tun, as per agreement; gold, ½ per cent. by sailing vessels, and ¾ by steamer. Melbourne, July 25.—Wool—The only wools coming forward are fellmongers', which are shipped on producers' account. The Customs clearances of wool since our last are: from June 15 to July 13, 60,342 lbs, value 4,606*l*; previous shipments

from October 10, 1860, to June 15, 1861, 16,700,973 lbs, value 1,304,469*l*; total 16,761,315 lbs, value 1,309,075*l*. Tallow—Our quotations are: beef, in shipping order, 39*l* to 43*l* per ton; mixed ditto, 43*l* 10s to 44*l*; mutton ditto, 45*l* to 48*l* per ton. Hides—A decline in price has taken place in this market of about 2s per hide. Our quotations are now for good well-cured hides, in shipping order, 12s 6d to 13s.

The following commercial report is dated Calcutta, *July* 7:—Produce Market—Our stocks are considerably increasing, but as native holders will insist on demanding prices utterly disproportioned to the value of their goods in the home market, there has been a decrease in the amount of business transacted, and the general tendency of prices is a downward one. Import Market—Less business has been transacted during the last fortnight than the previous one, even although importers have further given way on most staple goods, and it is not possible to move off any quantity of goods in the present state of the bazaar. Three failures of dealers took place a week ago, and there is still want of confidence. Accounts from the Upper Provinces continue to represent rapid clearances of the goods which are arriving there at paying prices, but this news does not appear to have any effect on our market here in the meantime.

Advices from Rangoon are to Aug. 1. The state of trade to that period is thus reported:—Imports.—There has been a brisk inquiry for yarns of all kinds, and sales have been effected at enhanced values. Grey goods show no improvement in value, and sales have only been made to a moderate extent. White shirtings have been in fair request. Exports.—Rice—There has been no variation in prices since last mail. Natsain, best quality, 16 per cent. paddy, still holds at 86 to 91 rs, while more mixed sorts are proportionately cheaper. The smallness of supplies during the fortnight has fully warranted an accession to the above values, but shippers have been very firm in their refusals. A good quantity of grain still remains stored up in the interior, fully 25 to 30,000 tons—sufficient to allow a moderate export seawards during the next four or five months.

An account of the importations and exportations of bullion and specie registered in the week ended *18th September, 1861*:—

Gold imported into the United Kingdom.

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing, chiefly, to the present high value of cotton, and the limited nature of our exports of goods to India and America, the markets in the manufacturing districts held this week have been extremely inactive. In the general quotations, however, no change of importance has taken place. A fair average business has been passing in iron, at full prices, and the demand for coals has ruled healthy.

MANCHESTER, Sept. 19.—In the first part of this week our market was chiefly affected by the discouragement of the Eastern advices then to hand, and prices were occasionally weaker, especially in India or China makes. Now, however, the excitement in Liverpool has had rather the preponderating influence; more offers are made, but still cautiously, by merchants; whilst many, both spinners and manufacturers, have withdrawn their productions altogether from sale at these rates. The working full time is now probably more the exception than the rule, each day adding to the numbers who adopt it. The purchases of the week have been mainly speculative for investment in staple goods to keep during the winter, and a considerable portion of the spare warehouse room in Manchester is already occupied by stocks of such. It almost needless to add that most sellers also hold to the extent o their ability.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Raw Cotton.	Price Sept. 19, 1861	Price Sept. 1860	Price Sept. 1859	Price Sept. 1858	Price Sept. 1857	Price Sept. 1856

BRADFORD.—The continual cheapening of money tends to make wool firm. The best kinds of bright-haired wools are especially difficult to buy. The demand, however, is not large, and often, where old prices would be given, an advance is refused. In Down wools we can report no improvement, either in demand or price. The production of yarns is just now somewhat on the increase. Several large firms in Halifax and Bradford have gone on to full time. The export houses are sending out somewhat more yarns of the better class to the Continent. We have to report a quiet market for pieces. Prices are very steady, and in some instances slightly higher. Stocks are unusually small.

LEICESTER.—The hosiery trade in most branches continues in satisfactory state, but there is not an average amount of business doing. Employment, however, is more general, and future prospects are encouraging. At Loughborough and Hinckley there is a little more doing. Wools remain without material change in price, the market being firm. Yarns keep up in price, and spinners continue well employed.

NOTTINGHAM.—In some departments of the lace trade there is a slight improvement noticeable, and a shade more is doing in some descriptions of cotton fabrics. Plain nets are not in request, but there is a little more doing in fancy nets and muslins, but the buyers who have recently visited the lace market have not purchased in large quantities. In hosiery there is a fair amount of business doing for the home market, and a little also for export; business generally is assuming a more healthy tone. Yarns have an upward tendency. There are still a great number of lace and hosiery hands out of employ.

LEEDS.—The tone of the market was of a more cheerful character than last week, and a larger amount of business was done. Heavy goods were in chief request, but a fair bulk of ordinary cloths of light-made fabrics was also disposed of. Small parcels on French account were understood to be among the purchases. Prices are moderately firm, those of wool as well as those of goods.

ROCHDALE.—Manufacturers, are moderately well employed, and prices are firm. Great care has been for some time used not to overstock the market. Wools are steady in price, but only a few sales have been made.

BELFAST.—In a few of the leading places of sale there has been a slight improvement in the quantity of goods offered, and for some descriptions a better demand existed. The lawn trade has been less inactive; no improvement in the market for handkerchiefs. A considerable extent of consumption of some qualities of the lighter fabrics of linen has recently been created by the sewing houses who are engaged in embroidering that description of goods.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* at the works; best bars, 8*l*; sheets, 8*l* 10s; doubles, 10*l*; nail sheets, 8*l*; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l*; hoops, 8*l*; gas strip, 7*l* 10s; Canada plates, 11*l* 10s, and all other sorts in proportion. Second and third-class makers are selling below these rates.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 18th day of September, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,823,445	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,173,445
		Silver Bullion	..
	27,823,445		27,823,445

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,450,800
Rest	3,790,874	Other Securities	17,289,032
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,061,928	Notes	7,987,265
		Gold and Silver Coin	826,347
Other Deposits	12,442,850		
Seven Day and other Bills	704,792		
	36,553,444		36,553,444

Dated the 19th September, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,540,972	Securities	27,836,832
Public Deposits	5,061,928	Coin and Bullion	13,999,792
Private Deposits	12,442,850		
	38,045,750		41,836,624

The balance of Assets above Liabilities being 3,790,874*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£14,816
An INCREASE of Public Deposits of	193,919
An INCREASE of Other Deposits of	85,170
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	83,513
An INCREASE of Bullion of	350,390
An INCREASE of Rest of	2,604
An INCREASE of Reserve of	367,040

The above return is again very favourable, the bullion having increased to nearly fourteen millions, while the reserve shows a further addition of 367,000*l*. Both the public and the other deposits exhibit an augmentation in the latter case from the diminished demand for money. The falling off in the other securities arises from the like cause.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,171,226	20,775,364	21,919,055	21,609,969	20,540,972

Exchange on Paris (shrt)	25 20 25	25 15 20	25 10 15	25 15 20	25 40 47½
— Amsterdam ditto	11 18⅛ 19½	11 16 16½	11 14½ 15	11 13½ 14	11 18 19
— Hamburg (3months)	13 10⅞	13 8½	13 5½ 6	13 5½ 6	13 9⅛ 10½

In the corresponding week of 1851, some further mercantile failures had taken place at Liverpool. The money market, however, remained easy, and the supply of capital was abundant. Abroad, the new session of the Dutch Chamber had just been opened. The accounts of the misgovernment in the Italian provinces, and especially in Naples, continued deplorable. From Austria doubtful accounts were received of the success of the loan there in course of negotiation. A commercial treaty had been arranged between Prussia and Hanover, by which the latter Kingdom and Brunswick, at the expiration of rather more than two years, would enter the Zollverein. Great excitement still prevailed in the United States with regard to the piratical invasion of Cuba by General Lopez. Further interesting accounts had been received from the Australian gold regions.

In 1858, the treaty of peace with China had been published in the Paris *Moniteur*. The Bank of France had lowered their rate of discount from 3½ to 3 per cent., but the Bank of England maintained their minimum at 3 per cent., although the bullion had reached 19,134,065*l*, and the reserve 13,593,100*l*.

In 1859, the Bank rate of discount was 2½ per cent., notwithstanding that the bullion and reserve were considerably lower than in the preceding year, being respectively 17,192,169*l* and 10,587,394*l*, and the other securities had risen from 15,227,068*l* to 19,317,020*l*. The instalments on the Indian and Russian loans were in course of payment.

In 1860, General Cialdini had just defeated General Lamoriciere and the Papal army at Castelfidardo with great loss, and the siege of Ancona had commenced. Various points in the Papal provinces were being occupied by the national troops. An attempt had been made to assassinate the Emperor Napoleon. In the London Bankruptcy Court the examination of the partners in the great leather house of Streatfeild, Laurence, and Mortimer was exciting much interest.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 5,577,467*l*; in 1858, a deficiency of 3,177,579*l*; in 1859, a deficiency of 6,097,938*l*; and in 1860, a deficiency of 6,396,144*l*. In 1861, the deficiency is 4,846,182*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England, at their weekly Court yesterday, reduced the minimum rate of discount from 4 per cent., at which it was fixed on the 29th ult., to 3½ per cent.

This movement was generally anticipated, and hence no effect was exercised in the discount market or on the Stock Exchange. The demand during the week had been very moderate, and the rate in Lombard street had fallen to 3¼ per cent., with occasional transactions at a fraction less. The reduction yesterday consequently brought no additional business to the Bank, the applications at that establishment being still confined to regular customers. This afternoon the demand for discount slightly increased, but there was no change in the general rates.

On the Stock Exchange, money on Government securities was obtainable yesterday at 2 per cent., but to-day 2¼ per cent. was asked for short loans, and 2½ to 3 for longer periods.

The joint stock banks have followed the movement at the Bank by lowering their allowance on deposits from 3 to 2½ per cent. The London and Westminster, however, in accordance with their usual practice, giving 1 per cent. less than their ordinary terms on sums below 500*l*. The discount establishment have also reduced their interest from 3 per cent. to 2½ for money at call, and from 3¼ to 2¾ per cent. with seven days' notice.

The following are the rates of discount in the principal cities of the Continent, showing no change from last week:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5
Berlin	4	2¾
Frankfort	3	2
Amsterdam	3	3
Turin	5	5
Brussels	4	3½
Hamburg	...	2½
St Petersburg	7	...

ENGLISH FUNDS.—The funds were heavy in the earlier part of the week, but subsequently recovered to fully last Friday's prices. Consols for money were offered on Monday at 93½, whence an improvement gradually took place to 93⅝ to ¾, which was the closing quotation this evening. For the account the last price was 93¾ to ⅞, after having been for a short period this morning 93⅞ buyers. The chief favourable influences have been the continued ease in the money market, the steady influx of gold into the Bank, which, for the present at least, shows no sign of ceasing, and the generally seasonable weather. On the other hand, the American crisis excites uneasiness, chiefly from the uncertainty thrown upon our cotton prospects, and the political appearance of the Continent is in many respects considered unsatisfactory.

On Monday there were five further failures on the Stock Exchange in connection with the Consol account, and on Wednesday the brother of Mr Augustus Cooper, the large dealer, whose default was announced last week, was also declared. In each case only a small amount is involved.

The June Exchequer bills have improved to 5s to 8s premium, while the March issue remain without change at

2s discount to 2s premium. India bonds are firm at 9s to 12s premium.

The Indian Five per Cent. loan was prejudiced in the earlier portion of the week by realisations, but subsequently rallied, and closed the same as last Friday, at 103¾ to 104.

FOREIGN STOCKS.—The transactions in the foreign market this week have again been numerous, and in several cases a rise has taken place. The chief inquiry has been for Spanish-American descriptions, which have come into marked favour, their present position in the market contrasting strongly with the price they bore some time ago. Peruvian Three per Cents. Uribarren and Dollar Bonds have advanced considerably. New Grenada, Venezuela, and Chilian have also risen and remain with a firm tendency. Mexican has fluctuated between 23⅛ and 24, according as the reported intention of France, England, and Spain to intervene in the affairs of Mexico has been discredited or confirmed. Turkish Six per Cents. have advanced, the reliance on the projected financial reforms of the Sultan being sufficient to outweigh the effect of the disturbances in various parts of Turkey. The late improvement in the certificates of the confiscated Spanish dividends has not been maintained. The new Italian Five per Cent. loan has been ordered to be quoted on the Stock Exchange, and a considerable business has taken place in this security at 1¼ to ½ premium.

French Three per Cents. closed this evening on the Paris Bourse at 69f 25c, showing a rise on the week of more than one-eighth.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

RAILWAYS AND OTHER SHARES.—The railway market remains without business, the daily transactions being of the most unimportant character. The general tendency has again been flat, gloomy anticipations being entertained as to our autumn and winter trade, and to the consequent effect stagnation in business may produce on railway receipts. Lancashire and Yorkshire stock has been especially influenced, since a large part of the revenue of the line depends mainly upon the prosperity of the cotton manufacture. North-Eastern stocks have again sustained a fall, the traffic having now for some weeks shown a continuous decrease. South-Eastern is also lower, the decline in the receipts being attributable to the competition of the London, Chatham, and Dover, which will necessarily prove a permanent cause of disturbance. The market generally would probably exhibit greater signs of depression than are now apparent but for the support derived from the low value of money, and the unwillingness of the public to sell with the prospect of increased receipts from the Great Exhibition next year.

In the colonial department, there has been a rise in Canadian descriptions, but Indian guaranteed stocks have not maintained the previous advance. Cape Railway shares are steady.

The principal feature in the foreign market is the steady improvement in Brazilian descriptions, both the San Paulo and Bahia shares being again quoted higher. Pernambuco was exceptionally dull until to-day, when a considerable advance suddenly occurred. Lombardo-Venetian, after some fluctuation, closed at 1½ to ⅝ premium, or the same as last week. American descriptions are generally better.

Colonial Government debentures continue in demand, with an upward tendency, being still taken up for investment.

In the miscellaneous market, mining shares have been in demand. Great Ship have receded on the announcement of the damage to the Great Eastern to 4s to 5s the 1*l* share. The new Mercantile Fire left off at ½ to ⅝ prem., and Commercial Union ⅛ dis. to par.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

FOREIGN EXCHANGES.—There has been a greater demand for bills this week, and the rates have generally been a shade flatter.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—The arrivals since our circular of 12th instant are the Seine, from the West Indies, with 49,000*l*; the Orwell, from Melbourne, with 155,000*l*; the Pera, at Southampton, with 118,000*l* from Australia, via Alexandria. Some large parcels of gold coin have also been received from the Continent. The shipments have been 10,700*l*, per Persia, to New York; 1,000*l*, per Edinburgh, to New York; 20,000*l*, per Tagus, to the Peninsula; 12,500*l*, per Indus, to Alexandria; 1,338*l*, per Indus, to Madras; 350*l*, per Indus, to Calcutta. About 408,000*l* has been purchased by the Bank of England, of recent arrivals, since 12th instant. The Swiftsure, with 204,000*l*, sailed from Melbourne on 3rd July; the James Wilson, with 76,000*l*, sailed from Melbourne on 13th July; the Lincolnshire, with 207,000*l*, sailed from Melbourne on 23rd July.

Silver.—Although operations in the silver market have not been extensive this week, prices continue firm at our quotation of 12th instant, viz., 60⅝d per oz standard; at this price the 84,000*l* brought by the Seine, from the West Indies, was disposed of. The Peninsular and Oriental Company's steamer Indus, which leaves Southampton to-morrow, will take 4,000*l* for the Mauritius, 550*l* for Calcutta, 11,220*l* for Hong Kong, 42,746*l* for Shanghai, and 1,000*l* for Foo Chow Foo.

Mexican Dollars have been sold this week for China at 59⅜d per oz; both demand and supply however are limited.

Exchange for Bank's drafts at 60 days' sight on Bombay and Calcutta remains unaltered, viz., 1s 11⅜d to 1s 11½d; on Madras, 1s 11⅛d. Bills with documents, 1s 11d to 1s 11⅛d.

India Government loan notes have rather a downward tendency; there is but little doing at 96⅛ to 96¾ for the 5 per Cents., and 103¼ to 103¾ for the 5½ per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9¼d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, scarce. Silver—Bar silver, 5s 0⅜d per oz std, firm; bar silver, containing 5 grs gold, 5s 0⅜d per oz std; fine cake silver, 5s 5¼d per oz; Mexican dollars, 4s 11⅜d per oz; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 60,000*l* in gold was purchased by the Bank yesterday and 145,000*l* to-day, making a total of 205,000*l* since the date of the last account. The bulk of the amount taken this afternoon was Australian by the Orwell.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Messrs Theodore Ralli, Sons, and Co., Greek merchants, who suspended on the 9th of May last, have made the satisfactory

announcement that they have now liquidated all their engagements in full, and resume their payments from the present week.

The stoppage has taken place of Messrs (Ford) Hale and Jones, wine and spirit merchants, with moderate liabilities.

A meeting of creditors of Messrs Scott and Wright, woollen warehousemen, whose suspension was announced on the 27th ult., took place on Monday, when it was resolved to wind up under an assignment, unless the firm could within a week offer a satisfactory composition with security. The total liabilities ranking on the estate were said to be about 43,000*l*, and assets 28,000*l*.

The advices from Melbourne report trade to be in an unsatisfactory condition, and that several failures have taken place. Mr. W. H. Nicholson has stopped payment with liabilities of 30,000*l*, assets about 5,000*l*; Berger Brothers, liabilities about 45,000*l*, assets 8,600*l*; and Goodman Teale, liabilities 13,500*l*, assets 4,570*l*. At Sydney, the suspension is announced of Mr Elias Moses, with liabilities of about 24,000*l*.

PUBLIC COMPANIES.—The advices from New Zealand announce the proposed formation of a Bank of New Zealand with a nominal capital of 500,000*l*, of which it is intended to call up half. Some of the most influential persons in the colony are connected with the project, and 130,000*l* of the capital is said to have been already subscribed.

Satisfactory advices are said to have been received from Singapore by the last mail with regard to the prospects of the Labuan Coal Mines. The preparatory works have been energetically prosecuted, and no difficulty has been experienced in procuring Chinese and Malay labour. A small quantity of coal has been regularly raised, notwithstanding that the mine had to be cleared out and the old plant repaired. It is intended to sink a new pit, but not until coal to some extent has been raised from the present working.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.42½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107½ to 107⅝ per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, the arrivals of home-grown wheat, fresh up, were considerably on the increase. Buyers acted with great caution, and to effect sales of any extent lower prices had to be submitted to. The transactions, however, were mostly of a retail character, at about previous rates. There was a fair show of foreign wheat on the stands, and the demand for all descriptions ruled inactive, at former currencies. The trade for barley was less firm, and the quotations were rather drooping. Oats—the supply of which was large—moved off heavily, at a decline of 6d per quarter. In the value of beans and peas, no change took place. Flour was held at full prices; but the amount of business doing in it was limited. This week's imports amount to 14,280 quarters of wheat; 120 of barley; 40,390 of oats; and 9,430 barrels of flour.

The demand for both red and white wheats at Liverpool, this morning, was steady, at full quotations. Flour was in fair request, at quite former prices; and maize sold freely, at extreme rates.

Messrs Briggs and Co., of Alexandria, writing on the 6th inst., remark that the corn market of that port was abundantly supplied with wheat, and that prices had fallen 2s per quarter. Beans and barley were both cheaper. The following were the sales to the 3rd inst.:—Wheat, Saide, private trade produce, 30,350 qrs, 30s 2d to 31s; ditto, Pasha's produce, 4,250 qrs, 32s 6d; Beheireh, private trade produce, 19,540 qrs, 28s 4d to 29s 6d; ditto, ditto (white), 3,450 qrs, 29s 3d to 30s 10d; ditto, Pasha's produce, 812 qrs, 30s 6d; beans, Saide, private trade produce, 18,460 qrs, 26s to 26s 6d; Beheireh, private trade produce, 3,200 qrs, 25s to 25s 9d; barley, private trade produce, 7,320 qrs, 16s 6d to 17s 7d; ditto, Pasha's produce, 2,500 qrs, 18s to 18s 3d; lentils, 910 qrs, 25s to 25s 7d; peas, 63 qrs, 27s 3d; linseed, 1,790 qrs, 43s 6d to 47s 3d per quarter, free on board.

The Liverpool cotton market, this week, has again been very excited, in consequence of the news from America destroying more and more any hope for peace, and a supply of cotton. A proof the Americans themselves do not expect for the present an alteration of things, is their operations in cotton at Liverpool, partly on speculation, partly for re-shipment to America. Several thousand bales have already been sent to New York, and much more will follow. Short time has not yet been resorted to by spinners to the extent which present circumstances require; but no doubt it will become general very soon, being the only means of making the present stock of cotton last a little longer; moreover, only by a smaller production will spinners be enabled to obtain more remunerative prices for their yarns. As yet, they do not seem to be fully aware of the extremely awkward position in which their supplies are. The only favourable step they have so far taken is an increased consumption of East India cotton, but still that is only in so very limited use in comparison to American cotton, that a still larger increase in the consumption of Surat is highly advisable. The total sales of last week amount to 143,000 bales, including 56,000 bales to spinners, 57,000 on speculation, and 30,000 for export. Quotations ¼d to ⅜d higher for Americans, and ⅛d to ¼d for Surat. To-day, 20,000 bales have been sold at very full rates.

Very little change had taken place in the cotton trade of Alexandria during the week ending Sept. 3. The supplies on offer were small, and were readily disposed of at full curencies. The new crop is not expected in the market for six weeks hence. The sales have been:—48 bales ordinary to middling, 8½d to 8 6-10d; 120 do., good middling to fair, 8 66-100d to 8 95·100d: and 23 bales good fair to good, 9 1-10d per lb, free on board, making a total of 191 bales. Freight by steamer, 3-16 ths of a penny per lb.

Export of Cotton in bales from 3rd Oct. to 2nd Sept.

Rather extensive public sales of tea have been brought forward this week; however, they have gone off with animation, and, in some instances, prices have slightly improved. Privately, the market has been very firm.

The annexed intelligence, in reference to tea and silk, is dated Hong Kong, August 28:—

Canton Silk—Settlements of 100 piculs are reported. The third crop is expected in about a fortnight. Loonkong, 420 dols; re-reeled Kumchuck, 445 dols; Kumchuck, 410 dols; Mahtow, 175 dols; Kowkong, 385 dols. Tea—A considerable business has been done since last mail, amounting to 51 chops, including 5 chops contract tea. Stock in the market, 18 chops. Prices show an advance of 5 mace to 1 tael on opening rates. Tayshan congous are quite neglected. Scented teas have been in good demand at previous prices; the stock of finest is very small, and the common kinds are not inquired for. Sales are as follow:—Congou, 46 chops, and five chops contract; Oopeiks, at 30½ to 35¼ taels; Oonahins, 26½ to 28¾ taels; Tayshan congou, no sales; scented orange pekoe, 15,000 boxes, at 22 to 30 taels; scented caper, 2,000 boxes, at 20 to 27 taels. Canton Greens—Gunpowder, 4,000 boxes, at 18 to 23 taels; young hyson, 140 half-chests, 23⅛ taels. Country Greens—Sales, 200 half-chests; stock, 1,500 half-chests. Freights to London, 3l 5s to 3l 10s. Macao—Arrivals of tea at this port amount to 35,000 half-chests, chiefly Tayshans. The Spirit of the North is loading, and the Coleroo on the way from Canton to fill up. Amoy advices are to the 19th inst. Tea—Settlements amount to 3,626 half-chests orange pekoe, at 12½ dols to 18¼ dols; 4,204 half-chests congou, at 17 to 26 taels; at the latter rates 910 half-chests in addition were settled, but it was understood the purchasers refused to take them. Stock about 31,000 half-chests. Foochow advices are to the 17th inst. Tea—Last mail reported the prospect of a fall in prices, which, however, has not been realised, but, on the contrary, good medium to Kaison kinds in some instances have been taken at an advance. Arrivals have been in excess of last year, but comprise a large quantity of low and ordinary quality, for which there is no demand. The second crop had arrived to some extent, and the better qualities realised extreme rates, but were, nevertheless, understood to show a loss to the teamen. Souchong had been taken to a moderate extent, and the stock was large. In oolong a small business done for England, but as yet no sales were reported for America. The quality of the crop is decidedly inferior. Stocks increasing. Sales from the 1st to the 16th July as follow:—Congou—28,529 chests, at 6 taels, short, for low siftings, to 29 taels, short, for fine second-class. Souchong—3,508 chests, at 19 to 34 taels, short, for common to fine. Finest still held for 40 taels. Oolong—2,478 half-chests, at 14½ to 22 taels, short, common to good. Pekoe—768 chests, at 27 to 38 taels, short, good to fine. Scented Teas—5,670 boxes, at 23 to 33 taels, short, good to fine. Stocks—Congou, 65,175 chests; souchong, 15,996 chests; oolong, 44,558 half-chests; pekoe, 1,372 chests; scented teas, 3,000 boxes. Shanghai advices are to the 18th inst. Silk—A considerable business has been done at exorbitant rates; settlements amount to 6,000 bales. Stock estimated at about 11,000 bales; the actual quantity cannot be ascertained, as silk does not now come through the inland custom houses. Quotations are:—Tsatlee, Nos. 1 to 3, none; No. 4, 390 taels; inferior, 330-70 taels. Taysaam, No. 1, 360 taels; No. 2, 330 taels; No. 3, 295 taels; No. 4, 270 taels; inferior, 230-60 taels. Total export of silk from China to Europe is 1,591 bales, against 1,607 bales, showing a decrease of 16 bales for the present season. Tea—Two chops of second-class Oopeih, bought at Hankow by foreigners, had been put upon the market, but the price asked had prevented their being sold. Five musters of the same kind had likewise been shown, representing chops on the way down to this port. At Hankow settlements to the 30th of June were 32 chops, leaving nine chops on the market. At Shanghai purchases have been—Nangchow, 465 chests, at 21½ to 23 taels; common congou, 190 chests, at 16¼ taels. Stocks, 3,100 chests congou and 800 chests pekoe. Green Teas—Settlements there and at Ningpo sent up to Shanghai for shipment comprise 11,000 half-chests of Fychow and Moyune. At Ningpo the market had been firm, and purchases showed fully 1 tael advance. The first of the new Pingsueys had arrived, and one chop, equal to 850 half-chests, had been settled at a high rate. The quality was said to be superior to last season. Sales of Japan, 1,250 half-chests. Stocks—New Pingsueys, 5,000 packages; Hooychow, 1,500 half-chests; Moyune and Fychow, 3,500 half-chests; Japan, 2,000 half-chests. Stock at Ningpo, 3,500 half-

chests. Total export of tea from China to Great Britain is 7,193,600 lbs, against 3,091,800 lbs, or an increase for this season of 4,101,800 lbs. To the United States the export is 419,000 lbs, against 128,800 lbs, or an increase for 1861-62 of 290,200 lbs.

For most kinds of raw sugar, there has been an improved demand, at an occasional improvement of 6d per cwt. Refined goods have sold steadily at extreme rates.

The stocks of sugar at New York, Sept. 1, were as follows:—

Although the supplies of coffee offered at public sale have been large, all descriptions have been in good request, at fully previous quotations. The Dutch Trading Company's Autumn sale, consisting of 389,753 bags, held at Rotterdam on the 18th inst., was well attended, and the whole of the quantity offered was disposed of at from 41½ to 45c, being firm prices.

The following is dated Colombo, Aug. 16:—We have only a few small transactions in Badulla parchment coffee to notice at about previous values, there being very little remaining unsold. The reports from the coffee districts present no new feature. The weather has been unsettled, and the arrivals of coolies large. The crop of native Ouvah coffee comes slowly to market, and in small quantities. Some bold parcels of this description have been taken at extreme prices, but generally speaking the quality has been irregular. The shipments of produce during the fortnight have been moderate, there being but three ships loading for London, one only cleared out. The exports of coffee to date stand as follows:—

PLANTATION COFFEE.

The dry fruit trade has been somewhat inactive. Old currants, of useful quality, are easy of sale, at late rates. In new produce, however, sales progress slowly.

In rum, the dealings have been very moderate, yet no change has taken place in its value. Brandy continues firm, and the quotations are well maintained.

Good and fine qualities of English wool are in steady request, at full prices. Inferior parcels, however, are a slow inquiry. In colonial and foreign qualities, next to nothing has been done. Hemp has sold steadily, at 30*l* 10s to 30*l* 15s per ton for clean Russian. Flax, jute, and coir goods commanded previous rates.

Messrs Thomas and Co., of Calcutta, write as follows with regard to the crop of indigo. The communication is dated Aug. 8:—"Manufacture in Bengal has been nearly brought to a close, and a season so disastrous as the present one we do not remember to have witnessed: dissatisfaction among the ryots, heavy rains, and an inundation one month earlier than usual, have each in their turn brought about this miserable result, and it is not impossible that prices may have to be reduced. From Tirhoot and Chuprah we regret to say that our accounts are far from favourable. The Benares district is reported to be very bad. The Nowdha has also suffered a good deal, and, owing to the heavy rains, all weeding has been stopped. Heavy rain has lately fallen in some parts of the Doab, but as yet planters do not complain of much injury having been done, and are in hopes of making a fair season. We beg to hand you our first estimate of the season:—Doab and Benares, 32,000 fy mds; Tirhoot and Chuprah, 15,000 fy mds; Bengal, 18,600 fy mds; total, 65,600 fy mds."

The inquiry for most metals has been very moderate. Scotch pig iron has realised 51s 3d cash, mixed numbers; and spelter 18*l* to 18*l* 5s per ton on the spot. Copper is firm in price.

Linseed oil has been very firm, at 34s 3d to 34s 6d per cwt, on the spot. In other oils a fair average business has been transacted, and for the best qualities enhanced rates have been obtained. Turpentine has met a heavy market, and American spirits are now quoted at 63s to 64s per cwt.

The tallow trade has been depressed, and prices have given way. Petersburg Y. C. is now selling at 47s 3d per cwt on the spot, and at 48s for spring delivery.

COTTON.

NEW YORK, Sept. 3.—The market was still excited, and again active and higher, with sales of about 5,000 bales, closing at 21½c for middling uplands. At the close any figure under 22c was refused by some holders.

NEW YORK, Sept. 7.—The business doing in the market was very moderate; nevertheless, prices were fully supported.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 3.—Breadstuffs—Flour—The receipts were moderate and the market was steady, with a fair export and Eastern demand. The sales embraced about 16,000 bbls, chiefly

within the following range of prices:—Superfine State, 4.25 dols to 4.35 dols; extra State, good to choice, 4.45 dols to 4.85 dols; superfine Western, 4.25 dols to 4.35 dols; common to choice Western extra, 4.45 dols to 6 dols; extra Canada, 4.40 dols to 7.50 dols; mixed to straight Southern, 5 dols to 5.70 dols; straight to good extra ditto, 5.75 dols to 8 dols; choice extra family and bakers' brands, 8 dols to 8.75 dols; rye flour, 2.25 dols to 3.50 dols; corn meal, Jersey and Brandywine, 2.80 dols to 3.15 dols. Canadian flour was quiet, and the demand limited, while the market was dull at quotations. Southern flour was in better supply, and the market was less buoyant, and favoured purchasers. The sales embraced 700 to 800 bbls at the above quotations. Rye flour was dull and in good supply, with sales of 200 to 300 bbls at the above prices. Corn meal was in fair request, with moderate sales of Jersey and Brandywine at our figures, and of Marsh's caloric at 3.10 dols to 3.15 dols. Wheat was firm for prime shipping lots for export. The sales embraced about 100,000 bushels, at 1.03½ dol for Racine spring, 1.22½ dol for white Canadian, 1.14 dol for red State, 1.25 dol to 1.32 dol for white Kentucky, 1.22 dol to 1.23 dol for white Ohio, 1.10 dol to 1.15 dol for red Western, 1.10 dol for amber Iowa, 92c to 1.08 dol for Milwaukee Club, and 88c to 1 dol for Chicago spring. Corn was firmer, and in good domestic and export demand, with sales of 90,000 bushels, at 44c to 45c for heated, 46c to 48c for Eastern, and 49c to 50c for good to prime lots of shipping Western mixed.

New York, Sept. 7.—The flour trade was firm, and the quotations were well maintained. For wheat, the transactions were to a full average extent, at extreme rates. Corn realised full currencies, with a steady demand.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Only moderate supplies of English wheat have been on offer in the various markets held this week, and the demand for most kinds has ruled steady, at a further advance in the quotations of 1s per quarter. There has been a good business doing in foreign wheat, partly for export to France, at extreme rates to a slight advance. The barley trade has shown signs of improvement, but the transactions have not increased to any extent. Malt has sold without difficulty, on former terms. Good sound oats have commanded very full prices, but inferior parcels have ruled heavy. Both beans and peas have sold at late currencies.

The Continental markets have been somewhat excited, and both wheat and flour have further advanced in France; notwithstanding that very large quantities have been imported of late. Spring corn, however, has sold slowly, but at full prices. The American advices state that very large quantities of produce continued to be shipped to England and France.

The harvest in this country has been brought to a pretty general close. As thrashing progresses, the yield of the new wheats has fallen short of what may be termed a full average crop; nevertheless, the quality, without exception, is remarkably fine. All spring corn is turning out well, both as to condition and quantity.

The Scotch markets have been scantily supplied with wheat, in which a moderate business has been transacted, at very full prices. Barley and other articles have changed hands slowly, at late rates.

In Ireland, wheats have realised extreme rates, and the demand for them has improved. Barley and oats have sold freely, and Indian corn has been held for more money.

At Mark lane, to-day, there was an increased supply of English wheat on offer, and the trade for both red and white qualities was much less active. To effect sales of any extent, lower prices had to be submitted to. Foreign wheat was in slow request, yet no change took place in its value. Barley was less firm, and rather drooping in price. The supply of oats was large, and the trade ruled heavy, at a decline of 6d per quarter. Beans and peas changed hands slowly, at late rates. Flour was in slow request, yet the quotations were supported.

With regard to the trade in floating cargoes, Mr E. Rainford observes:—The arrivals reported since the 12th inst. to last night are 97 cargoes, comprising 46 maize, 27 wheat, and 24 miscellaneous, viz.:—Wheat, 10 cargoes from New York, 8 Taganrog, 4 Berdianski, 1 Galatz, 2 Alexandria, 10 Odessa, 1 Marianople; flour, 1 New York; rye, 1 Galatz, 1 Berdianski, 1 Odessa; maize, 7 New York, 7 Ibraila, 15 Sulina, 12 Galatz, 4 Odessa, 1 Saffi; barley, 2 Ibraila, 2 Sulina, 4 Odessa; beans, 6 Alexandria, 4 Danube, 2 Casabianca. There is still a demand for France, although it is not quite so active to-day. The following are the prices paid since this day week:—Wheat, per 492 lbs, for the United Kingdom, arrived, Taganrog Ghirka, 53s, 53s 9d, and 54s; Berdianski, 55s and 57s; on passage, Taganrog Ghirka, 52s 6d; per 480 lbs, for the United Kingdom, arrived, red winter, 57s 6d; Milwaukee, suppposed 53s 6d; Sandomirka, 62s, delivered sound; for the Continent, Saide, 42s, delivered sound; on passage, amber Milwaukee, 54s; new red winter, 58s. Maize, per 492 lbs, for the United Kingdom, arrived, Galatz, at prices ranging from 34s 6d to 36s; Moldavian, 34s 3d (sea-damaged for seller's account); Odessa (some samples slight dry warmth), 34s 6d (for London); on passage, Galatz (a resale), 34s; Odessa, 35s; per 480 lbs, arrived, Bulgarian, according to condition, 33s to 33s 6d; Foxanian, 33s 9d; Ibraila (imperfect), 32s 6d; ditto (perfect), 33s 9d. Barley, per 400 lbs, for the United Kingdom, arrived (imperfect), Ibraila, 23s 4½d and supposed 24s; Odessa, 24s 6d; on passage, Odessa, 26s 3d for the Continent, delivered sound; for the United Kingdom, shipping, old Odessa, 25s 3d, delivered sound.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—There has been an improved feeling in the market, the home trade paying extreme rates to 6d per cwt advance for good to fine bright sugars, while refining sorts have also sold more readily. Few floating cargoes of foreign are now offering. The abundance of money, coupled with the present low quotations of the article, does not, however, stimulate speculation. Up to yesterday, 4,000 casks West India had changed hands, including Barbadoes by auction: brown, 32s 6d to 34s 6d; yellow, 35s to 41s 6d; Jamaica, 33s to 38s; grainy Berbice, 41s to 43s 6d per cwt. The deliveries last week were 4,405 tons, and the landings 6,150 tons, leaving the stock at the close 88,750 tons, against 72,100 tons in 1860 at the same period.

Mauritius.—2,638 bags went off without change in prices, excepting for grainy and crystallised kinds at 37s 6d to 43s 6d, these being rather dearer. Low and low middling soft brown realised 30s 6d to 31s per cwt. Some parcels have changed hands privately at full rates.

Bengal.—783 bags white Benares partly sold at 45s 6d per cwt for middling yellowish.

Madras.—500 bags brown to low yellow native sold at 30s 6d to 32s. 3,810 bags grocery: grainy white (16s duty), 46s to 46s 6d; yellow (13s 10d duty), 42s 6d to 45s per cwt.

Foreign:—1,300 casks 410 barrels Porto Rico, by auction, sold as follows: low to fine grocery, 38s 6d to 45s; extra fine, 46s; brown to middling yellow, 33s to 38s. 684 casks Cuba about one-fourth part realised 33s to 37s for brown to good middling yellow. 481 boxes Havana: low grey to good yellow, 36s 6d to 40s; fine yellow, 43s 6d.

Privately, about 500 casks muscovado have sold, chiefly Cuba. 1,000 boxes Havana, No. 10, at 39s 6d. 140 boxes white in bond at 31s. A floating cargo of Havana, No. 15, has sold at 30s per cwt for this kingdom or the Continent.

Refined.—The market has been firm, with rather more inquiry. Dry goods: common, 48s 6d to 49s; middling to fair, 49s 6d to 50s. Crushed and pieces remain as before.

MELADO.—2,500 casks have sold at 22s to 27s per cwt.

MOLASSES.—The demand continues active. Several contracts have been made in West India at 14s 6d to 17s for St Lucia to fine Barbadoes. 230 casks Madras at 14s, being higher rates. A cargo of Cuba muscovado has sold at 15s 6d per cwt.

RUM.—Some few sales are reported on former terms, including Leeward Island proof at 1s 6½d to 1s 7d, and Mauritius at 1s 6½d per gallon.

COCOA.—856 bags Trinidad went at full prices to an advance for the better qualities: grey and mixed, 52s to 55s; low to fine red, 56s to 96s 6d. 581 bags Grenada sold readily at from 51s 6d to 56s. Further business is reported in Guayaquil at 55s per cwt.

COFFEE.—The numerous public sales held this week have gone off with great spirit at full rates to 1s 6d advance upon Ceylon and pale East India; and the 389,750 bags Java, &c., submitted by the Netherland Trading Company on Wednesday, realised the valuations to a slight rise. Numerous parcels of plantation Ceylon, comprising 1,127 casks 629 barrels and bags, sold readily at 72s to 79s 6d for low middling small berry to good. 1,011 bags native: small berry to superior, 64s 6d to 68s. 602 cases 3,550 bags 55 half-bales East India: palish and greenish Mysore and Malabar, 70s to 71s 6d; Madras, 72s 6d to 80s; Wynaad, 74s 6d to 76s; other good to fine sorts, 81s 6d to 95s. 43 bales 15 half-bales, good long berry, 129s. 676 cases Neilgherry were bought in at 82s to 85s. 370 bags superior bold brownish Java realised 74s. 933 bags Costa Rica: fine fine ordinary to good middling, 70s to 76s 6d. 3,835 bags Rio partly found buyers at 54s to 60s per cwt for ordinary to good. 143 casks 199 barrels and bags Jamaica.

TEA.—The market continues firm, but the chief feature to notice has been the public sales, which have gone off well. The catalogues contained 28,682 packages China and Japan, and 318 packages Assam, and the total quantity sold was 14,600 packages, a large portion being printed "without reserve." All kinds, including green, brought full rates, broken and dusty leaf congou being rather dearer. The Assam teas sold readily at the extreme valuations. Fine uncoloured Japan in boxes, 2s per lb.

RICE.—This article still meets with an active demand, and quotations have again advanced 3d to 6d in several cases, particularly for white Bengal. Four floating cargoes of soft grain sold during the week at 11s, subsequently one of Arracan at 11s 4½d, open charter, quality guaranteed, and one of Rangoon at 9s 1½d. On the spot, rather a large business is reported: pinky Madras, 10s 3d to 10s 6d; white Bengal, 10s 9d to 14s; Ballam, 10s to 10s 3d; Java, 14s 6d; new Rangoon, 10s 9d. By auction, 2,884 bags Bengal chiefly sold: small broken to good white, 10s 6d to 14s 6d; common Ballam, 10s per cwt. 8,000 bags Madras to arrive, sold at 10s 9d per cwt.

IMPORTS and DELIVERIES of RICE to September 14, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	57700	24000	17700	70900
Deliveries for home use	51800	45220	20200	26250
Exported	...	8400	14650	16800
Stock	36300	43100	69000	91100

SPICES.—The market has been firmer. By private contract, fair to good Singapore black pepper has realised 4d and a shade under. Many parcels of Cochin ginger have changed hands at higher rates for common sorts. 124 cases, by auction, went at 5s to 8s advance on the lowest quotations lately accepted: small and broken to middling rather wormy, 49s to 55s. 15 barrels Jamaica, 50s to 58s per cwt. Nutmegs sold slowly, at the recent decline; 132 cases went at 11d to 1s 8d for low small to fair brown; one lot fine, 3s 5d. 13 cases mace realised 7d to 11d, according to quality and condition. 37 cases Penang cloves, 1s 1½d to 1s 2½d. 265 bags pimento, at 2⅞d to 3⅛d, fully supported the improvement lately noticed.

SALTPETRE.—Bengal remains very dull. Privately, 10 per cent has sold at 33s; 7¾, 33s 3d; fine, 34s 3d to 34s 6d. By auction, 3,235 bags were bought in; refraction 7 11/16 38s 3d; 5½ to 3, 34s 6d to 35s 6d, since partly sold at 33s 6d to 34s 6d. 668 bags Bombay sold at high rates; refraction 58 to 50, 30s 6d to 31s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to September 14, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	8700	9650	13700	7300
Delivered	8450	9200	12660	10300
Stock	3560	4800	3860	3200

The deliveries last week were 210 tons.

NITRATE OF SODA.—Three floating cargoes have been sold at 13s 3d to 13s 6d per cwt.

DYESTUFFS.—The chief feature to notice consists of the active demand for Gambier, at 18s on the spot: 17s 3d to 17s 6d per cwt paid for arrival, and the holders now ask an advance. Common Cutch has sold at 21s to 21s 6d per cwt.

JUTE.—The market is steady, without alteration in prices. On Wednesday 1003 bales went off at 12*l* 12s 6d to 20*l* 7s 6d per ton for low to very good quality.

MANILLA HEMP *is* inquired after by speculators, but few parcels now offer. 22*l* per ton paid for good roping quality.

METALS.—The changes in prices have been few and unimportant, but the market generally remains very steady. Spelter has been in demand, at 18*l* to 18*l* 5s per ton. Scotch pig iron last sold at 50s 9d per ton for mixed numbers. Foreign tin is held for higher rates, but not much business doing: Straits last sold at 117*l* per cwt. No variation in British. Copper exceedingly firm: Burra Burra, 98*l* to 99*l* per ton; British at the quotations.

LINSEED.—Arrivals for the week are 2,322 quarters from the East Indies. Bombay is held at 62s; Calcutta, 58s to 60s, as to quality, ex warehouse; a few hundred tons of the latter have been sold at 57s 3d to 57s 6d for ordinary, and 58s 6d for Patna grain, shipment to be made up to the end of October. Several cargoes of Black Sea and Azoff have been sold at 57s 6d to 58s 6d, as to quality and position. Market for future shipments is less active than for parcels already afloat.

TURPENTINE.—American spirits are quiet at 64s; rough offers at 18s per cwt.

OILS.—Linseed is much wanted for export, and 34*l* 5s to 34s 10s readily obtainable. In Hull the value is 34*l* 10s. There is more demand for rape oil on the spot; foreign refined commands 46*l* and brown 42*l* per ton, and for forward delivery 20s advance on this price has been paid. Olive oils are freely taken by the trade, and prices continue to advance. We quote Gallipoli, 58*l* 10s to 59; Gioja, 58*l* 10s; Mogadore, 54*l* per tun. A cargo of Gallipoli has been sold at 57*l* 15s, cost, freight, and insurance to Cronstadt. Cocoa-nut is steady at 46*l* 10s to 47*l* for Cochin, and 45*l* 10s to 46*l* Ceylon. Palm is in good export demand, and 43*l* to 43*l* 10s paid for fine Lagos. Fish Oils—Sperm oil is neglected. We quote colonial, 94*l*; and American, 93*l* per tun.

TALLOW.—Throughout the greater part of the week the market has continued dull, and the closing quotations show a reduction of fully 6d on foreign: first sort St Petersburg Y.C., 47s to 47s 3d; to the end of the year the same; for delivery in the first three months of next, 48s; old Y.C., 45s to 45s 6d per cwt. The latter has sold freely for export.

PARTICULARS OF TALLOW.—Monday, September 16.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firm, and the sales to-day, comprising 580 casks West India and 1,082 bags Bengal, went off at full prices. 1,200 bags native Madras were bought in at 31s 6d to 32s. 6,000 casks West India have sold for the week. A floating cargo of Cuba muscovado is reported at 22s 9d, and one at 22s 9d with clayed at 25s 6d per cwt for the United Kingdom.

COFFEE.—288 casks 80 barrels 63 bags plantation Ceylon, 245 cases Neilgherry, 1,557 bags Costa Rica, and 410 bags Java from the Cape realised the full valuations to a further slight advance. A floating cargo of Bahia sold for a near port at 53s per cwt.

RICE.—A floating cargo of Rangoon sold at 11s 4½d open charter. 100 tons old Rangoon, on the spot, at 10s; and 2,000 bags white Bengal. By auction, 692 bags low and low middling white Bengal realised 10s 6d to 11s 6d per cwt.

SPICES.—116 cases Zanzibar cloves partly sold at 3⅜d per lb. 202 cases wormy Cochin ginger were mostly taken in at high rates.

SHELLAC.—Fine button sold at 9*l* 17s 6d; middling garnet, 8*l* 10s to 8*l* 15s per cwt.

OIL.—518 casks palm went at 38s 6d to 44s. 495 casks cocoa-nut: Cochin, 46s to 47s; Ceylon, 46s to 46s 6d per cwt. 95 tuns seal: brown, 26*l* 15s to 32*l* 10s; yellow to tinged, 34*l* 5s to 39*l* per tun.

TALLOW.—At auction, 204 casks Australian chiefly sold at 41s 9d to 48s 6d; some very low, 38s to 38s 9d; 77 casks 197 boxes South American realised 41s 6d to 48s; 152 casks North American part sold at 45s to 46s 3d; 176 casks Taganrog sold at 44s to 45s 6d; scrapings, 37s 6d to 43s; and 150 cases 50 hhds East India, at 44s 6d to 47s.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been rather better supported this week, and in some transactions rather better prices have been paid. Treacle continues firm, particularly for better qualities. No alteration to quote as respects transactions in English crushed.

GREEN FRUIT.—A good demand for all kinds, with a diminished stock. Barcelona and Para nuts cleared from the market. The scarcity of British fruit is leading to considerable importations of foreign. Some cargoes of apples and pears, sold by Keeling and Hunt at public sale, went at prices to induce further shipments. Lemons scarce. A large parcel of Lisbon grapes has arrived, which met a ready sale.

DRY FRUIT.—The only novelty in currants this week is the appearance of a small parcel of rain-damaged, the first which has been seen. The condition is very bad, and it would be unsaleable unless at very low prices. If much of such quality is to come on, it cannot fail to cause a further advance in the dry new, and in any quality of old currants. The clearances of the month, so far, are not much short of 1,000 tons, which would, according to last stock-taking, reduce the stock to 5,000 tons of old, a quantity of good fruit considerably short of our requirements. In raisins there is absolutely nothing doing in the market. New figs and sultanas next week.

COLONIAL WOOL.—The market remains firm.

FLAX.—Market unaltered.

HEMP.—Market very firm, and but few sellers.

COTTON.—Sales of cotton from Friday, 13th Sept., to Thursday, 19th Sept., inclusive:—4,550 bales Surat, 7d to 7½d, good fair sawginned Broach; 6⅞d, good fair new Broach; 6d to 6 5-16d, middling fair to fully fair old Dhollera; 6½d, fully fair new ditto; 5⅞d to 6¼d very middling,

to fair Omrawatty; 5¾d, fully fair Compta: 800 bales Tinnevelly, 6¼d 6⅜d fair to good; 250 bales Western Madras, 5⅞d fully fair—total, 5,600 bales. Owing to the continued warlike advices from America an active demand has been experienced, and a good business transacted, particularly yesterday, when the sales amounted to 2,500 bales. Prices of Surats are in some cases ⅛d per lb higher, and for Tinnevelly and Western Madras ⅛d per lb advance has been paid, and the market closes with great firmness with an upward tendency. Yesterday at public sale 135 bales fair sawginned Dharwar from Cochin were sold at 7½d per lb. The sales for arrival are 2,800 bales new Broach, guaranteed good fair, 7d; 150 ditto, fair, 6¾d; 250 Dhollera, fair, 6½d. Yesterday, the Bank of England reduced the rate of discount from 4 to 3½ per cent. P.S.—Market very firm. Yesterday's prices refused for quantity. Sales only 200 bales.

SILK.—Business continues dull and unsatisfactory; prices, if any change, rather easier.

TOBACCO.—The market has assumed a greater degree of firmness, and for some descriptions holders have obtained an advance of fully ⅛d per lb. There has been more demand, especially for home trade qualities possessing colour; and for exportation some lots of good and fine have been taken at outside quotations.

LEATHER AND HIDES.—The leather trade has continued without alteration since last week. The demand has not been particularly active. At Leadenhall, on Tuesday, there was a fair supply of fresh leather, and a moderate amount of business was done at former prices. The articles most in request are good heavy English butts, extra stout foreign butts, bellies, and calf skins.

METALS.—Under the influence of an easier money market, we have again a slightly improved feeling in metals. Copper is very firm, and even buoyant, at quotations. Iron is unchanged. Tin keeps steady at the enhanced rates, although no very considerable business is doing. Spelter is fairly maintained. Tin plates are unchanged. Lead finds more inquiry.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	9
Fat by ditto	2	6½
Yellow Russian	48	6
Melted stuff	36	0
Rough ditto	20	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market very dull at still lower prices, 74s f.o.b. being the highest price made. We may expect a further decline. Friesland, 112s, with every cask cleared. Fine Waterford butter meets a ready sale at 110s; the quality generally very superior to last season's shipments. York hams are very quick of sale from 96s to 100s.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 16.—The total imports of foreign stock into London, last week, amounted to 14,327 head. In the corresponding period in 1860, we received 12,020; in 1859, 13,828; in 1858, 8,207; in 1857, 8,558; in 1856, 9,399; and in 1855, 10,888 head.

There was a full average supply of foreign stock on offer in to-day's market, in fair condition, and sales progressed steadily at full quotations. The arrivals of beasts fresh up from our own grazing districts, as well as from Ireland, were tolerably good as to number, but somewhat deficient in quality. The primest breeds commanded a steady sale at full prices. Otherwise, the beef trade was in a sluggish state, and in some instances the currencies had a drooping tendency. From Lincolnshire, Leicestershire, and Northamptonshire we received about 3,000 Shorthorns, &c.; from other parts of England 300 various breeds; from Scotland 16 Scots and crosses; and from Ireland 500 oxen and heifers. The show of sheep was moderately good; prime stock was scarce, and in fair request, at full quotations, the best Downs and half-breds having sold at 5s 4d per 8 lbs, but other breeds moved off slowly, at late rates. The lamb season is now over; the few lambs in the market were taken off slowly, at from 5s 4d to 5s 8d per 8 lbs. We were well supplied with calves, in which a fair amount of business was transacted, at full prices, viz., from 3s 6d to 4s 8d per 8 lbs.

SUPPLIES.

	Sept 17, 1860.	Sept 16, 1861.
Beasts	5450	5750
Sheep and lambs	25250	25350
Calves	90	218
Pigs	410	510

THURSDAY, Sept. 19.—Our market to-day was but moderately supplied with beasts; nevertheless, all kinds moved off slowly, at Monday's currency. The top quotation for the best lots was 4s 8d per 8 lbs. Although the show of sheep was by no means extensive, the mutton trade ruled inactive, at late prices. The best Downs and half-breds realised 5s 4d per 8 lbs. Calves, the supply of which was rather limited, moved of slowly, on former terms. There was a good demand for pigs, at very full prices; but milch cows were a dull inquiry.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	4	3	6	Large coarse calves	3	6	4	0
Prime large oxen	3	8	4	2	Prime small ditto	4	2	4	8
Prime Scots, &c.	4	4	4	8	Large hogs	3	10	4	4
Coarse and inferior sheep	3	2	3	4	Small porkers	4	6	4	10
Second quality ditto	3	6	4	0	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	2	4	10	Quarter old store pigs	22	0	30	0

Total supply—Beasts, 892; sheep and lambs, 7,860; calves, 390; pigs, 400.
Foreign supply—Beasts, 280; sheep 1,100; calves, 210.

NEWGATE AND LEADENHALL.

FRIDAY, Sept. 20.—These markets are seasonably well supplied with both town and country-killed meat. On the whole the demand rules steady, but by no means active, at our quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	10	3	2	Middling mutton	3	8	4	2
Middling ditto	3	4	3	6	Prime ditto	4	4	4	6

Prime small ditto	4	0	4	2	Small pork	4	8	5	0
Large Pork	4	0	4	6	Lamb	0	0	0	0
Inferior mutton	3	0	3	6					

HOP MARKET.

BOROUGH, Monday, Sept. 16.—We have a supply of the new growth on offer this morning, a large portion of which has met with a ready sale at the following prices:—Mid and East Kents, 200s, 273s; Weald of Kents, 170s, 200s; Sussex, 155s, 170s. The hops continue to fall short of the estimate, and the duty has further receded to 120,000*l*.

FRIDAY, Sept. 20.—New hops are in fair demand at full prices, but in yearling and old qualities the transactions have been to a very limited extent. Duty, 110,000*l* to 115,000*l*.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 16.—The arrivals of home-grown potatoes continue very moderate, and the trade for all qualities rules firm, at extreme quotations. Shaws are selling at from 85s to 90s, and Regents 95s to 110s per ton.

FRIDAY, Sept. 20.—Very moderate supplies of potatoes continue on sale, for which the demand rules steady at 85s to 90s for Shaws, and at 90s to 110s for Regents.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 5s; clover ditto, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 14s per load. A moderate demand.

CUMBERLAND.—Meadow hay, 2*l* 15s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay 2*l* 10s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 14s per load. A slow trade.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 20.—The demand for low foreign continues very good, and if holders were more yielding in their demands a considerable amount of business would be doing. Public sales of East India will take place in the early part of next month, and the quantity to be brought forward will not fall much short of 20,000 bags.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 20.—Moderate attendance at corn market. Good healthy trade in wheat at extreme rates of Tuesday. Flour in fair request at late rates. Indian corn in good demand at 30s 6d to 31s for mixed. Egyptian beans unaltered. Oats and oatmeal dull.

The Gazette.

TUESDAY, Sept. 17.

BANKRUPTS.

S. Bacon, Northampton place, Old Kent road, corn merchant.
W. Green, Bear lane, Blackfriars road, carman.
C. E. Alforth, Lousdale terrace, Barnes, Surrey, timber dealer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending the 7th of September amounted to 583,775*l*, and for the corresponding week of last year to 589,945*l*, showing a decrease of 6,170*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 272,517*l*, and for the corresponding week of 1860 to 275,723*l*, showing a decrease of 3,206*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 16.—The railway market was dull at the opening, but partially recovered at the official close. After regular hours, however, there were symptoms of renewed heaviness, and most of the leading stocks left off at an average decline of ¼ per cent. Lancashire and Yorkshire was especially flat, and receded nearly 1½ per cent. South-Eastern was lower, on the unfavourable traffic return. There was no movement of importance in colonial descriptions. In the foreign market there was a rise in Bahia, San Paulo, and Lombardo-Venetian, the last price of the latter being 1⅛ to ¾ pm. Southern of France were dull. American securities were rather firmer; Virginia Six per Cents., Erie ordinary and preference shares, and Illinois Central especially showing an advance. Mines were quiet but steady.

TUESDAY, Sept. 17.—The railway market remained without business, and was rather flat at the opening, but recovered later in the day. Compared with yesterday, London and North-Western, Lancashire and York-hire, Great Western, and Eastern Counties showed a fractional advance; while North-Eastern descriptions, South-Eastern, and Sheffield receded ¼ to ⅛ per cent. Colonial railway securities were generally firm, Grand Trunk especially advancing to 19¾ to 20¼; and Great Western of Canada to 9⅛ to ⅝. In foreign descriptions an improvement took place in Bahia, San Paulo, Eastern of France, and Lombardo-Venetian. Nova Scotia bonds were also higher. American securities again showed an upward tendency, particularly United States Five per Cents., Erie preference and ordinary shares, and Illinois Central. Mines have been rather dull; West Caradon, however, and St John del Rey were firmer. In joint stock banks there was another advance in Ottoman, and London, and South African. In miscellaneous descriptions, East and West India Dock stock and Peninsular and Oriental Steam shares were quoted lower.

WEDNESDAY, Sept. 18.—The railway market to-day was very inactive, and scarcely any change took place. South-Eastern advanced ½ per cent., and Great Western and London and North-Western were slightly firmer. The other leading stocks closed the same as yesterday. In the colonial market, Indian guaranteed stocks were rather dull. Grand Trunk of Canada improved to 20 to ⅞, while Great Western shares left off at 9¼ to ⅜. The principal feature in the foreign department was the continued rise in Brazilian descriptions, Bahia and San Paulo being again quoted higher. Lombardo-Venetian were also firm at 1¼ to ⅜ pm. In American securities United States Five per Cents. relapsed. There was little business doing in mines, but prices were steady, and occasionally showed an advance. Joint stock banks closed about the same as yesterday. In miscellaneous descriptions, Great Ship shares, which stood last evening at 7s, receded in the morning to 4s on the announced accident to the Great Eastern, but afterwards rallied to 4s 6d to 5s.

THURSDAY, Sept. 19.— The railway market to-day was dull, notwithstanding the reduction in the value of money, from unfavourable anticipations respecting the future course of trade. Lancashire and Yorkshire was especially affected by the apprehended stagnation in the manufacturing districts. North-Eastern descriptions were also prejudiced by the late falling off in the traffic. Compared with yesterday, Lancashire and Yorkshire receded ⅜ per cent., and London and North-Western, Midland, and South-Eastern ¼. Caledonian, Great Northern, and Eastern Counties, on the other hand, improved. No change of importance occurred in the colonial market. In foreign descriptions there was another rise in Brazilian shares. In American securities, Virginia 6 per Cents. and Erie and Illinois Central shares were lower. Mines were in fair demand, and in several cases showed an improvement.

FRIDAY, Sept. 20.—The railway share market to-day was firm. An improvement of about ¾ per cent. took place in Great Western, London and North-Western, and Midland stocks. Other descriptions present little alteration. Lombardo-Venetian shares receded to 1½ to 1⅝ prem. Pernambuco were firm, at the important rise which took place late yesterday afternoon. Bahia continue in demand. In mining shares, there was rather less activity.

ANGLO-PERUVIAN DEBT.—The Dividends on the Three per Cent. Deferred Bonds, becoming due on the 1st of October next, will be Paid on that, or any following day, by Messrs Antony Gibbs and Sons, between the hours of Eleven and Two.

Lists may be had on application on and after the 20th inst., and the Coupons must be left three clear days for examination.

15 Bishopsgate street within, London,
September 16, 1861.

THE GREAT FIRE.—Destructive Fire at the Jarrow Docks Station, on the North-Eastern Railway.—"Collector's office, Tyne Dock, South Shields, 28th Jan., 1861. Gentlemen,—In reply to your favour of the 25th inst., respecting the state and contents of one of your Safes after the fire at this office on the 31st ult., I have to inform you that it was subjected to a very hot fire for three or four hours, and must at one time have been nearly red hot, as the workmen were not able to touch it for two or three hours after the fire was extinguished. On the Safe being opened, the books and cash were found to be in good condition. The cash boxes contained both notes and cheques, the whole of which were quite safe. I am, gentlemen, yours respectfully, R. THUBRON. Messrs Milner and Son, Phœnix Safe Works, Liverpool, and 47A Moorgate street, City, London." Note.—Another party says, "I have seen the Safe, and it has had a regular roasting. There was a large amount in bank notes and several bags of gold in the drawers, and the principal books above. Everything else in the building was entirely destroyed; nothing left but the bare walls."

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings.

By SAMUEL HARE, F.R.C.S., &c.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

London: John Churchill; and may be had of all booksellers

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 22 and 31 West Strand, London, W.C.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Gorge Piazzas, Liverpool.

PATERSON'S AMERICAN POWDERS, recomended for immediate relief of Indigestion, Sick Headache, Acidity, Heartburn Flatulency, Loss of Appetite, and Nervousness. The above Powders are also made into Lozenges, for the convenience of travellers, or those who may object to Powders. Powders, 4s per box; Lozenges, 2s per box.—Agents, WILCOX and CO., English, French, and German Dispensing Chemists, 336 Oxford street.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German, Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-seventh of this celebrated treatise), with illustrations, engravings, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope twenty stamps, either from the publisher, J. Allen, 20 Warwick lane; or from the author's address, 17 Harley street, Cavendish square, London, where he may be consulted daily.

GLENFIELD PATENT STARCH,
USED in the ROYAL LAUNDRY.
The Ladies are respectfully informed that this Starch is EXCLUSIVELY USED in the ROYAL LAUNDRY, and Her Majesty's Laundress says, that although she has tried Wheaten, Rice, and other Powder Starches, she has found none of them equal to the GLENFIELD, which is the FINEST STARCH SHE EVER USED.

WHEN YOU ASK FOR
GLENFIELD PATENT STARCH,
see that you get it, as inferior kinds are often substituted.
WOTHERSPOON and CO., Glasgow and London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."
Dr GRANVILLE, F.R.S.—"Dr Granville has found Dr de Jough's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."
Dr LANKESTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."
Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jough's Oil in preference to any other, feeling assured that I am recommending a genuine article, and ot a manufactured compound, in which the efficacy of his invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE CONSIGNEES,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

TEETH.—REGISTERED PNEUMATIC VENTILATING PALATE.—Discovery of a new principle in dentistry, and great reduction in price.—Mr LEWIN MOSELY, 30 Berners street, W., established 25 years, offers for inspection Specimens of all the latest inventions in ARTIFICIAL TEETH. His PNEUMATIC VENTILATING PALATE is recognised as the best combination of improvements submitted to the medical profession, supplying all dental deficiencies without extraction of stumps or any painful operation. Sharp edges, wires, springs, ligatures, and all metals, especially avoided, rendering impossible unpleasant secretions and vitiated breath (hitherto causes of general complaint). This Palate may be added to teeth in wear, and defies competition for cheapness and durability. Consultation and every information free. Success guaranteed in all cases by Mr Lewin Mosely, 30 Berners street, Oxford street, W.

TEETH.—No. 9 Lower Grosvenor street, Grosvenor square (removed from 61).—By Her Majesty's Royal Letters Patent.—Newly-invented Application of Chemically-prepared India-rubber in the Construction of Artificial Teeth, Gums, and Palates.—Mr EPHRAIM MOSELY, Surgeon Dentist, 9 Lower Grosvenor street, sole inventor and patentee. A new, original, and invaluable invention, consisting in the adaptation, with the most absolute perfection and success, of CHEMICALLY-PREPARED WHITE and GUM-COLOURED INDIA-RUBBER, as a lining to the gold or bone frame. The extraordinary results of this application may be briefly noted in a few of its most prominent features. All sharp edges are avoided; no springs, wires, or fastenings are required; a greatly increased freedom of suction is supplied; a natural elasticity hitherto wholly unattainable, and a fit, perfected with the most unerring accuracy, are secured: while from the softness and flexibility of the agents employed, the greatest support is given to the adjoining teeth when loose or rendered tender by the absorption of the gums. The acids of the mouth exert no agency on the chemically-prepared india-rubber, and as it is a non-conductor, fluids of any temperature may be retained in the mouth, all unpleasantness of smell and taste being at the same time wholly provided against by the peculiar nature of its preparation.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

TRADE B/P MARK.
BROWN AND POLSON'S
PATENT CORN FLOUR,
In packets 2d, 4d, 8d, and tins 1s, 5s, and 9s 6d.
Considerable extra advantage is allowed upon the sale of articles similar in appearance, to encourage their being recommended in place of Patent Corn Flour, to support which practice unscrupulous announcements are made use of. It is therefore respectfully suggested that Families should observe that no other kinds are substituted for Brown and Polson's, of which the LANCET states (July 24, 1858), "This is superior to anything of the kind known,"—an opinion indisputably confirmed by scientific tests and public appreciation.
BROWN and POLSON, Manufacturers and Purveyors to Her Majesty the Queen: Paisley, Manchester, Dublin, and London.

Under the Patronage of the Governments of Great Britain, Spain, Denmark, Brazil, Russia, &c., &c.
EASTON'S PATENT BOILER FLUID effectually removes and prevents incrustation in steam boilers (land and marine), without injury to the metal, with great saving in fuel, and with less liability to accident from explosion. It is now generally used by the principal steam-packet companies of London, Liverpool, Hull, Southampton; by H.M. steam store-ships, Woolwich Arsenal, by the Honourable Corporation of Trinity House, the War Department, and India Store Department, at Bombay, Calcutta, and Kurrachee, and by engineers and manufacturers throughout the country.
Testimonials from eminent engineers, boiler-makers, millwrights, manufacturers, and steam-boat proprietors, with full particulars, will be forwarded on application to P. S. EASTON and G. SPRINGFIELD, sole manufacturers and patentees, 37, 38, and 39 Wapping wall, London, E.; or of their agents in the principal towns of Great Britain.

HEALTH AND HAPPINESS FOR the NERVOUS and DEBILITATED.—A single copy of a new medical work, written by one of the most eminent medical men of the present day, solely for the guidance and benefit of that class of sufferers who desire a speedy and private cure, with illustrative cases of parties who have been restored to health by following the advice laid down in this work, free on receipt of stamp.—Address to the Secretary, Institute of Anatomy, Birmingham.

EXTRAORDINARY DISCOVERY—NEW THEORY.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
"These lectures contain Dr Marston's experience during Twenty-five Years of Successful Practice, and point out to those who need it Simple yet Effectual means of complete restoration to vigorous health."—MEDICAL JOURNAL.
State the No. of the Lecture required, and enclose 2 Stamps to prepay postage; or the whole Four may be had, neatly bound, 164 pages, octavo, post free, for 6 Stamps.—Address, Treasurer, Royal Institute, 369 Oxford street, London.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.
CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

HOLLOWAY'S PILLS.—The Body's Bulwark.—Nine-tenths of the maladies afflicting adults depend upon a disordered state of the stomach. Holloway's Pills correct the first symptoms of indigestion, by acting healthily on the gastric juice, and wholesomely exciting the liver. They dispel flatulency in incipient indigestion, and overcome the heat, distention, and pain attending more advanced or neglected cases. These Pills invigorate and soon restore the dyspeptic from the great and sudden depression of strength always accompanying stomachic disorders or biliary derangement. They beget cheerfulness, vigour, and happiness. In rectifying disorders of the digestive apparatus, these Pills prove themselves the promptest preventives of disease. They raise a bulwark against all approaching maladies, and preserve freshness, health and life.

CURE OF LIVER COMPLAINT by Dr Hugo's Medical Atoms.—Dear Dr,—My liver (which was pronounced to be entirely and hopelessly diseased, and which made me an invalid for seven years) has been entirely cured by your Medical Atoms, so that I can now walk ten miles any day, while before I could hardly creep about. Pray make my cure public, that others may experience the benefit I have. Yours, WILLIAM BROWN. St Colomb, May 29, 1861.—Dr Hugo's Medical Atoms give immediate relief to all disorders of the head, heart, and stomach. They have no taste of medicine, are small, and may be eaten as sweets. Wholesale agents, Da Silva and Co., Bride lane, Fleet street; and sold by all Druggists, at 1s 1½d, 2s 9d, and 4s 6d per packet.

FRAMPTON'S PILL OF HEALTH,
Price 1s 1½d and 2s 9d per box
This excellent Family Pill is a medicine of long-tried efficacy for purifying the blood, and correcting all disorders of the stomach and bowels. Two or three doses will convince the afflicted of its salutary effects. The stomach will speedily regain its strength; a healthy action of the liver, bowels, and kidneys will rapidly take place; and renewed health will be the quick result of taking this medicine, according to the directions accompanying each box.
Persons of a Full Habit, who are subject to headache, giddiness, drowsiness, and singing in the ears, arising from too great a flow of blood to the head, should never be without them, as many dangerous symptoms will be entirely carried off by their timely use, and for elderly people, where an occasional aperient is required, nothing can be better adapted.
These Pills require no restraint of diet or confinement during their use; and in consequence of the great and increasing demand, the Proprietor has obtained permission from Her Majesty's Commissioners to have the name and address of "Thomas Prout, 229 Strand, London," impressed upon the Government stamp affixed to each box. Sold by all venders of medicine.

KEATING'S PERSIAN INSECT DESTROYING POWDER.
This powder is quite harmless to animal life, but is unrivalled in destroying fleas, bugs, emmets, flies, cockroaches, beetles, gnats, mosquitoes, moths in furs, and every other species of insects in all stages of metamorphosis.
Sportsmen will find this an invaluable remedy for destroying fleas in their dogs, as also ladies for their pet dogs, and sprinkled about the nests of poultry it will be found extremely efficacious in exterminating those insects with which they are usually infested. It is perfectly harmless in its nature, and may be applied without any apprehension as it has no qualities deleterious to animal life.
Sold in packets, 1s, 2s 6d, and 4s 6d each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79 St Paul's churchyard, London, E.C.
Take notice, each genuine packet bears the above name and address.

JOZEAU'S COPAHINE, or SACCHARATED CAPSULES.—Copaiba and Cubebs are, doubtless, the best remedies, but these drugs are of a repulsive taste and odour, and occasion colicky pains, nausea, and gastric disturbance. M. Jozeau has succeeded in rendering these valuable therapeutic agents perfectly innocuous by increasing, in in his Copahine, all the curative properties. This preparation has been adopted by the Paris Academy of Medicine, after more than a thousand trials in Paris and the different London hospitals, viz., St Thomas's, Guy's, and St Bartholomew's, under the care of Messrs Lloyd, Poland, and Legros Clark, LANCET, Nov. 6, and Dec. 10, 1857. The Copahine, which is in form of a pretty pink sugar plum, effects a cure in about six days, either in recent or chronic diseases. 100 capsules, 4s 6d; post free, 5s 2d. Post-office order required; at G. Jozeau's, French Chemist, 49 Haymarket, London; 22 Rue St Quentin, Paris; and all the most important Chemists.

F. G. TRESTRAIL AND CO., 19 AND 20 WALBROOK, LONDON, E.C.
MANUFACTORY—SOUTH LONDON WORKS, LAMBETH.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs. ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

MR WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price, 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

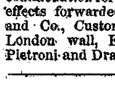
WHITE, MANUFACTURER, 228 Piccadilly, London.

LAMBERT BROTHERS,

Walsall, Staffordshire, (Established 1830,)
Manufacturers of
WROUGHT-IRON WELDED TUBES & FITTINGS,
Chandeliers, High Pressure Steam and Water Valves.
Patent Metallic Bedsteads for exportation.
*** Illustrated catalogues on application.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.



STEAM NAVIGATION OF THE DANUBE.

—The magnificent Steamers of the Imperial and Royal Danube Company, Vienna, are now plying from Linz, to VIENNA, Pesth, Basiasch, GALATZ, CONSTANTINOPLE, ODESSA, &c. East Indian Railway House, Alderman's walk, New Broad street, London, Sept. 16, 1861.

DEBENTURES.—SCINDE RAILWAY COMPANY.—The Directors are prepared to receive applications for Debentures at par, bearing guaranteed interest at five per cent. per annum, for the purposes of the Indus Steam Flotilla.
The Debentures are for five years, and may be renewed for five years at the same rate of interest.
The Debentures may be converted into Indus Steam Flotilla Capital Stock, at the option of the holder.
Full particulars may be obtained at this office.
THOMAS BURNELL, Secretary.
Scinde Railway Company, Gresham House, Old Broad street, August 15, 1861

MADRAS RAILWAY COMPANY.—The Directors are prepared to comply with applications for Debentures at par, in sums of not less than £50 each, bearing interest at 5 per cent. per annum, payment of interest and principal being guaranteed by Her Majesty's Secretary of State for India in Council. The interest is payable by coupon half-yearly at the Union Bank of London. The Debentures are of the two following descriptions:—
1st. For a term of 5 years from the 1st of January last, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of 5 years at the same rate of interest of 5 per cent.
2nd. For a term of 4 or 5 years, and convertible at the option of the holder into capital stock of the Company, bearing 5 per cent. interest, guaranteed by the contract with the East India Company.
Forms of application may be obtained at this office.
JAMES WALKER, Managing Director.
Company's offices, No. 33 New Broad street, London, E.C., April 30, 1861.

THE LANDS IMPROVEMENT COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—
1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.
2. Farm roads, tramways, and railroads for agricultural or farming purposes.
3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.
4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.
Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.
No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.
For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

BRITISH AND FOREIGN INVESTMENT.
Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Bread street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—*Statistics* and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

LOAN OF MONEY.

The Corporation of Dublin, being empowered by "The Dublin Corporation Water Works Act, 1861," to Borrow, on Mortgage, for the purposes therein specified, the sum of £300,000, on the security of the Municipal Rates leviable under said Act, and being desirous of immediately raising a portion of the said sum of such security, will, before the 1st day of October next, receive Written Tenders from all persons willing to advance the same, or any part or parts thereof, for such term or time, and at such rate of interest as may be agreed upon.

To facilitate the sale, transfer, or other disposition of the securities, the Corporation will grant, at the option of the lenders, one or more mortgage or mortgages for the sums to be advanced by them respectively, but no instrument will be issued for any sum under £100 sterling.

For farther particulars as to the nature and value of the security, and the statutable powers and provisions in reference to the same, apply to Alexander Farquhar, Esq., Town Clerk, City Hall.

All tenders to be under cover and seal, and addressed to "The Water Works Committee," City Hall, Dublin.
—By order,
ALEXANDER FARQUHAR, Town Clerk.
City Hall, September, 1861.

WHOLESALE HOUSES,

PROSPECTUS.

This Company is incorporated for the purpose of establishing a colliery, and raising the well-known Silkstone Coal upon the estates of the Dukes of Devonshire and Rutland, at Sheepbridge, in the vicinity of Chesterfield.

The existence of the coal, and the cheap rate at which it can be obtained, as proved by borings and shafts already sunk both in and around the field, entirely remove this undertaking from anything like risk or speculation, and thus afford an opportunity seldom met with for moderate capitalists to invest in one of the most profitable and important productions in the kingdom.

From accurate surveys made by the most eminent mineral engineers, the Directors can with confidence predict that the returns upon the capital will at the very least be 21 per cent., while the facilities for winning the coal are such as to render it almost a certainty that dividends will be paid within twelve months from the commencement of the works.

The coal is the "Silkstone," well known as the best suited for domestic use, and for which the demand, both in the locality of the works, as well as in London, is almost unlimited, and at the highest prices.

The shafts will be sunk in proximity with the Midland Railway, communicating and having extensive sidings therewith, thus enabling the Company to forward the coal by rail from the pit's mouth to any town or port in the country.

The Coal-field comprises about 600 acres, and is estimated to contain nearly four millions of tons of coal. The lease is for a term of 36 years, and held at the very moderate rental of £210 per acre, of which a minimum of about 17 acres per year must be removed; hence the Company has no sums to pay as a bonus for the lease, as is usually the case; and no portion of the capital will be applied to any purpose, save the construction of the works, and the prosecution of the business of the Company.

The lessors have also bound themselves to construct and keep in repair for a moderate sum, the branch line of rail to join the pits with the Midland Railway, and to provide all the requisite sidings thereto; also to convey thither all the Company's coal, at a fixed charge of 6d per ton haulage.

From the reports given by different mineral surveyors, and taking the highest of their estimates, it will be seen that the coal can be raised and put into the railway waggons at a cost of not exceeding 4s 6d per ton (including all royalties, expense of management, and a fair allowance for the redemption of capital expended in opening the colliery). After deducting these from the lowest prices now ruling in the neighbourhood, there is left a clear average profit of 1s per ton, or an annual income of £8,750, being upwards of 22 per cent. on the total capital of £40,000, even should the whole be required.

Although the Directors have fixed the capital nominally at £40,000, it is almost certain that little over two-thirds of that amount will ever be required: hence it is thought probable that the total calls on each share will not exceed £3 10s at most: these will be asked for in 10 shillings per share on application, £1 on allotment, and the remainder in calls of £1 each as required; in no case will the calls be at less intervals than three months.

A considerable amount of the capital being already subscribed, as soon as the Directors think the requisite number of shares applied for, they will commence the works; at the same time, unless at least one-half of the capital be subscribed, all deposits will be returned in full.

The Company being completely registered with limited liability, no shareholder can, under any circumstances, be made responsible for a greater amount than that unpaid upon the shares for which he subscribes. No payment, either in shares or money, will be given to the projectors for promoting the Company.

Application for surveys, reports, prospectuses and forms of application for shares, to be made at the Company's office, 42 Bridge street, Blackfriars, London, E.C.

THE ECONOMIST.—FOR SALE,
A SET from commencement, in 1843, to the present date, in good condition, complete, except the year 1846, —WANTED to purchase, the year 1846.—Address, H.R, care of Mr Sloper, Stationer, 47 Holborn hill.

SHOOTER'S HILL, KENT.
MR WHITTINGHAM IS instructed to Sell by Auction, at the Lord Raglan, Burrage road, Plumstead, on Thursday, October 3, at Five for Six in the evening, in about 80 Lots, valuable FREEHOLD BUILDING LAND, near the Royal Military Academy, Woolwich common, on Herbert road, leading to Woolwich Arsenal and Plumstead, being the first portion of the estate known as the Potteries. Nine-tenths of the purchase money can remain on mortgage or contract at five per cent. interest to be paid by instalments. Plans, with particulars and conditions of sale, may be obtained of the Auctioneer, 14 Moorgate street; of Messrs Russell and Davies, Solicitors, 59 Coleman street, City, E.C.; and at the place of sale.

V.R.
TOWER.—SALE OF STORES.—By order of the Secretary of State for War,—To be SOLD by Public Auction, in the Tower, on MONDAY, the 7th of October, 1861, at ELEVEN o'clock in the forenoon precisely, the following STORES:—
Rags, Woollen, various
Canvas, old
Mattrasses, Cork
Beds, Hair, &c.
Leather, materials for Boots and Shoes
Accoutrements
Boots, Knee and Ankle
Firewood
Old Iron, Steel, and Miscellaneous Articles.
May be viewed at the Tower from 10 to 4 o'clock, the three working days previous to the day of sale, and catalogues may be had at the War Office, Pall Mall; the Tower; and the Royal Arsenal, Woolwich.

GOOD DIVIDENDS.—Messrs DAUNT and COMPANY, of 30 Clement's lane, Lombard street, E.C, have on SALE some Foreign Government BONDS, yielding Eight and Nine per Cent. Interest, payable half-yearly, as punctually as on Consols, and are perfectly secure. Business transacted in the English Funds at 1-16th, Railways at ⅛, and Mines at 1 per cent. A list of safe investments forwarded (gratis) on application. Investors will be cautioned against spurious mines.

LAURIE'S INTEREST TABLES.
New Edition, 800pp. 8vo, price 21s strongly bound, or 26s in calf,
TABLES OF SIMPLE INTEREST for EVERY DAY in the YEAR, at Eight different Rates, from 2½ to 5 per Cent., and from £1 to £100, &c.
By JAMES LAURIE.
"In the great requisites of simplicity of arrangement and comprehensiveness we have seen none better adapted for general use."—M'CULLOCH'S COMMERCIAL DICTIONARY.
"Mr Laurie was well known as one of the most correct and industrious authorities on Commercial Calculations, and the practical value of his various Tables has long been recognised."—TIMES.

LAURIE'S HIGH RATE TABLES.
Third Edition, 8vo, cloth, 7s.
Arthur Hall, Virtue, and Co., 25 Paternoster row.

BRITISH AND FOREIGN INVESTMENT.
Mr THOMAS SPARGO, of 224 and 225 Gresham house, Old Broad street, London, E.C., transacts every description of business in the PURCHASE and SALE of SHARES in BANKS, Canals, Railways, Bridges, Insurances, and all other British and foreign stock. Mr Spargo has for sale shares in English mines paying from 20 to 25 per cent. upon the present price in bi-monthly and quarterly dividends, as also a number of shares in good progressive mines, some of which he specially recommends to the public as sound investments. Mr Spargo gives advice and accurate information as to the position and prospects of all mining undertakings upon application, either personally or by letter, and has published the following works, viz.:—Statistics and Observations upon the Mines of Devon and Cornwall, for 1859, price 2s 6d; ditto for 1860, 2s 6d; Physical, Geological, and Parish Map of Cornwall, 10s 6d; Geological Maps of various Mining Districts of Cornwall, showing Boundary Lines of every Mine, with the lodes, cross-courses, and elvans traversing each, 2s 6d each; and a Relief Model Map of Cornwall, price £5 5s. Dividends received, calls paid, and all orders negotiated on a commission of 2½ per cent.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

12 AND 13 FETTER LANE, LONDON, E.C.

ACCIDENTS OF ALL KINDS, and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

NORWICH UNION FIRE INSURANCE SOCIETY.

Notice.—MICHAELMAS RENEWALS.

Losses by fire occurring during the fifteen days of grace are made good to the assured.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368.

A bonus of three-fifths of the profits periodically made to parties insuring, who have thus from time to time received sums amounting in the aggregate to £400,000.

A further sum is applicable for a bonus upon policies renewed in 1861.

The rates of premium are in no case higher than those charged by the other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, New Bridge street, Blackfriars, E.C.

THE COMMERCIAL UNION FIRE ASSURANCE COMPANY.

Temporary Offices—34 Gracechurch street, E.C.

Capital, £2,500,000, in 50,000 Shares of £50 each, with power to increase to £5,000,000.

DIRECTORS.

Henry Wm. Peek, Esq., (Peek Brothers and Co.), Chairman.
Henry Trower, Esq. (Trowers and Lawson), Deputy Chairman.
Jeremiah Colman, Esq. (J. and J. Colman).
Charles Curling, Esq. (Charles Curling and Co.)
Edwin Fox, Esq. (Halliday, Fox, and Co.).
Henry Ghinn, Esq. (late of Victoria), 39 Euston square.
Nehemiah Griffiths, Esq. (N. Griffiths, Tate, & Fisher).

Mr Sheriff Lusk (A. Lusk and Co.).
Joseph Underwood, Esq. (Hills and Underwood).
John Robert Thomson, Jun., Esq. (R. J. Thomson & Co).
John Kemp Welch, Esq. (Orlando Jones and Co.)

MANAGER—Henry Thomson, Esq.

AUDITORS—William Barton Ford, Esq.; Alexander Sim, Esq.; John Pasman Tate, Esq.

BANKERS—The London and County Bank.

SOLICITORS—Messrs Marten, Thomas, and Hollams, Mincing lane.

The Directors are prepared, on and after Saturday next, the 28th inst., to accept proposals for Fire Insurance on all descriptions of property.

The Tariff for London Mercantile Business has been adjusted on the principle of classification, thus adopting the plan that each class of goods should be charged a premium proportionate to the risk.

The Directors, in deciding upon this tariff, have endeavoured faithfully to fulfil the wishes of the mercantile community expressed at the influential meeting held at the Mansion House on the 25th July last, and trust that they will receive such support as will enable them to carry out the system of rating on classification of goods.

The Directors will, at the expiration of five years, return to Insurers a per centage of profits on the premiums paid.

Ordinary Insurances taken at the usual rates.

Forms of proposal and all information can be obtained at the temporary offices of the Company, 34 Gracechurch street, E.C.

27th September, 1861.

ANNUITIES.

NATIONAL ASSURANCE AND INVESTMENT ASSOCIATION.

3 Pall Mall East, London.

Empowered by Special Act of Parliament, 17 Vic. cap. 43.

Established A.D. 1844.

IMMEDIATE ANNUITIES granted on very favourable terms.

The Tables for Reversionary and Deferred Annuities are particularly deserving of attention, whether regarded as a means of providing for a particular individual, or as a resource against the casualties of age and the uncertainties of health and fortune.

PETER MORRISON, Managing Director.

Prospectuses sent free on application.

LONDON LIFE ASSOCIATION,

81 King William street, E.C. Instituted 1806.

PRESIDENT—Charles Franks, Esq.

VICE-PRESIDENT—John Benjamin Heath, Esq.

TRUSTEES.

Francis H. Mitchell, Esq. | Robert Hanbury, Esq.
Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 73⅓ per cent., whereby each £10 of annual premium will be reduced to £2 13s.

This Society has paid in claims more than £4,150,000.

And has policies now in force amounting to £6,450,000.

For the payment of which it possesses a capital exceeding £2,750,000.

And a gross income from premiums and interest of more than £340,000.

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents, and allows no commission; nevertheless the new assurances effected in the last financial year amounted to £287,240, and the new annual premiums to £10,567.

EDWARD DOCKER, Sec.

Notice.—The usual fifteen days allowed for payment of Fire Premiums falling due at Michaelmas will expire on 14th October.

Fire and Life Assurances may be effected with this Corporation on advantageous terms.

In the Life Department, assurances are granted with participation in Profits, or, at lower Premiums, without such participation.

The Reversionary Bonus on British Policies has averaged nearly 2 per cent. per annum on the sum assured.

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The divisions of Profit take place every Five years.

Any sum not exceeding £15,000 may be insured on one Life.

This Corporation affords to the Assured

Liberal participation in Profits,—with exemption from the liabilities of partnership.

A rate of Bonus equal to the average returns of Mutual Societies,—with the guarantee of a large invested Capital Stock.

The advantages of modern practice,—with the security of an Office whose resources have been tested by the experience of nearly A CENTURY AND A HALF.

The Corporation have always allowed the Assured to serve in the Militia, Yeomanry, or Volunteer Corps, within the United Kingdom, free of charge.

ROYAL EXCHANGE, LONDON.
ROBERT P. STEELE, Secretary.

ONE THOUSAND TO £5,000.—BREWERY.—Wanted, by the most rising brewery in London, no partnership, but full security on the leases, and guarantee of the firm, with interest at five per cent., together with a bonus per barrel realising a good income.—Apply by letter to A. B. C., care of Messrs Ash and Flint, printers, Wellington street, Borough.

PARTNERSHIP.—Mr H. SALTER has numerous Clients with capital at command from £500 to £20,000, who are Desirous of Commercial Partnerships. Established firms of good standing and sound position will always save much unnecessary trouble and expense by communicating with him.—17 Abchurch lane, E.C.

PARTNER WANTED—A Provincial House engaged in a Manufacturing Business have an opening for a Partner, active or otherwise, with £20,000 or £30,000, to take the place of a retiring member of the firm. The business, which has been established for many years, can be shown to be safe and remunerative. Any application must be accompanied by a reference to a Banker or Solicitor.—Apply to Ashurst, Son, and Morris, Solicitors, 6 Old Jewry, E.C.

TO CAPITALISTS.—A Mercantile Firm in the City, wishing to increase their capital, would be glad to meet with a party commanding about Ten Thousand Pounds. All most satisfactory explanations will be given in reference to the concern, and, if required, they will also be open to treat in case the party would prefer to become a partner in the firm.—Address Y. Z., care Messrs Waterlow and Son, 65 to 68 London wall.

TO CAPITALISTS.—A lucrative Mercantile Business of 20 years' standing, annual returns averaging upwards of half a million, is to be Disposed of under peculiar circumstances. No stock or book debts to be taken, but a considerable capital is necessary, and a suitable premium will be required, the payment of which may be deferred conditionally.—Principals only to address "Mercator," care of Messrs Hammond and Nephew, 27 Lombard street, E.C.

NOTICE TO INVENTORS.—Office for Patents, 4 Trafalgar square, Charing cross.—Printed instructions (gratis) as to the cost of Patents for Great Britain or foreign countries. Advice and assistance in disposing of or working inventions. Branch offices and agencies in every continental state and in America. Established 20 years. Full information as to expired or existing patents at home or abroad.—Apply personally or by letter to Messrs Prince and Co., Patent Office, 4 Trafalgar square, Charing cross, W.C.

WHOLESALE HOUSES.—Merchants, Shippers, &c., requiring Bookkeepers, Travellers, Clerks, Warehousemen, or other Assistants, can have the same forwarded for approval (without charge) by addressing a letter, stating their want, to Smith, Barry, and Co., 12 Bucklersbury, sole proprietors of the "Employers' Assistant," which always contains particulars of very eligible parties seeking employment of time and capital. S., B., and Co., do not in any way interfere with or make themselves responsible for the characters of applicants. Those seeking employment can obtain prospectuses with full particulars on application at 12 and 13 Bucklersbury.

The Political Economist.

As the American crisis is so very important to the commercial interests of this country, we have made arrangements for a Series of Letters from a Gentleman of great intelligence, practically acquainted with the Cotton Trade, who is now on his voyage to America to learn, as far as possible, the real facts from personal observation.

ENGLISH FEELING TOWARDS AMERICA.

Though we persist in and reiterate our denial of the charge, liberally made on both sides of the water, of unfriendly feeling towards the United States and discreditable selfishness in the English views of the present civil conflict in America, we fully admit that those views and that feeling require careful watching and distinct analysis and explanation. We believe we may safely affirm that, hitherto at least, neither the British Government nor the British people nor British journalists have done or said anything to warrant the accusation that they have embraced the cause of the South or are actuated by any hostile sentiments towards the North, —still less that, in their estimate of the matter at issue between the two sections and their expressed opinions as to the result, they have allowed selfish interests to outweigh moral considerations. At the same time we are fully aware that an unfavourable interpretation may, by unfriendly critics, be placed upon much that is said and felt—an interpretation which, though we cannot admit it to be just, is yet by no means unnatural. The failures and shortcomings of the Federalists have no doubt been freely and provokingly commented upon; the boasts and insults of several of their newspapers and of some of their politicians in reference to Great Britain may have been sharply and contemptuously answered; and the improbability of final success in the enterprise they have taken in hand may have been boldly and perhaps coarsely predicted. No great care has been taken, we admit, to spare sensitive tempers or to soothe irritated minds; and this is to be regretted. But in this respect we can only plead that the example set us has been very bad, and that we have only followed it partially and at a distance.

On one point, however, we frankly avow that the Northerners have a right to complain; and on one point also we are bound to be more upon our guard than perhaps we have uniformly been. Our leading journals have been too ready to quote and to resent as embodying the sentiments and representing the position of the United States, newspapers notorious at all times for their disreputable character and feeble influence, and now more than suspected of being Secessionists at heart, of sailing under false colours, and professing extreme Northern opinions while writing in the interests and probably in the pay of the South. Few Englishmen can, for example with any decent fairness pretend to regard the *New York Herald* as representing either the character or the views of the Northern section of the Republic. Again: we ought to be very careful lest our just criticisms on the Unionists should degenerate by insensible gradation into approval and defence of the Secessionists. The tendency in all ordinary minds to *partisanship* is very strong; most men feel an irresistible though unconscious tendency to side with one party or other in a dispute; and when we are obliged to blame one side strongly, we are very apt to extenuate the faults and embrace the views of the other. Now, however warmly we may resent much of the conduct and language of the North; however we may feel satisfied that the prosecution of the war is on their side a blunder, and must issue in certain loss and in probable disaster; however inclined we may be to laugh at their mismanagement, and to look with some complacency on the mortifying and deplorable fulfilment of our own predictions, —we must never forget that the Secession of the South was forced on with designs and inaugurated with proceedings which have our heartiest and most rooted disapprobation. We, of course, must condemn the Protective Tariff of the Union as an oppressive and benighted folly—silly and suicidal in itself, iniquitous towards the West, and hostile as regards ourselves. Of course we reciprocate the wish of the South for low duties and unfettered trade. Of course we are anxious that the prosperity of States which produce so much raw material and need so many manufactured goods should suffer no interruption or reverse. Most of us are of opinion also, that they were entitled to secede, if so it seemed good to them; and that the claim of ten millions of Republicans to frame their own Unions and to select their own fellow-citizens could not logically be resisted by brother Republicans, though numbering twenty millions. We saw, therefore, no reason why they should be hindered from seceding if they chose, and we saw some reason why we should be glad if their secession was successful.

But, at the same time, it is impossible for us to lose sight of the indisputable fact that the real aim and ultimate motive of Secession was—*not* to defend their right to hold slaves on their own territories (which the Northerners were just as ready to concede as they to claim)—but to extend Slavery over a vast undefined district, hitherto free from that curse, but into which the planters fancied they might hereafter wish to spread. This object we have always regarded as unwise, unrighteous, and abhorrent. The state of society induced in the Southern States by the institution of domestic servitude, appears to English minds more and more detestable and deplorable the more they know of it. And the Southerners should be made aware that no pecuniary or commercial advantage which this country might be supposed to derive from the extended cultivation of the virgin soils of the Planting States and the new territories which they claim, will ever in the slightest degree modify our views on these points,

or interfere with the expression of these views, or warp or hamper our action whenever action shall become obligatory or fitting. So far as we sympathise with them in the present conflict rather than with their antagonists (which is only to a very partial extent), it is not that we regard Slavery or Slave extension with one whit less disfavour than the strongest Abolitionists of the North; but that we do not consider the "domestic institution" as lying at the bottom or directly involved in the issue of the strife,—since, if Secession had been averted, it would have been averted only by the most solemn confirmation of that institution by the people and Government of the Federation, and if the Union were now to be restored, it would be restored, we well know, only on the basis of such a solemn confirmation. We sympathise with the South (so far as we sympathise with it all), not because we are slaves to our necessity for cotton, or because we fear that emancipation would ultimately cut off the supply, — but because we think that, politically, the Southern States had a right to leave the Federation without hindrance and without coercion; because their behaviour towards England has been more decent and courteous than that of their antagonists; and because they were desirous to admit our goods at 10 per cent. duty, while their enemies imposed 40 per cent. But, if our relations with the Southern Confederacy when its independence is established, are to be comfortable, amicable, and enduring, it is to the last degree important that they should from the outset be based upon the clearest understanding of our feelings and our principles. We, therefore, pray them to believe that Slavery, so long as it exists, must always create more or less of a moral barrier between us,—and that even tacit approval is as far from our thoughts as the impertinence of open interference;—that Lancashire is not England, and, for the honour and spirit of our manufacturing population be it said also, that even if it were, "Cotton would NOT be King." There are other sources of supply besides the Negro plantations of America; but even were there none, our sentiments in reference to Slavery would undergo no change. England and Lancashire are ready to purchase cotton, if need be, at a cost of a shilling a lb,—but never at the cost of one iota of consistency or principle.

And now we must add a few words in answer to the charge of *selfishness* so thoughtlessly brought against the views and sentiments entertained by England in reference to the American crisis. We admit that we do regard the disruption of the Union as a matter rather for rejoicing than for regret; and we maintain that we do this without laying ourselves open to the just imputation of any one mean, narrow, or ungenerous feeling. We avow the sentiment, and we are prepared to justify it as at once natural, statesmanlike, and righteous. If, indeed, the choice lay—as some of our contemporaries both here and there so unwarrantably assume—between the preservation of the Union and the perpetuation of Slavery; if "Union" meant Negro emancipation as surely as "Secession" means Negro servitude,—then, indeed, we should be called upon to take a very different view of the subject. But since we have had every reason to see, and since any one is scarcely daring enough to deny, that if the Union had been preserved, it would have been preserved on terms which would have sanctioned and riveted that perilous and wicked institution, and that if it is now restored, it will be restored on condition of the most solemn guarantee which can be given to the sacredness and inviolability of that institution;—since, moreover, the dissolution of the Union means the confinement of Slavery within the limits of the Seceding portion, and the liberation of the Northern States with their preponderant wealth and population from the guilt and the complication and the impolitic and immoral exigencies of that abominable system;—and since, finally, we see in the vigilant and jealous antagonism of the Free and exonerated North, and in the establishment of a strong and anti-African Government in Mexico (which we earnestly hope for and begin dimly to discern as a reasonable probability), an immeasurably better prospect for the immediate compression and ultimate extinction of Negro Slavery than any which could be offered by a continued connection with the time-serving politicians of the old Republic,—on all these grounds we entirely repudiate and cast aside the false colour which it has been attempted to fix upon the contest. And having done this, we do not see why we should hesitate to declare our belief that the dissolution of the Union will prove a good to the world, to Great Britain, and probably in the end to America herself. The great Republic of the West had grown in population, in prosperity, and in power at a rate and in a way which was not well either for her neighbours or herself. Her course had been so triumphant, so unparalleled, so free from difficulties, so unchequered by disaster or reverse, that the national sense and the national morality had both suffered in the process. A boundless territory, an exhaustless soil, a commerce almost unequalled, mineral wealth quite unfathomed and apparently unlimited, a people rapidly increasing in numbers and endowed with most of those qualities which ensure empire and predominance to their possessors,—had fairly, and not unnaturally, turned the heads of the whole nation. They believed that no other nation could stand up against them, that none had a claim to interfere with them or thwart them, that the rest of the world had no rights which could for a moment be suffered to stand in the way of their interests or their designs. They were so rough, so encroaching, and so overbearing, that all other Governments felt as if some new associate, untrained to the amenities of civilised life, and insensible alike to the demands of justice and of courtesy, had forced its way into the areopagus of nations;—yet at the same time they were so reckless and so indisputably powerful, that nearly every one was disposed to bear with them and defer to them, rather than oppose a democracy so ready to quarrel and so capable of combat. The result was, as might be expected, an increase of arrogance and a stretch of pretensions which made it clear that, sooner or later, all who did not wish to be habitually trampled on and insulted must prepare to fight. At the same time, it became painfully obvious that this very unrebuked exercise of increasing power was demoralising the inmost nature of the people, blinding their eyes alike to what was just in their relations to others and to what was worthy and noble in the true objects of national ambition. This being —and who can gainsay it?—with what colour or consistency of reason can we be charged with selfishness or want of generosity, because we rejoice that an excess of power which was menacing to others and noxious to themselves has been curtailed and curbed; that we are spared the painful alternative of ceaseless squabbles and ceaseless endurances or of a desperate and decisive conflict; that pride which was fast becoming a disease has met with a salutary check; that the weak places and the radical faults in those democratic institutions which they were accustomed to worship with a blind idolatry have been laid bare in time; and that in future they will have to share the common lot of European nations, and to develop their resources and pursue their progress under the wholesome restraints of powerful neighbours and rival forms of polity? We rejoice that they are weakened, not because we derive gratification from their mortification or desire to take advantage of their misfortunes, but because they both over-estimated and abused their strength, and because this over-estimate and this abuse were bad for them as well as disturbing to us; and our sentiments have in them no alloy for which we need to blush; for if originally prompted by a paramount consideration for the welfare of England, they are perfectly in unison with the most Christian and amicable feelings towards America.

If, indeed, there were any rational ground for the apprehension which some appear to entertain, that with the dissolution of the Union, the real greatness and prosperity of America are at an end,—that the several States will separate and split into so many independent and insignificant Republics, without union and without power, jealous, quarrelsome, and mutually destructive, like the feeble and anarchic Provinces of the Southern Continent,—then there would be reason for reconsidering our views. But we do not do the Northerners the discredit to fear so ignominious a termination to their dreams of honourable grandeur. We believe that Anglo-Saxon sense and Anglo-Saxon principles will preserve them from the fate of Mexican and Spanish impulsiveness and imbecility. We are confident that, as soon as the danger shall become apparent and imminent, measures will be taken to avert it; and that the very self-control, mutual forbearance, reciprocal consideration, and fair terms of arrangement and of compromise, which the perilous crisis will necessitate and call forth, will afford the best conceivable discipline for the

American character, and will cultivate political and moral excellences which had no chance for growth so long as they had a whole world to bully and a whole continent to overrun. Even if the vast territory belonging to the old Republic, and stretching from Canada to Mexico, were to be severed into four independent States, each of them might be wider in extent, richer in resources, and ultimately more populous and powerful, than the mightiest Monarchies of Europe.

THE INCONSISTENCY BETWEEN THE FACTS OF THE INCOME TAX AND THE THEORIES OF ITS DEFENDERS.

If any competent person will carefully consider the arguments which Mr Lowe and the other defenders of an unadjusted income tax advance in its behalf, he will soon perceive that they are defending not the real tax which does exist, but a hypothetical tax which might exist. They concede, for example, that unquestionably a temporary and precarious income is less valuable than a certain and perpetual income—unquestionably it ought to pay a less tax; but they allege that it already pays a less tax. A temporary income pays only while it lasts; a perpetual income pays for ever. Already that which should pay more pays more, and that which should pay less pays less. And if the income tax were a tax of unvarying amount, enacted on constitutional principle as an undiscussed impost year after year, this argument, though it would not settle the entire question, would be entitled to its due weight as far as it went. But, as we know to our cost, the income tax, so far from being the unvarying element in our taxation, is most variable; so far from being the least discussed element in the national budget, it is the most discussed. The one question which is asked more than any other for the week before the Chancellor of the Exchequer makes his annual statement is: "What will the "income tax be next year?" Half the long speeches on finance in the House of Commons, or more than half, resolve themselves into this:—"Ought the Chancellor to have put 'that penny' "on, or might he not have taken another penny off?" Mr Lowe and others may be able to prove to their own satisfaction that an equal income tax of constant amount and perpetual duration is a just impost;—but of what use is this speculative proposition in defence of a tax which is varied every year; which is discussed as a matter of principle every year; which half the financiers in England hope or have hoped to remit; which, wisely or unwisely, would be remitted if the national expenditure were reduced to what it was only a very few years since? A terminable annuitant who contrasts himself with the owner of a perpetuity is comforted by the remark, that the owner of a perpetuity will go on paying when he himself, by the cessation of his annuity, is released both of his income and his tax. What, then, will be his feelings if the tax is taken off just when his income ceases, while during the continuance of his annuity, the rate has in one year been sixpence and in others sixteenpence?

Again, it is said that persons in trade have the power of shifting the burden of the income tax on to the consumer; for that is the meaning of the term self-adjustment as it is used in these discussions. We do not believe that they can for reasons which we are about to give; but, even supposing that they were able, the process would take a long time. All such shiftings require a considerable interval: the habits of men are used to one state of things, and they are not easily accommodated to a different state of things. As a rule, all persons in trade or in a profession charge as much as they can for their goods and their services. The price of commodities and the price of labour, mental and bodily,—the two elements into which all industrial bargains are ultimately resolvable,—are determined by the existing competition, and they cannot be augmented while that competition is undiminished. As no one (except in rare cases) voluntarily abandoned an obtainable profit in business before the income tax was imposed, no one has any mode of augmenting his income when that tax is remitted. If the competition in any branch of business diminish, its charges may be augmented; but how long is the period requisite to diminish competition? What number of years is sufficient for effecting this in an old industrial country like England, where all pursuits are thronged, and where crowds of new candidates are starting every day? Who can imagine that a change of the income tax from 6d to 9d in the pound would have the slightest effect in diminishing mercantile or professional competition of any kind? And yet the addition of 50 per cent. to that tax is to the industrial classes a formidable burden.

The notion, however, that the trading classes can shift the burden of the income tax to the consumer is (in all but very exceptional cases) an error. The income tax presses equally on all trades and all professions. It gives, therefore, no motive to enter one rather than another, to abandon one rather than another. There remain, after the imposition of the tax, the same amount of money and the same number of persons as before to distribute among the various trades and professions; the competition on the whole is no greater and no less; and the industrial classes in general cannot, therefore, transfer the burden of the income tax to the idle classes. Our present purpose is not, however, with this general principle which would be applicable to every possible income tax, but with the particular allegations put forward in defence of this particular tax which we pay. It is idle to say that a general principle of self-adjustment, which is a latent cause silently affecting all trades and all employments, can have time to operate instantaneously either on the sudden increase or the sudden diminution by one-half of the present fluctuating income tax in a particular year.

Again, Mr Lowe says it is unfair to exempt annual savings from annual taxation. But the present income tax does so. It permits the payer to deduct the premiums paid for a life insurance up to one-sixth of the payer's income. If Mr Lowe were right, this concession to the claims of the industrial classes ought to be repealed. Yet no one would bring forward such a proposal. The claims of the industrial classes have at least this mark of validity in their favour, that every instalment of them which is conceded, is conceded for ever. The good sense of mankind so ratifies them when they have once been brought home to our practical life, that no attempt is ever made to withdraw them again. No practical statesman would hazard the proposal: he would regard it not only as a manifest injustice, but also a gratuitous blunder.

Again, the theoretical defenders of the present income tax will tolerate no other distinction between the different classes of society except that based on the amount of their income. They say every man of 200*l* a year ought to pay the same tax whatever are his circumstances, his opportunities, his means, or his position. No matter that different men of this nominal income—say a clerk in ill-health who will not be able to earn two years' more income and fears he may not last one year, and a freeholder whose acres are as firm and as well protected as those of the largest proprietor—are really and for all other pecuniary purposes in a very different position; no matter that they have less to spend, less to consume, less to enjoy: these consecutive thinkers look merely to the figures. But then they should adhere to the figures. Every argument which tends to prove that every man of 200*l* a year ought to pay as much as every other man, goes also to show that every man of 200*l* ought to pay twice as much as a man of 100*l*. If we once leave the arithmetical test, and begin to inquire into the accompanying circumstances in one case, it becomes a matter of detail,—a question of management and consideration whether we should not do so in another. The ground on which a man of 100*l* a year does *not* pay at present half as much as a man of 200*l*, is that presumably he is not half as well able to bear taxation. On looking into the matter, we have discovered that the pecuniary criterion is insufficient in one case, and works great injustice in that case. We have, consequently, in that instance abandoned the purely arithmetical mode of imposition, and, therefore, we can no longer wisely or even logically shut our eyes to the peculiar hardships of every other case.

The explanation of the great contrast between the theories upon which the unadjusted income tax is defended and the facts of that tax itself is very simple. Nothing is more common than for persons who are more logical than their

neighbours to get hold of some theory which they consistently expand into conclusions that the common sense of their neighbours will not accept. Very few persons are able in these cases to indicate where the fundamental flaw—the precise defect—in the argument lies; but almost every one in a vague, general way feels that the entire argument is unsound and unsatisfactory. Accordingly, small fragments of the theory,—usually those which are easiest to alter and which are most conspicuously unjust in practice,—are abandoned; and side by side with a rigid and logical theory we have an illogical and mitigated law. The practical step next to be taken is very plain. It is not possible ever to return to the old rigid theory. The omnipotent judgment of mankind has given up that and will not return to it: we must accept the consequence,—we must investigate in all cases what true justice really requires, and then be just, as far as the inevitable difficulties of practice and the incurable defect of administrative machinery will admit us.

SIR E. B. LYTTON ON ENGLISH FOREIGN POLICY.

Sir E. B. Lytton has made a very eloquent and, what is better, a very sensible speech at Hitchin on English Foreign Policy. But it brings before us very strongly the fact that the *natural* foreign policy of England is a policy which is really grateful only to one of the two great parties in the State. The Tories, now that it has become clearly impossible for England to aid the despotic cause abroad, are quite at a loss for a foreign policy. They feel, what Sir E. B. Lytton so frankly avows, that it is England's duty and interest to promote the cause of constitutional government on the Continent, so far as her moral influence will aid it,—and yet they cannot find it in their heart to do so with any zeal. Sir E. B. Lytton speaks very well, but he does not speak like a Conservative. He says:—"It is for the interest of England that Italy should enter into the great community of constitutional nations. Foreigners misunderstand the foreign policy of England. I will endeavour to explain what it is. England is a free nation, and its statesmen must consult popular opinion; the popular opinion of a free State goes with the free. England is a commercial and a manufacturing nation. It is the interest of England that good government, with the elements of progressive prosperity, should be established everywhere, because it is only in good governments that the interchange of her commerce is secure, and in proportion as the foreigner prospers, the probability is that he will widen the market for our English manufactures. We have no interest in tyrannies, where all progress is arrested. We have no interest in revolutions, where all property is insecure. But we have an interest in the rise and prosperity of every people who adopt that temperate form of constitutional freedom which our own experience has proved to be the best for the development of human energies; and, if to that good feeling we must seek a selfish motive, it is because every people so rising would naturally become our ally through the sympathy of freedom, and our customers through that commercial prosperity which is the usual result of political freedom. In these few words, if foreigners would condescend to reflect, they will find the true key to the foreign policy of England." This is most true, but it is a little mortifying to the Conservatives. Their hereditary policy has always been to be jealous of any change,—and to sympathise rather with the despotic monarchies than with the revolutionary tendencies of Europe. Such a policy naturally belongs to the tactics of the party. They profess to stand by all that is established,—to oppose a considerable resistance to change; and they have generally acted up to their profession. It was their party which helped to construct the treaties of 1815, which parcelled out nearly all Europe among a few despotic Princes, and to these treaties they have always adhered with a jealous fondness. Lord Malmesbury fought as long as he could for the treaties of 1815 while he remained in office. And Lord Derby and Mr. Disraeli have done little but lament over them since the Italian war rent them in pieces. It would, therefore, be exceedingly difficult for the Tory leaders to accept their colleagues' large views as to the duties and interests of England. If they once accept a principle which implies that they are to give hearty support to the cause of constitutional reform abroad, what would not be the result to their home policy? They may be carried into aiding the attainment of much for other nations which they resist for their own. They may be, like the Emperor of the French, accused of winning for others a liberty which they deny to their own countrymen. For constitutionalism in Italy or Hungary is not constitutionalism in England;—and you cannot help them to secure it on condition they ask for no more than is found sufficient in England.

The difficulty the Conservatives feel in accepting a genuinely liberal foreign policy is therefore very great. At the same time the return to a genuinely Tory foreign policy is absolutely impossible. The English nation knows too well with whom they cordially sympathise abroad to permit it for a moment,—even if the chiefs wished it, which very probably they do not. The only alternative left, therefore, is between more or less absolute neutrality. The Liberals see changes occurring which they are glad to see. The consequence is, that they support them heartily so far as they intervene at all. The Conservatives, on the other hand, see changes occurring which they distrust, if they do not dread. But they know that the feeling of Englishmen will not permit of any actual resistance, and the result is that they stand by,—speaking, when at all, with languid dislike and solemn warnings. As a consequence, we believe it to be really true that a Tory Government would carry out the policy of *isolation* more completely at the present moment than at any other. It would like to support Austria,—and now that Austria is becoming constitutional, it might take a cautious step or two in that direction. But it would feel no inclination to aid with cordial help the Governments which the English people would most wish to aid,—and, as a consequence, it would do as little as it could. There is no possible English foreign policy which the Tories could feel was in consonance with all their traditions,—and knowing this, they would have a much more colourless and isolated foreign policy than the Liberals. Something of this difference we have already seen in the policy of the present and the last Administration towards Italy. Lord Malmesbury was heart and soul with the treaties of 1815. He *wished* earnestly to see them inviolable. He dreaded to see Austria deprived of Lombardo-Venetia. He distrusted France,—he disliked Sardinia. But none of these tendencies could,—as English opinion then stood,—be expressed in any but very guarded words. Accordingly, his policy consisted in an energetic effort to protect the *status quo*, and the expression of disgust at his failure. On the other hand, when Lord Russell took the Foreign Office, he found himself in general sympathy with the train of forces then tending to liberate Italy, and he gave those forces all the support of English sympathy and approbation. The consequence was, that England, who, under Lord Malmesbury, had been all but detested in Italy for her selfish and cold isolation,—under Lord Russell has become at least as popular as France herself. And it is, therefore, we feel sure, most important for Europe during the present crisis of renovating tendencies, that a Government should remain in power which can and will show its hearty sympathy with these tendencies. A Tory Government, with a Foreign Secretary as generous in his sympathies as Sir E. B. Lytton, would do very well. But such a Government could never command the support of the Country party, which looks with considerable jealousy on political freedom in every country but our own. Lord Ellenborough and Sir E. B. Lytton would be more at home in defending the foreign policy of the Whigs, than in eulogising one which their own party are by no means likely ever heartily to adopt.

THE FINANCES OF TURKEY.

For the first time it is now possible to give some adequate conception of the financial position of the Turkish Empire. It is still not very easy, for during many years ample resources have been dealt with in a manner so profligate and shameless that a perplexing disorder has necessarily accumulated; but Sir Henry Bulwer, our present Ambassador at Constantinople, has devoted great pains and great ability to the investigation of the subject, and, in consequence of his

efforts, some approximation to the truth may perhaps, without excessive difficulty, be attained.

Sir Henry Bulwer has procured for us a balance-sheet of the Finances of the Empire, which we give at length below. In brief it is as follows:—

REVENUE.	£
Direct taxes	3,067,146
Indirect taxes	7,500,604
Produce of State property and public establishments	305,779
Fixed receipts	427,631
Miscellaneous	142,741
Total	11,443,901

And on the other side of the account:—

EXPENDITURE.	£
Interest on debt	2,049,153
Expenses connected with religion	459,189
Civil list	1,393,123
Pensions	282,078
General services	9,222,501
	13,406,044
Deduct:—	
Measures of economy which have been ORDERED—	
Civil list £391,722	
Reductions in general services 1,269,120	
	1,660,842
Total expenditure	11,745,202

And the general result is:—

Expenditure	11,745,202
Revenue	11,443,901
Deficit	301,301

which is not a hopeless state of things, but when the connected circumstances are considered, very much the contrary.

Sir Henry Bulwer estimates that under proper management the revenue might be increased a third, and the expenses lessened a third; and though this is obviously a vague estimate, the evidence collected in the recent correspondence goes far to show that it is not a very extravagant one. If both these reforms could be effected, the balance-sheet would stand:—

	£
Revenue	15,258,534
Expenditure	7,830,135
Surplus	7,428,399

—a *more* happy financial position than any other State in Europe can at present exhibit, and which affords opportunities for an almost indefinite series of beneficial reductions in taxation.

Unfortunately, there is a reverse side to the picture. These ample resources have been anticipated, and under a management at all like the past, it is not likely that any approximation to this flattering prospect will be realised. A certain vagueness is, indeed, indicated by a certain portion of the foregoing account. Credit is taken for hypothetical economies:—

	£
In the civil list	391,722
In the general services	1,269,120
	1,660,842

—a large amount to save in a single year, and demanding great administrative skill, great ability, and indomitable will, ever to save it in practice as well as on paper. But this patent uncertainty in the published statement is not the worst. As usual, the more critical difficulties are latent. The revenues above calculated have been forestalled, and the mode in which this has happened indicates a system of financial administration which will effectually preclude all financial prosperity, whatever may be the resources of the country, so long as it continues.

The revenues are in the hands of the State creditors. Money has been urgently required for the public service, and, as it could not otherwise be obtained, the public income has been mortgaged. Every year the same difficulty has recurred, and every year the mortgage has grown greater. A great deal of ready money,—"equal," Sir Henry Bulwer says, "to several millions, if not a year's revenue,"— must be obtained before the regular revenues of the country can be in the hands of the Government; and, unfortunately, ready money is the very thing which the Turkish Government never has—the very thing from want of which they have fallen into the present difficulties.

It seems indeed hard that Turkey should want ready money. The present burdens are trifling. We have now an official account of them, which is as follows:—

	£	£
Domestic debt		18,312,000
Foreign debt:—		
Loan of 1854, at 6 per cent.	3,000,000	
Loan of 1855, guaranteed by France and England, at 4 per cent.	5,000,000	
Loan of 1858, at 6 per cent.	5,000,000	
Loan of 1860, in France, through M. Mirès, at 6 per cent.	2,037,220	
	15,037,220	
Less sinking fund, about	500,000	
		14,537,220
		32,849,220

which is not three times its annual revenue.

Yet the want of ready money is so critical, that the Porte was ready to pay an immense commission to M. Mirès for a comparatively small sum in hand; that the public service is conducted wherever it is possible on credit; that provisions are purchased for the army to be paid for at long intervals; that, as we have said, the ordinary revenues are in pawn; that there is a *talk* of some surreptitious issue of paper money. In truth, no capitalists have at present any confidence in the Administration. The country is in a transition state. It is too Europeanised to be Asiatic, and not sufficiently Europeanised to be truly European. The old state of society in Turkey was despotic and tyrannical, but it was efficient. The new is in comparison humane, is in comparison favourable to the Christians, but it is inefficient. Sir Henry Bulwer describes it graphically:—"The Ottoman Government, when it undertook to place the Empire on a new foundation, was neither entirely sincere in its professions, nor did it clearly understand what it was about. It accepted the announcement of great, immense, and sudden reforms, less with a desire to reinvigorate Turkey than to gain Europe. It was less occupied with the laws it was to make than with the newspaper articles it would produce. It consequently undertook too much too suddenly, and got confused amidst the novelties it promulgated. An uncertainty between the old and the new everywhere prevailed, and still prevails. A Pasha said to me the other day, 'What am I to do? I govern a province, and the Grand Vizier sends me an order which is framed on the new ideas that we profess. The Sheikh-ul-Islam complains against me because I do not act upon the old laws, which with him are still sacred. I say the two things are incompatible; and I am told I must follow our old usages, but I must give them a new dress. I don't know what I am about.' The former Government was very simple in its forms. Great individual power was given; if a man was thought to exercise it well, he rose to wealth and power; if ill, his property was confiscated and his head went off. The object of late years has been to destroy his personal responsibility; and this project, as all funtionaries have been interested in it, has succeeded. The Pasha can throw the blame of his acts on the Medjlis of his province; the Minister of every department can say that his measures bear the signatures of all his colleagues: add to this the endeavour to apply the complicated habits of European administration and the refinement of European codes through the medium of people altogether ignorant of both; an accumulation of business in each department by the modern practice of immense and constant correspondence, with no classification; and officials over whom there is no practical control."

It is not be wondered at, that with such inefficient control from head-quarters, there should be much peculation in money matters. More is continually paid by the tax-payer than is received by the Government, and the difference is appropriated by some Pasha or other official, who bribes some higher personage if there is a chance of his being discovered. Many of the revenues are farmed at much less than their nominal value, while the contractor realises one-third more than the nominal value by illegal exactions. The expensiveness of the Palace has grown of late years with extreme rapidity; it seems growing without limit. Its corruption is in proportion, and some are even sceptical whether surreptitious debts may not be contracted, or unknown paper money issued, under the cover of so much licence.

The present Sultan has, therefore, a great work before him, and a difficult one. But it is not more difficult than has often been accomplished

least so far as the finances are concerned. A man of plain strong mind, and clear strong will might, without genius, without superhuman labour, without any painful pressure on any innocent person, restore the finances of Turkey to a satisfactory position by consistent good intentions and undeviating steady attention. Let us hope that the present Sultan will effect it.

GENERAL BUDGET of INCOME and EXPENDITURE of the TURKISH EMPIRE for the YEAR 1860.

INCOME.

	£	£
Direct Taxes:—		
Verghi (a rude sort of income tax)	2,522,315	
Military redemption	544,831	
		3,067,146
Indirect Taxes:—		
Tithes	3,248,136	
Tax on sheep	756,120	
Tax on pigs	95,535	
Customs	1,611,587	
Customs on tobacco, including the right of sale	257,999	
Tax on fishing	78,759	
Produce of contracts	21,488	
Produce of stamps	28,457	
Tax on spirits	339,921	
Japan (imitation China)	131,844	
Sundry taxes	930,758	
		7,500,604
Public Establishments:—		
Post Office	57,285	
Imperial Printing Office	8,372	
Property belonging to the State	31,611	
		97,268
Produce of Domains and Legal Rights:—		
Fisheries	18,302	
Forests	6,018	
Imperial farms	71,390	
Salt-pits	97,725	
Mines	10,451	
Sales of landed property	4,625	
		208,511
Tributes:—		
Fixed receipts	427,631	
		427,631
		11,301,160
Add:—		
Special revenues of the Minister of Marine	135,636	
Special revenues of the Minister of Commerce	7,105	
		142,741
Total receipts		11,443,901

THE BOARD OF TRADE RETURNS.

THE Board of Trade Returns for the month of August, and the eight months ending with August, show less decline in our exports than the wretched state of the American trade would lead us to expect. The exports for the month of August, and for the eight months ending 31st August, are valued as follows:—

August.			Eight Months ending 31st August.		
1859	1860	1861	1859	1860	1861
£	£	£	£	£	£
12,117,275	13,535,205	12,337,441	86,405,885	88,077,892	82,575,126

whence it appears that we are exporting just now rather more than at the same period of 1859, though less than last year,—and that even for the whole eight months our exports have only fallen off by four millions sterling as compared with 1859,—or not five per cent. This is really but very trifling, considering the enormous loss on our American trade, which is reduced by the tariff and political calamities to less than half its usual proportions.

What the loss on our American trade is will be seen by the following table, which gives the comparison of the articles exported to the United States during the eight corresponding months:—

VALUE of EXPORTS to the UNITED STATES in the Eight Months ending August 31.

	1859	1860	1861
	£	£	£
Beer and ale	66,470	68,506	24,778
Coals	127,399	134,016	179,162
Cottons	2,454,211	2,472,441	1,051,235
Earthenware and porcelain	401,000	443,899	183,245
Haberdashery and millinery	1,132,633	1,004,360	520,993
Hardwares and cutlery	771,367	664,637	402,789
Linens	1,317,760	1,147,942	451,761
Metals—Iron—Pig	186 099	137,035	78,706
Bar, bolt, and rod	594,149	466,217	142,176
Railway, of all kinds	659,489	579,090	164,919
Cast	14,863	15,801	9,040
Wrought, of all kinds	326,828	314,680	118,074
Steel, unwrought	335,068	384,489	201,734
Copper—Sheets and nails	96,448	38,901	8,188
Lead	49,867	53,955	1,451
Tin plates	847,251	734,295	255,885
Oil seed	118,530	68 597	1,620
Salt	51,029	64,806	54,166
Silk stuffs	190.001	94,574	78,516
Other silk articles	119,955	85,793	22,545
Soda	405,752	349,549	131,269
Spirits (British)	42,569	47,132	12,070
Woollens:—Cloths of all kinds	540,558	487,809	244,715
Mixed stuffs	1,630,594	1,405 375	584,362
Worsted stuffs	992,484	764,206	351,663
Totals	13,472,374	12,033,105	5,275,042

This great loss has been partially counteracted by a considerable number of small causes. France has taken a good deal more than usual in consequence of her relaxed tariff,—a cause which we may expect to see in fuller operation in a few months more, as many of the provisions of the treaty come into full operation next month. The immediate effect will, we fear, be somewhat lessened by the bad harvest in France, which is compelling her to take corn rather than any other kind of import. It is curious, too, that Naples and Sicily are largely increasing their custom in several important items.

EXPORTS to NAPLES and SICILY.—Eight Months ended 31st August.

	1859	1860	1861
	£	£	£
Cottons	234,000	175,000	559,000
Cotton yarn	208,000	185,000	344,000
Iron (bar and bolt)	48,000	57,000	69,000
Worsted mixed stuffs	46,000	39,000	103,000
	536,000	456,000	1,075,000

showing already a double consumption of English exports as compared with the year before last, a year which was in that part of the Peninsula one of perfect tranquillity. Again, the trade to Holland and to British North America is on the increase, and thus the supply that would, in the ordinary course, have gone to the United States, has been drained off by a number of small new channels.

It is remarkable that, while the exports have fallen off steadily throughout the year, the imports still continue to exceed in value those of previous years. Even for the month of July (the last for which the imports are valued) the imports exceed those of the same month in preceding years. While America is taking so much less than usual of our goods, we have been taking much more than usual of her grain, and this was even the case as late as the month of July. The enumerated imports, forming about 80 per cent. of the whole imports, are valued thus:—

Month of July.			Seven Months ending 31st July.		
1859	1860	1861	1859	1860	1861
£	£	£	£	£	£
15,551,616	15,200,442	17,748,952	76,367,153	90,569,648	100,015,301

As this is for only seven months of the year, and for only about four-fifths of the value of our actual imports, we see that at the same rate we should now be spending something like 250,000,000*l* in the year on our imports—an enormous sum which we have never yet approached. We append the account of the quantities of the principal articles of food and drink received and retained for home consumption during the month of August:—

	Quantities Imported.		Quantities Retained for Home Consumption.	
	1860	1861	1860	1861
Cocoa ..... lbs	650,379	768,197	291,789	332,675

Agriculture.

CAPITAL IN FARMING.

RELATIONS OF LANDLORD AND TENANT.

Amongst much that is irrelevant or foolish in the utterances at the agricultural meetings of the present autumn, a voice from Buckinghamshire gives a healthy and no uncertain sound. And the tone is alike in accord with true economical laws and the hopes and wishes of all our best practical farmers. We trust it is a good omen, and that it indicates the opinions which are making way among the more intelligent owners of land in England. Sir Harry Verney, one of the members for Buckinghamshire town, presided at the recent meeting of "The North-west Bucks and the adjoining parts of Oxfordshire and Northamptonshire Association," and in proposing prosperity to the Association, delivered a speech in every way worthy of an enlightened landed proprietor and a practical statesman. This is not the first time very sound views in regard to English land, and the relations between English landowners and tenant-farmers, have been enunciated by Sir Harry Verney, for we have a clear recollection of several very useful and judicious speeches made by him on the same topics during the contest with the Protectionists which ended in the repeal of the Corn Laws. Various causes have latterly rendered the landlord mind less open to right views on the management of landed property, and we hope and believe that in again proclaiming the only safe basis for agricultural progression, Sir Harry Verney gives utterance to opinions which are likely now to find acceptance with the class to which he belongs.

He said he regarded agricultural meetings as valuable, "inasmuch as they afforded an opportunity for mutual interchange of opinions on agricultural subjects between men who had spent their lives in practical agriculture, and those who, without the same active experience, had perhaps devoted considerable attention to agriculture as a science, and considered it in its social and political aspects." It was a trite saying that he who increases the produce of the soil is a general benefactor; and "it was invariably found that in districts where produce most abounded, the wages of the working agriculturist were highest, and the farmer himself was best off." These were moral and social advantages which were of direct benefit to the landlords. For productive husbandry with its accompanying good results, capital is necessary; and "he, for one, hoped when they should have the capitalists of the country coming forward and going hand in hand with the agriculturists in making the land produce as much as possible. On its doing this the well-being of the whole community depended.....He believed that investments made for agricultural purposes would be found to be the safest and most successful."

On this question of agricultural investments an important consideration arose. He admitted there existed "much mutual faith and confidence between landlords and their tenants; but the system which he wished to see prevalent in this country—that of capitalists putting money into land to make it productive—*required something more.* Of course the capitalist could not be expected to invest his money in the cultivation of land unless those who cultivated it were men of intelligence, rectitude, and principle, and that in addition to these moral qualities, they had a certain tenure in the land." And the cheers which greeted these opinions proved that his auditors fully appreciated their soundness.

He knew there were differences of opinion on such points, and he invited those who thought agriculture would not be benefited by whatever induced the capitalist to invest his capital in the cultivation of the land to state their reasons. "It was clear that he (the capitalist) would not do so, unless the agriculturist had a certain permanency of tenure. Now, how such a permanency was to be given, except by lease, he (Sir H. Verney) could not discover. Therefore he should be happy to see a system of long leases come into greater prevalence than we had yet seen in this country."

He did not think such a system would lead to tenants being longer on an estate, for on some properties where no leases were granted, many tenants had been preceded by their fathers and grandfathers. They felt as secure, from the confidence reposed in the landlord, as if they had leases. That, however, would not be such a system as would induce capitalists to advance their money in aid of such tenants. But a lease was not to be binding on one side only. "If the landlord gave a lease, he, on his side, would expect an assurance that the terms of the written agreement would be observed, and consequently he must have his conditions as well as the tenant. But what he (Sir H. Verney) desired to see was, that the tenant-farmers of this country might have leases which would enable any of them to go to a capitalist and say: "I have got this farm for twenty-one years; will you trust to my intelligence, integrity, and skill, as an agriculturist, and lend me money to cultivate my land?" He believed that such a thing as that was practicable, that it would be for the advantage of the community at large, and for that reason he should be glad to see it in operation.

There is little to add to such views, except to amplify details. When leases have become more general than they now are, it will be found that the more liberal and simple their stipulations, the better will they answer the purpose, and advance the interests of both landlords and tenants. Thus, the absence of cropping regulations, except for the last four years of the term; no reservation of game; and no restriction on assigning the lease, will be variations from ordinary farming leases which will greatly enhance the security the tenant-farmer has to offer for the use of money lent to him for cultivating his farm. This will react on the landlord's interest; for the tenant, having by means of a liberal lease obtained more capital and so increased his profits, will be both able and willing to pay more rent for his farm.

Sir Harry Verney then adverted to the agricultural labourers, about whose condition "landlords were at present showing themselves to be much interested.....A landlord ought always to bear in mind that every man on his estate should have a good house to live in." Emigration was some years ago recommended, but now it was known that the labourers were none too many for the wants of modern husbandry.

Of the landowners, Sir H. Verney said "they are wonderfully deficient in knowledge of their business":—a proposition which was heartily assented to by the assembled farmers. And it is strictly true. They may say their's is not a business, but that is a mistake, for to know how to manage an estate well, or even to permit it to be well managed, requires a degree of attention to and of acquaintance with facts and details few English landowners give or possess.

Sir H. Verney justly said:—"A doctor, a lawyer, a sailor, or a soldier, worked hard 'to fit himself for his calling, but it was supposed every landlord was born fit to discharge the duties of his position. That he believed to be a great mistake. He (Sir H. Verney), was not brought up as a landlord. In his youth he had other pursuits, but he sincerely desired that those who came after him should learn the management of land. No good steward would object to seeing a landlord thoroughly conversant with everything that belonged to the management of land. Such a knowledge on the landlord's part would make him value the services of a good steward the more. He felt certain that all classes of agriculturists would be benefited by landlords having a perfect knowledge of all that belonged to the management of their estates."

Of that there can be no doubt. But landowners have not only to learn how to manage their estates well, they have to unlearn habits and notions which necessitate mismanagement. They must give up the idea of personal active control over the land which has been let to tenants, and they must learn that restrictions and precise regulations merely impede the farmer without the slightest benefit, nay, literally with positive injury, to the landlord.

Literature.

COMMERCIAL LITERATURE.

Indian Railway and Flotilla Guarantees Examined and found to be Delusive. With Extracts from the Official Contracts between the Indian Government and the several Companies, as published by order of Parliament. By James Mills. London: Mann Nephews, 39 Cornhill.

A pamphlet of which the object appears to be to depreciate the securities of the Indian Government by the suggestion of imaginary difficulties. It will not materially affect the general estimate of this kind of property by competent persons, and with the general public the author tacitly admits that it is already popular.

GENERAL LITERATURE.

Narrative of Ten Years' Imprisonment in the Dungeons of Naples. By Antonio Nicolò, Political Exile. London: A. W. Bennett, 5 Bishopsgate Without. 1861.

In the Track of the Garibaldians through Italy and Sicily. By Algernon Sidney Bicknell. London: Manwaring, 8 King William street, Strand. 1861.

These narratives picture the state of the Neapolitan kingdom just before and just after the fall of the Bombas. The tale they tell is substantially the same—a beautiful country degraded by a brutal Government, and the struggle of good against evil conducted by a few generous spirits under the heaviest disadvantages. Signor Nicolò, who is a physician by profession, was one of those concerned in the Neapolitan insurrection of June 1848, which he joined reluctantly, foreseeing that success was all but impossible. In a few weeks the insurgents were dispersed by the King's troops, and from the autumn of 1848 to Sept. 1850, Nicolò was a wandering fugitive, seeking concealment now in one place, now in another. At length, to save his family from the perpetual annoyance with which the

Government visited them, and partly trusting to false assurances of safety, he gave himself up. His trial did not take place till June 1851; the condemnation followed in November, to nineteen (commuted in July 1852 to thirteen) years in irons; and in September 1852 he was sent to the Bagno of Nisida. A month later he and others were transferred to Procida, where they remained till September 1858, when they were again sent to Nisida until January 1859. Then, as is well known, Ferdinand II. endeavoured to send the prisoners whom he could not well keep much longer to America, but the exiles persuaded the captain, when clear of the Mediterranean, to sail for Cork, where they were received with warm hospitality and sympathy, and where Signor Nicolò has made himself a home. A clear and satisfactory account is here given of the conduct of the exiles to the American captain, and the glimpses we get of Poerio in the history of the voyage are among the most interesting parts of the narrative.

The chief staple of the book is, of course, far from pleasant reading. Some strong stimulus of sympathy or admiration is needed to carry one through a record of such revolting details, and Nicolò, though estimable and affectionate, and evidently much above the general average of Neapolitan patriots, is not exactly a hero or a saint. But we have no right to expect every Italian victim to be a Poerio or a Pellico, and it is useful to compare different records of this sort with each other. The feature in Nicolò's narrative which will probably strike English readers as the strangest, is the anomalous position which the Camorristi or Neapolitan brigands appear to have maintained in all the prisons of the Bourbon régime. They were the terror both of the other prisoners and of the officials; they always contrived to keep their poniards, and would often assassinate a prisoner who refused to accede to any demand they chose to make. Occasionally some strong-minded prison commandant would try to do his duty and put down their power, but more often their excesses were winked at. The other prisoners were obliged to procure (clandestinely) poniards for themselves in self-defence, and when a search was made by the officials for these weapons, "the turnkeys would inform the Camorristi, and take charge of their poniards until it was over." Nicolò accuses the Government of deliberately favouring these wretches, and tells the following anecdote in confirmation of the charge. When Ferdinand, in 1858, visited the Bagno of Capua, a prisoner named Madonna "entreated His Majesty to be pleased graciously to remove the Camorristi from the prison, because of their overbearing insolence and their exactions towards the other prisoners.

"Why, how many Camorristi are there?" asked Ferdinand. "Eight, your Majesty." "Well, there are 200 of you, and you can get rid of them for yourselves. The favour that I will grant you is not to make you pay for doing so." "But we cannot get rid of them, because we have no weapons, while they are provided with poniards." "Very well, very well, I see you are a chicken-hearted set" (*siete veramente conigli*), said the King, and walked away.—Pp. 104-5.

A curious contrast to Signor Nicolo's depressing narrative is presented in Mr A. S. Bicknell's wanderings "In the Track of the Garibaldians." He has nothing very new or remarkable to tell, but he is a quick observer of manners and character, and he writes in a lively and piquant style. He started for Naples in September 1860, was present at the siege of Capua, witnessed Victor Emanuel's entry into Naples on the 7th of November, contrived to see something of the siege of Gaeta, and when tired of Naples and its environs, set off for Sicily, where he visited Palermo, traversed the interior to Syracuse, and returned by Etna and Messina. His accounts of the Neapolitans are unfavourable in the extreme, and few things are more horrible than the ghastly descriptions he gives of the South-Italian burial arrangements. The utter absence of all decent respect for the dead in Naples, and the scarcely less revolting customs prevalent in Sicily, are a disgrace to Christendom. In this and a few other parts of his narrative, Mr Bicknell's habitual vivacity of style might have been restrained with advantage.

The "speciality" of the book is the author's original, and, as it seems to us, very plausible theory of the St Januarius miracle. He went to see it twice, and studied it most carefully. On the second occasion he was so fortunate as to get a seat inside the enclosure of the altar, facing the latter at about six feet from it. He was there before the ceremony commenced, and had a full view of all that took place. Before the service began, the priest who held the bottles exhibited them to each person near him separately, turning them over more than once, and afterwards holding them up and reversing them conspicuously for the benefit of the congregation beyond, that all might observe the perfect congealment of the contents. About twenty minutes afterwards, Mr Bicknell relates, "having never taken my eyes off the bottles or lost sight of them for a single moment, I saw the blood suddenly begin to dissolve next the glass.....Observing how eagerly my eyes were fixed on the reliquary, the old man held it out to me, and as he did so, at that instant, when quite close to me, the blood became in a second almost wholly liquid; only a small lump, the size of a filbert, remaining undissolved, floating in the middle." Mr Bicknell does not believe the liquefaction to be either a miracle or a deception, but a purely natural phenomenon, misunderstood by the priests, who believe themselves to be working a miracle in causing it. He thinks that "the matter in the bottle is some gelatinous composition, outwardly resembling blood, which is soluble at a moderately high temperature," and that the warmth of the priest's hand, and the heat of the crowded church, are the causes of its liquefaction. The evidence he accumulates in support of this view seems as nearly decisive as second-hand evidence can well be, but for this we must refer our readers to the book.

Mr Bicknell gives an amusing account of his ascent of Mount Etna, and speaks with enthusiasm of the view from the summit, which he had the good fortune to see in its perfection at sunrise, when, he says, "the whole of Sicily and Southern Calabria is so clearly spread out and so fore-shortened, it appears only to want printed names to resemble an ordnance map on a very large scale." He also gives (in the Appendix) a useful series of directions for travellers wishing to make the ascent, stating the time which should be allotted to different portions of the route, the proper fees for guides, &c.

The volume is well got up, and contains a map of Gaeta, and the finest photograph of Garibaldi we have yet seen, taken on the day of Victor Emanuel's entry into Naples, Nov. 7, 1860.

THE PIRATE AND THE THREE CUTTERS. By CAPTAIN MARRYAT, R.N. Illustrated with Twenty Steel Engravings from Drawings by Clarkson Stanfield, Esq., R.A. Henry G. Bohn, York street, Covent garden.

HOWEVER often Captain Marryat's tales may be republished, they are sure to meet with a warm welcome from at least one portion, and that no one inconsiderable of the reading public. Boys delight now, and successive generations of boys will continue to delight in these sea stories. There is something particularly attractive to the young in their life and stir; their wealth of adventure; their broad and effective drawing of character; and in the genuine salt-water tone, fresh as sea breezes, as untrammelled by rules, and often as boisterous, but always healthy and invigorating, that is about them all. Even older readers, who have almost forgotten how they felt when they were young, whom "a heavy weight of hours has chained and bowed," till, with every desire to be "as in their boyhood," they cannot help criticising as they read, and subjecting even romances to the test of reason, probability, and common sense,—even such unhappy mortals will confess to the charm that lies in Captain Marryat's unflagging spirits, in his hearty enjoyment of the sea-yarns he spins so well, in the vigour of his style unpruned though it be, and in the humour and point of his characters, always unfinished, and often overdrawn as they undoubtedly are.

The two tales that Mr Bohn has here selected and illustrated with some charming sea-pieces by Stanfield, are by no means their author's best, but they are marked by the most prominent characteristics of his genius as a writer of novels, and are a fair average sample of his powers.

"The Pirate" is full of action and adventure of wrecks, sea fights, marvellous escapes, exciting incidents. It shows the writer's complete mastery of all the mysteries of his profession, and his lively and vigorous imagination. "The Three Cutters" is a good example of his keen faculty of observation, his humour and comic power. It is conceived in the very spirit of rollicking fun, and capitally worked out. The happy thought that strikes the smuggling captain of Cutter No. 3, that since the owner of Cutter No. 1 has made—and failed in making—an attempt to enforce the revenue laws without licence, he is entitled to turn his lordship's yacht into a smuggling vessel without leave; the cool audacity of the seizure; the fright of the unprotected ladies, who fancy they have fallen into the hands of a pirate, and their subsequent amusement at their novel position; the by-play among the terrified servants, and the happy winding-up, are all told with such cheerful enjoyment that we enter heartily into the joke, and are almost sorry—in spite of the pretty and rich widow he has won—when daring Jack Pickersgill settles down into respectable Mr Davenant.

The memoir and capital portrait prefaced to this volume add not a little to its attraction. Captain Marryat's life was at least as varied as that of his heroes; and his character as manly, intrepid, self-forgetful, and brave. To say that he served for three years under Lord Dundonald, and was praised for his gallantry in many of that illustrious seaman's most hazardous undertakings, is sufficient testimony to his courage and capacity. As a naval officer, he was able and successful. He served in the West Indies, where he was first attacked with that weakness of the blood-vessels which in the end resulted in his death; at St Helena, from which he announced the death of Napoleon; in the East Indies, Burmah, and the Channel Islands. At the age of 38 he quitted the navy, resigning his ship, the Ariadne, and devoted himself to literature. His novels now came out in rapid succession. "He set to work," as his biographer says, "with an earnestness and a zeal which he brought to all his undertakings." The wording of this sentence will give a fair notion of the style in which this slight memoir is written; verging upon the slipshod, and not particularly luminous. As a more favourable specimen, we will extract an amusing example of self-possession and promptness of speech in Captain Marryat when quite a boy:—

Having chased a ship into the Bay of Arcupon which sought safety under a battery, Lord Cochrane resolved to cut her out, and young Marryat was one of the boarding party. He followed closely the first lieutenant who headed the expedition, and who at length, after his party had sustained a severe loss, succeeded in gaining the deck of the enemy.

He had scarcely done so, when, struck by thirteen musket balls, he fell back a corpse, knocking down his follower in his fall, who was trampled on and almost suffocated by his shipmates, who, burning to revenge their leaders, rushed forward with impetuous bravery. The vessel captured, an examination took place of the bodies of the killed and wounded. Marryat was numbered among the former, and being in a state of stupor was unable to deny the doom assigned to him. But soon arrived the surgeon and his assistants, and with them came a midshipman who bore no good-will to Marryat. This worthy youth, seeing the supposed lifeless body of his comrade, gave it a slight kick, saying, "Here is a young cock that has done crowing! Well, for a wonder this chap has cheated the gallows!" This salutation, with its comment, revived the almost expiring energies of the other, who faintly exclaimed, "You are a liar!"—a retort which, notwithstanding the melancholy scene around, produced a roar of laughter.

QUARTERLY JOURNAL OF THE STATISTICAL SOCIETY OF LONDON. Vol. 24. Part 3. September, 1861. London: E. Stanford, 6 Charing Cross.

THE first article in this number is an interesting paper by Mr Arthur de Buschen (of the Central Commission of Statistics in the Ministry of the Interior, St Petersburg), on the "Origin and Numerical Development of Serfdom in the Russian Empire." It concludes with an elaborate table showing the distribution of the serfs belonging to private proprietors at the close of the year 1858 in each of the fifty-four divisions of the Empire,—separately classed as serfs attached to the land, domestic serfs, temporary serfs, serfs belonging to institutions, and serfs attached to manufactories and mines. The number of proprietors, the average number of serfs under each proprietor, and the percentage of the serfs to the general population, are also stated. The next paper is one by Mr Frederick Purdy, Principal of the Statistical Department of the Poor Law Board, on the "Earnings of Agricultural Labourers in England and Wales in 1860." It abounds in details, systematically collected and classified, and is far too minute and complex to be briefly epitomised, but it will be found extremely valuable by all who are concerned in the subject,—indeed, it strikes us as the chief article of the present number. Then follows a "Numerical Analysis of the Patients treated in Guy's Hospital from 1854 to 1861," by Dr J. C. Steele, the superintendent of the hospital, and a paper on the Irish Census for 1861, presenting some of the preliminary results. These articles are succeeded by a group of "Miscellanea," of which the most generally interesting are two reprints, one on "Scotch and English Farm Labourers," a paper by Mr George Singer, which originally appeared in the *Gardeners' Chronicle*,—and an excellent letter on the "Effect of Reformatories" by Mr Barwick Baker, of Hardwicke Court, Gloucester, which appeared in the *Times* of Aug. 13, 1861. The number concludes with several quarterly returns on a variety of subjects.

VILLAGE SKETCHES—DESCRIPTIVE OF CLUB AND SCHOOL FESTIVALS AND OTHER VILLAGE GATHERINGS AND INSTITUTIONS. By J. C. WHITEHEAD, M.A., Incumbent of Gawcott, Bucks. Bosworth and Harrison, 215 Regent street.

THIS pleasantly written little book gives a simple but true story of successful enterprise in that rather difficult part of a country clergyman's duty,—the social organisation of his flock in their "village gatherings and institutions." Every one who has had to do with such matters knows the practical difficulties and discouragements that harass their originators and promoters. Mr Whitehead's cheering success is, we are sure, greatly due to the spirit of self-help he calls out in his parishioners by making them feel their own powers of administration in the management of their clubs allotments and village festivities. To suggest, and then to interfere as little as possible in the arrangement of the suggested scheme, has been his plan; and it has worked well in his own village. The boldest and most successful of all his attempts,—the establishment of a self-supporting day school that, while giving a superior education to the sons of tradesmen and farmers at the lowest cost, should furnish all necessary means of education for the children of the poorer classes out of its funds,—is well worthy of imitation; and has to our own knowledge been copied, with such variations as altered circumstances called for, in at least one case with the happiest results.

SOCIAL LIFE AND MANNERS IN AUSTRALIA. Being the Notes of Eight Years' Experience. By a RESIDENT. London: Longmans. 1861.

THESE "Notes" are selected from the diary of a young married lady, and published for the comfort of some of her countrywomen in England, whose husbands are bent on Australian emigration. It would have been a consolation to herself, she says, had she, when in like case, "known the true state of things in that far distant land." Whether her romantic pictures will be generally accepted as giving, on the whole, the true state of things, we rather doubt. She does, indeed, so far anticipate the doubt as to say, "Perhaps many may think my descriptions too *couleur de rose*; but if I felt a roseate tint everywhere shining on my path, could I cast shadows where there were none?" Certainly not; but young ladies who see roseate tints everywhere on their path are scarcely qualified to report fully concerning the complex state of such a society as Australia now contains. The "Resident" has, however, written an amusing little book, which may be read with pleasure, as giving the best aspects of Australian social life in town and country, besides various descriptions of scenery and wild animals which are curious and worth reading.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The Bank of France has this day increased its discount ½ per cent., so that the rate now is 5½. Thus there is a difference of not less than 2 per cent. between the rate of the Bank of France and that of the Bank of England. But evidently that difference cannot long exist. The augmentation made by the Bank of France has taken the public by surprise, and a reduction had been calculated on. The increase proves that, notwithstanding the large quantities of grain imported, the demand for specie for more purchases is as great as ever.

The Government has published a notification in the *Moniteur*, to the effect that the negotiations entered into between the Porte and certain Powers for the conclusion of treaties of commerce similar to those it has made with France, England, and Italy, not having been terminated, the Porte has requested that the conventions with those three Powers may not be brought into effect before the 13th March, 1862, instead of on the 1st October, as originally intended. The reason assigned by the Porte for this request is, that perturbation would be caused in its Customs system and also in commercial affairs by modifying the tariffs now, and again at a later period; and that it will be better to make the modification once for all. The French Government, the notification adds, has consented to the delay to the 13th March next which was demanded.

M. Michel Chevalier has communicated to the newspapers a copy of a letter which he has written to M. Dupin, Procureur-General of the Court of Cassation, in reply to a very violent and very unwise attack of that worthy gentleman on the English treaty of commerce. M. Michel Chevalier, in the first place, shows that M. Dupin's allegation that the treaty must be regarded as a concession to the English is erroneous, inasmuch as since 1852 the present Government of France has walked in the path of commercial reform; and so far back as 1856 proposed to do what the treaty does,—abolish prohibitions; and that although from circumstances it was not able in 1856 to attain its object, it announced that it would do so in 1861. "We are now," says the distinguished economist, "in 1861, the epoch fixed five years back by the Imperial Government. In a few days, that is on the 1st of October, we shall see disappear from our tariff the innumerable prohibitions which were established as war measures in the bellicose times of the Republic and the first Empire, and which domestic, not foreign manœuvres, have made to last to this day. A man of good faith cannot say that in that there is anything else than the accomplishment of a measure of public interest announced years in advance by the Government in the plenitude of its spontaneity; and, therefore, this act cannot properly be represented as produced by the schemes of foreigners." M. Michel Chevalier afterwards shows that the abolition of the sliding scale on the import and export of grain, which was also attacked by M. Dupin, was not proceeded to rashly,—a searching investigation into the working of the scale having been made by a Government commission, and the Legislative Body having elaborately discussed the matter. He adds:—"At the moment at which you complain of the new law, because, as you say, it may lead to a larger export than is desirable of French wheat to England, and so occasion a marked increase in the price of wheat in France,—at this very moment it is England which is supplying us with wheat—with English wheat! We take from England without difficulty the wheat which we require, because in 1846 the Parliament set us the example of abolishing the sliding scale—and we do not take it without causing prices to rise in England."

The 1st October, which is now near at hand, will, it is known, in virtue of the English treaty, see disappear the odious prohibitions on certain descriptions of merchandise which have so long disfigured the French tariff, and will see moderate duties fixed for them. It might have been expected that this great day would have been ushered in by pompous announcements from the Parisian shopkeepers of the cheapness in store for the public; but I have not seen many of such things. From what I hear, I am inclined to fancy that the English have not taken all the measures desirable for making their wares known, and that French retailers, who are a very routine class of people, have displayed even less activity in the matter.

But, nevertheless, English goods are certain to find their way to France before long, and in large quantities too.

You may have noticed that in the last two or three returns of the French Customs published in your columns, the quantities of grain and flour imported and exported were not given. The absence of these figures at any time would have appeared singular; but at the moment at which France is making immense importations of grain and flour to supply the deficit in her harvest, the omission is perfectly inexplicable, and gives rise to very serious complaints. To other countries, as well as to France, it must also present serious inconvenience. The *Echo Agricole*, an organ of the corn market, makes some observations on the subject which are worth reproducing:—

For reasons which we cannot explain, the Government has ceased for some months past to publish monthly the figures of the imports and exports of grain and flour. It is just at the very time at which commerce has the greatest need of the information that it is withheld. The new corn law is liberal in its stipulations, and administrative measures ought not to delay its liberal character.....

The situation of the country caused by the last harvest gives great importance to the complaints of the trade on this subject. The purchases abroad to fill up the deficit have already been considerable. ..... But more remains to be done, and importers require to know the facts, which but the Government can alone collect and publish.

The security of commerce ought to be complete; the Government should keep back nothing from it. Any reticence, if it were to be prolonged, would look suspicious. *Justly or unjustly, secret designs would be supposed,* and the least suspicion in such a matter would destroy confidence and would embarrass the action of commerce.

The following are the quotations at the Bourse:—

The following is an account of the markets: it will be seen that a new and important rise has taken place in the price of cotton:—

FLOUR.—At *Paris*, prices have declined: yesterday, the sack of 159 kilogs was 88f to 93f; the four marks for October, 88f 75c; for the last two months of the year, 89f.

WHEAT.—At *Paris*, a decline has taken place: yesterday, the offers made were not readily accepted, the prices paid being 45f to 47f 50c, and some lots 48f the sack of 120 kilogs. For wheat for sowing, 52f to 60f were given. In foreign, American went at 42f; English, 50f; Californian, 49f. Of the provincial markets, 59 present a rise of from 25c to 3f 60c the hectolitre, 36 a fall of from 10c to 1f 40c; 11 are reported firm, 38 without variation, 6 calm.

COTTON.—At *Havre*, in the week ending Friday, business was very animated, and prices advanced considerably. The sales were 32,826 bales, and the arrivals 281. The closing prices were 12f higher for the very low, 10f to 12f for low, 11f for the very ordinary, and 8f to 9f for other sorts. Consequently very low New Orleans was 119f the 50 kilogs.; low ditto, 127f; very ordinary ditto, 132f. The stock on Friday was 208,530 bales, against 179,160 in 1860, and 77,250 bales in 1859. Since Friday, prices have made a new advance. On Monday, the very low New Orleans was at 125f, and the low at 133f. On Tuesday, the very low 126f, and the low 134f. Yesterday, very low was at 127f to 128f, and low at 136f. The sales were, on Monday, 15,464 bales; on Tuesday 3,500; Wednesday, 7,600.

COFFEE.—At *Havre*, in the week ending Friday, business was brisk and prices rose. The sales were 950 sacks Hayti Port-au-Prince disposable, at 82f to 83f the 50 kilogs in bond; 450 ditto for delivery, 82f; 150 Jacmel for delivery, 82f 50c; 100 Gonaives disposable, 85f; 350 Cape ditto, 84f to 85f; 300 ditto for delivery, 85f; 80 St Marc ditto 86f; 750 Rio not washed, disposable, 67f 50c to 77f 50c; 108 ditto washed, 92f; 2,000 native Ceylon for delivery, 110f duty paid; 539 ditto *trié*, disposable, 109f to 112f; 925 Malabar for delivery, 111f to 112f. The arrivals were 5,207 sacks and 84 casks. In the first two days of this week, Rio not washed was quoted 77f; 50 Macassar, 109f. Yesterday, prices unchanged. At *Nantes*, last week, nothing was done; this week, same stagnation. At *Bordeaux*, last week, the sales were 1,000 sacks Rio not washed at 80f; 560 ditto washed, 90f to 92f; 682 Malabar, 115f; 87 plantation, 120f 50c; 7,000 ditto for delivery, 115f; 2,200 Mysore, 115f; 1,300 Costa Rica disposable, 115f; 500 ditto 115f for delivery; 102 Santiago, 92f to 100f; 200 Guayra, 87f; 496 Salem for delivery, 115f. This week, Rio not washed has been at 104f; Salem at 125f; Guayra, prices not stated. At *Marseilles*, last week, the sales were 6,000 Maracaibo, 85f; 500 Hayti, 82f to 83f; 4,000 Rio, 72f; 2,000 Rio damaged, 42f to 64f 25c; 300 Rio, 68f. This week, Rio has been at 70f to 72f; Guayra, 96f to 97f.

SUGAR.—Sales at *Havre*, in the week ending Friday, were not very active. 103 casks French West India went at 46f to 46f 50c the 50 kilogs duty paid; 650 ditto "usine," disposable, 50f to 53f 50c; 430 Havana, 33f to 33f 75c in bond. The arrivals were above 5,000 casks and 241 sacks. In the two first days of this week, Cuba was sold at 45f; Trinidad, 45f 50c duty paid; Havana, 34f. Yesterday, Porto Rico went at 45f; Trinidad and Havana, unchanged. At *Nantes*, in the week ending Friday, at a public sale, 311 sacks Reunion common went at 40f 50c to 40f 75c; 595 ditto Reunion, 49f 45c; 304 Reunion, 49f 65c; 134 French West India, 47f 50c. In addition to this public sale, 1,067 Reunion went at 48f 25c; 624 ditto, 48f 75c; 154 French West India, 46f; 43 ditto "usine," 53f. This week, Reunion at prices not stated. At *Bourdeaux*, in the week ending Friday, the sales consisted only of 200 bales Reunion "gros grain," 56f; 1,565 Havana, 54f; 245 Santiago, 45f. This week, French West India has been at 46f to 46f 50c. At *Marseilles*, last week, business was not very active, and prices somewhat lower, owing to large purchases having been made at London. This week, business has been very dull.

INDIGO.—At *Havre*, in the week ending Friday, business was rather brisk, and prices rose. The sales consisted of 100 chests Bengal, of which a part went at prices kept secret, and the other part at 2f 25c to 2f 52½c above the estimates. The arrivals were only 24 chests. This week, during the first two days, no business. Yesterday, same situation. At *Bordeaux*, for the week ending Friday, business was animated enough, and prices rose from 25f to 30f. The sales were 75 serons Mexico; 128 chests Kurpah; 47 ditto Madras; 72 ditto Bengal. This week, no business.

HIDES.—Business, at *Havre*, in the week ending Friday, was animated, without, however, any marked variation in prices. The sales were 2,430 dry La Plata, at 90f to 129f the 50 kilogs; 1,490 salted ditto, Saladeros oxen, 70f to 72f; 200 ditto ditto cow, 67f; 1,650 salted Rio Janeiro, 50f; 4,200 ditto ditto damaged, 48f; 4,000 salted Pernambuco, 55f; 2,150 ditto Maragnan, 51f 25c; 900 salted Valparaiso, half oxen at 63f, and half cow at 59f; 2,400 salted South Sea, damaged, 50f; 18 *vachettes*, Calcutta, 85f; 1,100 salted horse La Plata, disposable, 84f the 100 kilogs; and 5,000 ditto ditto, for delivery, 84f. The arrivals were 9,132. During the first two days of this week, salted oxen Buenos Ayres were at 71f; ditto Monte Video, 67f; salted New York, 42f; dry Buenos Ayres and Monte Video, 107f 50c to 110f; Lima, 72f. Yesterday, Monte Video dry was 107f 50c; salted ditto, 70f.

WOOL.—The sales at *Havre*, in the week ending Friday, were 43 bales La Plata, not washed, 1f 15c to 1f 25c the kilog; 39 Monte Video, washed, 2f 40c; 22 sheepskins, Buenos Ayres, not washed, 1f 14c. The arrivals were 534 bales wool and 45 bales sheepskins. This week, Donskoi has been at 198f the 100 kilogs.

TALLOW.—At *Havre*, in the week ending Friday, no sales were made; the arrivals were 255 casks. This week, no business. At *Paris*, yesterday, the 100 kilogs were 119f, a fall on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was at 91f the hectolitre; Montpellier disposable, of 86 deg., 115f. At *Bordeaux*, the day before yesterday, Languedoc was at 110f, and beetroot at 95f.

BRUSSELS, Sept. 24.

You are aware that the manufacturers and cotton-spinners of different towns in this country, and particularly of Ghent, have been raising great clamours against the conclusion of a treaty of commerce with England, extending to her the concessions just made to France. An imposing demonstration against these people has been got up in this city, under the auspices of the very intelligent and energetic Association for promoting Customs reforms. A very numerous meeting has been held, the President of the Association, M. Van Humbeeck, who is a member of the Belgian Parliament, being in the chair. This honourable gentleman, after some preliminary observations, called on M. de Molinari, the well known economist, to read the resolution which the Directing Committee of the Association proposed to the meeting, and which was as follows:—

Considering that Belgian productions are, generally speaking, freed from all duties on their admission into England, and that in the English colonies they are only subjected to the same duties as British productions:

Considering that it would consequently be unjust to continue to repel English productions whilst admitting those of France, especially as Belgian productions are admitted into England on more favourable conditions than into France:

Considering that this injustice with regard to a nation which is the friend and ally of ours is calculated to alienate from as its sympathies:

Considering that to excuse this injustice the interests of national manufactures cannot be invoked; that, on the contrary, experience has demonstrated that the protective system delays the progress of our manufacture, by artificially augmenting the cost price, and by thereby rendering it less capable of struggling with competing manufactures in foreign markets:

That, by thus checking the extension of our markets, and consequently the demand for work, the protective system particularly injures the working class:

The meeting expresses the wish that the stipulations of the Franco-Belgian treaty shall be made applicable with the least delay possible to England and other nations, *en attendant* a more complete reform in our tariff.

M. Gouvy, President of the Chamber of Commerce of Verviers, spoke in support of the resolution. In a very excellent speech, full of "facts and figures," he showed that the allegation that Belgium is placed at a disadvantage compared with England as regards the interest on capital and the cost of cotton and machinery, is untrue on the first point, and is compensated on the other by the lesser wages she pays to her workmen and the infinitely less taxes she pays to the Government. He concluded by affirming that Belgian cotton-spinners can compete successfully with those of England, but that if protection is to be afforded to them 5 per

cent. is the utmost they can expect. A Frenchman, of the name of Briavoine, contended that no treaty ought to be entered into, inasmuch as England is a giant who only wanted to embrace Belgium in order to smother her. This sagacious declaration was greeted with disapprobation by the meeting. M. Mayer-Hartogs affirmed that, without speaking of agriculture, it was for the interest of Belgian manufacturers or producers of wax candles, arms, paper, oil, woollen yarn, chicory, marble, stone, nay even cloth and unbleached and printed tissues, that their relations with England should be extended; and that those relations were certain to take a much larger development than could be hoped for in France. He affirmed, too, that liberty of commerce with England would be for the advantage of the workmen of Ghent, and would put an end to the strikes which so frequently occur in that city. M. Masson, Secretary of the Chamber of Commerce of Verviers, said that he had at one time been a Protectionist, and that, "to his shame," he had in 1845 signed a foolish petition against a commercial treaty with France; but that he was now convinced that he had been in the wrong, and was at the present moment a warm partisan of commercial liberty. His belief, he said, had been that the French treaty referred to would destroy the spinning of wool at Verviers, but under it that trade had increased fourfold. "Competition," he added, "had rendered the Verviers spinners more prosperous, and it would do the same for those of Ghent." M. de Molinari dwelt on the injustice of according to France concessions not extended to England, and on the importance of increasing commercial relations between different countries as the best means of maintaining peace. A Ghent manufacturer of the name of Decoster-Wittouckx, a protectionist, contended that the statements of M. Gouvy were erroneous, declared that the workmen of Ghent were well paid, and that even women could earn 14 francs a week, and complained that manufacturers and spinners were represented as "crocodiles," living at the expense of their fellow-citizens. This worthy gentleman was laughed at, and a working man of Ghent, named Billen, president of the Working Men's Association of that city, replied to him with great energy. He declared that the wages paid to a Ghent workman, though satisfactory in appearance, were not so in reality, inasmuch as they were greatly reduced by stoppages and fines. The Ghent manufacturers, he said, told their men that if a treaty with England were concluded, they, their wives and children, would have to rot on straw; but they were doing that already! For thirty years, he added, the workmen had suffered dreadfully under protection, and they were now unanimous in wishing for free trade in the belief that it would ameliorate their position.

After some other speakers had addressed the meeting, an amendment was proposed to the effect that, in the event of a treaty of commerce with England being concluded, it ought not to come into operation for two years, but this was negatived. The resolution given above was then put from the chair, and was carried unanimously amid loud applause.

On the whole, the meeting of which I have given but an imperfect account was most important; and will aid materially in bringing about a treaty with England.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Gazette* of last night contains a notification to the effect, that the exportation of grain from the Neapolitan provinces is now free. The notification is as follows:—The prohibition of the exportation of grain from the Neapolitan provinces to the other provinces of the kingdom, and that of grain, Indian corn, oats, barley, potatoes, kidney beans, chickpeas, beans, and lentils, from the same Neapolitan provinces to foreign countries, will cease from the day of the publication of the present decree. The commerce of grain with foreign countries is declared free in the whole kingdom as regards the exportation and importation according to the terms of the Tariff of 9th July, 1859, published in Naples with the Decree of 24th September, 1860.

Messrs Volkart Brothers, writing from Bombay, Sept. 23, remark:—Exports—The business in cotton had been restricted, in consequence of scanty supplies; but prices had further advanced 4 rs to 5 rs for the better, and 2 rs to 3 rs for the commoner sorts. The principal transactions were for cotton to arrive, both old and new. We quote:—Broach, 5 75-100d; Dhollera, 5 72-100d; Inglehaut, 5 92-100d; to arrive, Comptah, 5 17-100d; to arrive, Sawginned, 6 41-100d per lb, free on board, exchange 2s 0⅛d. To make a "sterling" calculation of cost and freight at 2*l* 15s, seven-sixteenths of a penny must be added to the above quotations. Freights—Rates for England have experienced a further improvement. For London—Cotton, 2*l* 10s to 2*l* 12s 6d; seeds, 1*l* 15s to 1*l* 17s 6d. For Liverpool—Cotton, 2*l* 15s; seeds, 1*l* 5s. The cotton clearances for Liverpool during the fortnight were as follows:—Ellinor, with 3,342 bales; Jane Jack Mitchell, 4,566 bales; Attila, 5,297 bales. Exports of cotton to Europe up to 25th August:—1861, 768,607; 1860, 343,011—*difference*, 425,596 bales.

The following is dated Quebec, Sept. 13:—Two hundred and fifty-six ships have arrived since 30th ult., an amount of tonnage altogether disproportioned to the wants of the trade. The result has been that a large quantity of white pine has changed hands at advanced prices, 70 feet having been sold at 8d, 60 feet at 6½d, and inferior rafts of coarse wood as high as 6d per foot. In board wood a few sales have been made at rather better prices; a lot of half waney, half square (the latter only ordinary wood), at 10d measured off. Altogether prices must be quoted at fully ½d per foot higher. Red Pine—Considerable sales have been made at about previous quotations. Elm—Small is very scarce and dear: 50 to 60 feet can still be bought at 12½d to 13d. Oak—Prime is held at 18d, but some ordinary lots badly made have been sold at 15d to 16d. Birch—No demand. Staves are light in stock, and holders are asking 45*l* for pipe. Deals—Floated have nearly all been shipped. Bright of good quality and specification have been sold at 15*l*, 10*l*, and 5*l*. ½ 1sts, ½ 2ds, at 16*l* 10s and 11*l*. Coals—Scotch and Liverpool steam, 17s 6d to 20s per 30 cwts. Salt—Liverpool bag, 2s to 2s 1d. Exchange lower: 90 days, 7 per cent.

An account of the importations and exportations of bullion and specie registered in the week ended 25th September, 1861:—

Gold imported into the United Kingdom.

Countries from which imported.	Coin.	Bullion.	Total.
	oz.	oz.	oz.
Hamburg	1,156	...	1,156
France	28,999	...	28,999

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Aug. 24, 1861, compared with the previous month:—

	July 27, 1861.	Aug. 24, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	20202800	20190372	...	12428
Private Banks	3030202	2974906	...	55296
Joint Stock Banks	2753068	2704611	...	48457
Total in England	25986070	25869889	...	116181
Scotland	4077331	4053808	...	23523
Ireland	5617044	5519428	...	97616
United Kingdom	35680445	35443125	...	237320

And as compared with the month ending the 25th of Aug., 1860, the above returns show a decrease of 2,085,098*l* in the circulation of notes in England, and a decrease of 2,813,766*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,373,002*l*, the English joint stock banks are below their fixed issue 597,746*l*,—total below fixed issue in England 1,970,748*l*; the Scotch banks are above their fixed issue 1,304,137*l*, the Irish banks are below their fixed issue 835,066*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 21st of August was 12,509,523*l*, being an increase of 748,447*l* as compared with the previous month, and a decrease of 3,125,230*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during

the month ending the 24th Aug.:—Gold and silver held by the Scotch banks, 2,470,235*l*; gold and silver held by the Irish banks, 2,126,454*l*; total, 4,596,689*l*; being an increase of 52,311*l* as compared with the previous return, and a decrease of 147,463*l* when compared with the corresponding period last year.

New York Sept. 2	17	16	73
Total	17	16	73
Same time 1860	43	10	69

The market has lost the buoyancy by which it was characterised at the date of our previous writing, and though the reported sales are to a fair extent—comprising 5,000 bales—prices are no higher.

New York, Sept. 11.—The market has been very quiet and somewhat less buoyant since our last, and prices have favoured the buyer to such an extent as to warrant a reduction from the extreme rates of last Friday. The Africa's advices imparted a little more tone to the market, but without resulting in any movement. The sales have been very light, not exceeding 1,500 bales.

The arrivals have been from Providence, 128 bales. Total import since 1st inst., 250 bales. Export from 1st to 10th Sept., 6 bales, against 3,422 in 1860.

New York, Sept. 14.—The market has relapsed into a dull state, and prices are merely nominal. We make no alteration in our quotations, however, but to effect sales, a reduction would undoubtedly be granted. The sales for the three days are confined to about 1,000 bales. We quote:—

New York Classification.

	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	18	18	18	18
Good ordinary	19½	19½	19½	19½
Middling	21¼	21¾	21¾	22
Good middling	22	22¼	22¼	23
Middling fair	...	...	...	...

Stocks of Cotton.—After a careful examination, the stock of cotton in this port, 31st ult., was ascertained to be 37,229 bales, as follows:—

	bales
On hand, unsold	28,068
Sold, but not delivered	9,161
On shipboard, not cleared	none
Total	37,229

Note.—It will be seen by the statement below, that spinners took 213,689 bales from this port during the year ending 31st ult., against 240,892 bales last year, and 223,081 year before; or, say 4,109 bales per week this year, against 4,633 last year, thus:—

	bales	bales
Stock, August 31, 1860		64,891
Received since		434,076
Making a supply of		498,967
Deduct—		
Export to Foreign Ports	248,049	
Stock, August 31, 1861	37,229	
		285,278
Leaving for Consumption		213,689

Weekly Consumption.

	bales		bales
1860-61	4,109	1853-54	3,082
1859-60	4,633	1852-53	3,484
1858-59	4,290	1851-52	3,724
1857-58	3,773	1850-51	2,636
1856-57	4,843	1849-50	3,066
1855-56	3,758	1848-49	3,040
1854-55	4,062	1847-48	3,070

The quantity taken from this port for consumption the past year shows a falling off from the quantity taken in 1859-60 of 524 bales per week, and 181 bales per week less than in 1858-59.

The past week has been one of almost unexampled excitement in the cotton market. Some slight improvement in the Manchester markets, based on diminished production, has encouraged manufacturers to buy more freely; and exporters and speculators, the latter especially, have done a very large business. Holders, without hope of replacing their stocks, adhere most tenaciously to predetermined figures, only selling a portion as these are realised. We quote an advance for the week in American of ½d per lb fully. A large business has been done in Egyptian, resulting in an advance of ¼d to ⅜d per lb. Brazil are also ⅜d per lb higher. East India have again been extensively dealt in at an advance generally of fully ¼d per lb. The market is a little quieter to-day but the sales are still large, say 20,000 bales, and prices firm. The reported export amounts to 30,250 bales, consisting of 9,680 American, 880 Brazil, and 19,690 East India.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 25th day of September, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,081,495	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,431,495
		Silver Bullion	..
	28,081,495		28,081,495

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,450,800
Rest	3,796,020	Other Securities	17,439,259
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5 810,424	Notes	8,107,915
Other Deposits	11,957,808	Gold and Silver Coin	810,746
Seven Day and other Bills	691,468		
	36,808,720		36,808,720

Dated the 26th September, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,665,048	Securities	27,987,059
Public Deposits	5,810,424	Coin and Bullion	14,242,241
Private Deposits	11,957,808		
	38,433,280		42,229,300

The balance of Assets above Liabilities being 3,796,020*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£124,076
An INCREASE of Public Deposits of	748,496
A DECREASE of Other Deposits of	485,042
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	156,227
An INCREASE of Bullion of	242,449
An INCREASE of Rest of	5,146
An INCREASE of Reserve of	105,049

The above return shows a continued addition to the resources of the Bank. A considerable increase has again taken place in the bullion and reserve, notwithstanding that at this period of the year there is generally an augmented demand for money to meet the revenue and other payments due at the termination of the quarter. The increase in the other securities is therefore comparatively moderate.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,395,558	£ 21,295,913	£ 22,030,294	£ 21,544,622	£ 20,665,048
Public deposits	9,886,439	8,886,870	9,268,239	7,092,681	5,810,424
Other deposits	8,229,829	11,543,876	13,096,415	12,873,222	11,957,808
Government securities	13,464,216	10,980,684	11,220,018	9,563,511	10,450,800
Other securities	14,247,837	15,234,491	13,434,507	19.559.349	17,439,259
Reserve of notes & coin	9,775,745	13,267,714	10,899,959	9,907,461	8,918,661
Coin and bullion	14,953,400	19,290,479	17,541,119	16,255,951	14,242,241
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	3½ p. c.
Price of Consols	97	98¼	95⅝	93¼	93⅝
Average price of wheat	36s 7d	44s 2d	41s 10d	53s 3d	55s 11d
Exchange on Paris (shrt)	25 20 25	25 15 20	25 10 15	25 15 20	25 37½ 45
— Amsterdam ditto	11 18½ 19½	11 15 16	11 14½ 15	11 13½ 14	11 18½ 19
— Hamburg (3 months)	13 10¼ 10½	13 8½ 8½	13 5½ 6	13 5½ 6	13 9½ 9½

In the corresponding week of 1851, the Great Exhibition continued to be thronged with visitors, the returns on one day having exceeded 60,000. From abroad, few events of importance were announced. Further confirmation had been received of the richness of the gold discoveries in Australia. The financial statement of Holland had just been presented to the Dutch Chambers, and was very favourable. Oldenburg had assented to the commercial treaty between Hanover and Prussia. The railway from St Petersburg to Moscow had been inaugurated by the Emperor of Russia. Intelligence had arrived of a terrific hurricane in the West Indies which had done much damage. The advices from the United States and Cuba were more reassuring, and affairs in the latter island had assumed a quiet appearance.

In 1858, Sir Hope Grant and other Generals were engaged in the pursuit of detached bodies of insurgents in Oude. A reduction in the Bank rate to 2½ per cent. was looked for, but it did not take place until some months afterwards. Consols had reached 98½, being the highest price known for years, and most other classes of securities were at the same time advancing, a considerable degree of speculative animation being observable on the Stock Exchange. The new Turkish loan issued at 80, was at ½ premium, and the Brazilian loan commanded 1 premium.

In 1859, the Bank rate of discount was 2½ per cent. Large arrivals of bullion were announced, and the abundance of capital was demonstrated by the fact of three millions and a half of the new Indian loan of five millions being paid up before the second instalment fell due.

In 1860, great sensation had been caused in England by the Macdonald affair at Bonn. The national troops under Cialdini and Garibaldi were gaining further successes in the Papal Provinces and Naples, although the latter had experienced a slight temporary check at Capua. A frightful catastrophe had taken place on Lake Michigan by the foundering of a steamer, upwards of 300 lives being estimated to be lost. The great hide and leather house of Mello e Souza had just failed in Rio, with liabilities for nearly half a million. Intelligence had arrived from China of the setting out of the allied forces for the Peiho.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 6,018,008*l*; in 1858, a deficiency of 3,690,615*l*; in 1859, a deficiency of 6,338,092*l*; and in 1860, a deficiency of 6,586,127*l*. In 1861, the deficiency is 5,481,451*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has been unusually moderate for the present period of the year, and transactions have taken place in the general market at 2⅝ per cent., while to-day, notwithstanding that there was rather more inquiry, the general rate was only about 3 per cent. The supply of capital for discount purposes continues large, but the amount of commercial bills offering is only moderate. There appears, however, a general impression that no further reduction in the value of money will be witnessed for the present, owing in a great degree to the action of the Bank of France.

On the Stock Exchange, there has been less ease, partly from the calling in of loans before the end of the quarter, and partly from some large sales of stock for immediate delivery, and the rate to-day has risen to 3 to 3½ per cent.

The Bank of France yesterday announced an advance in their rate of discount from 5 per cent., at which it has stood since the 22d March, to 5½. The movement is attributable to the increased demand for money to purchase grain. It is said that owing to this drain the Bank have lost a million sterling in bullion since the close of last month.

The following are the present rates of discount in the principal cities of the Continent, showing a tendency to diminished ease:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5½	5½
Vienna	6	5
Berlin	4	3
Frankfort	3	2½
Amsterdam	3	3
Turin	5	5
Brussels	4	3½
Hamburg	...	2½
St Petersburg	7	...

ENGLISH FUNDS.—The funds have been heavy this week, owing to some considerable sales of stock for immediate delivery, chiefly on account of a large insurance office. A gradual decline has taken place of about a half per cent., with little signs of recovery. Consols opened this morning at 93⅛ for money, and 93⅛ to ¼ for the account, but became slightly firmer on the American exchange being telegraphed at 109¼, the last official prices being 93⅛ to ¼ for cash, and 93¼ to ⅜ for October. After regular hours, however, a fresh tendency to give way was manifested. The market remains almost entirely influenced by the operations of the day, and no effect of any importance has been produced by political events. The public appear to be realising on the late advance, which has induced operators for the rise also to close their accounts. The recent improvement seems in a great measure due to speculative transactions.

There has been no change in Exchequer bills, the June issue remaining at 5s to 8s premium, and those of March at 2s discount to 2s premium. India bonds are firm, at 9s to 13s prem.

The India Five per Cent. stock has been rather flat, but rallied from the lowest point of the week. The closing price this evening was 103½ to ⅝, showing a decline compared

with last Friday of a quarter per cent. An instalment of 20 per cent. was payable on Tuesday on the last loan of 5,000,000*l*, but a comparatively small sum only was required from the large total already paid up in full, viz., about 3,200,000*l*.

FOREIGN STOCKS.—Great excitement has prevailed this week in the market for Mexican, and the transactions in this stock have been extraordinarily large and numerous. A rapid rise occurred on Tuesday, in consequence of an article in the *Morning Post*, setting forth in detail the alleged bases for the projected intervention of England, France, and Spain in the affairs of Mexico, which continued until yesterday afternoon, when a contradiction of the statement in the French paper *Patrie* caused a reaction. To-day, however, there has been renewed buoyancy, the determination of the three Powers to intervene at once being confirmed by the *Times*. The last price of Mexican, this afternoon, was 27 to ¼, showing an improvement since last Friday of 3½ per cent. Other Spanish American descriptions have been in rather less demand, but remain with a firm appearance. Buenos Ayres bonds in particular show a further advance. Another improvement has taken place in Turkish Six per Cents., especially the 1854 stock, of which the approaching dividend has just been advertised for payment.

French 3 per Cents. left off this evening on the Paris Bourse at 68f 85c, showing a decline on the week of more than three-eighths per cent. The rise in the Bank of France rate of discount has been the chief cause of the heaviness.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day:—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The railway market continues to be unfavourably affected by apprehensions of stagnation in trade, and consequently reduced traffics, and in most cases exhibits a fall. Lancashire and Yorkshire, and Midland, from their position in the manufacturing districts, have been especially flat. Caledonian, which had latterly shown exceptional firmness, has also given way. The supply of stock brought forward at the settlement commencing to-day has been larger than on previous occasions, and the rates of continuation, or for carrying over purchases to the next account, this afternoon, were generally high. It would, therefore, appear that the public have latterly been selling stock. There is scarcely any speculative business going on except on provincial account.

In the colonial department, the transactions have been unimportant, and little change has taken place. Canadian descriptions, however, are flat on the reduced traffic returns published this week. Indian guaranteed stocks are steady.

A further rise took place in Brazilian shares this week, but it has not been fully maintained. Lombardo-Venetian have receded to 1 to ⅛ premium in answer to a corresponding decline in Paris. American securities have been depressed.

There is no feature of importance in miscellaneous descriptions. Joint stock banks have been rather more in demand, especially Egypt, and London and Westminster. The new Mercantile Fire are quoted ⅛ to ¼ premium, and Commercial Union ⅛ discount to ⅛ premium.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and to-day:—

RAILWAYS.	Closing prices last Friday.	Closing prices to-day.

G. Western of Canada shares	9½ ¾	9 ½

FOREIGN EXCHANGES.—There has been little alteration in the rates this week. The quotation for Paris is rather firmer, while a slight decline has taken place in the Hamburg rate.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and the movements in Indian rupee paper:—

Gold.—Since our circular of 19th instant, the Swiftsure has arrived from Melbourne with 205,000*l*. There being no demand for export, this will ultimately be sold to the Bank, by which establishment no less than 332,000*l* has been bought since 19th instant. 7,200*l* has been shipped to Bombay, per Ellora, steamer, and 11,500*l* has been shipped to Alexandria, per Ellora steamer.

Silver.—Our market during the past week has been active, and prices have ruled higher, quotations being 5s 0⅜d and 5s 0⅞d per oz standard. The Peninsular and Oriental Company's steamer Ellora, for Bombay, will leave Southampton to-morrow with 91,680*l*. The Sultan, from the Peninsula, has brought 11,216*l*. It is reported that the West India steamer due on the 30th instant, will have a considerable amount on board, but this will not be available for the China shipments of 2nd October.

Mexican Dollars have risen in price since 19th instant, rather owing, however, to the short supply obtainable than to any active demand. Transactions have taken place at 59½d per oz, but we doubt if many could be had even at an increased rate.

Exchange on India has been rather firmer, though we still quote rates for Banks' 60 days' sight drafts on Bombay and Calcutta the same, viz., 1s 11⅝d to 1s 11¾d; bills with documents, 1s 11½d to 1s 11¾d. Madras Banks' drafts 1s 11⅝d to 1s 11¾d.

India Government Loan Notes are very dull. The late high prices are barely maintained, but we cannot quote any change in prices of moment. They are, this day, 103 to 103½ for 5½ per Cents., and 96 to 96½ for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 9½d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 76s 6d to 77s, nominal; South American doubloons, 73s 6d to 73s 9d per oz, last price; United States gold coin, 76s 6d per oz. Silver—Bar silver, 5s 0⅜d to 5s 0½d per oz std, firm; bar silver, containing 5 grs gold, 5s 1d to 5s 1⅛d per oz std; fine cake silver, 5s 5½d per oz; Mexican dollars, 4s 11½d per oz; Spanish dollars (Carolus), 6s 6d per oz, nominal.

About 43,000*l* in gold was purchased by the Bank to-day, and 51,000*l* yesterday, making a total of 94,000*l* since making up the last return.

PUBLIC COMPANIES.—A meeting of the Linares Lead Mining Company was held on Thursday, but no dividend was declared, the operations for the past half-year having for the first time since the commencement of the undertaking shown a loss of 1,924*l*. This result is chiefly attributable to a considerable fall in the price of lead, owing to the diminution in the export to the United States. Some improvement, however, has latterly taken place. The Directors have been unable to effect any material reduction in the expenditure, as such a course would be prejudicial to the future working of the mine. A decrease, however, has occurred in the cost of carriage to Seville, where the greater

part of the Company's lead is conveyed. The general prospects and present position of the property were stated to be encouraging.

The prospectus of the "Metropolitan and Provincial Bank" has been issued, with a nominal capital of 1,000,000*l*, in 10,000 shares of 100*l* each. The proposed bank will be under the Limited Liability Act.

The Commercial Union Fire Assurance Company commence business to-morrow (Saturday). The Directors, in issuing their tariff for London mercantile business, state that it has been adjusted on the principle of classification, thus adopting the plan that each class of goods should be charged a premium proportionate to its risk. Another noteworthy feature in the undertaking is, that at the expiration of five years a per centage of profits on premiums paid will be returnable to insurers.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 4 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 429½ per mark, and the short exchange on London is 13.8½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 107½ to 108 per cent., which, when compared with the mint par between the two countries, shows that the exchange is against England; but, after making allowance for charges of transport and loss of interest, the present rate leaves no profit on the transmission of gold to the United States.

INDIA EXCHANGES.—September 26.

Imports of the week ..... 166,941 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The supply of English wheat at Mark lane, to-day, was moderate, and principally consisted of several samples left over from Monday. For both red and white qualities the trade was in a sluggish state; and, in order to effect sales, further reduced rates had to be submitted to. In foreign wheat the amount of business transacted was much restricted. Prices, however, ruled about stationary. Barley was dull, and the quotations had a downward tendency. Oats, beans, and peas moved off slowly, on former terms. The flour trade was far from active; nevertheless, the currencies were supported. This week's imports amount to 13,020 quarters of wheat; 11,650 of barley; 28,210 oats; and 11,030 barrels of flour.

At Liverpool, this morning, the demand for wheat ruled inactive, and prices were the turn in favour of buyers. Flour, as well as Indian corn, was dull, at rather lower rates.

The wheat trade at Alexandria, for the week ending Sept. 11, owing to somewhat large purchases for France, had almost recovered from the late fall in prices. Beans were in good demand, at full currencies. Linseed—the receipts of which were somewhat on the increase—was without alteration in value. The following business had been transacted during the week:—Saide wheat, private trade produce, 35,730 qrs, 29s 6d to 30s 6d;

ditto, Pasha's produce, 810 qrs, 31s 6d; Beheireh, private trade produce, 18,420 qrs, 28s to 28s 8d; ditto, Pasha's, 2,750 qrs, 30s 6d to 30s 10d; ditto, private trade produce (white and Buhi), 3,680 qrs, 28s 9d to 30s; Saide beans, private trade produce, 16,130 qrs, 26s 6d to 26s 9d; Beheireh, private trade produce 3,120 qrs, 25s to 25s 6d; ditto, Pasha's, 650 qrs, 25s 3d; barley 10,915 qrs, 16s 6d to 18s 2d; lentils, 1,350 qrs, 24s 3d to 24s 6d; peas, 640 qrs, 25s 9d to 26s 3d; and linseed, 2,020 qrs, 47s to 47s 6d per quarter, free on board.

The excitement of the cotton market experienced in Liverpool last week has made further progress during the present. The total sales amount to the enormous cipher of 172,000 bales, including 57,000 to shippers, 85,000 on speculation, and 30,000 for export, and quotations are ⅛d per lb above those of last Friday. Till very lately holders offered their stocks rather freely, always anticipating that some unforeseen event might perhaps check the course of the market; this has been changed during the past week, and spinners instead showed much more eagerness than before to supply their wants; in consequence, the advance of this week is more considerable than that of any previous one. The future course of the article depends upon the turn of events in America, and if only an armistice should be concluded, there is no doubt that prices would at once decline considerably.

Messrs Briggs and Co., writing from Alexandria, Sept. 11, thus report the state of the cotton trade of that port:—"Buyers o cotton continue to be eager purchasers, and we must expect to see the new season, now close at hand, open at very high rates. It is probable that we shall have the incoming crop earlier than usual, stimulated by high prices, and aided by the greater facilities offered for its preparation and transport, by improved gins and the branch railways. Some of the new pods have already been picked, and the opinion of intelligent observers is that a rendering of one-fifth more than usual may be reckoned on. The operations for the past week have been as follows:—177 bales sweepings to low ordinary, at 6¾d to 7¾d; 262 bales ordinary to middling, at 8d to 8¼d; 123 bales good middling to fair, 8⅝d to 9d; 49 bales good fair, 9⅛d per lb, free on board. Freights by steamer are at 3-16ths of a penny per lb."

The inquiry for most kinds of tea has ruled steady, and, in some instances, prices have slightly improved. A cargo of new season's congou has been on offer.

In the demand for raw sugar, there has been increased animation, and a further advance of 6d per cwt has taken place in the quotations. Refined goods have been very firm, and prices have had an upward tendency.

The market for coffee has ruled brisk, at the extreme rates of last week to 1s per cwt advance. Cocoa has been in more active request, at an improvement in value of 1s to 2s per cwt. A Government contract is advertised for 200 tons.

There has been less activity in the sale for rice, especially for medium and inferior qualities, which have slightly given way in price.

The dry fruit trade has been devoid of animation, the inquiry being still confined, for the most part, to useful samples of old produce.

Rum has changed hands at rather higher prices, but the demand for it has been far from active. Brandy is in fair request, at full quotations. Hemp has sold steadily, at 31*l* 15s to 32*l* per ton for clean Russian. The wool trade has ruled firm, and the value of flax, jute and coir goods has been quite supported. Transactions have taken place in indigo at an advance of 1s per lb on July rates. The periodical public sales of cochineal have gone off heavily, at previous prices, to 1d per lb decline.

Linseed oil has been in steady request, at 34s to 34s 6d per cwt on the spot. All other oils have changed hands to a fair average extent, at fully late rates. In turpentine, next to nothing has been done. American spirits are quoted at 63s to 64s per cwt.

The following table exhibits the receipts and shipments of naval stores from New York since Jan. 1:—

	Receipts.		Exports.	
	bbls 1861.	bbls 1860.	bbls 1861.	bbls 1860.
Turpentine	32,064	47,570	19,465	44,459
Spirits of turpentine	44,442	108,228	20,057	53,438
Rosin	192,130	492,080	195,526	383,189
Tar	48,907	41,045	25,349	25,197

"Inland navigation," observes the New York *Shipping List* of the 7th and 11th inst., "continues to be prosecuted with vigour, and the amount of tolls received during the season shows a large increase. The amount received from the opening of navigation to and including the fourth week of August, 1860, was 1,563,896 dols 42c; the amount of tolls received from the opening of navigation to and including the 4th of August, 1861, was 1,929,137 dols 21c, an increase in 1861 of 357,240 dols 79c. The aggregate receipts at tide-water since the opening of navigation show an enormous increase over those of last year, as follows:—

	Flour. bbls.	Wheat. bush.	Corn. bush.	Barley. bush.
1860	407,000	4,837,900	9,682,000	83,200
1861	628,400	13,022,500	10,582,500	187,600
Increase	221,400	8,184,600	899,500	104,400

Reducing the wheat to flour, the excess in 1861 is equal to 1,858,315 bbls of flour. The amount of corn received at tide-water for August was 3,787,300 bushels, said to be the heaviest receipts in any one month ever known. The state of general trade, though far from being as prosperous as usual at this season of the year, is yet unmistakeably in a better condition than it has been during the past several months, while from prevailing indications, a moderate trade during the fall months may reasonably be expected. The shipping interest is in a state of fair prosperity, though were it not for the fact that a large number of vessels have been either purchased or chartered by the Government, it is very likely that vessels would find tardy employment, while freights would undoubtedly rule lower. The money market remains in substantially the same condition, and there is comparatively little doing. There is an evident scarcity of prime commercial paper. The rates are without noticeable change. We quote:—

	Per cent. per annum.
Loans on call, stock securities	6 to ...
Do. bond and mortgage	6 7
Prime endorsed bills, 60 to 90 days	6 7
Do. 4 to 6 months	8 9
First-class single signatures	7 ...
Other good bills	... ...

A call for another instalment of ten per cent. upon the Bank subscription to the loan has been made, payable to-day. The Bank statement shows considerable fluctuation, but not more than was expected, as it is influenced to such an extent by the operations of the Associated Banks in reference to the United States Treasury Department. The mercantile line of loans and discounts is steady, and shows comparatively little variation. The decrease in the specie line is more than offset by the gain to the Sub-Treasury, the difference being made up by the receipts from California, &c. The statement compares with that of last week as follows:—

	Aug. 31. dols	Sept. 7. dols		dols
Loans	141,081,474	139,158,230	Dec.	1,923,244
Specie	45,098,113	41,887,230	Dec.	3,210,883
Circulation	8,440,155	8,890,581	Inc.	450,426
Deposits	134,343,805	128,934,210	Dec.	5,409,595

The following is the comparative statement of imports for the week ending September 6, and since January 1:—

	1860. dols	1861 dols
For the week—		
Dry goods	2,273,255	832,301
General merchandise	2,156,216	689,484
Total for the week	5,429,471	1,521,785
Previously reported	165,403,267	92,009,451
Since January 1	169,832,738	93,531,236

The total value for the first eight months of the year being only about 35,000,000 dols, against upwards of 78,000,000 dols last year, as shown by the figures:—

Imports for the Month of August and since January 1.

	1860. dols.	1861. dols.
Total entered for consumption	13,969,712	1,859,899
Total since 1st January.		
Total entered for consumption	71,533,210	18,949,502
Total withdrawn from warehouse for Aug.	1,352,861	1,814,725
Add entered for consumption	13,969,712	1,859,899
Total thrown on the market	15,322,093	3,674,624
Total withdrawn from warehouse, since 1st January	6,923,549	14,144,429

Total entered for warehousing for August	1,019,332	1,676,434
Add consumption entries	13,969,712	1,859,889
Total entered at the port	14,989,044	3,536,323
Total entered for warehousing since 1st January	6,818,311	16,102,437
Add entered for consumption	71,533,420	18,949,592
Total entered at the port	78,351,731	35,051,939

The same journal, of the 14th inst., observes:—In general trade circles things remain in much the same condition, though it may be said that there is a little more movement. Trade is irregular, however, while some descriptions of goods, such as groceries, &c., are very active, and steadily enhancing in values; other departments continue considerably depressed, with comparatively little prospect of a very speedy improvement. The comparative receipts of flour and grain at four Lake ports from January 1st to September 1st, 1861, were:—At Chicago—Flour, 835,631; wheat, 8,703,795; corn, 17,899,480; oats, 1,006,211; rye, 283,079; barley, 345,215. At Toledo—Flour, 597,670; wheat, 2,460,914; corn, 3,074,167; oats, 35,334; rye, 15,619; barley, 5,022. At Milwaukee—Flour, 292,538; wheat, 6,839,942; corn, 80,134; oats, 71,859; rye, 56,201; barley, 21,775. At Detroit—Flour, 529,033; wheat, 774,843; corn, 579,340; oats, 150,551; rye, 9,938; barley, 16,382. Reducing flour to wheat, the receipts are equivalent in bushels:—At Chicago, 32,415,939 bushels; Toledo, 8,579,406 bushels; Milwaukee, 8,532,601 bushels; Detroit, 4,176,219 bushels—total, 53,704,161 bushels. The wheat crop has not turned out as good as was generally expected, though it is not yet known how the yield compares with that of last year. The money market remains in substantially the same position. There is comparatively little inquiry for accommodation, and first-class signatures continue scarce.

The following is a summary of the condition of the Banks in the three cities, as shown by their last week's statements:—

	Loans. dols	Deposits. dols
New York, Sept. 7	139,663,403	114,091,061

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the continued advance in the price of cotton at Liverpool, higher rates have been paid for yarns in the manufacturing districts, and at which a very large business has been transacted. Most other articles, however, have changed hands slowly, at about previous currencies. The demand for iron has not increased; but coals have sold readily, on rather higher terms.

MANCHESTER, Sept. 26.—Since Thursday last, this market has been mainly affected by Liverpool and London speculators, who have laid their hands on staple goods where these could be found at the very obvious disparity which has existed between the price of cotton and the manufactured article. Current buyers have accordingly also found it necessary to secure a portion in advance of their own wants. Prices have risen ¼d to ½d per lb on yarn, 3d to 6d per piece on shirtings, and ½d to 3d per piece on printing cloths. Domestics and T'cloths have had a large sale, and the coarser numbers of yarn which these require have been largely in demand. But the great variety of goods of less note remain only nominally higher, and not more easy of sale, and production continues to be reduced day by day.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—The wool market continues in much the same condition as last week. For bright-haired wools prices are very firm. For Down wools the price is hardly as firm as it was, and the business doing next to nothing. The yarn trade is unaltered in its main features both as to demand and price. Lustre yarns are very stiff in price, and a considerable quantity is being exported. Twofold yarns generally are quiet. There is a fair home trade doing. Pieces—The home houses continue busy, and the orders of fancy manufactures are not yet expired. Business otherwise has been somewhat dull.

LEEDS.—A moderate amount of business has been done. Though a fair bulk of heavy goods changed hands, perhaps fully one-half the purchases were of tweeds and ordinary cloths. The general tone of the trade is quiet, but healthy, and stocks are not so large as might be expected. Wools are steady in price. The flax trade, neither as as regards the raw material nor yarns, is very brisk, and the feeling of the trade rather inclines to flatness.

ROCHDALE.—The flannel trade has shown no signs of improvement, and a comparatively small amount of business has been done. Though the cold season is fast approaching, goods, both Lancashire and Yorkshire, are purchased but in small parcels. The advance in the price of cotton, and the progress of short time working in the cotton mills, have a prejudicial effect upon the flannel trade. Manufacturers, however, keep moderately well employed, and stocks in their hands are not very heavy. Wools keep very firm in price.

LEICESTER.—There continues a steady demand for hosiery goods, and, although the season is not an average one, business generally remains in a healthy condition. At Loughborough, Hinkley, and the adjacent country districts, trade is the turn more active, and both town and country operatives have met with more constant employment. The wool market is firm, recent prices being maintained. There is no important change in yarns, which are quite as dear, and spinners are well employed.

NOTTINGHAM.—There is rather more doing in the cotton branch of the lace trade. The French buyers who have been in the market have ordered samples of plain goods, and there has been more doing during the past few days in plain articles than for some time past. There is barely so much doing in silk lace. Some fair orders have been received for cotton Mechlin quillings. Stocks of all descriptions of goods are kept extremely low, and what is being produced is principally to order. In hosiery, the improvement noticed a short time ago continues, and there is every prospect of a further improvement. There is a rather better home demand, and some orders for export are also in the market. Yarns hold high, and have an upward tendency.

BELFAST.—Yarns—There is little of importance to note in this section of the trade. Exports to the markets across the Straits are not so inactive as they were earlier in the month. Flax—This week's turn-out of raw material has been much above that of the previous one. Prices are the turn firmer for all ranges of handscutched; these now rule at 6s to 7s 6d per stone; and for milled, 7s 6d to 12s 6d are the extreme rates of quotation. In the finer qualities of handscutched, rates are fully 6d a stone above recent quotations. Milled is steady; the tendency of the market for the upper lines has been towards greater firmness.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 0s, at the works; best bars, 8*l* 0s; sheets, 8*l* 10s; doubles, 10*l* 0s; nail sheets, 8*l* 0s; latten, 11*l* 10s; boiler plates, 8*l* 10s; best and best best in proportion; common rods, 7*l* 0s; hoops, 8*l* 0s; gas strip, 7*l* 10s; Canada plates, 11*l* 10s; and all other sorts in proportion. Second and third-class makers are selling below these rates.

BIRMINGHAM.—The preliminary meeting of the ironmasters of this district has been held. There was a numerous attendance of the trade. All present were of opinion that the trade is more active than it was three months ago, and in that spirit a resolution was unanimously passed to adhere to the old scale of prices: bars, 7*l*; hoops, 8*l*; sheets and plates, 8*l* 10s per ton.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 11.—The market for State and Western flour opened with much more favourable auspices. Yesterday there prevailed a steady fair demand throughout, and sales to a considerable extent were effected at late prices. Canada flour has been in better demand, though at somewhat lower rates. The sales aggregate 1,800 barrels, including 700 yesterday. Southern flour is steady and unchanged. The sales have been to only a moderate extent, comprising 2,800 barrels, including 850 barrels yesterday, at previous quotations.

EXPORT from 1st to 10th September.

	1861. barrels	1860. barrels
Wheat Flour	50,222	59,541

There was only a moderate inquiry for wheat on Saturday, but with increased receipts and a good demand for shipment, the the market assumed considerable firmness on Monday, when transactions were heavier than usual, and full prices were realised. The movements of flour and grain toward tide-water continue on an extensive scale, and the receipts are expected to be very heavy up to the close of navigation. The transactions during the three days have been tolerably heavy, but particularly yesterday, when a large amount was taken for export, chiefly to France. The total sales comprise about 487,000 bushels, of which about 222,000 changed owners yesterday. The demand for corn has been tolerably active, and full prices have for the most part been realised. The sales comprise 358,000 bushels, of which 123,000

changed hands yesterday, at 48c to 49½c for Western mixed, and 45c to 48c for unsound.

EXPORT from 1st to 10th September.

	1861. bushels	1860. bushels
Wheat	427,084	341,137
Corn	331,959	51,404

NEW YORK, Sept. 14.—The demand for State and Western flour has ruled active, and prices have advanced 5 to 10c per brl. Canada and Southern qualities have moved off freely, on higher terms. Wheat has been in good request, at 2c per bushel more money. In corn, a large business has been transacted, at extreme rates.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, from September 1, 1860 to September 1, 1861.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the leading markets have been seasonably well supplied with English wheat. For all kinds, the demand has ruled heavy, owing to a falling off in the inquiry for France, and prices have given way 1s to 2s per quarter. There has been less passing in foreign wheat than for some time past, and the quotations have had a drooping tendency. All descriptions of barley have found buyers to a fair extent, on former terms; whilst the sale for malt has continued firm. The supplies of oats having increased to some extent, the oat trade has been much less active, at drooping currencies. Beans and peas have moved off steadily; but the value of flour has been with difficulty supported.

On the Continent, wheat is selling at high rates; but buyers have operated with caution; hence, the business done has been only moderate. All spring corn has commanded extreme rates, with a fair export demand. The latest advices from New York state that increased quantities of wheat and flour were in progress of shipment to England and France, and that prices were well supported.

The new wheats continue to appear in very fine condition; but most accounts agree in stating that the yield is by no means a full average one. Barley, oats, beans, and peas, especially the two former articles, are turning out extremely well.

In Scotland, there has been much less activity in the demand for wheat and most other articles of produce, and, in some instances, prices have had a drooping tendency. Harvest work has progressed steadily.

In Ireland, the inquiry for wheat has been much restricted; nevertheless, no change of importance has taken place in the quotations. Barley and oats have commanded full prices; but other produce has met a dull inquiry.

At Mark lane, to-day, there was a fair supply of English wheat, for which the demand ruled heavy, at barely late rates. Foreign wheat sold slowly, on former terms. Barley was dull, and rather cheaper. In the value of oats, beans, and peas, no change took place; but the trade for them was in a sluggish state. Flour supported former prices.

Mr E. Rainford writes as follows with regard to the floating trade:—Up to last night 74 arrivals are reported since the 19th inst., comprising 31 cargoes of wheat, 31 maize, and 12 miscellaneous, viz.:—Wheat, 5 cargoes from Berdianski, 20 Taganrog, 2 New York, 2 Marianople, 1 Philadelphia, 1 Montreal; maize, 3 Odessa, 11 Sulina, 6 Galatz, 1 Saffi, 1 Ordu, 3 Ibraila, 2 Mazagan, 4 New York; rye, 2 Ismail, 1 Eupatoria; barley, 2 Odessa, 1 Galatz, 1 Ibraila, 1 Kellia; beans, 1 Larache, 2 Alexandria, 1 Casabianca. There has been a fair business in cargoes afloat since this day week, notwithstanding the present limited demand for the Continent. The following are the prices paid, varying according to quality and condition:—Wheat, for the United Kingdom, per 492 lbs, arrived, Taganrog Ghirka, 54s 3d, 53s 9d, 54s 6d, 54s, and (a portion discoloured) 53s; hard Taganrog, 48s 6d; Berdianski, 56s 3d and (not quite perfect) 55s 6d; for the Continent, Taganrog, supposed about 55s 6d; per 480 lbs, for the Continent, Saide, 43s. Rye, per 480 lbs, on passage, for the Continent, Taganrog, 36s 6d. Maize, for the United Kingdom, per 492 lbs, arrived, Galatz, slight dry warmth, 34s, 34s 3d, 35s, and a small cargo without the discharge-afloat clause, 36s; per 480 lbs, Ibraila, 33s 6d, 33s 7½d, 33s 9d; Wallachian, partly discoloured, 33s 3d; Bulgarian, 33s 7½d and 33s 9d. Barley, warm and partly discoloured, 22s 3d; on passage, Egyptian (for London), 27s, shipping, Scala Nova, 28s (delivered sound). Beans, per 480lbs; arrived, Egyptian, 32s 6d; Casabianca, 33s 6d.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Full rates to a slight advance were paid for some kinds at the commencement of the week, the grocers and refiners buying freely, but the market has since assumed a more quiet appearance. A good business has been done in West India. 730 casks various kinds by auction went as follows: Barbadoes, 33s to 43s; grainy, 42s to 43s 6d; Antigua and St Lucia, 33s 6d to 36s 6d per cwt. The deliveries last week amounted to 4,520 tons, against 5,650 tons landed; consequently the stock at the close increased to 90,015 tons. Last year at the same period it reached 72,850 tons. The Netherlands Trading Company's sales this week went off slightly above the rates current in July.

Mauritius.—1,915 bags sold as follows: crystallised, 42s to 44s 6d; grainy sorts, 37s 6d to 39s per cwt.

Madras.—5,955 bags were disposed of at the full valuations to a slight advance: grainy yellow, 42s 6d to 45s; soft greyish yellow, 41s to 41s 6d per cwt.

Bengal.—1,035 bags chiefly met with purchasers: fine Gurpatta date, 41s 6d per cwt; the remainder bought in above the value.

Foreign.—974 boxes Havana chiefly bought in at 35s to 41s 6d for brown to very good yellow. 482 casks 122 barrels Porto Rico: brown, 32s 6d to 35s; low greyish to very good yellow, 35s 6d to 43s 6d. 352 cases Bahia were held at 32s to 35s for brown, and 35s 6d to 37s for low

to low middling grey. 785 casks Cuba chiefly sold at extreme rates: brown, 32s 6d to 35s; low grey to bright grocery, 35s 6d to 41s 6d. A floating cargo of Havana has been sold for the United Kingdom, No. 8½, at 24s 6d; one of Cuba, at 23s; and one of Bahia for a near port, at 20s 10½d. A cargo of Porto Rico resold at 40s per cwt.

Refined.—The market is firm, and production keeps moderate. Low dry goods quoted 49s; crushed, 46s to 47s 6d; pieces, 41s to 45s per cwt.

MOLASSES.—Further sales have been effected in West India at the advance paid last week: good Cuba muscovado at 16s, and 375 casks Cossipore treacle, have also sold at about 16s per cwt.

MELADO.—Several parcels have sold since last Friday at 23s to 27s per cwt.

RUM.—Common kinds have been more inquired after. Leewards, 1s 7d to 1s 7½d. 200 casks Mauritius are reported at 1s 6½d per proof gallon. The home deliveries have fallen off materially this season, and the total stock now amounts to 32,320 puns 5,100 hhds, against 28,300 puns 4,450 hhds at the corresponding date of last year. A Government contract for 50,000 gallons is advertised for the 4th of October.

COCOA remains firm. 235 bags Trinidad, by auction, were principally bought in, being held for higher rates: grey, 50s to 55s; mixed low to good red, 56s 6d to 80s per cwt. Business is also doing by private contract. A Government contract for 200 tons is advertised for the 4th of October.

TEA.—The market remains very firm. At public sale, on Wednesday, 2,309 packages about half sold, and green teas realised late high rates The new season's congous (per Fiery Cross from Foo Chow) have been partly taken by the trade at 1s 9d to 2s 8d per lb.

COFFEE.—Although the public sales have been very large, there is no cessation of the active demand last noticed. Native Ceylon has risen about 1s to 1s 6d, and plantation 1s 6d to 2s in several instances. The market was perhaps less excited yesterday. 1,615 casks 420 barrels 350 bags plantation Ceylon chiefly sold at 72s to 84s 6d for fine fine ordinary to bold colour. 3,000 bags native: small berry to good, 65s 6d to 68s; fine, 69s 6d. 3,811 bags Costa Rica: pale to middling, 70s to 80s. 1,343 cases 295 casks 695 bags other E. I. only partly sold: palish to fine close made, 81s to 99s; Naidoobatum bought in as high as 100s. Low mixed brownish Java kind realised 61s 6d 62s 6d; palish Tellicherry, 71s. A few lots Jamaica brought 65s to 72s per cwt. By private contract, ordinary mixed Rio has sold at 53s per cwt.

RICE.—The sales have been moderate, and there is not the animated demand lately noticed, still quotations keep very firm. 5,998 bags Bengal, by auction, brought 11s 9d to 14s 6d for middling old grain to good bold white, Ballam being withdrawn at 10s 6d to 11s. Of 17,536 bags Necrancie Arracan, the bulk was taken in: new at 11s to 11s 6d; old at 10s 6d to 11s, a few lots of the latter being sold. Soft grain descriptions are rather quiet. Moderate transactions have taken place in white Bengal privately, and good Ballam has sold at 10s 3d; pinky Madras, 10s 9d per cwt. No floating cargoes reported.

IMPORTS and DELIVERIES of RICE to September 21, with STOCKS on hand.

SAGO FLOUR is in steady demand, at 16s to 16s 6d per cwt.

SAGO.—175 cases medium grain sold at 18s 6d to 19s per cwt.

SPICES.—613 bags Singapore white pepper sold at fully ½d to ⅝d advance: common to fine bold, 6d to 7½d. Black is firm, 4d being paid for good quality. Pimento steady: 250 bags realised 2¾d to 3d, one lot 3½d per lb. 123 barrels Jamaica ginger went at 55s to 170s, 37 casks 837 cases Cochin: small and broken to good, 50s to 84s per cwt; one lot 90s, being high prices for the better sorts.

SALTPETRE.—To effect sales of Bengal rather easier rates have again been accepted, fine selling at 34s. By auction, 1,775 bags about one-fourth part found purchasers: refraction 11¼, 32s 6d to 33s; 5¾ to 2⅝ bought in at 35s to 35s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to September 21, with STOCKS on hand.

DYESTUFFS.—Gambier, although firm, is not so much inquired after as of late. Bengal turmeric was bought in at 13s 6d. 4,415 bags Cutch sold well at 22s to 23s per cwt, the packages being in good condition.

COCHINEAL.—The public sales on Wednesday, comprising 867 bags, went off at 1d to 2d lower rates for the small quantity sold. Teneriffe silver, 2s 7d to 2s 9d; blacks, 2s 8d to 3s; Mexican silver, 2s 3d to 2s 4d per lb. The Honduras was mostly withdrawn.

SHELLAC.—Liver sorts at 9*l* 10s to 9*l* 12s 6d, and livery orange at 9*l* 17s 6d to 10*l* 5s per cwt, were sold on lower terms.

METALS.—There have been few features of interest to notice in th market this week. A large business is reported in spelter at 18*l* 10s to 18*l* 15s per ton. Straits tin sold at 117s cash, and Banca at 118s per cwt, but the demand is by no means active. Tin plates appear to be less pressed for sale. Copper remains firm. Scotch pig iron last sold at 50s 6d to 50s 7½d per ton for mixed numbers. Manufactured descriptions are dull.

HEMP.—Manilla is held for further enhanced rates, which checks business. Fair Sorsogon, 22*l* 10s to 23*l*. Russian in steady demand: clean Petersburg, 31*l* 10s.

HIDES.—101,000 East India sold rather irregularly: good at barely their former value, while common went rather dearer.

JUTE meets with buyers at full prices to 10s advance, and the market is firm. On Wednesday, 5,433 bales by auction went off at 12*l* 12s 6d to 21*l* for ordinary to fine quality. Some inquiry has been made privately.

LINSEED.—Floating cargoes of Azoff have sold at 58s. Calcutta to arrive quoted 57s 6d to 58s; on the spot, 60s; and Bombay, at 64s per quarter.

OILS.—There has been less excitement in the linseed oil market; the last price was 34s. Rape continues steady: foreign refined, 45s 6d to 46s. Cocoa-nut has sold freely at rather higher rates: Ceylon, 46s to 46s 6d; Cochin, 47s 3d to 47s 6d. Fine palm firmer, at 43s to 43s 6d per cwt. Sperm dull. Other fish oils unchanged in value. Stocks of olive are small, and prices still on the advance: Gallipoli, 59*l* to 60*l*; Mogadore, 55*l* per tun.

TURPENTINE.—500 barrels rough sold during the week at 18s, and 1,500 barrels American spirits at 59s to 63s. Present quotations for the latter, 61s to 62s per cwt.

TALLOW.—During the greater part of this week the market has been in a quiet state. Subsequently rather more inquiry sprung up, and quotations have risen 1s 3d to 1s 6d per cwt. First sort Petersburg Y.C., 48s 6d to 49s; the same for delivery to the end of the year; and 49s 6d for the first three months of next. Old Y.C. on the spot, 47s per cwt.

PARTICULARS OF TALLOW.—*Monday*, September 23.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was rather quiet, good qualities however maintaining their former prices. 4,303 Bengal, by auction, comprising Gurpatta date, were chiefly bought in above the value. 3,700 bags Mauritius, 401 bags native Madras, 556 bags Penang, 760 casks West Indies, 132 casks and 262 boxes Cuba, nearly all sold at full rates. The week's business in West India is 3,810 casks.

COFFEE.—612 casks 448 barrels and bags plantation Ceylon, 572 bags native, and 72 casks 37 cases Wynard plantation, realised full rates.

COCOA.—56 bags Grenada sold at 53s to 56s per cwt.

SALTPETRE.—280 bags Bengal, refraction 4¾, sold at 34s per cwt, 1,200 bags sold privately.

SPICES.—130 cases cassia lignea sold at 90s to 91s for 1st pile. 56 barrels Jamaica ginger realised 51s to 55s per cwt.

LIMA WOOD.—800 tons were bought in at 7*l* 15s to 9*l* 5s per ton.

OILS.—850 casks palm, by auction, sold at 39s to 44s 3d. 483 casks Cochin cocoa-nut brought 47s 6d to 49s.

TALLOW.—Y.C., 48s 6d to 48s 9d; for delivery in January to March, 49s 3d to 49s 6d. At auction, 52 cases 11 hhds Calcutta realised 44s 3d to 49s 6d; 132 casks North American, 46s to 48s; 69 casks Australian, 45s to 47s; 239 casks South American sold at 49s 6d, inferior, 43s per cwt, being 2s higher.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar remains steady; demand moderate. For export nothing doing. In Dutch crushed some few sales have been made in V.O. at a slight decline: the quantity too insignificant to quote.

GREEN FRUIT.—Market lively, and a good demand for all kinds. Lemons scarce: Lisbon advanced 3s per package. Some parcels Malaga, although wanting colour, sold by Keeling and Hunt at public sale, were taken freely by the trade. Lisbon grapes show want of condition; sound fruit is required, but difficult to obtain. Para nuts, as well as Barcelona, 2s per package higher. Foreign apples and pears continue to be shipped, and meet a ready sale from the deficiency of those of home growth.

DRY FRUIT.—A good inquiry exists for currants of all descriptions, and the trade are moving off large portions of their stocks. 40s is reported as refused for a small parcel of very fine old. 31s to 32s is the lowest quotation for low new, and 30s for rain-damaged. Valentias are very dull, and show evidences of a further decline, in face of the large supplies and almost forced sales of muscatels. Red raisins are expected in small lots next week. Figs come from Liverpool very slowly, and realise from 50s, 85s, and 100s, according to quality and size of package.

FLAX steady, but unaltered in price.

HEMP very firm, and prices advancing. 32*l* demanded for Petersburg clean, with very few selling thereat.

COTTON.—Sales of cotton, from Friday, 20th September, to Thursday, 26th September, inclusive:—9,600 bales Surat at 8¼d to 8⅝d for good fair to good sawginned Dharwar, at 7d to 8¼d for middling to fine sawginned Broach, at 6⅞d to 7¼d for good fair to good new Broach, at 6⅝d for fully fair to good fair new Dhollera, at 6⅝d to 7d for good fair to good new Oomrawatty, at 5⅝d to 6¼d for very middling to middling fair Oomrawatty, at 5⅝d to 6¼d for fair to good fair Compta; 2,500 bales Tinnevelly at 6⅝d to 7¼d for fair to good. An active and general demand has been experienced throughout the week, and an extensive business has been transacted, prices hardening daily, and the market closes with an upward tendency, at an advance of ¼d to ⅝d per lb on the better kinds of sawginned Dharwar, and ⅜d to ½d per lb on Broach, and on the other qualities of Surat about ¼d per lb; for Tinnevelly there has been a decidedly improved demand, and ⅝d per lb advance has been paid. There have been no transactions in Western Madras; on the spot they are now very scarce, and the quotations are advanced ¼d per lb. Sales for arrival:—700 bales Western Madras, guaranteed fair, at 5⅞d; 800 bales new Dhollera, guaranteed middling fair to fair, at 6⅝d. P.S.—Good market sales: 1,000 Surat at very full prices.

SILK.—The silk market continues without improvement, and, indeed, without any change to report.

TOBACCO.—A more active demand has existed for most descriptions, and sales to some extent have been effected at full quotations, both for home trade and exportation; for the latter, sales may be estimated at fully 300 hhds.

LEATHER AND HIDES.—The leather market continues inactive, the demand during the week, as well as at Leadenhall on Tuesday, having been on a limited scale. The supplies, however, are not large, and good tannages of English butts, 24 lbs and upwards, are scarce and in request. There is also inquiry for good crop hides 40 lbs and upwards, of which the supply is small. No change can be quoted in prices. At the public sale of foreign hides this week, the only alteration in prices was in Australian hides, which were ⅛d higher on the heavier weights, and ¼d on the lighter averages. In the East India kips there was scarcely so good a demand, but prices remain generally unaltered.

METALS.—Hardly any changes have been made in metal business during the week. Copper keeps quite firm at quotations. Iron is still flat in demand. Tin is just a shade easier to buy, and operations are very restricted. Spelter has rallied in price and demand, and closes firm. Lead has been in rather more inquiry. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	9
Fat by ditto	2	6½
Yellow Russian	50	0
Melted stuff	36	0
Rough ditto	20	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market dull with a downward tendency. The pig market is still as awkward as ever in Ireland, but eventually must come down. Friesland butter dearer, owing to a decrease in quantity: price from 116s to 118s. Jersey butter better in quality; an advance in the price, 106s to 108s. American butter coming in in large quantities; quality generally good.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 23.—The total imports of foreign stock into London, last week, amounted to 12,148 head. In the corresponding period in 1860, we received 11 522; in 1859, 9,893; in 1858, 6,503; in 1857, 6,323; in 1856, 7,877; and in 1855, 7,378 head.

There was a full average supply of foreign stock on offer in to-day's market. The beasts came to hand in very middling condition, but the quality of the sheep and calves was good. From our own grazing districts the arrivals of beasts fresh up were very large as to number, but somewhat deficient in quality. Prime Scots, crosses, Shorthorns, Herefords, and Devons were in good request at full prices, the top quotation being 4s 8d per 8lbs, but all inferior breeds moved off slowly at barely stationary currencies. The receipts from Lincolnshire, Leicestershire, and Northamptonshire amounted to 3,350 Shorhorns, &c.; from other parts of England, 400 various breeds; from Scotland, 27 Scots and crosses; and from Ireland, 700 oxen and heifers. There was a fair show of sheep; but at least a moiety of the supply was of middling quality. Prime Downs and half-breds were in good request at full prices, viz., from 5s to 5s 4d per 8lbs, but inferior breeds were a dull inquiry, at barely late rates. The lamb season is now over. We have to report a slow sale for calves; prices, however, were supported. The supply was only moderate.

SUPPLIES.

	Sept 24, 1860.	Sept 23, 1861.
Beasts	6120	6470
Sheep and lambs	26840	26340
Calves	385	294
Pigs	430	660

THURSDAY, Sept. 26.—Notwithstanding that the supply of beasts on offer in to-day's market was only moderate, the demand for all breeds ruled inactive, at Monday's currency. We were but moderately supplied with sheep; nevertheless the mutton trade was in a sluggish state, at about stationary prices. The best Downs and half-breeds sold at 5s 4d per 8 lbs. Calves—the supply of which was tolerably good—met a heavy sale, at a decline in the quotations of 2d per 8 lbs. There was a steady inquiry for pigs, at very full prices; but milch cows commanded very little attention.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	2	10	3	2	Prime Southdown sheep	5	0	5	4
Second quality ditto	3	4	3	6	Large coarse calves	3	4	3	10
Prime large oxen	3	8	4	2	Prime small ditto	4	0	4	6
Prime Scots, &c.	4	4	4	8	Large hogs	3	10	4	4
Coarse and inferior sheep	3	0	3	4	Small porkers	4	6	5	0
Second quality ditto	3	6	4	0	Suckling calves.....each	21	0	30	0
Prime coarse-woolled do.	4	2	4	10	Quarter old store pigs	21	0	30	0

Total supply—Beasts, 990; sheep and lambs, 8,440; calves, 315; pigs, 400.
Foreign supply—Beasts, 210; sheep 890; calves, 110.

NEWGATE AND LEADENHALL

FRIDAY, Sept. 27.—The supplies of meat are moderately good. Good and prime qualities command a steady sale at very full prices; otherwise the trade rules inactive at our quotations.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	2	8	3	2	Middling mutton	3	8	4	2
Middling ditto	3	4	3	6	Prime ditto	4	2	4	6

Large Pork	4	0	4	6	Lamb	0	0	0	0
Inferior mutton	3	0	3	6					

HOP MARKET.

BOROUGH, Monday, Sept. 23.—As the picking of the new growth progresses, the reported falling off in the yield becomes fully confirmed, and the duty has in consequence declined to 115,000*l*. The trade for New Wealds and Sussex is very active, and last week's currency is fully maintained. In the choicer sorts the demand is at present limited. Mid and East Kents, 200s, 273s; Weald of Kents, 170s, 200s; Sussex, 155s, 170s.

FRIDAY, Sept. 27.—New hops are in fair demand, at full prices; but other kinds move off slowly, on former terms. Duty, 110,000*l* to 120,000*l*. The imports of foreign hops, this week, have been considerable.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Monday, Sept. 23.—The arrivals of home-grown potatoes by land-carriage have somewhat increased; but the receipts by water are still very moderate. Generally speaking, the trade rules inactive at about previous prices. Scotch Regents, 80s to 90s; Kent and Essex ditto, 85s to 110s per ton.

FRIDAY, Sept. 27.—The supplies of potatoes are moderate, and the trade rules steady, at previous quotations.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 0s; clover ditto, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 14s per load. A slow demand.

CUMBERLAND.—Meadow hay, 2*l* 2s to 5*l* 0s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 16s per load. Trade dull.

WHITECHAPEL.—Meadow hay 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 6*l* 0s; and straw, 1*l* 8s to 1*l* 14s per load. Supply good.

COAL MARKET.

FRIDAY, Sept. 27.—Wall's-end;—Hetton 20s—Haswell 20s—Stewarts 20s—South Kelloe 19s 3d—Heugh Hall 18s 9d—Cassop 19s 3d—Eden 18s 9d—Shincliffe 18s—South Durham 18s—Harton 18s—Acorn Close 18s 9d—Framwellgate 18s 9d—Byron 18s—Holywell 15s 6d—Wylam 15s 6d—North Pelton 18s—Hastings Hartley 16s 6d. 82 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 27.—In low foreign a large amount of business has been done for export to the States for army purposes, at current rates, and the stocks of such descriptions are much reduced. Public sales of East India are announced to commence on the 8th of October. The quantity to be brought forward will be about 18,000 bales.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 27.—Market rather quiet, but steady, and prices of wheat and flour are a shade easier than on Tuesday; new oatmeal rather dearer; beans and peas unchanged. The demand for corn has somewhat subsided, and, with continued large arrivals, prices are rather easier.

METALS.

[FROM OUR OWN CORRESPONDENT.]

FRIDAY, Sept. 27.—There has been little or no change in the market for manufactured iron during the past week, and the demand generally has been only of a moderate character. Scotch pig iron is slightly lower. The present quotations for copper are firmly maintained, but transactions are very limited. Lead continues very inactive. The price of spelter has given way 5s to 10s per ton. Tin plates are much neglected.

The Gazette.

TUESDAY, Sept. 24.

BANKRUPTCIES ANNULLED.

W. G. Coombs, St Peter's hill, Doctors' commons, and Halifax, Nova Scotia, merchant.
J. Levy, Finsbury pavement, general dealer.
